'From: bgrubb@dante.nmsu.edu (GRUBB)\nSubject: Re: IDE vs SCSI\nOrganization: New Mexico State University, Las Cruces, NM\nLines: 44\nDistribution: world\nNNTP-Posting-Host: dante.nmsu.edu\n\nDXB132@psuvm.psu.edu writes:\n>In article <1qlbrlINN7rk@dns1.NMSU.Edu>, bgrubb@dante.nmsu.edu (GRUBB) says:\n>>In PC Magazine April 27, 1993:29 "Although SCSI is twice as fast as ESDI,\n>>20% faster than IDE, and support up to 7 devices its acceptance ...has \n>>long been stalled by incompatibility problems and installation headaches."\n\n>I love it when magazine writers make stupid statements like that re: \n\n>performance. Where do they get those numbers? I\'ll list the actual\n>performance ranges, which should convince anyone that such a \n\n>statement is absurd: \n\n>SCSI-I ranges from 0-5MB/s. \n\n>SCSI-II ranges from 0-40MB/s. \n\n>IDE ranges from 0-8.3MB/s.

\n>ESDI is always 1.25MB/s (although there are some non-standard versions)\n\nALL this shows is that YOU don\'t know much about SCSI.\n\nSCSI-1 {with a SCSI-1 controller chip} range is indeed 0-5MB/s\n\nand that is ALL you have right about SCSI\n\nSCSI-1 {With a SCSI-2 controller chip}: 4-6MB/s with 10MB/s burst {8-bit}\n\nNote the INCREASE in SPEED, the Mac Quadra uses this version of SCSI-1\n\nso it DOES exist. Some PC use this set up too.\n\nSCSI-2 {8-bit/SCSI-1 mode}: 4-6MB/s with 10MB/s burst\n\nSCSI-2 {16-bit/wide or fast mode}: 8-12MB/s with 20MB/s burst\n\nSCSI-2 {32-bit/wide AND fast}: 15-20MB/s with 40MB/s burst\n\nBy your OWN data the "Although SCSI is twice as fast as ESDI" is correct\n\nWith a SCSI-2 controller chip SCSI-1 can reach 10MB/s which is indeed\n\n"20% faster than IDE" {120% of 8.3 is 9.96}. ALL these SCSI facts have been\n\nposted to this newsgroup in my Mac & IBM info sheet {available by FTP on \n\nsumex-aim.stanford.edu (36.44.0.6) in the info-mac/report as \n\nmac-ibm-compare[version #].txt (It should be 173 but 161 may still be there)}\n\n\nPart of this problem is both Mac and IBM PC are inconsistent about what SCSI\n\nis which. Though it is WELL documented that the Quadra has a SCSI-2 chip\n\nan Apple salesperson said "it uses a fast SCSI-1 chip" {Not at a 6MB/s,\n\n10MB/s burst it does not. SCSI-1 is 5MB/s maximum synchronous and Quadra\n\nuses asynchronous SCSI which is SLOWER} It seems that Mac and IBM see\n\nSCSI-1 interface and think \'SCSI-1\' when it may be a SCSI-1 interface driven\n\nin the machine by a SCSI-2 controller chip in 8-bit mode {Which is MUCH\n\nFASTER than true SCSI-1 can go}.\n\n\nDon\'t slam an article because you don\'t understand what is going on.\n\nOne reference for the Quadra\'s SCSI-2 controller chip is \n\n(Digital Review, Oct 21, 1991 v8 n33 p8(1)).\n',

'From: dbm0000@tm0006.lerc.nasa.gov (David B. McKissock)\nSubject: Re: Space Station Redesign, JSC Alternative #4\nOrganization: NASA Lewis Research Center / Cleveland, Ohio\nLines: 102\nDistribution: world\nNNTP-Posting-Host: tm0006.lerc.nasa.gov\nNews-Software: VAX/VMS VNEWS 1.41\n\n\nIn article <1993Apr23.184732.1105@aio.jsc.nasa.gov>, kjenks@gothamcity.jsc.nasa.gov writes...\n\n{Description of "External Tank" option for SSF redesign deleted}\n\n>Mark proposed this design at Joe Shea's committee in Crystal City,\n>and he reports that he was warmly received. However, the rumors\n>I hear say that a design based on a wingless Space Shuttle Orbiter\n>seems more likely.\n\nYo Ken, let's keep on-top of things! Both the "External Tank" and\n"Wingless Orbiter" options have been deleted from the SSF redesign\noptions list. Today's (4/23) edition of the New York Times reports\nthat O'Connor told the panel that some redesign proposals have\nbeen dropped, such as using the "giant external fuel tanks used\nin launching space shuttles," and building a "station around\nan exist

ing space shuttle with its wings and tail removed."

Currently, there are three options being considered, as presented to the advisory panel meeting yesterday (and as reported in today's Times).

Option "A" - Low Cost Modular Approach

This option is being studied by a team from MSFC. {As an aside, there are SSF redesign teams at MSFC, JSC, and LaRC supporting the SRT (Station Redesign Team) in Crystal City. Both LeRC and Reston folks are also on-site at these locations, helping the respective teams with their redesign activities.}

Key features of this option are:

- Uses "Bus-1", a modular bus developed by Lockheed that is qualified for STS and ELV's. The bus provides propulsion, GN&C Communications, & Data Management. Lockheed developed this for the Air Force.
- A "Power Station Capability" is obtained in 3 Shuttle Flights. SSF Solar arrays are used to provide 20 kW of power. The vehicle flies in an "arrow mode" to optimize the microgravity environment.
- Shuttle/Spacelab missions would utilize the vehicle as a power source for 30 day missions.
- Human tended capability (as opposed to the old SSF sexist term of man-tended capability) is achieved by the addition of the US Common module. This is a modified version of the existing SSF Lab module (docking ports are added for the International Partners' labs, taking the place of the nodes on SSF). The Shuttle can be docked to the station for 60 day missions.
- The Orbiter would provide crew habitability & EVA capability.
- International Human Tended. Add the NASDA & ESA modules, and add another 20 kW of power.
- Permanent Human Presence Capability. Add a 3rd power module, the U.S. habitation module, and an ACRV (Assured Crew Return Vehicle).

Option "B" - Space Station Freedom Derived

The Option "B" team is based at LaRC, and is lead by Mike Griffin. This option looks a lot like the existing SSF design, which we have all come to know and love :)

This option assumes a lightweight external tank is available for use on all SSF assembly flights (so does option "A"). Also, the number of flights is computed for a 51.6 inclination orbit, for both options "A" and "B".

The build-up occurs in six phases:

- Initial Research Capability reached after 3 flights. Power is transferred from the vehicle to the Orbiter/Spacelab, when it visits.
- Man-Tended Capability (Griffin has not yet adopted non-sexist language) is achieved after 8 flights. The U.S. Lab is deployed, and 1 solar power module provides 20 kW of power.
- Permanent Human Presence Capability occurs after 10 flights, by keeping one Orbiter on-orbit to use as an ACRV (so sometimes there would be two Orbiters on-orbit - the ACRV, and the second one that comes up for Logistics & Re-supply).
- A "Two Fault Tolerance Capability" is achieved after 14 flights, with the addition of a 2nd power module, another thermal control system radiator, and more propulsion modules.
- After 20 flights, the Internationals are on-board. More power, the Habitation module, and an ACRV are added to finish the assembly in 24 flights.

Most of the systems currently on SSF are used as-is in this option, with the exception of the data management system, which has major changes.

Option C - Single Core Launch Station

This is the JSC lead option. Basically, you take a 23 ft diameter cylinder that's 92 ft long, slap 3 Space Shuttle Main Engines on the backside, put a nose cone on the top, attached it to a regular shuttle external tank and a regular set of solid rocket motors, and launch the can. Some key features are:

- Complete end-to-end ground integration and check out
- 4 tangentially mounted fixed solar panels
- body mounted radiators (which adds protection against micrometeoroid & orbital debris)
- 2 centerline docking ports (one on each end)
- 7 berthing ports
- a single pressurized volume, approximately 26,000 cubic feet (twice the volume of sk

'From: ab@nova.cc.purdue.edu (Allen B)\nSubject: Re: TIFF: philosophical significance of 42\nOrganization: Purdue University\nLines: 39\n\n\nIn article <prestonm.735400848@cs.man.ac.uk> prestonm@cs.man.ac.uk (Martin \nPreston) writes:\n\n> Why not use the PD C library for reading/writing TIFF files? It took me a\n> good 20 minutes to start using them in your own app.\n\nI certainly do use it whenever I have to do TIFF, and it usually works\nvery well. That's not my point. I'm >philosophically< opposed to it\nbecause of its complexity.\n\nThis complexity has led to some programs\' poor TIFF writers making\nsome very bizarre files, other programs\' inability to load TIFF\nimages (though they\'ll save them, of course), and a general\ninability to interchange images between different environments\ndespite the fact they all think they understand TIFF

.\n\nAs the saying goes, "It\'s not me I\'m worried about- it\'s all the\n>other< assholes out there!" I\'ve had big trouble with misuse and\nabuse of TIFF over the years, and I chalk it all up to the immense (and\nunnecessary) complexity of the format.\n\nIn the words of the TIFF 5.0 spec, Appendix G, page G-1 (capitalized\nemphasis mine):\n\n"The only problem with this sort of success is that TIFF was designed\nto be powerful and flexible, at the expense of simplicity. It takes a\nfair amount of effort to handle all the options currently defined in\nthis specification (PROBABLY NO APPLICATION DOES A COMPLETE JOB),\nand that is currently the only way you can be >sure< that you will be\nable to import any TIFF image, since there are so many\nimage-generating applications out there now." \n\n\nIf a program (or worse all applications) can\'t read >every< TIFF\nimage, that means there are some it won\'t- some that I might have to\ndeal with. Why would I want my images to be trapped in that format? I\ndon\'t and neither should anyone who agrees with my reasoning- not\nthat any one does, of course! :-)\n\nab\'n',

'From: CPKJP@vm.cc.latech.edu (Kevin Parker)\nSubject: Insurance Rates on Performance Cars SUMMARY\nOrganization: Louisiana Tech University\nLines: 244\nNTP-Posting-Host: vm.cc.latech.edu\nX-Newsreader: NNR/VM S_1.3.2\n\n I recently posted an article asking what kind of rates single, male\ndrivers under 25 yrs old were paying on performance cars. Here\'s a summary of\nthe replies I received.\n\n \n \n \n \n \n-----

-----\n\n \nI\'m not under 25 anymore (but is 27 close enough).\n\n \n1992 Dodge Stealth RT/Twin Turbo (300hp model).\n\nNo tickets, no accidents, own a house, have taken defensive driving 1,\nairbag, abs, security alarm, single.\n\n \n\$1500/year \$500 decut. State Farm Insurance (this includes the additional \$100\nfor the \$1,000,000 umbrella policy over my car and house) The base\npolicy is the standard \$100,000 - \$100,000 - \$300,000 policy required in DE.\n\n \nAfter 2nd defensive driving course it will be 5% less.\n\n \nI bought the car in September 1992. The company I was with (never had\nand accident or ticket in 11 years) quoted me \$2,500.\n\n \nHope this helps.\n\n \nSteve Flynn\nUniversity of Delaware\n=====

===== 45\n\n Kevin:\n\n \n (Hope I remembered your name correctly)... \n\n You asked about insurance for performance cars. Well, last year\n I was in a similar situation before I bought my car, and made the\n same inquiry as you.\n\n \n Age: 24 (then and now)\n Car: 1992 Eagle Talon TSi AWD\n Driving Record: Clean\n State: Illinois\n Cost: \$820/6 mos.\n\n \n I turn 25 in May and the insurance goes down to \$520/6 mos.\n Also, I\'m single and that incurs a higher rate with my company.\n\n \n I\'ve got a couple other friends w/ AWDs and they pay more\n than I do (different insurance companies also), so maybe I\'m just lucky.\n\n \n Hope the info helps.\n\n \n Dan\n [dans@jdc.gss.mot.com]\n Motorola Cellular Subscriber Group\n\n=====

===== 38\n\n US A\nCc:\n\n \nI\'m 23; live in Norman, Oklahoma; drive an \'89 Thunderbird SC; have\nnever made a claim against my insurance (though I have been hit\nseveral times by negligent drivers who couldn\'t see stop signs or\nwere fiddling with their radios); and I have had three moving violations\nin the last 18 months (one for going 85 in a 55; one for "failure to\nclear an intersection" (I still say the damn light was yellow); and\nnone for going 35 in a 25 (which didn\'t go on my record)). My rates\nfrom State Farm (with a passive restraint deduction) on liability,\n\$500 deductible comprehensive, and \$500 deductible collision are\nroughly \$1300/year. (I was paying just over \$1100/year for a \'92 Escort LX.)\n\n \n\t\t\t\t\tJames\n\n \nJames P. ===== 37\n1300 per year, 1992 Saturn SC, 21 Years old, State: New Mexic
 o,\nInsurance: State Farm.\n \n \n=====

===== 64\n \n \nHere is my info:\n \nCar :
 \ '89 Toyota Celica ST\nInsurance Co : Farmer\'s Insurance\nYearly insurance
 : \$2028\nAge : 24\nDate of license : Oct 14, 1992\nResidence
 : Mountain View, California\nNo moving violations (for now atleast ;-)\n \nHop
 e this helps. Please post a summary if possible.\n \nVijay\n*****
 *****\nVijay Anisetti\nEmail: a
 nisetti@informix.com Apt: (415)962-0320 Off: (415)926-6547\n=====

===== 38\nSingle, 24 year
 s old, Eagle Talon Turbo AWD, \$1200 (full-cover, reasonable\n liability)\nNo t
 ickets, No violations, No accidents... (knock on wood...)\nMass,\n \n \nOne thi
 ng that makes a HUGE difference in MASS is the town you live in.\nI\'m persona
 lly in one of the best towns within reasonable distance\nof Boston. If I move
 d to the absolute best it would go down to about\n\$1150, if I moved to the wor
 st it would be \$2000+..\n \n \nAlso one accident and a couple of tickets, would
 probably add another \$600...\n \n \n \nRV\n \n \n=====

===== 43\nI have a 1990 Mitsubishi eclips
 e turbo awd, am 23 years old and have no\ntickets that went on my record. I
 live in Illinois just outside of Chicago\nand pay \$1560 a year with full cover
 age at State Farm. I did get a small\ndiscount because of my alarm system(\$30
 a year). I only live 15 miles from\nChicago but if I actually lived in the ci
 ty the price would be about \$2000\na year.\n=====

===== 41\nI\'m over 25, but in case you\'re i
 nterested anyway, I\'m insuring a 93 SHO\nfor \$287/6 month. Thats 100k person
 al+300k total+100k property with\n250 deductible, glass and towing, State Farm
 .\n \n=====

39\n \nUnless you are under 20 or have been driving for less than 5\neyears, I
 think you are being seriously ripped off. I don\'t have\nnone of the performan
 ce cars you listed, but if your record is\nclean, then you should not be payin
 g over \$2K.\n \nDid you try calling all the insurance dealers you could find?\n
 Although rates are supposed to be standardized, I\'ve found that\nmost places
 I initially call, give me some ridiculously high\nquote and *finaly*, I hit on
 e that is much lower.\n \nAlso, I have changed insurance companies when the ra
 te went up at\nrenewal (no accidents, tickets, car gets older??) to maintain a
 low\nrate. You always have to be careful when it comes to insurance\ncompanies
 s 8^).\n \nGood luck,\nSerge\n',

'From: ritley@uimrl7.mrl.uiuc.edu ()\nSubject: SEEKING THERMOCOUPLE AMPLIFIE
 R CIRCUIT\nReply-To: ritley@uiucmrl.bitnet ()\nOrganization: Materials Researc
 h Lab\nLines: 17\n\n\nI would like to be able to amplify a voltage signal wh
 ich is\noutput from a thermocouple, preferably by a factor of\n100 or 1000 ---
 - so that the resulting voltage can be fed\nmore easily into a personal-comput
 er-based ADC data\nacquisition card.\n\nMight anyone be able to point me to re
 ferences to such\ncircuits? I have seen simple amplifier circuits before, but
 \nI am not sure how well they work in practice.\n\nIn this case, I\'d like som
 ething which will amplify sufficiently\n"nicely" to be used for thermocouples
 (say, a few degrees\naccuracy or better).\n\nAny pointers would be greatly app
 reciated!\n',

'From: abarden@tybsel.uucp (Ann Marie Barden)\nSubject: X-Terminal Config. f
 ile question\nOrganization: Tybrin Corporation, Shalimar, FL\nDistribution: us
 a\nLines: 19\n\n QUESTION:\n What is the EXACT entry (parameter and syntax p

lease), in the X-Terminal\nconfiguration file (loaded when the X-Terminal boots), to add another system \nto the TCP/IP access control list? \n\n BACKGROUND:\n I have two unix systems, 1. an AT&T 3B2 running X11R3 and MIT's X11R4 and \n2. a Sun SS10 without any X. \n I want to have a window to the Sun and the 3B2 on the NCD X-Terminal at the\nsame time. I can do this if I manually set the Network Parameter TCP/IP\nAccess Control List to off, then login to my telnet session. Not Great! \n I've tried to get "xhost" to work and failed. Either my syntax is wrong\nor the X11R3 implementation is bogus. \n I am trying to edit the NCD configuration file that is loaded when the \nNCD boots. No matter what entry I add or edit, the NCD still boots with\nthe TCP/IP Access Control list containing only the 3B2.\n My manuals are worthless so any help would be most appreciated!! Thanks!\n\nAnn Marie Barden \t\tabarden@afseo.eglin.af.mil\n',

'From: jonh@david.wheaton.edu (Jonathan Hayward)\nSubject: Re: Pantheism & Environmentalism\nOrganization: Wheaton College, IL\nLines: 46\n\n\nIn article <Apr.5.23.31.36.1993.23919@athos.rutgers.edu> by028@cleveland.freenet.edu (Gary V. Cavano) writes:\n>I\'m new to this group, and maybe this has been covered already,\n>but does anybody out there see the current emphasis on the\n>environment being turned (unintentionally, of course) into\n>pantheism?\n\n\nYes.\n\n\n(I am adamantly an environmentalist. I will not use styrofoam table service.\nPlease keep that in mind as you read this post - I do not wish to attack\nenvironmentalism)\n\n\nA half truth is at least as dangerous as a complete lie. A complete lie will\nrarely be readily accepted, while a half truth (the lie subtly hidden) is more\npowerfully offered by one who masquerades as an angel of light.\n\n\nSatan has (for some people) loosened the grip on treating the earth as something\nother than God\'s intricate handiwork, something other than that on which the\nhealth of future generations is based. It is being treated with respect. You\nthink he\'s going to happily leave it at that? No. When one error is rejected,\nthat is his style to push people to the opposite error. Therefore the earth is\nnot God\'s intricate handiwork, not because it is rubbish, but because it is\nGod. Mother earth is the one you are to primarily love and serve.\n\n\nI see two facets of a response to it:\n\n\n1: Care for the environment. Treat it with proper respect, both because it is\nGod\'s intricate handiwork and the health of future generation, and because\nshowing the facet of one who is disregarding of such things does not\nconstitute what the Apostle Paul called "becoming all things to all men so\nthat by all possible means I might save some." Don\'t say "Forget the environment, I\'ve got impo

rtant things to spend my time\n on." - putting your foot in your mouth in th
is manner will destroy your\n credibility in expressing the things that _are
_ more important.\n\n2: Show that it is not the ultimate entity, that it is cr
eature and not\n creator. Show that its beauty and glory points to a greate
r beauty and\n glory. Show that it is not the ultimate tapestry, but one of
many cords\n woven in the infinite tapestry.\n\n#####

'From: ebrandt@jarthur.claremont.edu (Eli Brandt)\nSubject: Re: Do we need the clipper for cheap security?\nOrganization: Harvey Mudd College, Claremont, CA 91711\nLines: 56\n\n\nIn article <1r466c\$an3@news.intercon.com> amanda@intercon.com (Amanda Walker) writes:\n>Agreed. Remember, I don't even think of Clipper as encryption in any real\n>sense--if I did, I'd probably be a lot more annoyed about it.\n\n\nI agree with this assessment. Furthermore, its promotion as\nproviding greater protection than bare voice is quite true, as far\nas it goes. However, the only way for it to fulfill its stated goal\nof letting LE wiretap "terrorists and drug dealers" is to restrict\nstronger techniques. \n

\nWiretap targets presently use strong encryption, weak encryption, or\n(the vast majority) no encryption. The latter two classes can be\ntapped. With weak encryption in every phone, the no-encryption\nclass is merged into the weak-encryption class. Will the\nintroduction of Clipper cause targets presently enjoying strong\nprivacy to give up on it? that is, to rely for privacy on a system\nexpressly designed to deny it to people like them? I doubt it. The\nmere introduction of this scheme will give the government *nothing*.\n\nThe stated goal of preventing the degradation of wiretapping\ncapabilities can be fulfilled by restriction of domestic\ncryptography, and only by this restriction. "Clipper" appears to be\nno more than a sop, given to the public to mute any complaints. We\nwould find this a grossly inadequate tradeoff, but I fear the public\nat large will not care. I hate to even mention gun control, but\nmost people seem to think that an `assault weapon` (as the NYT uses\nthe word) is some sort of automatic weapon, .50 caliber maybe. Who\nwants to have such a thing legal? Well, people know even less about\ncryptography; I suspect that strong cryptography could easily be\nlabeled "too much secrecy for law-abiding citizens to need".\n\n>That's not for Clinton (or anyone under him) to say, though. Only the\n>federal and supreme courts can say anything about the constitutionality.\n>Anything the administration or any governmental agency says is opinion at\n>best.\n\nWhat they say is opinion, but what they do is what matters, and will\ncontinue unless overturned. And the courts are reluctant to annul\nlaw or regulation, going to some length to decide cases on other\ngrounds. Furthermore, Congress can get away with quite a bit. They\ncould levy a burdensome tax; this would place enforcement in the\nhands of the BATF, who as we've seen you really don't want on your\ncase. They could invoke the Commerce Clause; this seems most\nlikely. This clause will get you anywhere these days. The 18th was\nrequired because the Supreme Court ruled a prohibitory statute\nunconstitutional. In 1970 Congress prohibited many drugs, with a\ntextual nod to the Commerce Clause. The Controlled Substances\nAct of 1970 still stands. I think the government could get away\nwith it.\n\n>Amanda Walker\n\n't PGP 2 key by finger or e-mail\n Eli ebrandt@jarthur.claremont.edu\n\n\n'

 xtra round.\n\n> - Speedloaders for a revolver allow reloads almost as fast as
 magazines\n> on semi-autos. Can be faster depending on users.\n\nQuite true.
 Speed loaders are a little less convenient to pack around\nthan magazines thou
 gh.\n\n> - A misfire in a semi-auto will require you to clear a jammed shell\n
 > first, time spent which can be fatal. And a vital second or so is often\n
 lost as you realize "hey, it\'s jammed!" before starting to do anything\n> a
 bout clearing it.\n\nTrue, but this is a training function.\n\n> - Most semi-a
 utos must have the slide worked to chamber the first round\n> and cock the h
 ammer. Some police carry their semi-autos with the\n> chamber loaded and ham
 mer cocked, but a safety engaged. I do not consider\n> this safe however. Yo
 u must trade-off safety to get the same speed\n> of employment as a revolver
 .\n\nCocked and locked for single actions or hammer down on double actions\nar
 e the only carry modes that make sense... The 80 series Colt\'s for\nexamp
 le are quite safe to carry this way.\n\n> - There are some double-action semi-aut
 os out there, but the complexity of\n> operation of many of them requires mo
 re training.\n\nAgreed.\n\nNow that I\'ve shot off my mouth a bit, let me back
 some of this up. It\nis true that a simple misfire on a revolver doesn\'t cos
 t you much. On\nthe other hand, I\'ve had all sorts of interesting things hap
 pen over the\nyears. For example, I\'ve had FACTORY ammunition that has had h
 igh\nprimers. A high primer will tie your revolver up somewhere from seconds\
 nto minutes while you try to pound the action open to clear the problem.\nAn a
 uto? Jack the slide and continue.\n\nI\'ve had bullets come out of the case,
 keeping the cylinder from\nturning, see clearing paragraph above. About the W
 ORST that can happen\nwith a semi auto is a double feed. This can be cleared
 in seconds.\n\nMost revolvers are more \'fragile\' than semi auto\'s. There a
 re all sorts\nof close tolerance parts and fitting involved. Dropping the gun
 , or a\nblow to the gun or all sorts of things can take it out of action. Man
 y\nof the problems that can be cured on the spot with a (quality) semi auto\nt
 ake a gun smith for a revolver. In short a revolver MAY be less likely\nto ma
 lfunction, but as a rule when it does, you\'re out of the fight.\n\nThe majority
 of malfunctions that occur with semi autos does not fall\ninto that category.\n
 Vincint makes many good points in this post, but leaves off the opposing\nv
 iew of most of them. A real good starting place is Ayoob\'s "The Semi\nAuto P

istol for Police and Self Defense."\\n\\nIn general, I\\'d agree, the revolver is an excellent first gun and self\\ndefense weapon for somebody that does not have the time, and inclination\\nthat is necessary for the training and practice needed to use a semi\\nauto effectively as a self defense arm.\\n\\nMost cops are notoriously indifferent to firearms. If the department\\nisn\\'t going to train them, they aren\\'t going to take the time on their\\nown. There is no doubt that training is an issue. The amount of\\ntraining required for effective use of a semi auto is probably several\\ntimes that of a revolver. Many cops don\\'t bother.\\n\\nFor myself, I\\'d hate to be limited to one or the other. I\\'d rather pick\\nwhat fits better with my personal inclination, what I\\'m wearing that day\\nand so on. Like the Moderator on rec.guns says, buy em all!\\n\\nThat said, I have to admit that often my advice to people thinking of\\nbuying their first defense arm is (right after taking a class) get a\\nRuger or Smith revolver. ... (Sorry Colt fans. Colt revolvers are ok\\ntoo!)\\n\\nIf this post had gone the other way, I\\'d be arguing for revolvers. :-)\\n\\nRick.\\n',

'From: (Sean Garrison)\\nSubject: Re: Bonilla\\nNntp-Posting-Host: berkeley-kstar-node.net.yale.edu\\nOrganization: Yale Univeristy\\nLines: 37\\n\\nIn article <1993Apr17.213553.2181@organpipe.uug.arizona.edu>,\\nkrueger@helium.gas.uug.arizona.edu (theodore r krueger) wrote:\\n\\n> Isn\\'t it funny that a white person calls someone a "nigger" and gets banned \\n> for a year, but a black person calls someone a "faggot" and there is no \\n> consequence?\\n\\n> Ted\\n\\n\\nTed, you\\'re missing a vital point. As Roger Lustig pointed out in a\\nprevious response, the reason why Schott was banned from baseball was\\nbecause she had been known to call and think in a racially biased manner on\\na constant basis. Such thoughts affected her hiring practices. Bonilla,\\non the other hand, was found to have mentioned this one word a single time.\\nIf he had been known to go around, criticizing homosexuals, it would be a\\ndifferent story. Furthermore, he is merely an athlete. He doesn\\'t have to\\nhire anyone as Schott had to do. Dave Pallone, the former NL umpire who is\\nan admitted homosexual, has decided to assist in a protest before a Mets\\ngame at Shea. He, like you, thinks that Bonilla should be suspended from\\nbaseball. Pallone is hoping for a year\\'s suspension. In my opinion,\\nthat\\'s downright ludicrous. As Howie Rose on WFAN said, if you start\\nsuspending athletes who have mentioned a derogatory word even a single time\\nunder whatever conditions, then you\\'d probably have enough people remaining\\nto play a three-on-three game. Now, honestly, if you truly analyze the\\ndifferences between the two cases that you bring up in your article, I\\nwould think that you\\'d reconsider your thoughts.\\n\\n\\n-Sean\\n\\n\\n\\n*****\\n "Behind the bag!"\\n - Vin Scully\\n*****\\n',

"From: paul@csd4.csd.uwm.edu (Paul R Krueger)\nSubject: Brewer bullpen rocke
d again...\nOrganization: Computing Services Division, University of Wisconsin
- Milwaukee\nLines: 30\nDistribution: world\nNNTP-Posting-Host: 129.89.7.4\nOriginator: paul@csd4.csd.uwm.edu\n\nFor the second straight game, California sc
ored a ton of late runs to crush\nthe Brewhas. It was six runs in the 8th for
a 12-5 win Monday and five in\nthe 8th and six in the 9th for a 12-2 win yeste
rday. Jamie Navarro pitched\nseven strong innings, but Orosco, Austin, Manzani
llo and Lloyd all took part\nin the mockery of a bullpen yesterday. How's this
for numbers? Maldonado has\npitched three scoreless innings and Navarro's ERA
is 0.75. The next lowest\non the staff is Wegman at 5.14. Ouch!\n\nIt doesn't
look much better for the hitters. Hamilton is batting .481, while\nThon is hit
ting .458 and has seven RBI. The next highest is three. The next\nbest hitter
is Jaha at .267 and then Vaughn, who has the team's only HR, at\n.238. Another
ouch. Looking at the stats, it's not hard to see why the team\nis 2-5. In fact
, 2-5 doesn't sound bad when you're averaging three runs/game\nand giving up 6
.6/game. \n\nStill, it's early and things will undoubtedly get better. The off
ense should\ncome around, but the bullpen is a major worry. Fetters, Plesac an
d Austin gave\nthe Brewers great middle relief last year. Lloyd, Maldonado, Ma
nzanillo, \nFetters, Austin and Orosco will have to pick up the pace for the t
eam to be\nsuccessful. Milwaukee won a number of games last year when middle r
elief either\nheld small leads or kept small deficits in place. The starters w
ill be okay,\nthe defense will be alright and the hitting will come around, bu
t the bullpen\nis a big question mark.\n\nIn other news, Nilsson and Doran wer
e reactivated yesterday, while William\nSuero was sent down and Tim McIntosh w
as picked up by Montreal. Today's game\nwith California was cancelled.\n\n--sa

'From: leech@cs.unc.edu (Jon Leech)\nSubject: Space FAQ 11/15 - Upcoming Planetary Probes\nSupersedes: <new_probes_730956574@cs.unc.edu>\nOrganization: University of North Carolina, Chapel Hill\nLines: 243\nDistribution: world\nExpires: 6 May 1993 20:00:01 GMT\nNNTP-Posting-Host: mahler.cs.unc.edu\nKeywords: Frequently Asked Questions\n\nArchive-name: space/new_probes\nLast-modified: \$Date: 93/04/01 14:39:17 \$\n\nUPCOMING PLANETARY PROBES - MISSIONS AND SCHEDULES\n\n Information on upcoming or currently active missions not mentioned below\n would be welcome. Sources: NASA fact sheets, Cassini Mission Design team, ISAS/NASDA launch schedules, press kits.\n\n\n ASUKA (ASTRO-D) - ISAS (Japan) X-ray astronomy satellite, launched into\n Earth orbit on 2/20/93. Equipped with large-area wide-wavelength (1-20\n Angstrom) X-ray telescope, X-ray CCD cameras, and imaging gas\n scintillation proportional counters.\n\n\n CASSINI - Saturn orbiter and Titan atmosphere probe. Cassini is a joint\n NASA/ESA project designed to accomplish an exploration of the Saturnian\n system with its Cassini Saturn Orbiter and Huygens Titan Probe. Cassini\n is scheduled for launch aboard a Titan IV/Centaur in October of 1997.\n After gravity assists of Venus, Earth and Jupiter in a VVEJGA\n trajectory, the spacecraft will arrive at Saturn in June of 2004. Upon\n arrival, the Cassini spacecraft performs several maneuvers to achieve an\n orbit around Saturn. Near the end of this initial orbit, the Huygens\n Probe separates from the Orbiter and descends through the atmosphere of\n Titan. The Orbiter relays the Probe data to Earth for about 3 hours\n while the Probe enters and traverses the cloudy atmosphere to the\n surface. After the completion of the Probe mission, the Orbiter\n continues touring the Saturnian system for three and a half years. Titan\n synchronous orbit trajectories will allow about 35 flybys of Titan and\n targeted flybys of Iapetus, Dione and Enceladus. The objectives of the\n mission are threefold: conduct detailed studies of Saturn's atmosphere,\n rings and magnetosphere; conduct close-up studies of Saturn's\n satellites, and characterize Titan's atmosphere and surface.\n\n One of the most intriguing aspects of Titan is the possibility that its\n surface may be covered in part with lakes of liquid hydrocarbons that\n result from photochemical processes in its upper atmosphere. These\n hydrocarbons condense to form a global smog layer and eventually rain\n down onto the surface. The Cassini orbiter will use onboard radar to\n peer through Titan's clouds and determine if there is liquid on the\n surface. Experiments aboard both the orbiter and the entry probe will\n investigate the chemical processes that produce this unique atmosphere.\n\n The Cassini mission is named for Jean Dominique Cassini (1625-1712), the\n first director of the Paris Observatory, who discovered several of\n Saturn's satellites and the major division in its rings. The Titan\n atmospheric entry probe is named for the Dutch physicist Christiaan\n Huygens (1629-1695), who discovered Titan and first described the true\n nature of Saturn's rings.\n\n\n\t Key Scheduled Dates for the Cassini Mission (VVEJGA Trajectory)\n\t -----
\t -----
\t 10/06/97 - Titan IV/Centaur Launch
\t 04/21/98 - Venus 1 Gravity Assist
\t 06/20/99 - Venus 2 Gravity Assist
\t 08/16/99 - Earth Gravity Assist
\t 12/30/00 - Jupiter Gravity Assist
\t 06/25/04 - Saturn Arrival
\t 01/09/05 - Titan Probe Release
\t 01/30/05 - Titan Probe Entry
\t 06/25/08 - End of Primary Mission
\t (Schedule last updated 7/22/92)\n\n\n GALILEO - Jupiter orbiter and atmosphere probe, in transit. Has returned\n the first resolved images of an asteroid, Gaspra, while in transit to\n Jupiter. Efforts to unfurl

the stuck High-Gain Antenna (HGA) have essentially been abandoned. JPL has developed a backup plan using data compression (JPEG-like for images, lossless compression for data from the other instruments) which should allow the mission to achieve approximately 70% of its original objectives.

Galileo Schedule -----

10/18/89 - Launch from Space Shuttle	02/09/90 - Venus Flyby	10/**/90 - Venus Data Playback
12/08/90 - 1st Earth Flyby	05/01/91 - High Gain Antenna Unfurled	07/91 - 06/92 - 1st Asteroid Belt Passage
10/29/91 - Asteroid Gaspra Flyby	12/08/92 - 2nd Earth Flyby	05/93 - 11/93 - 2nd Asteroid Belt Passage
08/28/93 - Asteroid Ida Flyby	07/02/95 - Probe Separation	07/09/95 - Orbiter Deflection Maneuver
12/95 - 10/97 - Orbital Tour of Jovian Moons	12/07/95 - Jupiter/Io Encounter	07/18/96 - Ganymede
09/28/96 - Ganymede	12/12/96 - Callisto	01/23/97 - Europa
02/28/97 - Ganymede	04/22/97 - Europa	05/31/97 - Europa
10/05/97 - Jupiter Magnetotail Exploration	HITEN - Japanese (ISAS) lunar probe launched 1/24/90. Has made multiple lunar flybys. Released Hagoromo, a smaller satellite, into lunar orbit. This mission made Japan the third nation to orbit a satellite around the Moon.	

MAGELLAN - Venus radar mapping mission. Has mapped almost the entire surface at high resolution. Currently (4/93) collecting a global gravity map.

MARS OBSERVER - Mars orbiter including 1.5 m/pixel resolution camera. Launched 9/25/92 on a Titan III/TOS booster. MO is currently (4/93) in transit to Mars, arriving on 8/24/93. Operations will start 11/93 for one martian year (687 days).

TOPEX/Poseidon - Joint US/French Earth observing satellite, launched 8/10/92 on an Ariane 4 booster. The primary objective of the TOPEX/POSEIDON project is to make precise and accurate global observations of the sea level for several years, substantially increasing understanding of global ocean dynamics. The satellite also will increase understanding of how heat is transported in the ocean.

ULYSSES- European Space Agency probe to study the Sun from an orbit over its poles. Launched in late 1990, it carries particles-and-fields experiments (such as magnetometer, ion and electron collectors for various energy ranges, plasma wave radio receivers, etc.) but no camera. Since no human-built rocket is hefty enough to send Ulysses far out of the ecliptic plane, it went to Jupiter instead, and stole energy from that planet by sliding over Jupiter's north pole in a gravity-assist maneuver in February 1992. This bent its path into a solar orbit tilted about 85 degrees to the ecliptic. It will pass over the Sun's south pole in the summer of 1993. Its aphelion is 5.2 AU, and, surprisingly, its perihelion is about 1.5 AU-- that's right, a solar-studies spacecraft that's always further from the Sun than the Earth is!

While in Jupiter's neighborhood, Ulysses studied the magnetic and radiation environment. For a short summary of these results, see *Science*, V. 257, p. 1487-1489 (11 September 1992). For gory technical detail, see the many articles in the same issue.

OTHER SPACE SCIENCE MISSIONS (note: this is based on a posting by Ron Baalke in 11/89, with ISAS/NASDA information contributed by Yoshiro Yamada (yamada@yscvax.ysc.go.jp)). I'm attempting to track changes based on updated shuttle manifests; corrections and updates are welcome.

1993 Missions

to ALEXIS [spring, Pegasus]

ALEXIS (Array of Low-Energy X-ray Imaging Sensors) is to perform a wide-field sky survey in the "soft" (low-energy) X-ray spectrum. It will scan the entire sky every six months to search for variations in soft-X-ray emission from sources such as white dwarfs, cataclysmic variable stars and flare stars. It will also search nearby spac

e for such exotic objects as isolated neutron stars and gamma-ray burst
 ers. ALEXIS is a project of Los Alamos National Laboratory and is prima
 rily a technology development mission that uses astrophysical sources t
 o demonstrate the technology. Contact project investigator Jeffrey J Bl
 och (jjb@beta.lanl.gov) for more information.

to Wind [Aug, Delta I
 I rocket] Satellite to measure solar wind input to magnetosphere.

to Space Radar Lab [Sep, STS-60 SRL-01] Gather radar images of Earth's
 surface.

to Total Ozone Mapping Spectrometer [Dec, Pegasus rocket] Study of
 Stratospheric ozone.

to SFU (Space Flyer Unit) [ISAS] Conducting space experiments and observations and this can be
 recovered after it conducts the various scientific and engineering experiments. SFU
 is to be launched by ISAS and retrieved by the U.S. Space Shuttle on ST
 S-68 in 1994.

1994 to Polar Auroral Plasma Physics [May, Delta II roc
 ket] June, measure solar wind and ions and gases surrounding the
 Earth.

to IML-2 (STS) [NASDA, Jul 1994 IML-02] International Microg
 ravity Laboratory.

to ADEOS [NASDA] Advanced Earth Observing Satell
 ite.

to MUSES-B (Mu Space Engineering Satellite-B) [ISAS] Conductin
 g research on the precise mechanism of space structure and in-space ast
 ronomical observations of electromagnetic waves.

1995 to LUNAR-A [ISAS]
 Elucidating the crust structure and thermal construction of the
 moon's interior.

Proposed Missions:

to Advanced X-ray Astronomy Fa
 cility (AXAF) Possible launch from shuttle in 1995, AXAF is a space
 observatory with a high resolution telescope. It would orbit for 15 yea
 rs and study the mysteries and fate of the universe.

to Earth Observing Sy
 stem (EOS) Possible launch in 1997, 1 of 6 US orbiting space platforms
 to provide long-term data (15 years) of Earth systems science in
 cluding planetary evolution.

to Mercury Observer Possible 1997 laun
 ch.

to Lunar Observer Possible 1997 launch, would be sent into a lo
 ng-term lunar orbit. The Observer, from 60 miles above the moon's pole
 s, would survey characteristics to provide a global context for the
 results from the Apollo program.

to Space Infrared Telescope Facility
 Possible launch by shuttle in 1999, this is the 4th element of the Grea
 t Observatories program. A free-flying observatory with a lifetime of 5
 to 10 years, it would observe new comets and other primitive bodies in
 the outer solar system, study cosmic birth formation of galaxies, stars
 and planets and distant infrared-emitting galaxies.

to Mars Rover Sa
 mple Return (MRSR) Robotics rover would return samples of Mars' atmo
 sphere and surface to Earth for analysis. Possible launch dates: 1996 for
 imaging orbiter, 2001 for rover.

to Fire and Ice Possible l
 aunch in 2001, will use a gravity assist flyby of Earth in 2003, and us
 e a final gravity assist from Jupiter in 2005, where the probe will spl
 it into its Fire and Ice components: The Fire probe will journey into t
 he Sun, taking measurements of our star's upper atmosphere until it is
 vaporized by the intense heat. The Ice probe will head out towards
 Pluto, reaching the tiny world for study by 2016.

EXE.)\n\nYou may assert whatever you wish.\n\n>Here we go with MUTLU.EXE\'s fa
med list of sources:\n\nDitto.\n\n: The attempt at genocide is justly regarded
as the first instance\n: of Genocide in the 20th Century acted upon an entire
people.\n: This event is incontrovertibly proven by historians, government\n:
and international political leaders, such as U.S. Ambassador Mark \n: Bristol,
...\n\n>(and on and on for 46 lines)\n\nAnd still anxiously awaiting...\n\n: .
.....so the list goes on and on and on.....\n: \n: >I\'m still trying to find
out about those Jews in LATVIA. Can you post those \n: >documents PLEEEEEEEAS
E, Mr. Argic? Puh-leeze could you? C\'mon, it\'s my\n: >birthday in three we
eks... post them for me as a birthday present.\n: \n: Remember, the issue at h
and is the cold-blooded genocide of 2.5 million \n: Muslim people by the Armen
ians between 1914-1920, and the Armenian-Nazi \n: collaboration during World W
ar II. Anything to add?\n\n>No, darling, READ what I post! Other people are a
sking you about the Turkish\n>genocide. I am asking you to produce the docume
nts on Jews in Latvia. No\n>matter how many times you erase what I post, I wi
ll still post the same\n>question. Post the documents on Jews in Latvia. Do
not autopost the same\n>block of text about the Turkish genocide. \n\nRemembe
r, the issue at hand is the Armenian-Nazi collaboration during \nWorld War II
and the Turkish Genocide. And I still fail to see how\nyou can challenge the f
ollowing western sources.\n\nSource: John Dewey: "The New Republic," Vol. 40,
Nov. 12, 1928, pp. 268-9.\n\n"Happy the minority [Jews] which has had no Chris
tian nation to protect it.\nAnd one recalls that the Jews took up their abode
in \'fanatic\' Turkey\nwhen they were expelled from Europe, especially Spain,
by Saintly Christians,\nand they have lived here for centuries in at least as
much tranquility and\nliberty as their fellow Turkish subjects, all being exp
osed alike to the\nrapacity of their common rulers. To one brought up, as mos
t Americans have \nbeen, in the Gladstonian and foreign-missionary tradition,
the condition of \nthe Jews in Turkey is almost a mathematical demonstration
that religious\nifferences have had an influence in the tragedy of Turkey on
ly as they\nwere combined with aspirations for a political separation which e
very \n nation in the world would have treated as treasonable. One readily \n
reaches the conclusion that the Jews in Turkey were fortunate..." \n\nHe also
stated that:\n\n"they [Armenians] traitorously turned Turkish cities over to t
he Russian \n invader; that they boasted of having raised an army of one hundr
ed and\n fifty thousand men to fight a civil war, and that they burned at leas
t\n a hundred Turkish villages and exterminated their population." \n\n: >I wan
t the documents of Jews in Latvia. I think several other\n: >people on soc.cu
lture.greek are already disputing with you about the Turkish\n: >Genocide.\n:
\n: Is this the joke of the month? Who, when, how, where? What a clown...\n\n>

No, sweetie, the joke of the month is that you have now posted the same block of text four times, but you still have not produced the documents on Jews in Latvia. Instead, you post the same text you post in every other message, that same old McCarthy table: (how appropriate it's named "McCarthy!")

How about Prof Shaw, a Jewish scholar?

Source: Stanford J. Shaw, on Armenian collaboration with invading Russian armies in 1914, "History of the Ottoman Empire and Modern Turkey (Volume II: Reform, Revolution & Republic: The Rise of Modern Turkey, 1808-1975)." (London, Cambridge University Press 1977). pp. 315-316.

"In April 1915 Dashnaks from Russian Armenia organized a revolt in the city of Van, whose 33,789 Armenians comprised 42.3 percent of the population, closest to an Armenian majority of any city in the Empire... Leaving Erivan on April 28, 1915, Armenian volunteers reached Van on May 14 and organized and carried out a general slaughter of the local Muslim population during the next two days while the small Ottoman garrison had to retreat to the southern side of the lake."

"Knowing their numbers would never justify their territorial ambitions, Armenians looked to Russia and Europe for the fulfillment of their aims. Armenian treachery in this regard culminated at the beginning of the First World War with the decision of the revolutionary organizations to refuse to serve their state, the Ottoman Empire, and to assist instead other invading Russian armies. Their hope was their participation in the Russian success would be rewarded with an independent Armenian state carved out of Ottoman territories. Armenian political leaders, army officers, and common soldiers began deserting in droves."

"With the Russian invasion of eastern Anatolia in 1914 at the beginning of World War I, the degree of Armenian collaboration with the Ottoman's enemy increased drastically. Ottoman supply lines were cut by guerilla attacks, Armenian revolutionaries armed Armenian civil populations, who in turn massacred the Muslim population of the province of Van in anticipation of expected arrival of the invading Russian armies."

Source: Stanford J. Shaw, "History of the Ottoman Empire and Modern Turkey," Vol II. Cambridge University Press, London, 1979, pp. 314-317.

"...Meanwhile, Czar Nicholas II himself came to the Caucasus to make final plans for cooperation with the Armenians against the Ottomans, with the president of the Armenian National Bureau in Tiflis declaring in response: 'From all countries Armenians are hurrying to enter the ranks of the glorious Russian Army, with their blood to serve the victory of Russian arms... Let the Russian flag wave freely over the Dardanelles and the Bosphorus. Let, with Your will, great Majesty, the peoples remaining under the Turkish yoke receive freedom. Let the Armenian people of Turkey who have suffered for the faith of Christ receive resurrection for a new free life under the protection of Russia.'

[155] Armenians again flooded into the czarist armies. Preparations were made to strike the Ottomans from the rear, and the czar returned to St. Petersburg confident that the day finally had come for him to reach Istanbul."

[155] Horizon, Tiflis, November 30, 1914, quoted by Hovannisian, "Road to Independence," p. 45; FO 2485, 2484/46942, 22083.

"Ottoman morale and military position in the east were seriously hurt, and the way was prepared for a new Russian push into eastern Anatolia, to be accompanied by an open Armenian revolt against the sultan."

[156] Hovannisian, "Road to Independence," pp. 45-47; Bayur, III/1, pp. 349-380; W.E.D. Allen and P. Muratoff, "Caucasian Battlefields," Cambridge, 1953, pp. 251-277; Ali Ihsan Sabis, "Harb Hahralaram," 2 vols., Ankara, 1951, II, 41-160; FO 2146 no. 70404; FO 2485; FO 2484, nos. 46942 and 22083.

"An Armenian state was organized at Van under Russian protection, and it appeared that with the Muslim natives dead or driven away, it might be able to maintain itself at one o

f the oldest centers of ancient Armenian civilization. An Armenian legion was organized 'to expel the Turks from the entire southern shore of the lake in preparation for a concerted Russian drive into the Bitlis vilayet.' [162] Thousands of Armenians from Mus and other major centers in the east began to flood into the new Armenian state... By mid-July there were as many as 250,000 Armenians crowded into the Van area, which before the crisis had housed and fed no more than 50,000 people, Muslim and non-Muslim alike. [163]" [162] Hovannisian, "Road to Independence," p. 56; FOP 2488, nos. 127223 and 58350. [163] BVA, Meclis-i Vukela Mazbatalari, debates of August 15-17, 1915; \nBabi-i Ali Evrak Odasi, no. 175, 321, "Van Ihtilali ve Katl-i Ami," \nZilkade 1333/10 September 1915. \n\n: Muslim population exterminated by the Armenians: \n\n>(31 lines deleted) \n\nWhy? \n\n: Who gives a thunder about your pseudo-scholar jokes? I 'am arguing about \n: the Armenian-Nazi collaboration during World War II. Any comment? \n\n>Argue it with someone else or do not reply to my posts, Argic my love. I \n\n>am not arguing about the Armenian-Nazi collaboration. I do not give a \n\n>thunder about it. I want you to do one of three things: \n\n>a) admit that you are not a regular user, but a computer autoposting Turkish \n\n>propaganda, or, \n\n>b) post the documents on Jews in Latvia, or, \n\n>c) run away, like the coward without a real address that you are, and do not \n\n>reply to my posts. \n\nIt could be, perhaps, your head wasn't screwed on just right. In 1941, \nwhile the Jews were being assembled for their doom in the Nazi concentration \ncamps, the Armenian volunteers in Germany formed the first Armenian \nbattalion to fight alongside the Nazis. In 1943, this battalion had \ngrown into eight battalions of 20,000-strong under the command of the \nformer guerrilla leader Dro (the butcher), who was the former dictator of the \nshort-lived Armenian Dictatorship (1918-1920) and the architect of the \ncold-blooded genocide of 2.5 million Turks and Kurds between 1914-1920. \n\nAn Armenian National Council was formed by the notorious Dashnak Party \nleaders in Berlin, which was recognized by the Nazis. Encouraged by \nthis, the Armenians summarily formed a provisional government that endorsed \nand espoused fully the principles of the Nazis and declared themselves as the \nmembers of the Aryan super race and full participants to Hitler's policy of \nextermination of the Jews. \n\nThis Armenian-Nazi conspiracy against the Jews during WWII was an "encore" \nperformance staged by the Armenians during WWI, when they back-stabbed and \nexterminated 2.5 million Turks by colluding with the invading Russian army. \n\nFurthermore, as McCarthy put it, the Armenian dictatorship was granted \na respite when the Ottomans admitted defeat and signed the Mudros \nArmistice with the Allies (October 30, 1918). The Allies had decided \nto create a Greater Armenia, including the old Russian province \nof Yerevan and adjoining areas, as well as most parts of Anatolia \nclaimed by the Armenian fanatics. Only the area called Cilicia \n(around the Ottoman province of Adana) was to be excluded, as it \nhad already been claimed by the French. The Allies quickly set \nabout attempting to disarm Ottoman soldiers and other Turks, who \ncould be expected to oppose their plans. \n\nOn April 19, 1919 the British Army occupied Kars, gave civilian \nand military power over to the Armenians, then withdrew. The British \nplanned for Kars to be included in the Armenian Dictatorship, even \nthough the Russian pre-war census had shown Kars Province to be over \n60% Muslim. The Turks of Kars were effectively disarmed, but the \nBritish could not disarm the Kurds of the mountains. The fate of \nthe Turks was almost an exact replica of what had occurred earlier \nin Eastern Anatolia. Murder, pillage, genocide and the destruction \nof Turkish homes and entire Turkish villages drove the Turks of \nKars to the mountains or south and west to the safety afforded \nby remaining units of the Ottoman Army. The British had left \nthe scene to the Armenian genoc

ide squads. Therefore, few \nEuropeans were present to observe the genocide. O ne British\nsoldier, Colonel Rawlinson, who was assigned to supervise the\nndis armament of Otoman soldiers, saw what was occurring. \n\nRawlinson wired to hi s superiors, \n\n" in the interest of humanity the Armenians should not be left in\n independent command of the Moslim population, as, their troops \n being w ithout discipline and not being under effective control,\n atrocities were con stantly being committed." \n\n>Instead, you post more Armenian nonsense:\n\nCome again?\n\n: "These European Dashnags, with headquarters in Berlin, appealed to...\n>(34 lines deleted)\n\nWhy?\n\n: No wonder you are in such a mess. Here are the Armenian sources on the\n: Turkish Holocaust.\n>(30+ lines deleted) \n\nWhy?\n\n>(list of dead Armenians, 100+ lines, deleted): \n\nO brother. Spell it out, "list of dead Muslims":\n\nSource: Documents: Volume I (1919).\n\n"Document No: 64," Archive No: 1/2, Cabin No: 109, Drawer \n No: 4, Fil e No: 359, Section No: 103(1435), Contents No: 3-20.\n (To Acting Supre me Command - Socialist Salah Cimcoz, Socialist \n Nesim Mazelyah)\n\n"Armenian gangs have been murdering and inflicting cruelties on\n innocent peopl e of the region. This verified information, supported\n by clear statements of reliable eyewitnesses, was also confirmed by\n General Odishelidje, Commander of the Russian Caucasian Army.\n\nArmenians are entering every place evacuate d by Russians carrying out\n murders, cruelties, rape and all kind of atrociti es which cannot be\n expressed in writing, murdering all the women, children, aged people\n who happen to be in the street. These barbarous murders repeated \n every day with new methods continue and the Russian Army has been urged\n t o intervene to terminate these atrocities. Public opinion is appalled\n and ho rrified. Newspapers are describing the happenings as shocking.\n We have decid ed to inform all our friends urgently about the situation." \n\n "Docume nt No: 65," Archive No: 4/3671, Cabin No: 163, Drawer \n No: 5, File No : 2947, Section No: 628, Contents No: 3-1, 3-3.\n (To Acting Supreme Co mmand - Commander, 3rd Army General)\n\n"The situation in the cities of Erzinc an and Erzurum which we have \n recently taken over is given below:\n\nThese two beautiful cities of our country which are alike in the\n calamities and de struction which they suffered, have been destroyed,\n as the specially designe d and built public and private buildings of\n these cities were deliberately b urnt by Armenians apart from the \n destruction suffered during the two-year R ussian occupation.\n\nAll barracks buildings of Erzincan, the cavalry barrack s in Erzurum,\n the Government building and Army Corps Headquarters are among those\n burnt. In short, both cities are burnt, destroyed and trees cut down.\n\nAs to the people of these cities:\n\nAll people old enough to use weapons rounded up, taken to the Sarikamis\n direction for road building and were slau ghtered. The remaining people,\n were subject to cruelties and murder by Armen ians following the \n withdrawal of Russians and were partly annihilated the c orpses thrown \n into wells, burnt in houses, mutilated by bayonets, their abd omens\n ripped open in slaughterhouses, their lungs and livers torn out, girls \n and women hung up by their hair, after all kinds of devilish acts.\n The fe w people who were able to survive these cruelties, worse than\n those of the \ 'Spanish Inquisition,\n are in poverty more dead than alive,\n horrified, some driven insane, about 1500 in Erzincan and 30,000 in\n Erzurum. The people are hungry and in poverty, for whatever they had\n has been taken away from them, their lands left uncultivated.\n\nThe people have just been able to exist wit h some provisions found in\n stores left over from the Russians. The villages round Erzincan and \n Erzurum are in the worst condition. Some villages on the road, have \n been leveled to the ground, leaving no stone, the people complet ely\n massacred.\n\nLet me submit to your information with deep grief and reg

ret that\n history has never before witnessed cruelties at such dimensions." \n

wrote:\n> \n> It is my understanding that it is generally agreed upon by the u
 lema\n> [Islamic scholars] that Islamic law applies only in an Islamic country
 ,\n> of which the UK is not. Furthermore, to take the law into one's own\n>
 hands is a criminal act, as these are matters for the state, not for\n> indivi
 duals. Nevertheless, Khomeini offered a cash prize for people to\n> take the
 law into their own hands -- something which, to my\n> understanding, is agains
 t Islamic law.\n\nYes, this is also my understanding of the majority of Islami
 c laws.\n\nHowever, I believe there are also certain legal rulings which, in all
 \nfive schools of law (4 sunni and 1 jaffari), can be levelled against\nmuslim
 or non-muslims, both within and outside dar-al-islam. I do\nnot know if apostas
 y (when accompanied by active, persistent, and\nopen hostility to Islam) fall
 s into this category of the law. I do know\nthat\nhistorically, apostasy has v
 ery rarely been punished at all, let alone\nby the death penalty.\n\nMy unders
 tanding is that Khomeini's ruling was not based on the\nlaw of apostasy (alon
 e). It was well known that Rushdie was an apostate\nlong before he wrote the o
 ffending novel and certainly there is no\nprecedent in the Qur'an, hadith, or
 in Islamic history for indiscriminantly\nlevelling death penalties for apostas
 y.\n\nI believe the charge levelled against Rushdie was that of "fasad". This\
 nruling applies both within and outside the domain of an\nIslamic state and it
 can be carried out by individuals. The reward was\nnot offered by Khomeini but
 by individuals within Iran.\n\n\n> Stuff deleted\n> Also, I think you are mudd
 ying the issue as you seem to assume that\n> Khomeini's fatwa was issued due
 to the distribution of the book. My\n> understanding is that Khomeini's fa
 twa was issued in response to the\n> writing and publishing of the book.
 If my view is correct, then\n> your viewpoint that Rushdie was sentenced for a
 "crime in progress" is\n> incorrect.\n> \nI would concur that the thrust of th
 e fatwa (from what I remember) was\nlevelled at the author and all those who a
 ssisted in the publication\nof the book. However, the charge of "fasad" can en
 compass a\nnumber of lesser charges. I remember that when diplomatic relations
 \nbroke off between Britain and Iran over the fatwa - Iran stressed that\nthe
 condemnation of the author, and the removal of the book from\ncirculation were
 two preliminary conditions for resolving the\n"crisis". But you are correct to
 point out that banning the book was not\nthe main thrust behind the fatwa. Isl
 amic charges such as fasad are\nlevelled at people, not books.\n\nThe Rushdie
 situation was followed in Iran for several months before the\nissuance of the
 fatwa. Rushdie went on a media blitz,\npresenting himself as a lone knight gua
 rding the sacred values of\nsecular democracy and mocking the foolish concerns
 of people\ncrazy enough to actually hold their religious beliefs as sacred. \n
 Fanning the flames and milking the controversy to boost\nhis image and push th
 e book, he was everywhere in the media. Then\nMuslim demonstrators in several
 countries were killed while\nprotesting against the book. Rushdie appeared mom
 entarily\nconcerned, then climbed back on his media horse to once again\nattac
 k the Muslims and defend his sacred rights. It was at this\npoint that the fat
 wa on "fasad" was issued.\n\nThe fatwa was levelled at the person of Rushdie -
 any actions of\nRushdie that feed the situation contribute to the legitimizati
 on of\nthe ruling. The book remains in circulation not by some independant\nwi
 ll of its own but by the will of the author and the publishers. The fatwa\naga
 inst the person of Rushdie encompasses his actions as well. The\ncrime was cer
 tainly a crime in progress (at many levels) and was being\nplayed out (and pla
 yed up) in the the full view of the media.\n\nP.S. I'm not sure about this bu
 t I think the charge of "shatim" also\napplies to Rushdie and may be encompass
 ed under the umbrella\nof the "fasad" ruling.\n',

"From: ebosco@us.oracle.com (Eric Bosco)\nSubject: Windows 3.1 keeps crashing  
g: Please HELP\nNntp-Posting-Host: monica.us.oracle.com\nReply-To: ebosco@us.o  
racle.com\nOrganization: Oracle Corp., Redwood Shores CA\nX-Disclaimer: This m  
essage was written by an unauthenticated user\n at Oracle Corpora  
tion. The opinions expressed are those\n of the user and not nec  
essarily those of Oracle.\nLines: 41\n\nAs the subjects says, Windows 3.1 ke  
eps crashing (givinh me GPF) on me of \nlate. It was never a very stable pac  
kage, but now it seems to crash every \nday. The worst part about it is that  
it does not crash consistently: ie I \ncan't reproduce crashes, and they are  
not always GPF's in the same \napplication. Sometimes I can recover by simply  
closing the application \nthat caused an error, but other times, windows acts  
very strange, and I \nneed to re-boot.\n\nSome background: I have a Leading  
Edge 486sx25 with Phoenix BIOS. When I \nfirst got it it had 4Mg of memory.  
It ran windows fine (not too many \nGPF's). Then, a couple of weekends ago,  
I installed Lotus 123 for windows \n(with ATM), a game card and an additional  
4 1Mg SIMMS. The Leading edge \nmachine is kind of strange, in that it has  
the IDE controler built into \nthe motherboard, the CPU is actually on a spar  
ate board that plugs into \nthe motherboard and the SIMMS it uses are Macinto  
sh SIMMS! Apparently I \nwas told that the Leading Edge had the parity bit bu  
ilt into the mother \nboard. The original 4Mg 80ns SIMMS where of the 2 chip  
variety from \nSAMSUNG, and the ones I installed are 8 chip SIMMS. They are r  
ecognized \nfine by the BIOS RAM check. The game card is a generic \$20 gameca  
rd.\n\nThe reason why I mention the hardware like this is that sometimes \nre  
booting the machine using the reset button or ctl-alt-del still leaves \nthe  
machine kind of flaky, but turning it on and off doesn't. \n\nI haven't tried  
taking out the RAM or the game card, because as I said \nthese GPF are not re  
producible at will. I have gone through and entire \nday using the computer  
with no problems and then I might get 5 or so GPF's \nin the sppace of 20 min  
utes?\n\nWhat can I do. This situation is most annoying... Are there any good  
\ndiagnostic tools for hardware? Do you think that this might be a software \nproblem (ie EMM386 etc.)? If it helps, i have manage to get GPF's on After \nDark, quicken, Paint shop pro. A lot of them have been in user.exe or \ngdi.  
exe.\n\nAny help is truly appreciated.....\n\n-Eric\n\nnebosco@us.oracle.com\n"

'From: ndallen@r-node.hub.org (Nigel Allen)\nSubject: Reserve officers say demographics ignored in nominations to close naval, marine reserve centers\nOrganization: R-node Public Access Unix - 1 416 249 5366\nLines: 53\n\nHere is a press release from the Reserve Officers Association.\n\nReserve Officers Say Demographics Ignored in Nominations to\n\nClose Naval, Marine Reserve Centers\n\nTo: National Desk, Defense Writer\nContact: Herbert M. Hart of the Reserve Officers Association of\n\nthe United States, 202-479-2258\n\n WASHINGTON, April 13 /U.S. Newswire/ -- The Reserve Officers\n\nAssociation of the United States has alerted the Defense Base\n\nRealignment and Closure Commission that the services failed to give\n\nsufficient weight to demographics in recommendations made to close\n\n56 Naval and Marine Corps Reserve centers.\n\nIn letters to the closure commission and to all 86 members of\n\nCongress with affected locations in their constituencies, including\n\nSen. Sam Nunn (D-Ga.), chairman of the Senate Armed Services\n\nCommittee, ROA charged that the developers of the Navy-Marine list\n\nignored demographics of the civilian population, particularly prior\n\nservice personnel.\n\nROA's executive director, Maj. Gen. Evan L. Hultman, AUS (Ret.),\n\nsuggested "concern that the only plausible alternative is that they\n\nare intentionally attempting to foreclose the Naval Reserve\n\ncomponents from maintaining even today's relatively low level of\n\nparticipation in their parent service's Total Force of the future."\n\nHe asked the commission "to remove from consideration all\n\nlocations without sufficient and convincing demographic data to\n\nwarrant approval of the requested action."\n\n"Only a few of the 56 Naval and Marine Corps Reserve\n\ninstallations on this list are large enough to have a significant\n\nimpact on the community, if closed," wrote Hultman. "The major\n\nissue is the cumulative impact of moving or closing such a large\n\npercentage of the existing locations."\n\nHultman reminded the commission, "The fact that the vast\n\nmajority of the Reserve installations on this list do not come\n\nclose to meeting the minimal requirements for consideration in this\n\nprocess certainly supports the thesis" that these actions are\n\nsimply an attempt to foreclose a substantial role for the Navy and\n\nMarine Corps Reserve.\n\nROA also noted "that at the end of the 1960s, when the number of\n\nNaval Reservists was approximately the same as today, there were 480\n\nNaval Reserve facilities. If the Navy recommendations are\n\napproved, there will be less than 200 Naval Reserve facilities."\n\nFacilities on the list include seven Naval Air Stations ranging\n\nfrom South Weymouth, Mass., to Alameda, Calif., 28 Naval\n\nReserve Centers in Macon, Ga., and Parkersburg, W.Va., to\n\nMissoula and Great Falls, Mont. Naval/Marine Corps Reserve\n\nCenters include four in San Francisco, Fort Wayne, Ind.,\n\nBillings, Mont., and Abilene, Texas.\n\nA major Marine Reserve Center on the list is that at El\n\nToro, Calif., plus six others.\n\n-30-\n\n-- \nNigel Allen, Toronto, Ontario, Canada ndallen@r-node.hub.org\n',

'From: shd2001@andy.bgsu.edu (Sherlette Dixon)\nSubject: Christianity & Atheism: an update\nOrganization: BGSU\nLines: 32\n\n\nFirst, I would like to thank all who sent me their opinions on the matter\nat hand. All advice was taken to heart, if not directly used. My friend\nfound out about the matter quite accidentally. After reading some of my\nmail, I quit from the mail reader & went about my business. I must have\ntrashed my mail improperly, because he got on the same terminal the next\nday & saw my old messages. He thought they were responses to a post he\nplaced in alt.atheism earlier that week, so he read some of them before\nrealizing that they were for me. I got a message from him the next day; he\napologized for reading my mail & said that he did not want to appear to be\na snoop. He said that he would be willing to talk to me about his views &\ndidn't mind doing so, especially with a friend. So we did. I neither\nchanged his mind nor did he change mine, as that was not the point. Now he\nknows where I'm coming from & now I know where he's coming from. And all\nthat I can do is pray for him, as I've always done.\n\n\nI believe the reason that he & I "click" instead of "bash" heads is because\nI see Christianity as a tool for revolution, & not a tool for maintaining\nthe status quo. To be quite blunt, I have more of a reason to reject God\nthan he does just by the fact that I am an African-American female. \nChristianity & religion have been used as tools to separate my people from\nthe true knowledge of our history & the wealth of our contributions to the\nworld society. The "kitchen of heaven" was all we had to look forward to\nduring the slave days, & this mentality & second-class status still exists\ntoday. I, too, have rejected\nan aspect of Christianity----that of the established church. Too much\nhypocrisy exists behind the walls of "God's house" beginning with the\nimages of a white Jesus to that of the members: praise God on Sunday &\nraise hell beginning Monday. God-willing, I will find a church home where\nI can feel comfortable & at-home, but I don't see it happening anytime\nsoon.\n\n\nSherlette\n',

'From: sera@zuma.UUCP (Serdar Argic)\nSubject: Cold-blooded slaughter of Muslim women and children by Armenians.\nReply-To: sera@zuma.UUCP (Serdar Argic)\nDistribution: world\nLines: 91\n\n\nIn article <1993Apr17.011112.27439@news.columbia.edu> lasner@watsun.cc.columbia.edu (Charles Lasner) writes:\n\n>Hmm. Maybe I'll go rent Midnight Express tonight. I haven't seen that\n>scene in awhile; I have to savor the moment all over again.\n\nWell, does it change the fact that during the period of 1914 to 1920, \nthe fascist x-Soviet Armenian G

overnment ordered, incited, assisted \nand participated in the genocide of 2.5 million Muslim people because \nof race, religion and national origin?\n\nAs i n the past in Turkiye, and today in Azerbaijan, for utopic and \nidiotic cause s the Armenians brought havoc to their neighbors. A \nshort-sighted and mispla ced nationalistic fervor with a wrong agenda \nand anachronistic methods the A rmenians continue to become pernicious \nfor the region. As usual, they will b e treated accordingly by their \nneighbors. Nagorno-Karabag is a mountainous e nclave that lies completely \nwithin Azerbaijan with no border or history what soever connected to \nx-Soviet Armenia. Besides the geographical aspect, Nagor no-Karabag is \nthe historic homeland and the \"cradle\" of the artistic and l iterary \nheritage of Azerbaijan, which renders the Armenian claims prepostero us, \neven lunatic. \n\nAnd we still demand:\n\n1. that the x-Soviet Armenian Government, as the heirs of the Armenian \ndictatorship, recognize the Turkish Genocide;\n\n2. that x-Soviet Armenia return the historic homeland to the Turk ish and\nKurdish people;\n\n3. that the x-Soviet Armenian Government make mate rial reparations for their\nheinous and unspeakable crime to the victims of th e Turkish Genocide;\n\n4. that all world governments officially recognize the Turkish Genocide \nand Turkish territorial rights and refuse to succumb to all Armenian \npolitical pressure.\n\nThe awareness of the Turkish people of the n ecessity of solidarity in the\nefforts to pursue the Turkish Cause is seen by the victims of the first \ngenocide of the 20th century as a positive step. \n\nNow what would you do? \n\nSource: \"The Sunday Times,\" 1 March 1992 (a Bri tish Weekly, written by \n Thomas Goltz, from Agdam, Azerbaijan.)\n\nARMENIAN SOLDIERS MASSACRE HUNDREDS OF FLEEING FAMILIES.\n\n The spiralling violence gripping the outer republics of the former\nSoviet Union gained new impetus yesterday with cold-blooded slaughter of\nhundreds of women and child ren in war-racked Nagorno-Karabakh.\n Survivors reported that Armenian so ldiers shot and bayoneted more\nthan 450 Azeris, many of them women and c hildren, who were fleeing an\nattack on their town. Hundreds, possibly tho usands, were missing and\nfeared dead.\n The attackers killed most of t he soldiers and volunteers defending\nthe women and children. They then tu rned their guns on the terrified\nrefugees. The few survivors later describ ed what happened: \"That's when\nthe real slaughter began,\" said Azer Hajie v, one of three soldiers to\nsurvive. \"The Armenians just shot and shot. A nd then they came in and\nstarted carving up people with their bayonets and k nives.\"\n \" They were shooting, shooting, shooting\", echoed Rasia Aslanova, who\narrived in Agdam with other women and children who made their way through \nArmenian lines. She said her husband, Kayun, and a son-in-law were killed\ni n front of her. Her daughter was still missing.\n One boy who arrived in Ag dam had an ear sliced off.\n\n The survivors said 2000 others, some of w hom had fled separately,\nwere still missing in the gruelling terrain; many c ould perish from their\nwounds or the cold.\n By late yesterday, 479 death s had been registered at the morgue in\nAgdam's morgue, and 29 bodies had been buried in the cemetery. Of the\nseven corpses I saw awaiting burial, two were children and three were\nwomen, one shot through the chest at point blank range.\n Agdam hospital was a scene of carnage and terror. Doctors said they\nhad 140 patients who escaped slaughter, most with bullet injuries o r deep\nstab wounds.\n Nor were they safe in Agdam. On friday night rockets fell on the city\nwhich has a population of 150,000, destroying several b uildings and\nkilling one person.\n\nSerdar Argic\n\n \"We closed the roads and mountain passes that \n m ight serve as ways of escape for the Turks \n and t hen proceeded in the work of extermination. \"\n

Often when some scumbag steals the cover, that means \n that they were or are looking to steal the bike. In my case, I\n had a faded cover stolen off a bmw R100RS that was stashed in an\n apartment carport and not visible from the street. They evidently\n decided the beemer was n't worth stealing, but did try the next night to\n steal a Honda Hurricane 600 parked in the next apartment building.\n A neighbor heard them wheeling it out and called the cops.\n\n\nI know this is just setting myself up, but this is actually one of the\nthings that is really good about BMW bikes. From all accounts I've\nheard practically no one steals BMWs. Probably it is similar for Moto\nGuzzis and other relative "exotics" since there isn't a large demand\nfor parts and the bike would be much easier to track down. It seems\nthat the most stolen bikes are Harleys and 600cc Jap sport bikes. \n\n--\nJonathan E.  'From: noring@netcom.com (Jon Noring)\nSubject: Quack-Quack (was Re: Candida  
 (yeast) Bloom, Fact or Fiction)\nOrganization: Netcom Online Communications Se  
 rvices (408-241-9760 login: guest)\nLines: 69\n\n\nIn article rind@enterprise.bi  
 h.harvard.edu (David Rind) writes:\n\n>Do you believe that any quacks exist?  
 How about quack diagnoses? Is\n>being a "licensed physician" enough to guaran  
 tee that someone is not\n>a quack, or is it just that even if a licensed physi  
 cian is a quack,\n>other people shouldn\'t say so? Can you give an example of  
 a\n>commonly diagnosed ailment that you think is a quack diagnosis,\n>or have  
 we gotten to the point in civilization where we no longer\n>need to worry abou  
 t unscrupulous "healers" taking advantage of\n>people.\n\n\nI would say there  
 are also significant numbers of unscrupulous doctors (of\nthe squeaky-clean, t  
 raditional crew-cut, talk to the AMA before starting\nany treatment, kind) who  
 recommend treatments that, though "accepted", may\nnot be necessary for the pa  
 tient at the time. And all for making a quick\nbuck. I would not be surprise  
 d if the cost of medical services in the U.S. is\nsignificantly inflated by th  
 ese "quacks of a different color". In fact, I\'d\nsay these doctors are the m  
 ost dangerous since they call into question the\ntrue focus of the medical pro  
 fession. The AMA and the Boards should focus\non these "quacks" instead of de  
 voting unbelievable energy on \'search-and-\ndestroy-missions\' to pull the li  
 censes of those doctors who are trying non-\ntraditional or not fully accepted  
 treatments for their desperate patients\nthat traditional/accepted medicine ca  
 nnot help.\n\n\n\*\*\*\*\*\nNow to ma  
 ke a general comment on many recent posts:\n\*\*\*\*\*  
 \*\*\*\*\*\n\nLately I\'ve seen the word "quack" bandied about reckles  
 ly. When a doctor or\ndoctor-wanna-be has decided to quit discussing any cont  
 roversial medical\nsubject in a civilized manner, all he/she has to do is say  
 "quack-quack" and\nsomehow they magically expect the readership of this newsgr  
 oup to roll over\non their backs and pee-pee on themselves in obedience. What  
 do they teach\nyou in medical school - how to throw your authority around?\n\n\nLet me put it another way to make my point clear: "quack" is a nebulous word\  
 n\nlacking in any precision. Its sole use is to obfuscate the issues at hand.\n  
 The indiscriminate use of this word is a sure sign of incompetency; and comin  
 g\nfrom any medical doctor (or wanna-be), where competency is expected, is rea  
 l\nscary.\n\n\nBut what do I know, I\'ve already been diagnosed by the sci.med.g  
 ods in this\nnewsgroup as being \'anal retentive\', and \'psychotic\'. I look  
 forward to more\nnet.diagnoses. Hey, they\'re free.\n\n\nJon "Quacks \'R Us"  
 Noring\n\n\n(p.s., may I suggest - seriously - that if the doctors and wanna-b  
 e-doctors on\nthe net who refuse to have an open mind on alternative treatment  
 s and\ntheories, such as the "yeast theory", should create your own moderated  
 group.\nYou can call it sci.med.traditional.moderated or sci.med.AMA-approved,  
 so you\ncan keep anal-retentives like me out of it.)\n\n\n-- \n\n\nCharter Member

'From: jbrown@batman.bmd.trw.com\nSubject: Re: Gulf War and Peace-niks\nLine  
s: 67\n\nIn article <1993Apr20.062328.19776@bmerh85.bnr.ca>, \ndgraham@bmers30  
.bnr.ca (Douglas Graham) writes:\n\n[...]\n> \n> Wait a minute. You said \*nev  
er\* play a Chamberlain. Since the US\n> \*is\* playing Chamberlain as far as Ea  
st Timor is concerned, wouldn't\n> that lead you to think that your argument  
is irrelevant and had nothing\n> to do with the Gulf War? Actually, I rather  
like your idea. Perhaps\n> the rest of the world should have bombed (or maybe  
missiled) Washington\n> when the US invaded Nicaragua, Grenada, Panama, Vietna  
m, Mexico, Hawaii,\n> or any number of other places.\n\nWait a minute, Doug.  
I know you are better informed than that. The US \nhas never invaded Nicaragu  
a (as far as I know). We liberated Grenada \nfrom the Cubans\ntto protect US c  
itizens there and to prevent the completion \nof a strategic air strip. Panam  
a we invaded, true (twice this century). \nVietnam? We were invited in by th  
e government of S. Vietnam. (I guess \nwe "invaded" Saudi Arabia during the G  
ulf War, eh?) Mexico? We have \ninvaded Mexico 2 or 3 times, once this centu  
ry, but there were no missiles \nfor anyone to shoot over here at that time.  
Hawaii? We liberated it from \nSpain.\n\nSo if you mean by the word "invaded"  
some sort of military action where\nwe cross someone's border, you are right  
5 out of 6. But normally\n"invaded" carries a connotation of attacking an aut  
onomous nation.\n(If some nation "invades" the U.S. Virgin Islands, would they  
be\ninvading the Virgin Islands or the U.S.?) So from this point of\nview, yo  
ur score falls to 2 out of 6 (Mexico, Panama).\n\n[...]\n> \n> What's a "peac  
e-nik"? Is that somebody who \*doesn't\* masturbate\n> over "Guns\n'\n'Ammo" or  
what? Is it supposed to be bad to be a peace-nik?\n\nNo, it's someone who be  
lieves in "peace-at-all-costs". In other words,\na person who would have supp  
orted giving Hitler not only Austria and\nCzechoslovakia, but Poland too if it c  
ould have averted the War. And one\nwho would allow Hitler to wipe all \*all\*  
Jews, slavs, and political \ndissidents in areas he controlled as long as he l  
eft the rest of us alone.\n\n"Is it supposed to be bad to be a peace-nik," you  
ask? Well, it depends\non what your values are. If you value life over liber  
ty, peace over\nfreedom, then I guess not. But if liberty and freedom mean mo  
re to you\nthan life itself; if you'd rather die fighting for liberty than li  
ve\nunder a tyrant's heel, then yes, it's "bad" to be a peace-nik.\n\nThe pr  
oblem with most peace-niks it they consider those of us who are\nnot like them  
to be "bad" and "unconscionable". I would not have any\nargument or problem w  
ith a peace-nik if they held to their ideals and\nstayed out of all conflicts  
or issues, especially those dealing with \nthe national defense. But no, they  
are not willing to allow us to\nlegitimately hold a different point-of-view.  
They militate and \nmany times resort to violence all in the name of peace. (  
What rank\nhypocrisy!) All to stop we "warmongers" who are willing to stand u  
p \nand defend our freedoms against tyrants, and who realize that to do\nso re  
quires a strong national defense.\n\nTime to get off the soapbox now. :)\n\n[...]\n> --\n> Doug Graham dgraham@bnr.ca My opinions are my ow  
n.\n\nRegards,\n\nJim B.\n',

es:\n>\n>(Amir Y Rosenblatt) writes\n> > Sam Zbib Writes\n> >>No one in his right mind would sell his freedom and dignity.\n> >>Palestinians are no exception. Perhaps you heard about\n> >>anti-trust in the business world.\n> >>\n> >>Since we are debating the legality of a commercial\n> >>transaction, we must use the laws governing the guidelines\n> >>and ethics of such transactions. Basic ANTI-TRUST law says\n> >>that, while you can purchase IBM stocks for the purpose of\n> >>investing, you can not acquire a large number of those\n> >>shares with the intent or controlling IBM. You can do so\n> >>only if you make your intentions CLEAR apriori . Clearly,\n> >>the Jews who purchased properties from palasteniens had some\n> >>designs, they were not buying a dwelling or a real estate.\n> >>They were establishing a bridgehead for the European Jews.\n> >>\n> >>The palasteniens sold their properties to the Jews in the\n> >>old tradition of arab hospitality. Being a multi-ethnic /\n> >>multi-religious society, accepting the jews as neighbours\n> >>was no different, just another religion. Plus they paid fair\n> >>market value, etc... They did not know they were victims of\n> >>an international conspiracy. (I\'m not a conspiracy theorist\n> >>myself, but this one is hard to dismiss).\n> >>\n> >>Right now, I\'m just going to address this point.\n>>When the Jewish National Fund bought most of its land,\n>>It didn\'t buy it from the Palestinians themselves, because,\n>>for the most part, they were tenant farmers (fallahin),\n>>living on land owned by wealthy Arabs in Syria and Lebanon.\n>>The JNF offered a premium deal, so the owners took advantage of\n>>it. It\'s called commerce. The owners, however, made no\n>>provisions for those who had worked for them, basically shafting\n>>them by selling the land right out from under them.\n>>They are to blame, not the Jews.\n>>\n>>\n>\n>Amir: \n>>Why would you categorize the sale of land as shafting? was\n>>it because it was sold to Jews? was it fair to assume that the\n>>fallahin would be mistreated by the jews? is this the norm of\n>>any commerce (read shafting) between arabs and jews? \n>\n>It was shafting on the part of the Arab land owners for doing it\n>>without notifying their tenant farmers and for not being responsible\n>>enough to make provisions for them, but rather just leaving\n>>them to their fate.\n>\n>Your claim that the Lebanese/Syrian Landlords sold Palestine\n>>(if true, even partially) omits the fact that the mandate\n>>treaty put Lebanon and Syria under French rule, while\n>>Palestine under british. Obviously, any such land lord\n>>would have found himself a foreigner in Palestine and would\n>>be motivated to sell, regardless of the price.\n>\n>The point is that the land was sold legally, often at prices\n>>above its actual value. It was legal, and good business for\n>>the sellers, though it left the Palestinians who worked the land\n>>in a poor situation. \n>\n>It is interesting though that you acknowledge that the\n>>palestinians were shafted. Do many Israelis or Jews share\n>>your opinion ? Do you absolve the purchaser from\n>>any ethical commitments just because it wasn\'t written down? \n>\n>I don\'t know if others share this opinion. It is mine,\n>>and I\'m sure there are some who agree and some who don\'t\n>\n>The way I see it, the fallahin were caught in circumstances\n>>beyond their control, in that since they didn\'t own the land,\n>>they didn\'t have a say. Of course, now for the sake of the\n>>"greater\n>>Arab unity" the Arabs are angry that the land was sold to the Jews\n>>(an act that is illegal in Jordan), but when it happened, it was just\n>>business. \n>\n>All told, I did not see an answer in your response. The\n>>question was whether the intent behind the purchase was\n>>aimed at controlling the public assets (land,\n>>infra-structure etc...). IMHO the Palestinians have grounds\n>>to contest the legality of the purchase, say in world court.\n>\n>Sam \n>\n>My opinions are my own and no one else\'s\n>\n>The purpose of buying the land was to provide space and jobs for\n>>Jewish immigrants.

From: leech@cs.unc.edu (Jon Leech) \nSubject: Space FAQ 09/15 - Mission Sched  
ules \nSupersedes: <schedule\_730956538@cs.unc.edu> \nOrganization: University o  
f North Carolina, Chapel Hill \nLines: 177 \nDistribution: world \nExpires: 6 May  
1993 19:59:07 GMT \nNNTP-Posting-Host: mahler.cs.unc.edu \nKeywords: Frequently  
Asked Questions \n\n\nArchive-name: space/schedule \nLast-modified: \$Date: 93/04/0  
1 14:39:23 \$\n\nSPACE SHUTTLE ANSWERS, LAUNCH SCHEDULES, TV COVERAGE \n\n SH  
UTTLE LAUNCHINGS AND LANDINGS; SCHEDULES AND HOW TO SEE THEM \n\n Shuttle op  
erations are discussed in the Usenet group sci.space.shuttle, \n and Ken Hol  
lis (gandalf@pro-electric.cts.com) posts a compressed version \n of the shut  
tle manifest (launch dates and other information) \n periodically there. The  
manifest is also available from the Ames SPACE \n archive in SPACE/FAQ/manif  
est. The portion of his manifest formerly \n included in this FAQ has been r  
emoved; please refer to his posting or \n the archived copy. For the most up  
to date information on upcoming \n missions, call (407) 867-INFO (867-4636)  
at Kennedy Space Center. \n\n\n Official NASA shuttle status reports are poste  
d to sci.space.news \n frequently. \n\n\n WHY DOES THE SHUTTLE ROLL JUST A  
FTER LIFTOFF? \n\n The following answer and translation are provided by Ken  
Jenks \n (kjenks@gothamcity.jsc.nasa.gov). \n\n The "Ascent Guidance and F  
light Control Training Manual," ASC G&C 2102, \n says: \n\n\n\t "During the vert  
ical rise phase, the launch pad attitude is \n\t commanded until an I-loaded V(r  
el) sufficient to assure launch tower \n\t clearance is achieved. Then, the tilt  
maneuver (roll program) \n\t orients the vehicle to a heads down attitude requir  
ed to generate a \n\t negative q-alpha, which in turn alleviates structural load  
ing. Other \n\t advantages with this attitude are performance gain, decreased ab  
ort \n\t maneuver complexity, improved S-band look angles, and crew view of \n\t the horizon. The tilt maneuver is also required to start gaining \n\t downrange v  
elocity to achieve the main engine cutoff (MECO) target \n\t in second stage." \n\n\n This really is a good answer, but it's couched in NASA jargon. I'll tr  
y \n to interpret. \n\n 1) \t We wait until the Shuttle clears the tower bef  
ore rolling. \n\n 2) \t Then, we roll the Shuttle around so that the angle of  
attack \n\t between the wind caused by passage through the atmosphere (the \n\t "r  
elative wind") and the chord of the wings (the imaginary line \n\t between the l  
eading edge and the trailing edge) is a slightly \n\t negative angle ("a negativ  
e q-alpha"). \t This causes a little bit of \n\t "downward" force (toward the bell  
y of the Orbiter, or the +Z \n\t direction) and this force "alleviates structur  
al loading." \n\t We have to be careful about those wings -- they're about the \n\t most "delicate" part of the vehicle. \n\n 3) \t The new attitude (after the  
roll) also allows us to carry more \n\t mass to orbit, or to achieve a higher or  
bit with the same mass, or \n\t to change the orbit to a higher or lower inclina  
tion than would be \n\t the case if we didn't roll ("performance gain"). \n\n 4) \t The new attitude allows the crew to fly a less complicated \n\t flight path  
if they had to execute one of the more dangerous abort \n\t maneuvers, the Retur  
n To Launch Site ("decreased abort maneuver \n\t complexity"). \n\n 5) \t The ne  
w attitude improves the ability for ground-based radio \n\t antennae to have a g  
ood line-of-sight signal with the S-band radio \n\t antennae on the Orbiter ("im  
proved S-band look angles"). \n\n 6) \t The new attitude allows the crew to se  
e the horizon, which is a \n\t helpful (but not mandatory) part of piloting any  
flying machine. \n\n 7) \t The new attitude orients the Shuttle so that the bo  
dy is \n\t more nearly parallel with the ground, and the nose to the east \n\t (us  
ually). This allows the thrust from the engines to add velocity \n\t in the cor  
rect direction to eventually achieve orbit. Remember: \n\t velocity is a vector

I was taught a long time ago\n>that Satan was really an angel of God and was kicked out of heaven\n>because he challenged God's authority. The problem is, I cannot\n>find this in the Bible. Is it in the Bible? If not, where did it\n>originate?\n\nI did a workshop on this for an episcopal student gathering a couple months ago because I wanted to know the answer too. As far as I could tell, although that story was never specifically told in the Bible, many references are made to it, primarily in the New Testament. In the Old Testament there is actually an entirely different view of Satan as a (excuse the pun) "devil's advocate" for Yahweh. See the Book of Job. Getting back to the fallen angel story, there are no references to "Lucifer" in the Bible except for a mistranslation of "the morning star" in the King James version (Isaiah 14:12), which probably referred to a Babylonian monarch much in the same way as "the sun king" referred to Louis XIV. Well, in all, I don't know where the story came from; it may have been rolling around for a long time, or Milton (Paradise Lost) may have invented it. Sorry for the sketchiness of the rest of this, but I am in a hurry and need to eat lunch! Feel free to email me about the other stuff I found out.... (although a lot of it is just the result of a Bible concordance program called "Quick Verse" -- it's really lousy, by the way -- don't buy it.)\n\n>Wondering,\n>Eddie\n>\_\_\_\_\_o\_\_\_\_\_| Western Kentucky University | \n> / / ) / / / ) / / ) | \_\_\_\_\_ | \n> / / \ ( ( ( / / / \ ( | EASTEEE@WKUVX1.BITNET | \n\nHope this helped!\n\nvera\nje cherche une ame, qui t t t of course I don't agree with\npourra m'aider t t t t mylene farmer's religious views; je suis t t t t ti just think they're interesting. \n'une generation desenchantee t t (vera noyes)\n- mylene farmer t t t noye@midway.uchicago.edu\n',

friend of mine has a trouble with her ears ringing. [etc.]  
 A. Folks, do we have an FAQ on tinnitus yet?  
 B. As a lo-o-o-ong time sufferer of tinnitus and as a neuroscientist who has looked over the literature carefully I believe the following are reasonable conclusions:  
 1. Millions of people suffer from chronic tinnitus.  
 2. The cause is not understood.  
 3. There is no accepted treatment that cures it.  
 4. Some experimental treatments may have helped some people a bit, but there have been no reports--even anecdotal--of massive good results with many of these experimental drugs.  
 5. Some people with chronic loud tinnitus use noise blocking to get to sleep.  
 6. Sudden onset loud tinnitus can be caused by injuries and sometimes abates or goes away after a few months.  
 7. Aspirin is well known to exacerbate tinnitus in some people.  
 8. There is a national association of tinnitus sufferers in the US.  
 9. One usually gets used to it. Especially when concentrating on something else the tinnitus becomes unnoticed.  
 10. Stress and lack of sleep make tinnitus more annoying, sometimes.  
 11. I'm sure those of us who have it wish there was a cure, but there is not.

 Yeah, the "Feingold Diet" is a load of crap. Children diagnosed with ADD who are placed on this diet show no improvement in their intellectual and social skills, which in fact continue to decline. Of course, the parents who are enthusiastic about this approach lap it up at the expense of their children's development. So much for the value of

"interesting anecdotal\n results". People will believe anything if they want to.\n\n -- \n Steve Dyer\n dyer@ursa-major.spdcc.com aka {ima,harvard,rayssd,linus,m2c}!spdcc!dyer\n\n\nThanks for all the interest in this problem of mine. I don't think it\nis a reaction to sugar or junk food per se since Kathryn has never shown\nany signs of hyperactivity or changes in behavior in response to food.\nShe has always been very calm and dare I say, a neat, smart kid.\n\nThe fact that this happened while eating two sugar coated cereals made\nby Kellogg's makes me think she might be having an allergic reaction to\nsomething in the coating or the cereals. Of the four of us in our\nimmediate family, Kathryn shows the least signs of the hay fever, running\nnose, itchy eyes, etc. but we have a lot of allergies in our family history\nincluding some weird food allergies - nuts, mushrooms. \n\nAnyway, our next trip is to an endocrinologist to check out the body\nchemistry. But so far, no more sugar coated cereals and no more seizures\nneither. Every day that goes by without one makes me heave a sigh of\nrelief. Thanks again.\n\n--\nSharon Paulson

All of us that argue about gyroscopes, etc., thoroughly understand\n>the technique of countersteering.\n\nIncluding all the ones who think that they countersteer all the way\nthrough a corner ??\n\n>The underlying physics are a\n>different matter, and need not be taught to beginners. \n\nAgreed!\n\n>Countersteering\n>(the technique), should be taught, for only with understanding of the\n>technique can one develop maximally effective emergency avoidance\n>maneuvers.\n\nThis is really the only thing we disagree on. Maybe we should agree to\ndisagree?? I still think that telling newbies to steer left to turn\nto the right is unnecessarily confusing, when they'll do it anyway if they\njust get on the bike and ride the damn thing.\n\n>2. \*I\* know exactly what's happening. It's those \*other\* gits that\n>haven't a clue! :^)\n\nMe too!!\n\n:-)\n\n>>Understanding the physics of traction is fine - but I cannot see how\n>>detailed theory like that has any place in a motorcycle training course.\n>>All you need to know is that maximum traction is obtained with the tyre\n>>\*just\* beginning to slide against the road.\n\n>Then we are in violent disagreement. While what you state is true, it\n>is insufficient to form a traction management policy. Available\n>traction increases with applied normal force, ie, traction available to\n>the front wheel increases as weight shifts under braking forces, and\n>correspondingly decreases at the rear. Thus, a \*technique\* of applying\n>both brakes, and easing off the rear and increasing pressure on the\n>front, can best be learned with a\n\nunderstanding of weight shift and\n>available traction.\n\nJeez, Ed, when you started talking about traction management policies I\nthought you were making some weird reference to looking after railway\nlocomotives...\n\nThe official line here (though I do have my doubts about it) is that the\nfront brake is applied first, followed by the rear brake, the idea being\nthat you avoid locking up the rear after weight transfer takes place. In\npractice I suspect most people do what you describe.\n\n>Saying, "brake until the tire just begins to slide" is next to useless\n>advice to a newbie. He has to go out and slide the tire to find out\n>where that is! It also gives him zero information from which to\n>develop a braking technique that changes as the braking and\n>corres

ponding weight shift develop.\n\nIf you don't slide the tyre, you have no way of knowing whether you've\nachieved maximum braking or not. I'm not suggesting that you should always\naim to brake as hard as you possibly can - but if you want to find the\nlimits of the machine, you have to go beyond them. \n\nIn any case, for maximum braking, if (as I suggested) you aim to keep\nboth wheels just on the point of sliding, then you'll be doing\nexactly as \*you\* suggest!!\n\n\n',

"From: guykuo@carson.u.washington.edu (Guy Kuo)\nSubject: Quadra 700 Memory Install FAQ\nOrganization: University of Washington\nLines: 69\nNNTP-Posting-Host: carson.u.washington.edu\nSummary: Instructions for Quadra 700 memory installation\nKeywords: memory,quadra,700,install\n\nThis is turning into a FAQ\n\nHere is how to violate your Quadra 700 warranty and install your own\nmemory.\n\n1) Insert usual disclaimer here\n\n2) Remove the top lid of the machine. You will see the floppy disk and\nhard drive mounted in a plastic tower. Follow the usual anti-static\nprecautions and of course make sure the machine is OFF when you do\nthis. Unplug the wall and monitor power supply cords from the back\nof the mac.\n\n3) Remove the power supply by pulling the plastic interlocking tab on the\ntower forward and simultaneously pulling the power supply straight up.\n\nThe tab is a piece of plastic from the left posterior aspect of the\ntower which extends downward to hook on to the power supply. You may\nalso feel a horseshoe shaped piece at the right portion of the power\nsupply. Leave that alone. The plastic tab from the tower is all you\nneed release.\n\n4) Look at the rear of the tower assembly. You will see the flat ribbon\nSCSI connector to the hard drive, a power cable and a flat ribbon cable\nleading to the floppy drive. Disconnect all these from the motherboard.\n\nThe hard drive power cable connector has a tab which must be squeezed\nto release it.\n\n5) Unplug the drive activity LED from its clear plastic mount\n\n6) Look down the posterior, cylindrical section of the plastic tower. A\nphillips head screw is at the base. Remove it, taking care not to drop\nit into the case. A bit of gummy glue on your screwdriver is helpful\nhere.\n\n7) Remove the tower assembly by pulling medially the plastic tab on the\nright side of the tower. This tab prevents the tower from sliding\nposteriorly. Slide the entire tower assembly 1 cm posteriorly then\nlift the tower assembly straight up and out of the case.\n\n8) Congratulations, you have now gained access to your machine's SIMM\nslots.\n\n9) The six big slots are for VRAM. One usually must install all six to\ngain useful video modes. All SIMMS (RAM or VRAM) installed with their\nchips facing the front of the motherboard.\n\nThe four smaller sockets in front are for RAM SIMMS. Install SIMMS in\nsets of four into these sockets. Be sure you seat the SIMMS squarely\nand firmly into a fully upright position.\n\n10) Reinstall the tower assembly by first placing the right wall of the\ntower against the right wall of the case with the tower assembly about\n1 cm posterior of its intended position. Lower the tower assembly into\nplace while maintaining contact with the right wall of the case.\n\nOnce fully down, slide the tower assembly anteriorly until it clicks\ninto place.\n\n11) Reconnect the motherboard ends of the cables. DONT'T FORGET THE FLOPPY\nDRIVE CABLE.\n\n12) Replace the phillips head screw\n\n13) Drop the power supply straight down into place until it clicks in.\n\n14) Plug the hard drive activity light back into its clear plastic mount\n\nGuy Kuo <guykuo@u.washington.edu>\n",

From: wagner@mala.bc.ca (TOM WAGNER, Wizzard of old Audio/Visual Equipment.
.....Nanaimo Campus)\nSubject: Re: Suggestions on Audio relays ???\nOrganiz
ation: Malaspina College\nLines: 63\n\nIn article <C5r60r.4ID@megatest.com>, a
lung@megatest.com (Aaron Lung) writes:\n> In article <C5qsBF.IEK@ms.uky.edu> b
illq@ms.uky.edu (Billy Quinn) writes:\n>>I built a little project using the ra
dio shack 5vdc relays to switch\n>>audio. I got pretty bad \'clicks\' when th
e thing switched. I was doing\n>>most of the common things one is supposed to
do when using relays and\n>>nothing seemed to get rid of the clicks.\n>>\n>>\n
>>My question is:\n>>\n>>\tIs there a good relay/relay circuit that I can use
for switching\n>>audio, so that there will be *NO* noise of any kind on the au
dio lines.\n>>\n>>\n>>I will appreciate any advice or references to advice. A
lso, exact part\n>>numbers/company names etc. for the relays will help!\n> \n>
Are you switching high level signals or low level signals like pre-amp\n> out
level signals? Also, are the clicks you mentioning the big\n> clack that happ
ens when it switches or are you refering to contact\n> bounce? How are you dr
iving the relays? TTL gate output? Switching\n> transistor? How are the rel
ays connected to what you are driving?\n> \n> Need more specifics to answer yo
ur question!! :-)\n\nAs a general rule, no relay will cleanly switch audio if
you try to tranfer\nthe circuit with the contacts. The noise you hear is due
to the momentary\nopening and closing of the path.\n\nThe noiseless way of tra
nsferring audio is to ground the circuit. In high\nimpedance audio circuits a
resistive "T" is constructed close to characteristic\nimpedance of the circuit
. Grounding the inputs (connected to the T) transfers\nthe audio.\n\nIn low i
mpedance circuits transformers are usually used, and the inputs are\nshorted o
ut or grounded. Secondaries are paralleled at the characteristic\nimpedance.\n
\nSometimes if it is necessary to actually switch audio, a second contact is
used\nto momentarily short the circuit output for the duration of the switchin
g time.\n\nTelephone relays are handy, because contacts can be adjusted to "Ma
ke before\nbreak and Vica Versa" but I haven\'t seen any of these for years.\n
\nNowadys switching is done electronically with OP amps, etc.\n\nA novel circu
it I used to build was a primitive "optical isolator".. It consists\nof a resi
stive photocell and a lamp, all packaged in a tube. When the lamp is\noff the
cell is high resistance. Turn the lamp on and the resistance lowers\npassing
the audio. Once again this device in a "T" switches the audio. Varying\nthe
lamp resistance give a remote volume control. Use 2 variable resisters and\ny
ou have a mixer!\n\nLots of luck!\n-- \n73, Tom\n=====

e evidence for my opinions? At the moment, there are just\n|> generalities I can cite. For example, I read that in the 20th century,\n|> the percentage of youth (and people in general) who suffer from\n|> depression has been steadily climbing in Western societies (probably\n|> what I was reading referred particularly to the USA). Similarly, one\n|> can detect a trend towards greater occurrence of sex outside of marriage\n|> in this century in Western societies -- particularly with the "sexual\n|> revolution" of the 60\'s, but even before that I think (otherwise the\n|> "sexual revolution" of the 60\'s would not have been possible),\n|> particularly with the gradual weakening of Christianity and consequently\n|> Christian moral teachings against sex outside of marriage. I propose\n|> that these two trends -- greater level of general depression in society\n|> (and other psychological problems) and greater sexual promiscuity -- are\n|> linked, with the latter being a prime cause of the former. I cannot\n|> provide any evidence beyond this at this stage, but the whole thesis\n|> seems very reasonable to me and I request that people ponder upon it.\n|> \n|> Fred Rice <-- a Muslim, giving his point of view.\n|> darice@yoyo.cc.monash.edu.au \n\nI think this is a big leap sex->depression. One example is myself, \nwhere no sex->depression :) But, seriously 1) promiscuity is on a decline, \ndepression is not and 2) it might be more reasonable to say \ndepression->promiscuity. I think depression is more likely to come\nfrom emotional problems (relationships, family, job, friends) and\npromiscuity is used as an escape.\nSince I see marriage as a civil and religious bond rather than an\nemotional bond, I don\'t see a problem with sex before (not outside of)\nmarriage so long as you have the same commitment and devotion as\nwhat is expected from a married couple. Of course, this is just \nmy opinion.\n\nBrian /-|-\n|>

d with the little purposes that we can manufacture for ourselves. Little in the cosmic sense.

Ah, in the cosmic sense.. but who lives in the cosmic sense? Not me! Cosmicly, we don't even exist for all practical purposes. I can hardly use the Cosmic Sense Of Stuff as a guide to life. It would just say: "don't bother."

Luckily for mortals, there are many senses of scale you can talk about. In a human sense, you can have big purposes.

Even the greatest of the great pharos are long gone, the pyramids historical oddities being worn down by the wind, eventually to be turned into dust.

But the influence of Aristotle, Confucious, Alexander, Ceasar and countless others is still with us, although their works have perished.

But they have changed to course of history, and while humanity exists, their deeds cannot be said to have come to nothing, even if they are utterly forgotten.

Mankind itself will one day perish. One day, surely. (well, unless you believe in the Second Coming, which I do not)

But in that time we can make a difference.

Without some interconnectedness that transcends the physical, without God, it is all pointless in the end.

In the end. But it must be the end; until then, there is all the point you can muster. And when that end comes, there will be nobody to ask, "Gee, I don't think James Sledd's deeds are gonna make much of a difference, ultimately, ya know?"

But they will have already have made a difference, great or small, before the end.

Why must your ends be eternal to be worthwhile?

Most people are able to live with that, and for them little purposes (success, money, power, effecting change, helping others) suffice.

Little is in the eye of the beholder, of course.

I suppose they never think about the cosmic scale, or are at least able to put it out of their minds.

I don't doubt it. But I have thought about the cosmic scale. And it does not seem to mean much to us, here, today.

To me, it is comforting to know that reality is an illusion.

I would not find this comforting. But perhaps it is merely my definitions. Here's what I think the relevant terms are:

"Reality" That which is real.

"Illusion" That which is not real, but seems to be.

"Real" Objectively Existing

For "reality" to be an "illusion" would mean, then:

That which is real is not real, but seems to be.

Or:

That which objectively exists, does not objectively exist, but does seem to objectively exist.

From which we can conclude, that unless you want to get a contradiction, that no things objectively exist.

But I have a problem with this because I would like to say that \*I\* objectively exist, if nothing else. Cogito Ergo Sum and all that.

Perhaps you do not mean all that, but rather mean: "Objective Reality is Unreachable by humans."

Which is not so bad, and so far as I know is true.

That the true reality underneath the the physical is spirit.

Have on. If reality is an illusion, isn't True Reality an illusion too? And if True Reality is spirit, doesn't that make Spirit an Illusion as well?

If I am not distinctly confused, this is getting positively Buddhist.

That this world is a school of sorts, where we learn and grow, and our souls mature.

That is one hell of a statement, although perhaps true.

Do you mean to imply that it was \*intended\* to be so? If so, please show that this is true. If not, please explain how this can give a purpose to anything.

That gives a purpose to my little purposes,

How does it do that?

Wouldn't the world=school w/ intent idea make the world a preparation for some \*greater\* purpose, rather than a purpose in itself.

and takes some of the pressure off.

What pressure?

It's not so necessary to make this life a success in human terms if you're really just here to learn.

It is not necessary to be a success in human terms, unless your goals either include doing so or require doing so before they themselves can be achieved.

Indeed, many people have set goals for them

le <1993Apr13.144030.28994@cbnewsh.cb.att.com>, seth@cbnewsh.cb.att.com (peter  
.r.clark..jr) writes:\n> \n> >So Roussel was giving up almost another goal a g  
ame while facing a proportional\n> >number of shots for the number of minutes  
he played, and while I have\'t\n> >actually checked I believe that he faced a  
lower quality of opponent.\n> \n> Make that less than half a goal a game. The  
lower quality of opponet\n> argument is immaterial as neither Roussel nor Sode  
rstrom had any say in\n> the matter. That was Dineen\'s decision.\n\n\nSo in ot  
her words, if Roussel shuts out the Sharks and Soderstrom shuts out\nthe Pengu  
ins, that\'s immaterial because it was the coaches decision? Come on,\nJoe, th  
ink about what you\'re saying! Who they played is VERY significant.\nWhy they  
played them is what\'s irrelevant. A low GAA against good teams\nis better tha  
n a low GAA against bad teams in the context of comparing two\nngoaltenders. A  
low GAA is better then a higher GAA. A low GAA against good\nteams is much, mu  
ch better than a higher GAA against bad teams in the context\nof comparing two  
goaltenders.\n\n\n> > The fact of the matter is that, despite last nights shutou  
t, he doesn\'t\n> > have what it takes. Last night was due to an inept Ranger  
team much more\n> > than Roussel\'s skill. A 3 on 1 and they don\'t get a shot  
away? A 2 on none\n> > and one guy just passes and stops, the other guy shoots  
into Roussel\'s pad?\n> \n> C\'mon, Pete? So the Rangers were inept. A shuto  
ut is a shutout. During\n> both of Soderstrom\'s masterpieces against Toronto  
, Mike Emerich was quoted\n> as saying he didn\'t think the Leafs had much off  
ensive firepower past their\n> first line. Does that make Soderstrom\'s shuto  
uts less impressive because of\n> Toronto\'s lack of offense?\n\n\nYES IT DOES!  
Absolutely. \*\*In the context of comparing two goaltenders\*\*.\nOf course, at th  
e end of the season 2 points is 2 points no matter how you\nget them. And on t  
he score sheets shutouts are shutouts. But if you\'re a\ncoach deciding betwee  
n two goalies, or a GM looking to make a trade, you\nhave got to look deeper t  
han the stat sheets. I didn\'t see the second Toronto\ngame, but the first one  
was a defensive masterpiece. There was nothing in\nthat game to judge Tommy So  
derstrom on because he wasn\'t tested. The same\nfor Roussel in the Ranger gam  
e. Two real scoring chances, one he made a\ngreat play, the other he was saved  
by a mistake from the other player. If\nyou were judging Roussel on that game  
alone, you have very little to go by.\n\n\nBut if you were to look at the 0-0 ti

e against the Habs, you saw a goalie stand on his head to get that shutout. That was a #1 goalie in action. Roussel doesn't have a game like that in him.

> Well if you look back to November when Roussel was the #1 goalie (Soderstrom was being treated for his heart ailment). The Flyers finished November at 6-3-1 and were 9-10-4 overall. And there's no way of knowing where the Flyers would have finished if Soderstrom wasn't wearing the orange black. I'm glad we don't have to find out anytime soon either because he is one hell of a player. I would take him over Roussel right now, but I still think Dom has what it takes to be the #1 guy. He outperformed Hextall enough during the '91-92 season to make Flyers management think that way too.

> Don't be so sure of that. FLYERS management never says bad thing about Roussel, but they don't say too much on the good side either. I've seen at least two interviews where every time Farwell was asked how happy he was to have two good goaltenders, it was Tommy this, Tommy that, and oh, yeah, Dom has played well too.

> By the way, what was the final card on Monday night? Team picture by any chance?

> FLYERS in the NHL Hall of Fame. Kinda dull, really. They handed out a team picture to everybody who walked in from Pizza Hut, but it was the same picture they sold in the programs in mid-season. Had names like Benning, Kasper...

> And how did the Flyers choose the fans who received "the shirts off our backs?" Winning Recchi's jersey after breaking the club's single season point record would have been nice. But knowing your luck you would have won Roussel's:-)

> Mostly random seat locations, some were given out by having certain autographs on the team photos. I don't like that method since I've seen guards help out people get things like Lindros pictures, surely if they got their hands on an autographed picture they'd hold 'em for their buddies.

 >>> This system would produce enough energy to drive the accelerator, perhaps with some left over. A very high power (100's of MW CW or quasi CW), very sharp proton beam would be required, but this appears achievable using a linear accelerator. The biggest question mark would be the lead target chemistry and the on-line processing of all the elements being incinerated.

>>> Paul, quite frankly I'll believe that this is really going to work on the typical trash one needs to process when I see them put a couple tons in one end and get (relatively) clean material out the other end, plus be able to run it off its own residual power. Sounds almost like perpetual motion, doesn't it?

> Fred, the honest thing to do would be to admit your criticism on scientific grounds was invalid, rather than pretend you were actually talking about engineering feasibility. Given your postings, I can't say I am surprised, though.

> Well, pardon me for trying to continue the discussion rather than just tugging my forelock in dismay at having not considered actually trying to recover the energy from this process (which is at least trying to go the 'right' way on the energy curve). Now, where did I put those sackcloth and ashes?

> [I was not and am not 'pretending' anything; I am so pleased you are not surprised, though.]

> No, it is nothing like perpetual motion. Note that I didn't say it was perpetual motion, or even that it sounded like perpetual motion; the phrase was "sounds almost like perpetual motion", which I, at least, consider a somewhat different proposition than the one you elect to criticize. Perhaps I should beg your pardon for being too precise in my use of language?

he physics is well understood; the energy comes from fission of actinides in subcritical assemblies. Folks have talked about spallation reactors since the 1950s. Pulsed spallation neutron sources are in use today as research tools. Accelerator design has been improving, particularly with superconducting accelerating cavities, which helps feasibility. Los Alamos has expertise in high current accelerators (LAMPF), so I believe they know what they are talking about. I will believe that this process comes even close to approaching technological and economic feasibility (given the mixed nature of the trash that will have to be run through it as opposed to the costs of separating things first and having a different 'run' for each actinide) when I see them dump a few tons in one end and pull (relatively) clean material out the other. Once the costs, technological risks, etc., are taken into account I still class this none with the idea of throwing waste into the sun. Sure, it's possible and the physics are well understood, but is it really a reasonable approach? And I still wonder at what sort of 'burning' rate you could get with something like this, as opposed to what kind of energy you would really recover as opposed to what it would cost to build and power with and without the energy recovery. Are we talking ounces, pounds, nor tons (grams, kilograms, or metric tons, for you SI fans) of material and are we talking days, weeks, months, or years (days, weeks, months or years, for you SI fans -- hmmm, still using a non-decimated time scale, I see ;-))?

The real reason why accelerator breeders or incinerators are not being built is that there is not any reason to do so. Natural uranium is still too cheap, and geological disposal of actinides looks technically reasonable.

'From: aa888@freenet.carleton.ca (Mark Baker)\nSubject: Re: The arrogance of Christians\nReply-To: aa888@freenet.carleton.ca (Mark Baker)\nOrganization: The National Capital Freenet\nLines: 106\n\nTo what follows, our moderator has already answered the charge of arrogance more ably than I could have done so, so I will confine myself to answering the charge of illogic.\n\nIn a previous article, Eugene.Bigelow@ebay.sun.com (Geno) says:\n\n>>If I don't think my belief is right and everyone else's belief is wrong,\n>>then I don't have a belief. This is simply what belief means.\n\n>>Unfortunately, this seems to be how Christians are taught to think when it comes to their religion. \n\nThis is how everyone in the western intellectual tradition is, or was, taught to think. It is the fundamental premise "A is not not-A". If a thing is true then its converse is necessarily false. Without this basic assumption theology and science as we know them are alike impossible. We should distinguish the strong and weak meanings of the word "believe", however. The weak sense means I am not sure. "I believe Tom went to the library." (but he could have gone to the track). The strong sense means I am so certain that I use it as a basis of thought. "I believe that nature operates according to certain fundamental laws." (despite the fact that nature \*appears\* capricious and unpredictable). Christian belief is of the strong kind. (Though Christians may well hold beliefs of the weak kind on any number of theological and ecclesiological topics.)\n\nSome take it to the extreme and say that their religion is the ONLY one and if you don't accept their teachings then you won't be "saved".\n\nNote that these are two separate ideas. Most hold the first view, but the majority do not hold the second. It is again a matter of pure logic that if Christianity is true, then Hinduism (for example) must necessarily be false,

insofar as it contradicts or is incompatible with, Christianity. (And, as a matter of \*logic\*, vice versa.)

It takes quite a bit of arrogance to claim to know what God thinks/wants. It is arrogant to claim to know what \*anyone\* thinks or wants, unless they have told you. Christians believe God has told us what he thinks and wants. Especially when it's based upon your interpretation of a book. Most Christians do not base their belief on the Bible, but on the living tradition of the Church established by Christ and guided constantly by the Holy Spirit. The Bible is simply the written core of that tradition. The logic in the above statement is faulty in that it assumes two people with differing beliefs can't both be correct. If depends what you mean by differing. If I believe Tom is six feet tall and you believe he weighs 200 pounds, our beliefs differ, but we may both be right. If I believe Tom is six feet tall and you believe that he is four foot nine, one of us, at least, must be wrong.

It's all about perception. No two people are exactly alike. No two people perceive everything in the same way. I believe that there is one truth. Call it God's truth, a universal truth, or call it what you will. I don't believe God presents this truth. I think it is just there and it's up to you to look for and see it, through prayer, meditation, inspiration, dreams or whatever. Just because people may perceive this truth differently, it doesn't mean one is wrong and the other is right. Thus you believe that there is a single truth but that no human being can find it. You assert that anyone who believes that we can find absolute truth is mistaken. In short, you believe that anyone who does not share your belief on this point is wrong. QED.

As an example, take the question, "Is the glass half empty or half full"? You can have two different answers which are contradictory and yet both are correct. So, for your belief to be true, does not require everyone else's belief to be wrong.

Here I begin to suspect that your real difficulty is not with the knowability of truth, but simply with language. Saying that the glass is half empty is not a contradiction of the statement that it is half full: it is the same fact expressed in different words. (The whole point of this phrase is to illustrate the different ways the pessimist and the optimist express the \*same\* fact.)

It is, of course, quite true that different people may express the same belief in different words. It is also true that they may fail to understand each other's words as expressions of the same belief and may argue bitterly and believe that they are miles apart. Great schisms have occurred in just this way, and much ecumenical work has been done simply in resolving differences in language which conceal agreement in belief. This does not mean, in any sense, that all beliefs are equally valid. Since some of the beliefs people hold contradict some other beliefs that other people hold, after all obfuscations of language and culture in the expression of those beliefs have been stripped away, some of the beliefs that some people hold must, necessarily, be false, and it is neither arrogant nor illogical to say so. If I believe X and you believe Y we may both be correct, but if Y is equivalent to not-X then one of us is wrong and as long as we hold our respective beliefs, we must each regard the other as in error.

'From: syck5280@miller.cs.uwm.edu (Steven B Syck)\nSubject: WI and IL firearm  
ms law Questions\nOrganization: University of Wisconsin, Milwaukee\nLines: 39\  
NNTP-Posting-Host: 129.89.9.13\n\n\nA couple of questions for you firearms  
law experts out there: \n\nQuestion #1\n\nAccording to the NRA/ILA state fire  
arms lawbook, in Wisconsin it is\n'unlawful for any person except a peace off  
icer to go armed\* with a \"concealed and dangerous weapon.\" There is no stat  
utory provision for\nobtaining a license or permit to carry a concealed weapon  
\n\*\nJury instructions indicate that 'to go armed\' one must have a fire  
arm\non one's person or within his immediate control and available for use.\n\n\nDoes this mean that open carry is allowed? If so, just how 'open' doe  
s it\nehave to be? Would an in the pants holster be considered concealing? Wh  
at\nif one had their jacket on and it partially covered the weapon? Also,\nis  
there any way to be allowed to carry concealed, or is it just not allowed,\npe  
riod? \n\nQuestion #2\n\nAs I understand it, in Evanston, IL, they have a ordi

nance banning handguns.\nIs there any way to get around this provision? What would the penalty if\nyou were found out be? What if you used said handgun in a defensive shooting\nin your apartment there? How would the city law apply to your impending \ntrial for the shooting?\nAlso, what is IL state law concerning short barreled weapons? Short barreled\nshotgun is what I would be interested in if a handgun were not available, \neither that or a shortened 9mm carbine (ie Colt, Marlin). \nOne more thing, what is the chance of getting a CCW permit in IL without being\nrich or famous or related to the mayor?\n\nPlease send replies via E-Mail, as things seem to be piling up around t.p.g\na little faster than I can handle. Thanks again \n----- Steve Syck syck5280@miller.cs.uwm.edu -----\n\n',

'From: fcrary@ucsu.Colorado.EDU (Frank Crary)\nSubject: Re: Gun Control (was Re: We're Mad as Hell at the TV News)\nNntp-Posting-Host: ucsu.colorado.edu\nOrganization: University of Colorado, Boulder\nLines: 63\n\nIn article <C4tr3M.Eqw@magpie.linknet.com> manes@magpie.linknet.com (Steve Manes) writes:\n>On the other hand, we can draw lessons from neighbors who are more\nculturally similar, namely the Canadians...\n\nI don't think such a Canada is any more "culturally similar" to the United States than England. In terms of laws regarding individual rights, restrictions on police searches, etc... (all closely related to crime) Canadian laws parallel England's and differ greatly from those of the United States.\n\n>...In fact, an exhaustive, seven-year study has already been done of the respective crime rates of Vancouver, British Columbia and Seattle, Washington... cities with roughly the same population, urban economy, geography and crime but with decidedly different approaches to gun control.\n\nActually, they do not have "roughly the same... urban economy", and extremely different ethnic composition.\n\n>Over the seven-year study, 388 homicides occurred in Seattle (11.3 per 100,000) vs. 204 homicides in Vancouver (6.9 per 100,000).\n>After adjustment for differences in age and sex among the populations, the relative risk of being a victim of homicide in Seattle, as compared to Vancouver, was found to be 1.63.\n\nHowever, if you account for economic and ethnic differences, the difference disappears completely: Seattle's minorities are predominately poor, while Vancouver's are middle or upper class.\n\nThe rates for whites in both cities were found to be identical, while the rate for poor, Seattle minorities was almost three times as great as for the well-to-do minorities of Vancouver.\n\nThe pattern seems to be one of poverty and race relations, not none of gun control.\n\n>The authors of the report also investigated "legally justifiable" homicides (self-defense). Only 32 such homicides occurred during the seven-year study, 11 of which were committed by police. Only 21 cases of civilians acting in self-defense occurred...\n\nThat is a gross distortion: "Self-defense" does not mean killing the attacker. There were 21 cases of civilians killing their attacker in self-defence. But such cases represent less than 0.5% of the crimes prevented by armed self-defence; for every case you cite, there were over 200 other cases of self-defence where the crime was prevented but the attacker was not killed.\n\n(0.5%, by the way, is the most conservative possible figure, based on the National Crime Survey's estimate of 80,000 crimes prevented by armed self-defence each year. Most other studies on the subject put the figure at 500,000 to 600,000. Those figures would imply less than 0.08% of successful self-defences involve killing the attacker.)\n\nSo, more correctly, there over 4000 (possibly as many as 25,000) cases of civilians acting in self-defence, only 2

1 of which resulted in the death of the attacker. This is a significant factor, in comparison to the 592 homicides. If memory serves, homicides make up approximately 1% of the violent crimes the study considered, so the fair comparison would be 40 - 250 homicides prevented and 592 homicides. Clearly, the study can not be close to accurate, since it ignored these cases of self-defence.

Frank Crary

The reason for the formation of this group was to discuss prescription psyoactive drugs....such as antidepressants(tri-cyclics, Prozac, Lithium,etc), \nantipsychotics(Melleral (sp?), etc), OCD drugs(Anafranil, etc), and \nso on and so forth. It didn't take long for this group to degenerate into a pseudo alt.drugs atmosphere. That's too bad, for most of the serious folks that wanted to start this group in the first place have left and gone back to sci.med, where you have to cypher through hundreds of unrelated articles to find psyoactive data.\n\nIt was also to discuss real-life experiences and side effects of the above mentioned.\n\nOh well, I had unsubscribed to this group for some time, and I decided to check it today to see if anything had changed....nope....same old \nnine or ten crap articles that this group was never intended for.\n\nI think it is very hard to have a meaningful group without it being moderated...too bad.\n\nOh well, obviously, no one really cares.\n\nBill Claussen\n\nWould anyone be interested in starting a similar moderated group?\n\nBill Claussen",

'From: turpin@cs.utexas.edu (Russell Turpin)\nSubject: Re: Placebo effects\nOrganization: CS Dept, University of Texas at Austin\nLines: 39\nNNTP-Posting-Host: im4u.cs.utexas.edu\nSummary: Yes, researcher bias is a great problem.\n\n\*-----\nIn article <735157066.AA00449@calcom.socal.com> Daniel.Prince@f129.102.z1.calcom.socal.com (Daniel Prince) writes:\n\n> Is there an effect where the doctor believes so strongly in a\n> medicine that he/she sees improvement where there is none or sees\n> more improvement than there is? If so, what is this effect\n> called? Is there a reverse of the above effect where the doctor\n> doesn't believe in a medicine and then sees less improvement than\n> there is? What would this effect be called? Have these effects\n> ever been studied? How common are these effects? Thank you in\n> advance for all replies. \n\nThese effects are a very real concern in conducting studies of new treatments. Researchers try to limit this kind of effect by\nperforming studies that are "blind" in various ways. Some of these\nare:\n\no The subjects of the study do not know whether they receive a\nplacebo or the test treatment, i.e., whether they are in the\ncontrol group or the test group.\n\no Those administering the treatment do not know which subjects\nreceive a placebo or the test treatment.\n\no Those evaluating individual results do not know which subjects\nreceive a placebo or the test treatment.\n\nObviously, at the point at which the data is analyzed, one has to\ndifferentiate the test group from the control group. But the analysis\nis quasi-publ

ic: the researcher describes it and presents the data on\nwhich it is based so that others can verify it. \n\nIt is worth noting that in biological studies where the subjects are\nanimals, such as mice, there were many cases of skewed results because\nthose who performed the study did not "blind" themselves. It is not\nconsidered so important to make mice more ignorant than they already\nare, though it is important that in all respects except the one tested,\nthe control and test groups are treated alike.\n\nRussell\n',

'From: I3150101@dbstu1.rz.tu-bs.de (Benedikt Rosenau)\nSubject: Re: Gospel Dating\nOrganization: Technical University Braunschweig, Germany\nLines: 93\n\nIn article <65974@mimsy.umd.edu>\nmangoe@cs.umd.edu (Charley Wingate) writes:\n\n>>Well, John has a quite different, not necessarily more elaborated theology.\n>>There is some evidence that he must have known Luke, and that the content\n>>of Q was known to him, but not in a \'canonized\' form.\n>>This is a new argument to me. Could you elaborate a little?\n\n>>The argument goes as follows: Q-oid quotes appear in John, but not in\nthe almost codified way they were in Matthew or Luke. However, they are\nconsidered to be similar enough to point to knowledge of Q as such, and\nnot an entirely different source.\n\n>>Assuming that he knew Luke would obviously put him after Luke, and would\n>>give evidence for the latter assumption.\n>>I don\'t think this follows. If you take the most traditional attributions,\n>>then Luke might have known John, but John is an elder figure in either case.\n>>We\'re talking spans of time here which are well within the range of\n>>lifetimes.\n>>We are talking date of texts here, not the age of the authors. The usual\n>>explanation for the time order of Mark, Matthew and Luke does not consider\n>>their respective ages. It says Matthew has read the text of Mark, and Luke\n>>that of Matthew (and probably that of Mark).\n>>As it is assumed that John knew the content of Luke\'s text. The evidence\n>>for that is not overwhelming, admittedly.\n\n>>>(1) Earlier manuscripts of John have been discovered.\n>>>Interesting, where and which? How are they dated? How old are they?\n>>>Unfortunately, I haven\'t got the info at hand. It was (I think) in the late\n>>>\'70s or early \'80s, and it was as possibly as old as CE 200.\n>>>When they are from about 200, why do they shed doubt on the order on\n>>>putting John after the rest of the three?\n\n>>>I don\'t see your point, it is exactly what James Felder said. They had no\n>>>first hand knowledge of the events, and it obvious that at least two of them\n>>>used older texts as the base of their account. And even the association of\n>>>Luke to Paul or Mark to Peter are not generally accepted.\n>>>Well, a genuine letter of Peter would be close enough, wouldn\'t it?\n>>>Sure, an original together with Id card of sender and receiver would be\n>>>fine. So what\'s that supposed to say? Am I missing something?\n>>>And I don\'t think a "one step removed" source is that bad. If Luke and Mark\n>>>and Matthew learned their stories directly from disciples, then I really\n>>>cannot believe in the sort of "big transformation from Jesus to gospel" that\n>>>some people posit. In news reports, one generally gets no better\n>>>information than this.\n>>>And if John IS a disciple, then there\'s nothing more to be said.\n>>>That John was a disciple is not generally accepted. The style and language\n>>>together with the theology are usually used as counterargument.\n>>>The argument that John was a disciple relies on the claim in the gospel\n>>>of John itself. Is there any other evidence for it?\n>>>One step and one generation removed is bad even in our times. Compare that\n>>>to reports of similar events in our century in almost illiterate societies.\n>>>Not even to speak off that believers are not necessarily the best sources.\n>>>It is also obvious that Mark has been edited. How old are the oldest\n>>>manuscripts? To my knowledge (which can be antiquated) the oldest is\n>>>quite after any of these estimates, and it is not even complete.\n

'From: I3150101@dbstul.rz.tu-bs.de (Benedikt Rosenau)\nSubject: Re: An Anecdote about Islam\nOrganization: Technical University Braunschweig, Germany\nLines: 74\n\n\nIn article <114140@bu.edu>\n\njaeger@buphy.bu.edu (Gregg Jaeger) writes:\n\n\n>>>> In cases of prostitution\n>>>>both the man and the prostitute would be punished in public, quite\n>>>>severely.\n\n\n(Deletion)\n\n\n>>No Gregg, you cannot say A is lenient and A punishes severely in public.\n>>Unless, of course, it is one of the exceptions implied by "almost all\n>>matters".\n\n\n>>That depends on the statistics and who is punished in public. If some\n>>power (for example, nothing Islamic about it) allows men to rape women\n>>five times before blowing the rapist's head off in public then I'd call\n>>that lenientcy, wouldn't you?\n\n\n\nYou have given that example. It is not lenient. End of argument.\n\n\nAnd chopping off the hands or heads of people is not lenient either. It\n\nrather appears that you are internalized the claims about the legal system\n\nwithout checking if they suit the description.\n\n\nAnd wasn't the argument that it takes five men to rape a woman according\nto Islamic law?\n\n\n>>While I don't approve of it, I think both the prostitute and the customer\n>>have the right to do what they do. In other words, punishing them is a

violation of their rights. And to punish them severely in public is just  
 other pointer to the hysteria connected with sexuality in so many  
 religions.  
 Believe what you like.  
 No, I even believe what I don't like. Can you give better answers than that?  
 Have you got any evidence for your probably opposite claims?  
 In this case, I don't see why I should accept the complex ridden views  
 of an oriental goatherd.  
 Ah, yes, I forget that the West is historically so much without sexual  
 neurosis :)  
 "Oriental goatherd", really intellectual.  
 A fact, if memory serves. And most will see the connection between the  
 primitive machism in the Orient and in Islam.  
 If people agree on having sex it is fine. And I would assume that a  
 god would have a clue of what the detrimental effects of suppressing it  
 are.  
 Huh? Ever heard of AIDs? (Of course you'll probably go on to say that  
 God must be evil because he allows the disease to exist, bla bla).  
 As usually you miss the point. Aids is neither spread only through sex  
 nor necessarily spread by having sex. Further, the point is, a very important  
 point, the urge for sex is stronger than the fear of AIDS. It is even  
 stronger than the religious attempts to channel or to forbid sex. The  
 consequences of suppressing sex are worse than the consequences of Aids.  
 Please note that the idea that everybody would end up with AIDS when sex  
 is not controlled is completely counterfactual.  
 And since you have brought up the point, is your god evil or not?  
 Benedikt

"From: dunnjj@ucsu.Colorado.EDU (DUNN JONATHAN JAMES)  
 Subject: Re: ABOLISH SELECTIVE SERVICE  
 Organization: University of Colorado, Boulder  
 Lines: 42  
 nmuellerm@vuse.vanderbilt.edu (Marc Mueller) writes:  
 Considering that Clinton received a draft notice and got out of it (he admits it) the political feasibility of him abolishing it is not something he would be inclined to risk any extra exposure on.  
 As a libertarian (with a small l) who voted for Clinton, I think that he should abolish the Selective Service and the draft. If his conscience forbade him to go to war in Vietnam, it should forbid him to perpetuate this system of government-sanctioned slavery.  
 Agreed. Congress took money from NASA and FHA to fund the second Seawolf.  
 The shipyards are still building Los Angeles Class submarines and there is a lack of ASW foes to contend with. The Navy is considering reducing the number of attack subs to 40 (Navy Times) and that would entail getting rid of or mothballing some of the current Los Angeles class.  
 Politically, General Dynamics is in Connecticut and we will get Seawolf subs whether we need them or not.  
 If our government would pay attention to SERIOUS domestic issues (the ECONOMY) and choose to stay out of other people's wars (Iraq, Bosnia, Somalia), we would not be in this fix. An anyway, couldn't the jobs be replaced by improving our domestic situation? (I'm not for continued deficit spending, but if Clinton and Congress want to spend, I'd rather they improve the infrastructure than fight other people's wars.)  
 In addition, more bases need to be closed. Probably Long Beach Naval Station and others. The Navy is talking about three main bases on each coast being required to home port a total fleet of 320 ships.  
 The question is whether Les Aspin and Clinton will be able to face down a pork happy Congress.  
 A novel idea: Getting away from naval bases, what about refurbishing decommissioned Air Force bases as airports? This would be so much cheaper than building them from the ground up (Denver's new airport is one of the most appalling examples of pork-barreling and cronyism I have seen in my lifetime). Even if no more airports are needed, I'm sure Bill Gates or Ross Perot would LOVE to have their own private airfields, and the money from their purchases could be applied to the public debt.

 gh the bodily assumption has no basis in\n>the Bible, Carl Jung declared it to  
 be one of the most important\n>pronouncements\n>of the church in recent years,  
 in that it implied the inclusion of the \n>feminine into the Godhead.\n\nWhich  
 means he has absolutely no idea about what the Assumption is.\n\nHowever great  
 ly we extoll Mary, it is quite obvious that she is in no\nway God or even part  
 of God or equal to God. The Assumption of our\nBlessed Mother, meant that bec  
 ause of her close identification with the\nredemptive work of Christ, she was  
 Assumed (note that she did not\nASCEND) body and soul into Heaven, and is thus  
 one of the few, along\nwith Elijah, Enoch, Moses (maybe????) who are already p

erfected in\nHeaven. Obviously, the Virgin Mary is far superior in glorification to\nmany of the previously mentioned personages.\n\nJung should stick to Psychology rather than getting into Theology.\n\nAndy Byler\n',

Subject: Re: Monophysites and Mike Walker  
Organization: U of Wisconsin-Madison College of Engineering  
Lines: 127  
Hello src readers,  
Again the misconception that Copts among other Oriental Orthodox Churches believe in Monophysitism pops up again. We had a discussion about it a while ago. In article <May.6.00.34.58.1993.15426@geneva.rutgers.edu> db7n+@andrew.cmu.edu (D. Andrew Byler) writes:  
The proper term for what Mike expresses is Monophysitism. This was a heresy that was condemned in the Council of Chalcedon in 451 AD. It grew up in reaction to Nestorianism, which held that the Son and Jesus are two different people who happened to be united in the same body temporarily. Monophysitism is held by the Copts of Egypt and Ethiopia and by the Jacobites of Syria and the Armenian Orthodox.  
Then OFM comments :  
[These issues get mighty subtle . When you see people saying different things it's often hard to tell whether they really mean seriously different things, or whether they are using different terminology. I don't think there's any question that there is a problem with Nestorius, and I would agree that the saying Christ had a human form without a real human nature or will is heretical. But I'd like to be a bit wary about the Copts, Armenians, etc. Recent discussions suggest that at their monophysite position may not be as far from orthodoxy as many had thought.  
With my appreciation to the moderator, I believe that further elaboration is needed. This is an excerpt from an article featured in the first issue of the Copt-Net Newsletter :  
Under the authority of the Eastern Roman Empire of Constantinople (as opposed to the western empire of Rome), the Patriarchs and Popes of Alexandria played leading roles in Christian theology. They were invited everywhere to speak about the Christian faith. St. Cyril, Pope of Alexandria, was the head of the Ecumenical Council which was held in Ephesus in the year 430 A.D. It was said that the bishops of the Church of Alexandria did nothing but spend all their time in meetings. This leading role, however, did not fare well when politics started to intermingle with Church affairs. It all started when the Emperor Marcianus interfered with matters of faith in the Church. The response of St. Dioscorus, the Pope of Alexandria who was later exiled, to this interference was clear: "You have nothing to do with the Church." These political motives became even more apparent in Chalcedon in 451, when the Coptic Church was unfairly accused of following the teachings of Eutyches, who believed in monophysitism. This doctrine maintains that the Lord Jesus Christ has only one nature, the divine, not two natures, the human as well as the divine.  
The Coptic Church has never believed in monophysitism the way it was portrayed in the Council of Chalcedon! In that Council, monophysitism meant believing in one nature. Copts believe that the Lord is perfect in His divinity, and He is perfect in His humanity, but His divinity and His humanity were united in one nature called "the nature of the incarnate word", which was reiterated by St. Cyril of Alexandria. Copts, thus, believe in two natures "human" and "divine" that are united in one "without mingling, without confusion, and without alteration" (from the declaration of faith at the end of the Coptic divine liturgy). These two natures "did not separate for a moment or the twinkling of an eye" (also from the declaration of faith at the end of the Coptic

c divine liturgy).\n\nThe Coptic Church was misunderstood in the 5th century at the Council of\nChalcedon. Perhaps the Council understood the Church correctly, but they\nwanted to exile the Church, to isolate it and to abolish the Egyptian,\nindependent Pope. Despite all of this, the Coptic Church has remained very\nstrict and steadfast in its faith. Whether it was a conspiracy from the\nWestern Churches to exile the Coptic Church as a punishment for its refusal\nto be politically influenced, or whether Pope Dioscurus didn't quite go the\nextra mile to make the point that Copts are not monophysite, the Coptic\nChurch has always felt a mandate to reconcile "semantic" differences between\nall Christian Churches. This is aptly expressed by the current 117th\nsuccessor of St. Mark, Pope Shenouda III: "To the Coptic Church, faith is\nmore important than anything, and others must know that semantics and\nterminology are of little importance to us." Throughout this century, the\nCoptic Church has played an important role in the ecumenical movement. The\nCoptic Church is one of the founders of the World Council of Churches. It has\nremained a member of that council since 1948 A.D. The Coptic Church is a\nmember of the all African Council of Churches (AACC) and the Middle East\nCouncil of Churches (MECC). The Church plays an important role in the\nChristian movement by conducting dialogues aiming at resolving the\ntheological differences with the Catholic, Greek Orthodox, Presbyterian, and\nEvangelical Churches.\n\n[...]\n\nAs a final note, the Oriental Orthodox and Eastern Orthodox did sign a common statement of Christology, in which the heresy of Monophysitism\nwas condemned. So the Coptic Orthodox Church does not believe in Monophysitism.\n\nPeace,\n\nNabil\n\n

-----\n\n[As I mentioned in a brief apology, the comment quoted above from me\nis confused. I appear to say that Nestorius was monophysite. As\nAndrew Byler correctly stated it, the Nestorians and monophysites were\nactually opposite parties. The point I was making, which Nabil\nexplains in some detail, is that some groups that have been considered\nheretical probably aren't.\n\nChalcedon was a compromise between two groups, the Alexandrians and\nAntiochenes. It adopted language that was intended to be acceptable\nto moderates in both camps, while ruling out the extremes. I agree\nthat there were extremes that were heretical. However in the course\nof the complex politics of the time, it appears that some people got\nrejected who didn't intend heresy, but simply used language that was\nnot understood or even was misrepresented. And some seem not to have\njoined in the compromise for reasons other than doctrine. There are\ngroups descended from both of the supposedly heretical camps. This\nposting discussed the descendants of the Alexandrians. There are also\nremaining Nestorians. Like some of the current so-called\nmonophysites, there is reason to believe that the current so-called\nNestorians are not heretical either. They sheltered Nestorius from\nwhat they saw as unfair treatment, but claim they did not adopt his\nheresies, and in fact seem to follow more moderate representatives of\nthe Antiochene tradition.\n\n-

If it is typical for the principle of reasonable doubt to be upheld in North Carolina, then I would count that in the state's favor. Reasonable doubt dates back to Human Rights. We are now in the time of Civil Rights. Civil Rights are issued by the State with whatever strings attached they choose as the Grantor of said rights. And if that means that verdicts are determined by the needs of the state rather than by guilt or innocence in a traditional sense, so be it. Being subjective rather than objective may make it harder to anticipate what is right, and you may be sacrificed for being wrong inadvertently once in a while, but that really is a small price to pay for the common good don't you think?

"From: henry@zoo.toronto.edu (Henry Spencer)\nSubject: Re: HST Servicing Mission Scheduled for 11 Days\nOrganization: U of Toronto Zoology\nLines: 35\n\nIn article <1rdlg0\$ckb@access.digex.net> prb@access.digex.com (Pat) writes:\n>How will said re-boost be done?\n>Grapple, HST, stow it in Cargo bay, do OMS burn to high altitude, \n>unstow HST, repair gyros, costar install, fix solar arrays,\n>then return to earth?\n\nActually, the reboost will probably be done last, so that there is a fuel\nreserve during the EVAs (in case they have to chase down an adrift\nastronaut or something like that). But yes, you've got the idea -- the\nreboost is done by taking the whole shuttle up.\n\n>My guess is why bother with using the shuttle to reboost?\n>why not grapple, do all said fixes, bolt a small liquid fueled\n>thruster module to HST, then let it make the re-boost...\n\nSomebody has to build that thruster module; it's not an off-the-shelf\nitem. Nor is it a trivial piece of hardware, since it has to include\nattitude control (HST's own is not strong enough to compensate for things\nlike thruster imbalance), guidance (there is no provision to feed gyro\ndata from HST's own gyros to an external device), and separation (you\ndon't want it left attached afterward, if only to avoid possible\ncontamination after the telescope lid is opened again). You also get\nto worry about whether the lid is going to open after the reboost is\ndone and HST is inaccessible to the shuttle (the lid stays closed for\nthe duration of all of this to prevent mirror contamination from\nthrusters and the like).\n\nThe original plan was to use the Orbital Maneuvering Vehicle to do the\nreboost. The OMV was planned to be a sort of small space tug, well\nsuited to precisely this sort of job. Unfortunately, it was costing\na lot to develop and the list of definitely-known applications was\nrelatively short, so it got cancelled.\n-- \nSVR4 resembles a high-speed collision | Henry Spencer @ U of Toronto Zoology\nbetween SVR3 and SunOS. - Dick Dunn | henry@zoo.toronto.edu utzoo!henry\n",

'From: throopw%sheol@concert.net\nSubject: Re: Clipper considered harmful\nLines: 59\n\n: From: shirriff@sprite.berkeley.edu (Ken Shirriff)\n: Message-ID: <lr24us\$oeH@agate.berkeley.edu>\n: It seems likely to me that that a large subset of encrypted communications\n: would be archived to tape so they could be read if sometime in the future\n: probable cause arises and a warrant is obtained.\n\nI think it is unlikely that data like this could be used in court.\nCurrently LEAs can install wiretaps on large numbers of phones, record\ncalls without listening to them, and then post-facto obtain warrants\nand listen to calls after probable cause is established. But this\nstrategy wouldn't get the stuff admitted in court. (At least, not\nin the near term.)\n\nIn other words, near as I can tell, the thing that makes such evidence\ninadmissible is the interception without a warrant, not the attempt to\ninterpret what was intercepted without a warrant. I'd be surprised\nthat archiving data without consent would be interpreted as anything\nbut analogous to a wiretap by the courts.\n\nNote that that doesn't mean I think it won't be done if technically\nfeasible. Just as I'm sure many wiretaps are done now without\nwarrants, just to fish for avenues to investigate. So in the future,\nstart surveillance, start archiving data, trump up some probable cause,\ndecrypt post-facto after the warrant is in hand, and the investigation\ngets a boost from data that, sadly, won't ever be presented to a jury.\n\nWhile I'm posting... for an interesting cautionary tale projecting this\narchiving scenario to extremes, read "Lacey and his Friends", a\ncollection of sf stories by David Drake. The US starts down the\nslippery slope by archiving \*everything\*. But don't worry folks, it\n's stored in a secure repository where nobody but LEAs with warrants can\ngot to it. And by the way, we'll be installing cameras on all major\nstreets. Hey, this is nothing new, we already have cameras in banks and\nteller machines, don't we?\n\nAnd then we'll pass laws requiring cameras covering \*all\* public\nplaces. Then in some private places. Then we'll make it a crime ever\nto be out of range of a camera, except in legally licensed privacy\ncubicles. Only alone. And with a thorough body search before and\nafter. But, see, the re's still a right to privacy. We haven't\ncurtailed any rights, not really. And just think how much easier it'd\nbe to solve crimes in such a situation: just obtain a warrant, put on a\nVR helmet and take a walk down memory lane.\n\nAnd hey, nobody'll be tracking \*you\* or \*me\*, no need to be self-conscious.\n\nAfter all, if you're not doing anything illegal...\n\nFunny, though. While speeding and the radar detector industry became\npretty much a thing of the past, somehow all this didn't eliminate all\ncrime in the story. And somehow, politicians got exemptions on grounds\nof national security, and rich corporations got exemptions for their\nexecs on grounds of industrial espionage and the preservation of\ncompetition. And not everybody was exactly happy with the system. \nI can't imagine why.\n\n--\nWayne Throop throopw%sheol@concert.net\nthroop%aurgate@concert.net\n',

"From: henry@zoo.toronto.edu (Henry Spencer)\nSubject: Re: Moonbase race, NA  
SA resources, why?\nOrganization: U of Toronto Zoology\nLines: 33\n\nIn articl  
e <1993Apr21.210712.1@aurora.alaska.edu> nsmca@aurora.alaska.edu writes:\n>> S  
o how much would it cost as a private venture, assuming you could talk the\n>> U.S. government into leasing you a couple of pads in Florida? \n>\n>Why must i  
t be a US Government Space Launch Pad? Directly I mean...\n\nIn fact, you prob  
ably want to avoid US Government anything for such a\nproject. The pricetag i  
s invariably too high, either in money or in\nhassles.\n\nThe important thing  
to realize here is that the big cost of getting to\nthe Moon is getting into l  
ow Earth orbit. Everything else is practically\ndown in the noise. The only  
part of getting to the Moon that poses any\nnew problems, beyond what you face  
in low orbit, is the last 10km --\nthe actual landing -- and that is not immen  
sely difficult. Of course,\nyou \*can\* spend sagadollars (saga- is the metric  
prefix for beelyuns\nand beelyuns) on things other than the launches, but you  
don't have to.\n\nThe major component of any realistic plan to go to the Moon  
cheaply (for\nmore than a brief visit, at least) is low-cost transport to Eart  
h orbit.\nFor what it costs to launch one Shuttle or two Titan IVs, you can de  
velop\na new launch system that will be considerably cheaper. (Delta Clipper\  
might be a bit more expensive than this, perhaps, but there are less\nambitio  
us ways of bringing costs down quite a bit.) Any plan for doing\nsustained lu  
nar exploration using existing launch systems is wasting\nmoney in a big way.\n\nGiven this, questions like whose launch facilities you use are \*not\* a\nmin  
or detail; they are very important to the cost of the launches, which\ndominat  
es the cost of the project.\n-- \nAll work is one man's work. | He

"From: stgprao@st.unocal.COM (Richard Ottolini)\nSubject: Re: Krillean Photography\nOrganization: Unocal Corporation\nLines: 20\n\nLiving things maintain small electric fields to (1) enhance certain\nchemical reactions, (2) promote communication of states within a cell,\n(3) communicate between cells (of which the nervous system is a specialized\nexample), and perhaps other uses. These electric fields change with location\nand time in a large organism. Special photographic techniques such as applying\nexternal fields in Kirillian photography interact with these fields or the resistances\ncaused by these fields to make interesting pictures. Perhaps such pictures will\nbe diagnostic of disease problems in organisms when better understood. Perhaps not.\n\nStudying the overall electric activity of biological systems is several hundred\nyears old, but not a popular activity. Perhaps, except in the case of a few\ntissues like nerves and the electric senses of fishes, it is hard to reduce the\ninvestigation into small pieces that can be clearly analyzed. There are some\nhints that manipulating electric fields is a useful therapy such as speeding\nthe healing of broken bones, but not understood why.\n\nBioelectricity has a long association with mysticism. Ideas such as Frankenstein\nreanimation go back to the most early electrical experiments on tissue such as\nwhen Volta invented the battery. I personally don't care to revert to supernatural\ncause to explain things we don't yet understand.\n",

"From: aldridge@netcom.com (Jacquelin Aldridge)\nSubject: Re: Teenage acne\nOrganization: NETCOM On-line Communication Services (408 241-9760 guest)\nLines: 57\n\nnpchurch@swell.actrix.gen.nz (Pat Churchill) writes:\n\n>\n>My 14-y-o son has the usual teenage spotty chin and greasy nose. I\n>bought him Clearasil

l face wash and ointment. I think that is probably enough, along with the usual good diet. However, he is on at me to get some product called Dalacin T, which used to be a doctor's-prescription only treatment but is not available over the chemist's counter. I have asked a couple of pharmacists who say either his acne is not severe enough for Dalacin T, or that Clearasil is OK. I had the odd spots as a teenager, nothing serious. His father was the same, so I don't figure his acne is going to escalate into something disfiguring. But I know kids are sensitive about their appearance. I am wary because a neighbour's son had this wierd malady that was eventually put down to an overdose of vitamin A from acne treatment. I want to help - but with appropriate treatment.

My son also has some scaliness around the hairline on his scalp. Sort of teenage cradle cap. Any pointers/advice on this? We have tried a couple of anti dandruff shampoos and some of these are inclined to make the condition worse, not better.

Shall I bury the kid till he's 21 :) No...I was one of the lucky ones. Very little acne as a teenager. I didn't have any luck with clearasil. Even though my skin gets oily it really only gets miserable pimples when it's dry.

Frequent lukewarm water rinses on the face might help. Getting the scalp under control might help (that could be as simple as submerging under the bathwater till it's softened and washing it out). Taking a one a day vitamin/mineral might help. I've heard iodine causes trouble and that it is used in fast food restaurants to sterilize equipment which might be where the belief that greasy foods cause acne came from. I notice grease on my face, not immediately removed will cause acne (even from eating meat).

Keeping hair rinse, mousse, dip, and spray off the face will help. Warm water bath soaks or cloths on the face to soften the oil in the pores will help prevent blackheads. Body oil is hydrophilic, loves water and it softens and washes off when it has a chance. That's why hair goes limp with oiliness.

Becoming convinced that the best thing to do with a whitehead is leave it alone will save him days of pimple misery. Any prying of black or whiteheads can cause infections, the red spots of pimples. Usually a whitehead will break naturally in a day and there won't be an infection afterwards.

Tell him that it's normal to have some pimples but the cosmetic industry makes it's money off of selling people on the idea that they are an incredible defect to be hidden at any cost (even that of causing more pimples).

\n\n\n-Jackie-\n\n\n",

'From: db7n+@andrew.cmu.edu (D. Andrew Byler)\nSubject: The Nicene Creed (was Re: MAJOR VIEWS OF THE TRINITY)\nOrganization: Freshman, Civil Engineering, Carnegie Mellon, Pittsburgh, PA\nLines: 152\n\nMichael Bushnell writes;\n\n>The so-called Creed of Athanasius, however, has always been a Western creed, and has always had the filioque. The Orthodox have said that they accept all that it says, with the exception of the filioque, but it is not "in use." Which is exactly what I pointed out. (Though I was wrong about your use of the Creed, the 1913 Catholic Encyclopedia in which I read about it said the Orthodox do use the Creed minus the filioque. Apparently that has changed.) The Athanasian Creed has always had the Filioque, the Nicene - Constantinopolitan did not.

Of course the Orthodox did not delete the Filioque from the Nicene Creed (it wasn't there to begin with), but they certainly did from the Athanasian Creed, which did have it from the beginning.

I might point out that the whole problem started over the difference in ways of explaining the generation of the Blessed Trinity, the East emphasizing the idea of the Holy Spirit proceeding from the Father through the Son, and the West using proceeding from the Father and the Son. In fact, some, such as Tertullian, used both formulations (see below)

Following, therefore, the form of these exam

ples, I profess that I do\ncall God and His Word, - the Father and and His Son , - two. For the\nroot and the stem are two things, but conjoined; the founta in and the\nriver are two kinds, but indivisible; the sun and the ray are two forms,\nbut coherent ones. Anything which proceeds from another must\nnecessa rily be a second to that from which it proceeds; but it is not on\nthat accoun t separated from it. Where there is second, however, there\nare two; and wher e ther is third, there are three. The Spirit, then, is\nthird from God and th e Son, just as the third from the root is the fruit\nof the stem, and third fr om the fountain is the stream from the river,\nand thrid from the sun is the a pex of the ray."

\n\t-Tertullian, Against Praxeas, 8, 5 (about 213 AD)\n\nand\n\n\t"I believe that the Spirit proceeds not otherwise than from the Father\nth rough the Son"\n\t-Tertullian, Against Praxeas, 4, 1 (about 213 AD)\n\nAnd as St. Thomas showed in his Summa Theologica Part 1, Question 36,\nArticles 2 and 3, there is no contradiction between the two methods of\ngeneration, and in fa ct, the two methods of reckoning the procession\nemphasize what St. Augustine, among others taught, that the Holy Spirit\nproceeds from the Father and the So n, but He proceeds from the Father in\na more preeminent way.\n\n\t"For whatev er the Son has, He has from the Father, certainly He has it\nfrom the Father t hat the Holy Spirit proceeds from Him ... For the\nFather alone is not from an other, for which reason He alone is called\nunbegotten, not, indeed, in the Sc riptures, but in the practice of\ntheologians, and of those who employ such te rms as they are able in a\nmatter so great. The Son, however, is born of the Father; and the Holy\nSpirit proceeds principally from the Father, and since t he Father gives\nto the Son all that He has without any interval of time, the Holy Spirit\nproceeds jointly from both Father and Son. He would be called So n of\nthe Father and of the Son if, which is abhorrent to everyone of sound\nmi nd, they had both begotten Him. The Spirit was not begotten by each,\nhowever , but proceeds from each and both."

\n\t-St. Augustine of Hippo, The Trinity, 1 5, 26, 47 (400 to 416 AD)\n\nSo, in a sense, all of the formulations are corre ct (to the West at\nleast), because the Holy Spirit proceeds from both Father and Son, but\nin proceeding from the Son, the orgin of that procession is the\nprocession from the Father, so the Holy Spirit is proceeding from the\nFather through the Son, but as all that the Son has is from the Father,\nthe Holy Spi rit can be said to proceed from the Father, without any\nmention of the Son be ing necessary.\n\tIn any case, I am happy to know that I follow in the beliefs of Pope\nSt. Leo I, St. Fulgence of Ruspe, St. Cyril of Alexandria, Pope St.\nDamsus I, St. Augustine of Hippo, St. Epiphanius of Salamis, St. Ambrose\nof Milan, St. Hilary of Poitiers, Tertullian, and others among the\nFathers, who a ll have very quotable quotes supporting the Catholic\nposition, which I enunci ated above.\n\tAs for the issue of the adoption of another Creed being forbidd en, I\nwill point out that the Holy Fathers of Ephesus and Chalcedon both spok e\nof the Creed of Nicea in their statement forbidding anyone "to produce,\nrw rite, or compose a confession of faith other than the one defined by\nthe Fathe rs of Nicea." That Creed is a different Creed than that of\nConstantinople, w hich is commonly called the Nicene Creed. Not of\ncourse in that they were co ndemning the adoption of the\nConstantinopolitan Creed, which is but an enlarg ement upon the Creed of\nNicea, but that they were condemning the impious opin ions of Nestorius,\nwho had adopted a radically different Creed from the one used by the\nChurch, which among other things denied the procession of the Hol y\nSpirit form the Son. Thus, the additions of the Constantinopolitan\nCreed were not thought to be in violation of this, and as the Council\nChalcedon als o affirmed the doctrine of the procession of the Holy\nSpirit from the Son, wh ich Nestorius denied, they could hardly have been\nagainst explaining in a ful

ler way the Creed, for they themselves\napproved of previous additions to it. And if the further explanations\nof the Creed made in Constantinople were not denigrating of the work\ndone by the Holy Fathers of Nicea or in any way heretical, it follows\nthat the Council of Toledo was fully able to add what was not disputed\nby the faithful to the Creed so as to combat the impieties of the Arians\nin Spain, because the filioque was not in dispute in the Church until\nmany years later under Photius and others. And that the filioque was\nnot disputed, I provide more quotes below.\n\n\t"Since the Holy Spirit when he is in us effects our being conformed to\nGod, and he actually proceeds from the Father and Son, it is abundantly\nclear that He is of the divine essence, in it in essence and proceeding\nfrom it." \n\t-St. Cyril of Alexandria, The Treasury of the Holy and Consubstantial\nTrinity, Thesis 34, (423-425 AD)\n\n\t"The Holy Spirit is not of the Father only, or of the Son only, but he\nis the Spirit of the Father and the Son. For it is written: `If anyone\nloves the world, the Spirit of the Father is not in him\'; and again it\nis written: `If anyone, however, does not have the Spirit of Christ, he\nis none of His.` When the Father and the Son are named in this way, the\nHoly Spirit is understood, of whom the Son himself says in the Gospel,\nthat the Holy Spirit `proceeds from the Father,\` and that `He shall\nreceive of mine and shall announce it to you.`" \n\t-Pope St. Damasus I, The Decree of Damasus, 1 (382 AD)\n\n\t"The only-begotten Holy Spirit has neither the name of the Son nor the\nappellation of Father, but is called Holy Spirit, and is not foreign to\nthe Father. For the Only-begotten Himself calls Him: `the Spirit of the\nFather,\` and says of Him the `He proceeds from the Father,\` and `will\nreceive of mine,\` so that He is reckoned as not being foreign to the\nSon, but is of their same substance, of the same Godhead; He is Spirit\ndivine, ... of God, and He is God. For he is Spirit of God, Spirit of\nthe Father, and Spirit of the Son, not by some kind of synthesis, like\nsoul and body in us, but in the midst of Father and Son of the Father\nand of the Son, a third by appellation....\n\t"The Father always existed and the Son always existed, and the Spirit\nbreathes from the Father and the Son; and neither is the Son created nor\nis the Spirit created." \n\t-St. Epiphanius of Salamis (which is on Cyprus), The Man Well-Anchored,\n8 and 75 (374 AD)\n\n\t"Concerning the Holy Spirit, I ought not to remain silent, nor yet is\nit necessary to speak. Still, on account of those who do not know Him,\nit is not possible for me to be silent. However it is necessary to\nspeak of Him who must be acknowledged, who is from the Father and the\nSon, His Sources." \n\t-St. Hilary of Poitiers, The Trintiy, 2, 29 (356 to 359 AD)\n\n\tThus, as I have pointed out before, Gaul, Spain, Italy, Africa, Egypt,\nPalastine, and the lands of the Greeks, all of Christendom at that time,\nall have Fathers who can be cited to show that they confess the doctrine\nexpressed by the filioque. I suggest to those of the Orthodox Church\nthat they come up with some of the Fathers, besides St. John of Damascus\nwho all will admit denied the filioque, to support their views. It is\nnot enough to bring up the "proceeds from the Father" line of the Creed\nnor the Gospel of John, for that says what we believe also. But it does\nnot say the Holy Spirit does not proceed from the Son, only that He does\nproceed from the Father.\n\nAndy Byler\n,

'From: tmcconne@sedona.intel.com (Tom McConnell~)\nSubject: Re: Motif vs. [Athena, etc.]\nOrganization: Intel Corporation\nLines: 44\nDistribution: world\nNNTP-Posting-Host: thunder.intel.com\nOriginator: tmcconne@sedona\n\n\nIn article <C5K6ny.AzJ@kirk.bu.oz.au>, bambi@kirk.bu.oz.au (David J. Hughes) writes:\n> berry@durian.citr.uq.oz.au (Andrew Berry) writes:\n>\n> Ports of Motif to both 386BSD and Linux are available for a fee of about\n> \$100. This is cost recovery for the person who bought the rights to\n> redistribute. The activit

y in both the BSD and Linux news groups\n> pertaining to Motif has been high.\n> \n> \n> >I just wonder if this will also cause a divergence between commercial\n> >and non-commercial software (ie. you will only get free software using\n> >Athena or OpenLook widget sets, and only get commercial software using\n> >the Motif widget sets). \n> \n> \n> I can't see why. If just about every workstation will come with Motif\n> by default and you can buy it for under \$100 for the "free" UNIX\n> platforms, I can't see this causing major problems.\n\n Let me add another of my concerns: Yes, I can buy a port of Motif for "cheap",\nbut I cannot get the source for "cheap", hence I am limited to using whatever X\nlibraries the Motif port was compiled against (at least with older versions of\nMotif. I have been told that Motif 1.2 can be used with any X, but I have not\nseen it myself).\n\n Currently, I have X11R5 running on eight different unix platforms, of which\nonly three came with Motif. On those three, I am unable to use the X11R5\nlibraries to build Motif clients, because I get link errors between the\nvendor-supplied port of Motif and my X11R5. I anticipate having this same\nproblem when X11R6 becomes available.\n\n The result is that I cannot build Motif clients that rely on X11R5, since I do\nnot have Motif compiled under X11R5. True, I could buy another port of Motif,\nbut that sort of ruins the whole idea of "free", doesn't it?\n\n Cheers,\n\n Tom McConnell\n-- \n Tom McConnell | Internet: tmcconne@sedona.intel.com\n Intel, Corp. "From: games@max.u.washington.edu\nSubject: SSTO Senatorial (aide) briefing recollections.\nArticle-I.D.: max.1993Apr6.125512.1\nDistribution: world\nLine s: 78\nNNTP-Posting-Host: max.u.washington.edu\n\nThe following are my thoughts on a meeting that I, Hugh Kelso, and Bob Lilly\nhad with an aide of Sen. Patty Murrays. We were there to discuss SSTO, and\ncommercial space. This is how it went...\n\n\nAfter receiving a packet containing a presentation on the benefits of SSTO,\nI called and tried to schedule a meeting with our local Senator (D) Patty\nMurray, Washington State. I started asking for an hour, and when I heard\nthe gasp on the end of the phone, I quickly backed off to 1/2 an hour.\nLater in that conversation, I learned that a standard appointment is 15 minutes.\n\nWe got the standard bozo treatment. That is, we were called back by an aide,\nwho scheduled a meeting with us, in order to determine that we were not\nbozos, and to familiarize himself with the material, and to screen it, to\nmake sure that it was appropriate to take the senators time with that material.\n\nWell, I got allocated 1/2 hour with Sen. Murrays aide, and we ended up talking\nto him for 45 minutes, with us ending the meeting, and him still listening.\nWe covered a lot of ground, and only a little tiny bit was DCX specific.\nMost of it was a single stage reusable vehicle primer. There was another\nwoman there who took copious quantities of notes on EVERY topic that we brought up.\n\nBut, with Murray being new, we wanted to entrench ourselves as non-corporate\naligned (I.E. not speaking for boeing) local citizens interested in space.\nSo, we spent a lot of time covering the benefits of lower cost access to\nLEO. Solar power satellites are a big focus here, so we hit them as becoming\nfeasible with lower cost access, and we hit the environmental stand on that.\nWe hit the tourism angle, and I left a copy of the patric Collins Tourism\npaper, with side notes being that everyone who goes into space, and sees the\natmosphere becomes more of an environmentalist, esp. after SEEING the smog\nover L.A. We hit on the benefits of studying bone decalcification (which is\nmore pronounced in space, and said that that had POTENTIAL to lead to\nunderstanding of, and MAYBE a cure for osteoporosis. We hit the education\nwhereby kids get enthused by space, but as they get older and find out that\nthey havent a hop in hell of actually getting there, they go on to other\nfields, with low cost to orbit, the chances they might get there someday\nwould provide greater incentive to hit the harder classes needed.\n\nWe hit a little of the get nasa out of the operational launch vehicle business\nangle. We hit the lower cost of satellite launches, gps navigation, personal\ncommunicators, telecommunications, new services, etc... Jobs provided\nin those sectors.\n\nJobs provided building the thing, balance of trade improvement, etc.. We mentioned that skypix would benefit from lower launch costs.\n\nWe left the paper on what technologies needed to be invested in in order\nto make this even easier to do. And he asked questions on this point.\n\nWe ended by telling her that we wanted her to be aware that efforts are\nproceeding in this area, and that we want to make sure that the\nresults from these efforts are not lost (much like condor, or majellan),\nand most importantly, we asked that she help fund further efforts along\nthe lines of lowering the cost to LEO.\n\nIn the middle we also gave a little speal about the Lunar Resource Data\nPurchase act, and the guy filed it separately, he was VERY interested in it.\nHe asked some questions about it, and seemed like he wanted to jump on it,\nand contact some of the people involved with it, so something may actually\nhappen immediately there.\n\nThe last two things we did were to make sure that they knew that we\nknew a lot of people in the space arena here in town, and that they\ncould feel free to call us any time with questions, and if we didn't know\nthe answers,

that we would see to it that they questions got to people who really did know the answers.\n\nThen finally, we asked for an appointment with the senator herself. He said that we would get on the list, and he also said that knowing her, this would be something that she would be very interested in, although they do have a time problem getting her scheduled, since she is only in the state 1 week out of 6 these days.\n\nAll in all we felt like we did a pretty good job.\n\n\t\t\tJohn.\n",

'From: cbc5b@virginia.edu (Charles Campbell)\nSubject: Re: Was Jesus Black?\nOrganization: University of Virginia\nLines: 21\n\n\n\tJesus was born a Jew. We have biblical accounts of\nboth his mother's ancestry and his father's, both tracing back\nto David. It seems reasonable to assume, therefore, that Jesus\nwas Semitic.\n\tAs an interesting aside, Jesus' being semitic makes him\nneither "white" nor "black," and in some sense underscores the\npoint made earlier that his color was not important, it was his\nmessage, his grace, and his divinity that we should concentrate\non.\n\tFinally, I would direct anyone interested in African\ninvolvement in the church to the account of the conversion of\nthe Ethiopian eunuch in Acts chapter 9 (I think it's chapter\n9). This is one of the earliest conversions, and the eunuch,\ntreasurer to the queen of the Ethiopians, was definitely\nAfrican. Because "Ethiopia" at that time indicated a region\njust south of Egypt, many also speculate that this man was\nnot\nonly the first African Christian, but the first black Christian\nas well.\n\nGod bless,\nCharles Campbell\n',

'From: loss@fs7.ECE.CMU.EDU (Doug Loss)\nSubject: Re: Death and Taxes (was Why not give \$1 billion to...\nOrganization: Electrical and Computer Engineering, Carnegie Mellon\nLines: 55\n\n\nIn article <1993Apr23.000021.1@aurora.alaska.edu> nsmca@aurora.alaska.edu writes:\n>In article <1993Apr22.162501.747@indyva.x.iupui.edu>, tffreeba@indyva.x.iupui.edu writes:\n>> [...] Somebody pointed out, quite correctly, that such rights are\n>> not anybody's to grant (although I imagine it would be a fait accompli\n>> situation for the winner.) So how about this? Give the winning group\n>> (I can't see one company or corp doing it) a 10, 20, or 50 year\n>> moratorium on taxes.\n>> \n>> Tom Freebairn \n>\n>Who says there is no mineral rights to be given? Who says? The UN or the US\n>Government? \n\nTom's right about this. It's only a grantable right if the granter has\nthe will and the ability to stop anyone from taking it away from you.\nNever mind the legal status.\n\n>Major question is if you decide to mine the moon or Mars, who will stop you?\n>The UN can't other than legal tomfoolery.. Can the truly enforce it?\n\nNick's right about this. It's always easier to obtain forgiveness than\npermission. Not many people remember that Britain's King George III\nexpressly forbid his american subjects to cross the alleghany/appalachian\nmountains. Said subjects basically said, "Stop us if you can." He\ncouldn't.\n\n>If you go to the moon as declare that you are now a sovereign nation, who will\n>stop you from doing it. Maybe not acknowledge you? \n\nThat's how the USA started. Of course, that's also how the Bolivarian\nRepublic started (ca. 1800-1820) in central america. It didn't have\nquite the staying power of the USA. I'm sure there are more examples of\ngoing far away and then ignoring authority, but none jump to mind right\nnow.\n\n>What can happen is to find a nation which is acknowledged, and offer your\n>s services as a space miner and then go mine the asteroids/mars/moon or what\n>ever.. As long as your sponsor does not get in trouble..\n\nOr do as some whaling nations do: define whatever activities you want to\ncarry out as "scientific research" which just coincidentally requires\nthe recovery of megatonnes of minerals (or whatever), then go at it.\n\n>Basically find a country who wants to go into space, but can't for some reason\n>or another, but who will give you a "home".. Such as Saudia Arabia or\n>whatever..\n\nLute Keyser had just this sort of arrangement with Libya (I think) in\nthe late '70's for his commercial space launch project (one of the very\nearliest). It was killed by Soviet propaganda about NATO cruise\nmissiles in Africa, which made Libya renege on the arrangement.\n\n\nDoug Loss\n',

-- in fact, I believe the serial number is smaller, but\nthis is an order of m  
agnitude calculation. We assume  $250 \times 10^6$  as the\npopulation, and that each per  
son has a key. I get five gigabytes for\neach of the two escrow databases. Fit  
s conveniently on a single very\nvaluable Exabyte tape. This can only get easi  
er with time, but who\ncares -- I can already hold all the clipper keys in the  
country in my\npocket on two 8mm tapes.\n\nAdmittely, they will think of safeg  
uards. They won't put the whole\ndatabase on one disk, prehaps. Maybe they wi  
ll throw stumbling blocks\nin the way. This changes nothing -- they keys will  
be needed every day\nby hundreds if not thousands of law enforcement types, so  
convenience\nwill dictate that the system permit quick electronic retrieval. A  
t\nsome point, with or without collusion by the agencies, those exabyte\ntapes  
are going to get cut. Dorothy Denning and David Sternlight will\ndoubtless cla  
im this can't happen -- but we know that "can't" is a\nprayer, not a word th

at in this instance connotes realism.\n\nWith two exabyte tapes in your pocket , you would hold the keys for\nevery person's conversations in the country in your hands. Yeah, you\need the "master key" two -- but thats just ten bytes o f information\nthat have to be stored an awful lot of places.\n\nCome to think of it, even if the NSA getting a copy of the database\nisn't a threat to you because unlike me you have no contraversial\npolitical views, consider foreign intelligence services. You know, the\nones that David Sternlight wants to protect us from because of the\nevil industrial espionage that they do. The French apparently do have\na big spying operation in friendly countries to get industrial\nsecrets, so he isn't being completely irrational here (although why\nour companies couldn't use cryptosystems without back doors is left\nunexplained by those that point out this threat.) \n\nPresumably, foreign intelligence services can get moles into the NSA\nand other agencies. We have proof by example of this: its happened\nmany times. Presumably, someday they will get their hands on some\nfraction of the keys. You can't avoid that sort of thing.\n\nDon't pretend that no one unauthorized will ever get their hands on\nthe escrow databases.\n\nWe crypto types are all taught something very important at the\nbeginning of intro to cryptography -- security must depend on the\nsensibly changed key that you pick to run your system, and not on a\nsecret. The escrow databases aren't the sorts of secrets that our\nteachers told us about, but they are the sort of big secrets they\nwould lump into this category. Imagine trying to replace 100 million\nClipper chips.\n\nI cannot believe that the NSA or whomever it is thats doing this\ndoesn't realize all this already. They are too smart. There are too\nmany of them who have made their bones in the real world. I suspect\nthat they know precisely what they are doing -- and that what they are\ndoing is giving us the appearance of safety so that they can continue\nto surveil in spite of the growth of strong cryptography. I suspect\nthat they realize that they can't put things off forever, but they can\ntry to delay things as long as possible.\n\nWho knows. Maybe even some of the higher ups, the inevitable\nbureaucratic types that rise in any organization, really do believe\nthat this scheme might give people some security, even as their\nsubordinates in Fort Meade wring their hands over the foolishness of\nit all.\n\n--\nPerry Metzger\tpmetzger@shearson.com\n\nLaissez faire, laissez passer. 'From: jodfishe@silver.ucs.indiana.edu (joseph dale fisher)\nSubject: Re: Eternity of Hell (was Re: Hell)\nOrganization: Indiana University\nLines: 98\nIn article <Apr.13.00.09.04.1993.28448@athos.rutgers.edu> dlecoint@garnet.acns.fsu.edu (Darius\_Lecointe) writes:\n[insert deletion of unnecessary quote]\n>Why is it that we have this notion that God takes some sort of pleasure\n>from punishing people? The purpose of hell is to destroy the devil and\n>his angels.\n\nFirst of all, God does not take any sort of pleasure from punishing\npeople. He will have mercy on whom he will have mercy and compassion on\nwhom he will have compassion (Ex 33:19). However, if he enjoyed\npunishing people and sending them to hell, then why would he send Jesus\nto "seek and save that which was lost" (Luke 19:10)?\n\n>\n>To the earlier poster who tried to support

t the eternal hell theory with the fact that the fallen angels were not destroyed, remember the Bible teaches that God has reserved them until the day of judgement. Their judgement is soon to come. Let me suggest this. Maybe those who believe in the eternal hell theory should provide all the biblical evidence they can find for it. Stay away from human theories, and only take into account references in the bible.

You asked for it.

2 Peter 2:4-ff talks about how those who are ungodly are punished. Matthew 25:31-46 is also very clear that those who do not righteous in God's eyes will be sent to hell for eternity. Thessalonians 1:6-10 states that those who cause trouble for the disciples "will be punished with everlasting destruction and shut out from the presence of the Lord". Thessalonians 2:9-12 talks about those who refuse to love the truth being condemned. Revelation 21:6-8 talks about the difference between those who overcome and those who do not. Those who do not, listed in verse 8, will be in the "fiery lake of burning sulfur". Revelation 14:9-12 gives the indication that those who follow the beast "will be tormented with burning sulfur" and there being "no rest day or night" for them because of it. Psalm 9:17: "The wicked return to the grave, all the nations that forget God."

I think those should be sufficient to prove the point.

Darius Joe Fisher [In the following I'm mostly playing "devil's advocate". I'm not advocating either position. My concern is that people understand that it's possible to see these passages in different ways. It's possible to see eternal destruction as just that -- destruction. Rev often uses the term "second death". The most obvious understanding of that would seem to be final extinction. The problem is that the NT speaks both of eternal punishment and of second death. I.e. it uses terms that can be understood either way. My concern here is not to convince you of one view or the other, but to help people understand that there's a wide enough variety of images that it's possible to understand them either way. As Tom Albrecht commented, the primary point is to do our best to keep people out of the eternal fire, whatever the details. (To make things more interesting, Luke 20:35 implies that the damned don't get resurrected at all. Presumably they just stay dead. -- yes I'm aware that it's possible to understand this passage in a non-literal way.)

2 Peter 2:4-ff is talking about angels, and talks about holding them in hell until the final judgement. This isn't eternal punishment. Matthew 25:31-46 talks about sending the cursed into eternal fire prepared for the devil and his angels. The fact that the fire is eternal doesn't mean that people will last in its flames forever. Particularly interesting is the comment about the fire having been prepared for the devil and his angels. Rev 20 and 21 talk about the eternal fire as well. They say that the beast and the false prophet will be tormented forever in it. When talking about people being thrown into it (20:13-14), it is referred to as "the second death". This sounds more like extinction than eternal torment. Is it possible that the fire has different effects on supernatural entities such as the devil, and humans?

2 Thessalonians 1:6-10 similarly, what is "everlasting destruction"? This is not necessarily eternal torment. This one can clearly be understood either way, but I think it's at least possible to think that everlasting is being used to contrast the kind of destruction that can occur in this life with the final destruction that occurs in eternity.

2 Thessalonians 2:8 again talks about destruction. Revelation 21:6-8: see comment above. Revelation 14:9-12 is probably the best of the quotes. Even there, it doesn't explicitly say that the people suffer forever. It says that the smoke (and presumably the fire) is eternal, and that there is no respite from it. But it doesn't say that the people are tormented forever.

Psalm 9:17: I don't see

that it says anything relevant to this issue.\n\n--clhj\n',

'From: willis@oracle.SCG.HAC.COM (Stan Willis)\nSubject: Kings playoff notes  
: Stauber, TV ratings, etc.\nReply-To: willis@empire.dnet.hac.com (Stan Willis  
)\nOrganization: none\nLines: 112\n\n1992-93 Los Angeles Kings notes.\n-----  
-----\n\nPlayoffs:\n-----\n\n\*Stauber disturbed by third-m  
an theme\nby Rick Sadowski, Daily News\n\nBarry Melrose's decision to stick R

Robb Stauber in the stands rather than in the increase or even on the bench for the Stanley Cup playoffs does not sit well with the rookie goaltender. "I want to be a part of the team at the most crucial time of the year, the most fun time of the year, and I'm not," Stauber said with some emotion Monday. "I think I have worked hard enough for that." Stauber said he accepts Melrose's choice of Kelly Hradek as the team's top goalie in their playoff series with the Calgary Flames. Hradek made 21 saves in Sunday's 6-3 opening victory. But Stauber clearly is upset with his sudden status as the No. 3 man behind Rick Knickle. Stauber had a 4-1-2 record and 2.98 goals-against average down the stretch in the regular season and nearly wrestled the No. 1 job from Hradek. Knickle? He won 2 of 3 decisions but had a bloated 5.26 average, twice was yanked from games (once for stomach cramps) and hasn't played since March 29. Yet, when the series resumes Wednesday, Knickle will serve as Hradek's backup again and Stauber will have to satisfy his playoff hunger by munching on Olympic Saddledome popcorn. "If I'm supposedly close to being the starter or could have been the starter...I dropped too. 3. What happened to No. 2?" Stauber wondered. "Not that I'd be unhappy with No. 2, but I feel I should at least be a part of this team in the playoffs." Perhaps Stauber eventually will get his chance, but Melrose apparently is not convinced the 25-year-old is capable of handling playoff pressure. While insisting he is the Kings' "goalie of the future," Melrose said Stauber flubbed all four of the big games he was asked to win this season. They were, according to Melrose: a 7-2 loss to San Jose on Dec. 26; an 8-3 loss to the New York Rangers on Jan. 23; a 6-6 tie with Detroit on Feb. 11; an 8-6 loss to Vancouver on Thursday. "Four times this season Robb could have emerged as the elite goalie, he could have taken it away from Kelly Hradek, and he didn't do it," Melrose said. "An elite goaltender has to carry the ball when you give it to him. The mark of a great goalie is that he isn't satisfied to be a backup." "I'm not blaming Robb for the losses, but if you're going to be No. 1, you've got to be able to walk your talk. You've got to be able to play when everything is on the line. Robb Stauber has a great deal of ability, but maybe I expect more from him than he does." Ouch. That remark stung Stauber. He began the season 9-0-1, struggled when the team hit a mid-season slump, didn't play for a month after Knickle was signed off the San Diego Gulls roster, then came on at the end. "I expect more from myself than anybody, including Barry Melrose," said Stauber, a three-year star at the University of Minnesota who left school in 1989, only to have his development hampered by a string of serious injuries. "What I've been through the last four years - two knee operations, a herniated disk in my back, shoulder surgery - what more can I go through? I obviously don't expect a lot from myself, otherwise I wouldn't be here." "Anybody who would disagree with that doesn't know me. I'm not saying Barry doesn't know me, but don't say I've been without expectations. If anything, I'm a perfectionist." Stauber acknowledged he played poorly in the four games Melrose mentioned. "But even though I didn't play well, I get knocked down from maybe one to three? It's a bit of a jump," he said. "You're almost No. 1, or if you play a good game you're No. 1 and if you don't you're No. 3? Why does Jack Nicklaus shoot a 67 and then a 75? Can you explain that? That's what Barry wanted me to explain to him, why I didn't come through when he counted on me. I don't know. What I do know is, it's a sport. I'll be there." Melrose's "goalie of the future" statement doesn't mean much to Stauber. "Before you know it, I'll be 30 and there will be no future," he said. ----- \*Game 1 of the Kings @ Flames playoff series drew a 4.2 Nielsen rating on ABC Channel 7 here in LA. The Kings

'From: topcat!tom@tredysvr.tredydev.unisys.com (Tom Albrecht)\nSubject: Re: old vs. new testament\nOrganization: Applied Presuppositionalism, Ltd.\nLines: 39\n\n\nREXLEX@fnal.fnal.gov writes:\n\n>We can jllustrate this by pointing to

the way God administers His judgment. \n>In the OT, sins were not forgiven, but rather covered up. In the age of the \n>Church not only are sins forgiven (taken away), but the power of SIN is put to \n>death. ... \n \n My, this distinction seems quite arbitrary. \n \n Blessed is the man whose iniquities are forgiven, whose sin is covered. \n (Ps. 32:1). \n \n and quoted by the apostle Paul: \n \n Even as David also describeth the blessedness of the man, unto whom God \n imputeth righteousness without works, \n Saying, Blessed are they whose iniquities are forgiven, and whose sins \n are covered. \n Blessed is the man to whom the Lord will not impute sin. (Rom. 4:6-8) \n \n The biblical perspective seems to be that forgiveness and covering are \n parallel/equivalent concepts in both testaments. The dispensational \n distinction is unwarranted. \n \n > During the millenium, we read that sins are dealt with immediately \n > under the present (ie that Christ is present on earth) rulership of Christ. \n \n I \n'm sure Rex has Scripture to back this up. You \n're suggesting Jesus is \n going to travel around dealing with individual violations of His law -- for \n millions perhaps billions of people. Such activity for Moses the lawgiver \n was considered unwise (cf. Ex. 18:13ff). It makes for interesting \n speculation, though. \n \n I \n'll leave comments on the so-called "bema seat" vs. "throne" judgments to \n someone else. This also seems like more unnecessary divisions ala \n dispensationalism. \n \n -- \n Tom Albrecht \n',

\n\n

Constructing a Logical Argument\n\nAlthough there i  
s much argument on Usenet, the general quality of argument\nfound is poor. Th  
is article attempts to provide a gentle introduction to\nlogic, in the hope of  
improving the general level of debate.\n\nLogic is the science of reasoning, p  
roof, thinking, or inference [Concise\nOED]. Logic allows us to analyze a pie  
ce of reasoning and determine whether\nit is correct or not (valid or invalid)  
. Of course, one does not need to\nstudy logic in order to reason correctly;  
nevertheless, a little basic\nknowledge of logic is often helpful when constru  
cting or analyzing an\nargument.\n\nNote that no claim is being made here abou  
t whether logic is universally\napplicable. The matter is very much open for  
debate. This document merely\nexplains how to use logic, given that you have  
already decided that logic is\nthe right tool for the job.\n\nPropositions (or  
statements) are the building blocks of a logical argument. A\nproposition is a

statement which is either true or false; for example, "It is raining" or "Today is Tuesday". Propositions may be either asserted (said to be true) or denied (said to be false). Note that this is a technical meaning of "deny", not the everyday meaning.

The proposition is the meaning of the statement, not the particular arrangement of words used to express it. So "God exists" and "There exists a God" both express the same proposition.

An argument is, to quote the Monty Python sketch, "a connected series of statements to establish a definite proposition". An argument consists of three stages.

First of all, the propositions which are necessary for the argument to continue are stated. These are called the premises of the argument. They are the evidence or reasons for accepting the argument and its conclusions.

Premises (or assertions) are often indicated by phrases such as "because", "since", "obviously" and so on. (The phrase "obviously" is often viewed with suspicion, as it can be used to intimidate others into accepting suspicious premises. If something doesn't seem obvious to you, don't be afraid to question it. You can always say "Oh, yes, you're right, it is obvious" when you've heard the explanation.)

Next, the premises are used to derive further propositions by a process known as inference. In inference, one proposition is arrived at on the basis of one or more other propositions already accepted. There are various forms of invalid inference.

The propositions arrived at by inference may then be used in further inference. Inference is often denoted by phrases such as "implies that" or "therefore".

Finally, we arrive at the conclusion of the argument -- the proposition which is affirmed on the basis of the premises and inference. Conclusions are often indicated by phrases such as "therefore", "it follows that", "we conclude" and so on. The conclusion is often stated as the final stage of inference.

For example:

Every event has a cause (premise)  
 The universe has a beginning (premise)  
 All beginnings involve an event (premise)  
 This implies that the beginning of the universe involved an event (inference)  
 Therefore the universe has a cause (inference and conclusion)

Note that the conclusion of one argument might be a premise in another argument. A proposition can only be called a premise or a conclusion with respect to a particular argument; the terms do not make sense in isolation.

Sometimes an argument will not follow the order given above; for example, the conclusions might be stated first and the premises stated afterwards in support of the conclusion. This is perfectly valid, if sometimes a little confusing.

Recognizing an argument is much harder than recognizing premises or conclusions. Many people shower their writing with assertions without ever producing anything which one might reasonably describe as an argument. Some statements look like arguments, but are not. For example:

"If the Bible is accurate, Jesus must either have been insane, an evil liar, or the Son of God."

This is not an argument, it is a conditional statement. It does not assert the premises which are necessary to support what appears to be its conclusion. (It also suffers from a number of other logical flaws, but we'll come to those later.)

Another example:

"God created you; therefore do your duty to God."

The phrase "do your duty to God" is not a proposition, since it is neither true nor false. Therefore it is not a conclusion, and the sentence is not an argument.

Finally, causality is important. Consider a statement of the form "A because B". If we're interested in establishing A and B is offered as evidence, the statement is an argument. If we're trying to establish the truth of B, then it is not an argument, it is an explanation.

For example:

"There must be something wrong with the engine of my car, because it will not start." -- This is an argument.

"My car will not start because there is something wrong with the engine." -- This is an explanation.

on.

There are two traditional types of argument, deductive and inductive. A deductive argument is one which provides conclusive proof of its conclusion -- that is, an argument where if the premises are true, the conclusion must also be true. A deductive argument is either valid or invalid. A valid argument is defined as one where if the premises are true, then the conclusion is true. An inductive argument is one where the premises provide some evidence for the truth of the conclusion. Inductive arguments are not valid or invalid; however, we can talk about whether they are better or worse than other arguments, and about how probable their premises are.

There are forms of argument in ordinary language which are neither deductive nor inductive. However, we will concentrate for the moment on deductive arguments, as they are often viewed as the most rigorous and convincing.

It is important to note that the fact that a deductive argument is valid does not imply that its conclusion holds. This is because of the slightly counter-intuitive nature of implication, which we must now consider more carefully.

Obviously a valid argument can consist of true propositions. However, an argument may be entirely valid even if it contains only false propositions.

For example:

All insects have wings (premise)  
Woodlice are insects (premise)  
Therefore woodlice have wings (conclusion)

Here, the conclusion is not true because the argument's premises are false. If the argument's premises were true, however, the conclusion would be true. The argument is thus entirely valid.

More subtly, we can reach a true conclusion from one or more false premises, as in:

All fish live in the sea (premise)  
Dolphins are fish (premise)  
Therefore dolphins live in the sea (conclusion)

However, the one thing we cannot do is reach a false conclusion through valid inference from true premises. We can therefore draw up a "truth table" for implication.

The symbol " $\Rightarrow$ " denotes implication; "A" is the premise, "B" the conclusion. "T" and "F" represent true and false respectively.

Premise Conclusion Inference

| A | B | $A \Rightarrow B$ |
|---|---|-------------------|
| T | T | T                 |
| T | F | F                 |
| F | T | T                 |
| F | F | T                 |

If the premises are false and the inference valid, the conclusion can be true or false.

If the premises are true and the conclusion false, the inference must be invalid.

If the premises are true and the inference valid, the conclusion must be true.

A sound argument is a valid argument whose premises are true. A sound argument therefore arrives at a true conclusion. Be careful not to confuse invalid arguments with sound arguments.

To delve further into the structure of logical arguments would require lengthy discussion of linguistics and philosophy. It is simpler and probably more useful to summarize the major pitfalls to be avoided when constructing an argument. These pitfalls are known as fallacies.

In everyday English the term "fallacy" is used to refer to mistaken beliefs as well as to the faulty reasoning that leads to those beliefs. This is fair enough, but in logic the term is generally used to refer to a form of technically incorrect argument, especially if the argument appears valid or convincing.

So for the purposes of this discussion, we define a fallacy as a logical argument which appears to be correct, but which can be seen to be incorrect when examined more closely. By studying fallacies we aim to avoid being misled by them. The following list of fallacies is not intended to be exhaustive.

ARGUMENTUM AD BACULUM (APPEAL TO FORCE)

The Appeal to Force is committed when the arguer resorts to force or the threat of force in order to try and push the acceptance of a conclusion. It is often used by politicians, and can be summarized as "might makes right". The force threatened need not be a direct threat from the arguer.

For example: "... Th

us there is ample proof of the truth of the Bible. All those who refuse to accept that truth will burn in Hell."

**ARGUMENTUM AD HOMINEM**

Argumentum ad hominem is literally "argument directed at the man". The Abusive variety of Argumentum ad Hominem occurs when, instead of trying to disprove the truth of an assertion, the arguer attacks the person or people making the assertion. This is invalid because the truth of an assertion does not depend upon the goodness of those asserting it.

For example: "Atheism is an evil philosophy. It is practised by Communists and murderers."

Sometimes in a court of law doubt is cast upon the testimony of a witness by showing, for example, that he is a known perjurer. This is a valid way of reducing the credibility of the testimony given by the witness, and not argumentum ad hominem; however, it does not demonstrate that the witness's testimony is false. To conclude otherwise is to fall victim of the Argumentum ad Ignorantiam (see elsewhere in this list).

The circumstantial form of Argumentum ad Hominem is committed when a person argues that his opponent ought to accept the truth of an assertion because of the opponent's particular circumstances.

For example: "It is perfectly acceptable to kill animals for food. How can you argue otherwise when you're quite happy to wear leather shoes?"

This is an abusive charge of inconsistency, used as an excuse for dismissing the opponent's argument.

This fallacy can also be used as a means of rejecting a conclusion. For example: "Of course you would argue that positive discrimination is a bad thing. You're white."

This particular form of Argumentum ad Hominem, when one alleges that one's adversary is rationalizing a conclusion formed from selfish interests, is also known as "poisoning the well".

**ARGUMENTUM AD IGNORANTIUM**

Argumentum ad ignorantiam means "argument from ignorance". This fallacy occurs whenever it is argued that something must be true simply because it has not been proved false. Or, equivalently, when it is argued that something must be false because it has not been proved true. (Note that this is not the same as assuming that something is false until it has been proved true, a basic scientific principle.)

Examples: "Of course the Bible is true. Nobody can prove otherwise." "Of course telepathy and other psychic phenomena do not exist. Nobody has shown any proof that they are real."

Note that this fallacy does not apply in a court of law, where one is generally assumed innocent until proven guilty.

Also, in scientific investigation if it is known that an event would produce certain evidence of its having occurred, the absence of such evidence can invalidly be used to infer that the event did not occur. For example: "A flood as described in the Bible would require an enormous volume of water to be present on the earth. The earth does not have a tenth as much water, even if we count that which is frozen into ice at the poles. Therefore no such flood occurred."

In science, we can validly assume from lack of evidence that something has not occurred. We cannot conclude with certainty that it has not occurred, however.

**ARGUMENTUM AD MISERICORDIAM**

This is the Appeal to Pity, also known as Special Pleading. The fallacy is committed when the arguer appeals to pity for the sake of getting a conclusion accepted. For example: "I did not murder my mother and father with an axe. Please don't find me guilty; I'm suffering enough through being an orphan."

**ARGUMENTUM AD POPULUM**

This is known as Appealing to the Gallery, or Appealing to the People. To commit this fallacy is to attempt to win acceptance of an assertion by appealing to a large group of people. This form of fallacy is often characterized by emotive language. For example: "Pornography must be banned. It is violence against women." "The Bible must be true. Millions of people know that it is. Are you trying to tell them that they are all mistaken fools?"

**ARGUMENTUM AD NUMERAM**

This fallacy is

closely related to the argumentum ad populum. It consists of asserting that the more people who support or believe a proposition, the more likely it is that that proposition is correct.

**ARGUMENTUM AD VERECUNDIAM**

The Appeal to Authority uses the admiration of the famous to try and win support for an assertion. For example: "Isaac Newton was a genius and he believed in God." This line of argument is not always completely bogus; for example, reference to an admitted authority in a particular field may be relevant to a discussion of that subject. For example, we can distinguish quite clearly between: "Stephen Hawking has concluded that black holes give off radiation" and "John Searle has concluded that it is impossible to build an intelligent computer." Hawking is a physicist, and so we can reasonably expect his opinions on black hole radiation to be informed. Searle is a linguist, so it is questionable whether he is well-qualified to speak on the subject of machine intelligence.

**THE FALLACY OF ACCIDENT**

The Fallacy of Accident is committed when a general rule is applied to a particular case whose "accidental" circumstances mean that the rule is inapplicable. It is the error made when one goes from the general to the specific. For example: "Christians generally dislike atheists. You are a Christian, so you must dislike atheists." This fallacy is often committed by moralists and legalists who try to decide every moral and legal question by mechanically applying general rules.

**CONVERSE A ACCIDENT / HASTY GENERALIZATION**

This fallacy is the reverse of the fallacy of accident. It occurs when one forms a general rule by examining only a few specific cases which are not representative of all possible cases. For example: "Jim Bakker was an insincere Christian. Therefore all Christians are insincere."

**SWEEPING GENERALIZATION / DICTO SIMPLICITER**

A sweeping generalization occurs when a general rule is applied to a particular situation in which the features of that particular situation render the rule inapplicable. A sweeping generalization is the opposite of a hasty generalization.

**NON CAUSA PRO CAUSA / POST HOC ERGO PROPTER HOC**

These are known as False Cause fallacies. The fallacy of Non Causa Pro Causa occurs when one identifies something as the cause of an event but it has not actually been shown to be the cause. For example: "I took an aspirin and prayed to God, and my headache disappeared. So God cured me of the headache." The fallacy of Post Hoc Ergo Propter Hoc occurs when something is assumed to be the cause of an event merely because it happened before the event. For example: "The Soviet Union collapsed after taking up atheism. Therefore we must avoid atheism for the same reasons."

**CUM HOC ERGO PROPTER HOC**

This fallacy is similar to post hoc ergo propter hoc. It asserts that because two events occur together, they must be causally related, and leaves no room for other factors that may be the cause(s) of the events.

**PETITIO PRINCIPII**

This fallacy occurs when the premises are at least as questionable as the conclusion reached.

**CIRCULUS IN DEMONSTRANDO**

This fallacy occurs when one assumes as a premise the conclusion which one wishes to reach. Often, the proposition will be rephrased so that the fallacy appears to be a valid argument. For example: "Homosexuals must not be allowed to hold government office. Hence any government official who is revealed to be a homosexual will lose his job. Therefore homosexuals will do anything to hide their secret, and will be open to blackmail. Therefore homosexuals cannot be allowed to hold government office." Note that the argument is entirely circular; the premise is the same as the conclusion. An argument like the above has actually been cited as the reason for the British Secret Services' official ban on homosexual employees. Another example is the classic: "We know that God exists because the Bible tells us so. And we know that the Bible is true because it is the word of God."

nCOMPLEX QUESTION / FALLACY OF INTERROGATION\n\nThis is the Fallacy of Presupposition. One example is the classic loaded question:\n\n"Have you stopped beating your wife?"\n\nThe question presupposes a definite answer to another question which has not\neven been asked. This trick is often used by lawyers in cross-examination,\nwhen they ask questions like:\n\n"Where did you hide the money you stole?"\n\nSimilarly, politicians often ask loaded questions such as:\n\n"How long will this EC interference in our affairs be allowed to continue?"\n\nor\n"Does the Chancellor plan two more years of ruinous privatization?"\n\nIGNORATIO ELENCHI\n\nThe fallacy of Irrelevant Conclusion consists of claiming that an argument \nsupports a particular conclusion when it is actually logically nothing to do\nwith that conclusion.\n\nFor example, a Christian may begin by saying that he will argue that the\nteachings of Christianity are undoubtedly true. If he then argues at length\nthat Christianity is of great help to many people, no matter how well he\nargues he will not have shown that Christian teachings are true.\n\nSadly, such fallacious arguments are often successful because they arouse\nemotions which cause others to view the supposed conclusion in a more\nfavourable light.\n\nEQUIVOCATION\n\nEquivocation occurs when a key word is used with two or more different\nmeanings in the same argument. For example:\n\n"What could be more affordable than free software? But to make sure that it\nremains free, that users can do what they like with it, we must place a\nlicense on it to make sure that will always be freely redistributable."

e A\nis true". To understand why it is a fallacy, examine the truth table for \nimplication given earlier.\n\nDENIAL OF THE ANTECEDENT\n\nThis fallacy is an argument of the form "A implies B, A is false, therefore B\nis false". Again, the truth table for implication makes it clear why this is\na fallacy.\n\nNote that this fallacy is different from Non Causa Pro Causa; the latter has\nthe f orm "A implies B, A is false, therefore B is false", where A does NOT in\nfact imply B at all. Here, the problem is not that the implication is\ninvalid; rather it is that the falseness of A does not allow us to deduce\nanything about B.\n\nCONVERTING A CONDITIONAL\n\nThis fallacy is an argument of the form "If A then B, therefore if B then A".\n\nARGUMENTUM AD ANTIQUITAM\n\nThis is the fallacy of asserting that something is right or good simply\nbecause it is old, or because "that's the way it's always been." \n\nARGUMENTUM AD NOVITAM\n\nThis is the opposite of the argumentum ad antiquitam; it is the fallacy of\nasserting that something is more correct simply because it is new or newer\nthan something else.\n\nARGUMENTUM AD CRUMENAM\n\nThe fallacy of believing that money is a criterion of correctness; that those\nwith more money are more likely to be right.\n\nARGUMENTUM AD LAZARUM\n\nThe fallacy of assuming that because someone is poor he or she is sounder or\nmore virtuous than one who is wealthier. This fallacy is the opposite of the\nargumentum ad crumenam.\n\nARGUMENTUM AD NAUSEAM\n\nThis is the incorrect belief that an assertion is more likely to be true the\nmore often it is heard. An "argumentum ad nauseum" is one that employs\nconstant repetition in asserting something.\n\nBIFURCATION\n\nAlso referred to as the "black and white" fallacy, bifurcation occurs when\none presents a situation as having only two alternatives, where in fact other\nalternatives exist or can exist.\n\nPLURIMUM INTERROGATIONUM / MANY QUESTIONS\n\nThis fallacy occurs when a questioner demands a simple answer to a complex\nquestion.\n\nNON SEQUITUR\n\nA non-sequitur is an argument where the conclusion is drawn from premises\nwhich are not logically connected with it.\n\nRED HERRING\n\nThis fallacy is committed when irrelevant material is introduced to the issue\nbeing discussed, so that everyone's attention is diverted away from the\npoints being made, towards a different conclusion.\n\nREIFICATION / HYPOSTATIZATION\n\nReification occurs when an abstract concept is treated as a concrete thing.\n\nSHIFTING THE BURDEN OF PROOF\n\nThe burden of proof is always on the person making an assertion or\nproposition. Shifting the burden of proof, a special case of argumentum ad\nignorantium, is the fallacy of putting the burden of proof on the person who\ndenies or questions the assertion being made. The source of the fallacy is\nthe assumption that something is true unless proven otherwise.\n\nSTRAW MAN\n\nThe straw man fallacy is to misrepresent someone else's position so that it\ncan be attacked more easily, then to knock down that misrepresented position,\nthen to conclude that the original position has been demolished. It is a\nfallacy because it fails to deal with the actual arguments that have been\nmade.\n\nTHE EXTENDED ANALOGY\n\nThe fallacy of the Extended Analogy often occurs when some suggested general\nrule is being argued over. The fallacy is to assume that mentioning two\ndifferent situations, in an argument about a general rule, constitutes a\nclaim that those situations are analogous to each other.\n\nThis fallacy is best explained using a real example from a debate about\nanti-cryptography legislation:\n\n"I believe it is always wrong to oppose the law by breaking it." \n\nSuch a position is odious: it implies that you would not have supported\nMartin Luther King." \n\nAre you saying that cryptography legislation is as important as the\nstruggle for Black liberation? How dare you!" \n\nTU QUOQUE\n\nThis is the famous "you too" fallacy. It occurs when an action is argued to\nbe acceptable because the other party has performed it. For instance:\n\n"You're just being randomly abus

'From: maynard@ramsey.cs.laurentian.ca (Roger Maynard) Re: Leaf slump over\nOrganization: Dept. of Computer Science, Laurentian University, Sudbury, ON\nLines: 79\nIn <1993Apr13.190225.29001@newshub.lists.ca> dchhabra@stp1.lists.ca (Deepak Chhabra) writes:\nOn March 21, 1993 Roger Maynard wrote (in reply to an article by Graham Hudson):\n>>You don't think he is performing "under pressure" now? The major\ndifferences between playoff hockey and normal hockey is 1. play-ing every other night which is physically exhausting and 2. Youplay the same team in a consecutive string of games. Is thiswhat you mean by pressure? Have you even thought about what youmean by pressure, or are your thoughts, like most of the rest ofthis drivel, simply half-baked?\nThis was <1993Mar21.223936.6192@ramsey.cs.laurentian.ca>, for anybody who would like to check.\nHe went on (in another article) to say [paraphrased]\n>"Playoff hockey" is just an expression used by announcers to convince simple-minded folkslike yourself that what you are seeing is a betterproduct than a regular-season game.\nNOW\*, however, in article <1993Apr12.013939.23016@ramsey.cs.laurentian.ca> \n(Roger Maynard) writes:\n>>With a 4-2 win over a tough Whaler squad the Leafs showed all doubterswhat playoff hockey is all about. \n^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^  
^ ^ ^ ^ ^\nSo, Roger, what exactly \*is\* playoff hockey all about? Or is it a convenientphrase to use in certain circumstances only?\nYou see, when you spout off with flame bait too many times, sooner or laterit catches up with you....\nNice try Deepak, but "tough Whaler squad" should have clued you in to thefact that my Leaf woofing was tongue-in-cheek.\nIf playoff hockey is any more intense than the regular season variety thennit is because the teams are facing each other at least 4 consecutive timesnin 7 days and hockey being the contact sport that it is, some things willnbe carried over that might dissipate during the regular season. But that isnonly for some of the players. Many of the rest, who have been playing withninjuries, who miss their families, or who, like Grant Fuhr, would reallynrather be playing golf, don't really give a damn. Of course I can't say thisnfor sure, but I believe that this is fairly typical of human nature and Inndon't think that hockey players are above having what I consider typicallynhuman attitudes. \nWith the recent salary escalations the key players are actually losing nmoney by participating in the playoffs. The ones who regard the playoffn"take" as some kind of a

bonanza are fringe players who are unlikely\nto consistently be a force in the playoffs. Now I know some of you are\ngoing to come back with "winning spirit" and all of that crap but these\nplayers are professionals after all. While they may love to play the \ngame that love is entirely incidental to their purpose, which is, to make\nda decent living. \n\nOf course, the coach is a professional as well, and part of what he is \nbeing paid to do is motivate the players. So, if the coach does his\njob well enough the players may respond with a winning effort.\n\nThe second season, is after all, merely an exhibition. The true Champions\nof the league are the division winners, the teams that come out on top \nafter the long struggle of the season. The Stanley cup playoffs merely\naccord victory to the team that has remained healthy and "hot". The \nemphasis on the playoffs, with their "sudden death" appeal has been promoted\nby the media and the owners with profit purely in mind. Even if Pittsburgh\nloses the playoffs, we all know that they were really the best team in the\nleague over the year. They proved it.\n\nCordially, as always,\n\nrm\n\n-- \nRoger Maynard \nmaynard@ramsey.cs.laurentian.ca \n',

 "From: sera@zuma.UUCP (Serdar Argic)\nSubject: Re: Minority Abuses in Greece  
 .\nReply-To: sera@zuma.UUCP (Serdar Argic)\nDistribution: world\nLines: 201\n\nIn article <C60B63.G2M@panix.com> mpoly@panix.com (Michael S. Polymenakos) wr  
 ites:\n\n> Well, ZUMABOT claims just the opposite: That Greeks are not allowin  
 g\n>Turks to exit the country. Now, explain this: The number of Turks in\n>Thr  
 ace has steadily risen from 50,000 in 23 to 80,000, while the Greeks of\n\nDr.  
 Goebels thought that a lie repeated enough times could finally \nbe believed.  
 I have been observing that 'Poly' has been practicing \nGoebels' rule quite lo  
 yally. 'Poly's audience is mostly made of Greeks \nwho are not allowed to list  
 en to Turkish news. However, in today's \ninformed world Greek propagandists c  
 an only fool themselves. For \ninstance, those who lived in 1974 will remember  
 the TV news they \nwatched and the newspapers they read and the younger genera  
 tion can \nread the American newspapers of July and August 1974 to find out wh  
 at \nreally happened. \n\nThere are in Turkiye the Greek Hospital, The Greek G  
 irls' Lycee \nAlumni Association, the Principo Islands Greek Benevolent Societ  
 y, \nthe Greek Medical Foundation, the Principo Greek Orphanage Foundation, \n  
 the Yovakimion Greek Girls' Lycee Foundation, and the Fener Greek \nMen's Lyce  
 e Foundation. \n\nAs for Greece, the longstanding use of the adjective 'Turki  
 sh' \nin titles and on signboards is prohibited. The Greek courts \nhave order  
 ed the closure of the Turkish Teachers' Association, \nthe Komotini Turkish Yo  
 uth Association and the Ksanti \nTurkish Association on grounds that there are  
 no Turks\nin Western Thrace. Such community associations had been \nactive unt  
 il 1984. But they were first told to remove\nthe word 'Turkish' on their build  
 ings and on their official\npapers and then eventually close down. This is als  
 o the \nfinal verdict (November 4, 1987) of the Greek High Court.\n\nIn the ci  
 ty of Komotini, a former Greek Parliamentarian of Turkish\nparentage, was sent  
 enced recently to 18 months of imprisonment\nwith no right to appeal, just for  
 saying outloud that he was\nof Turkish descent. This duly-elected ethnic Turki  
 sh official\nwas also deprived of his political rights for a period of three \n  
 years. Each one of these barbaric acts seems to be none other than \na vehicl  
 e, used by the Greek governments, to cover-up their inferiority \ncomplex they  
 display, vis-a-vis, the people of Turkiye. \n\nThe Agreement on the Exchange o  
 f Minorities uses the term 'Turks,' \nwhich demonstrates what is actually mean  
 t by the previous reference \nto 'Muslims.' The fact that the Greek government  
 s also mention the \nexistence of a few thousand non-Turkish Muslims does not  
 change the \nessential reality that there lives in Western Thrace a much bigge  
 r \nTurkish minority. The 'Pomaks' are also a Muslim people, whom all the \nth  
 ree nations (Bulgarians, Turks, and Greeks) consider as part of \nthemselves.  
 Do you know how the Muslim Turkish minority was organized \naccording to the a  
 greements? Poor 'Poly.'\n\nIt also proves that the Turkish people are trapped  
 in Greece \nand the Greek people are free to settle anywhere in the world.\nTh  
 e Greek authorities deny even the existence of a Turkish\nminority. They pursu  
 e the same denial in connection with \nthe Macedonians of Greece. Talk about o  
 ppression. In addition,\nin 1980 the 'democratic' Greek Parliament passed Law  
 No. 1091,\nvirtually taking over the administration of the vakiflar and\nother  
 charitable trusts. They have ceased to be self-supporting\nreligious and cultu  
 ral entities. Talk about fascism. The Greek \ngovernments are attempting to ap  
 point the muftus, irrespective\nof the will of the Turkish minority, as state  
 official. Although\nthe Orthodox Church has full authority in similar matters  
 in\nGreece, the Muslim Turkish minority will have no say in electing\nnits reli  
 gious leaders. Talk about democracy.\n\nThe government of Greece has recently

destroyed an Islamic \nconvention in Komotini. Such destruction, which reflect s an \nattitude against the Muslim Turkish cultural heritage, is a \nviolation of the Lausanne Convention as well as the 'so-called' \nGreek Constitution, wh ich is supposed to guarantee the protection \nof historical monuments. \n\nThe government of Greece, on the other hand, is building new \nchurches in remote villages as a complementary step toward \nHellenizing the region.\n\nAnd you p ondered. Sidiropoulos, the president of the Macedonian Human \nRights Committe e, became the latest victim of a tactic long used by \nthe Greeks to silence c ritics of policies of forced assimilation \nof the Macedonian minority. A fore stry official by occupation, \nSidiropoulos has been sent to 'internal exile' on the island of \nKefalonia, hundreds of kilometers away from his native Flor ina. \nHis employer, the Florina City Council, asked him to depart in \n24 hou rs. The Greek authorities are trying to punish him for his \ninvolvement in Co penhagen. He returned to Florina by his own choice \nand remains without a job . \n\nHelsinki Watch, a well-known Human Rights group, had been investigating \nthe plight of the Turkish Minority in Greece. In August 1990, their \nfindin gs were published in a report titled \n\n 'Destroying Ethnic Identity: Turks o f Greece.'\n\nThe report confirmed gross violations of the Human Rights of the \nTurkish minority by the Greek authorities. It says for instance, \nthe Greek government recently destroyed an Islamic convent in \nKomotini. Such destructi on, which reflects an attitude against \nthe Muslim Turkish cultural heritage, is a violation of the \nLausanne Convention. \n\nThe Turkish cemeteries in the village of Vafeika and in Pinarlik\nwere attacked, and tombstones were broken. The cemetery in\nKarotas was razed by bulldozers.\n\nShall I go on? Why not? T he people of Turkiye are not going \nto take human rights lessons from the Gre ek Government. The \ndiscussion of human rights violations in Greece does not \nstop at the Greek frontier. In several following articles \nI shall dwell on and expose the Greek treatment of Turks\nin Western Thrace and the Aegean Mace donians.\n\nIt has been reported that the Greek Cypriot administration \nhas a n intense desire for arms and that Greece has made \nplans to supply it with t he tanks and armored vehicles it \nhas to destroy in accordance with the agree ment reached on \nconventional arms reductions in Europe. Meanwhile, Greek \na nd Greek Cypriot officials are reported to have planned \nto take ostentatious measures aimed at camouflaging the \ntransfer of these tanks and armored vehic les to southern \nCyprus, a process that will conflict with the spirit of \nth e agreement on conventional arms reduction in Europe.\n\nAn acceptable method may certainly be found when there\nis a will. But we know of various kinds of violent\nbehaviors ranging from physical attacks to the burning\nof buildings. The rugs at the Amfia village mosque were \ndragged out to the front of the bu ilding and burnt there. \nShots were fired on the mosque in the village of Ary ana.\n\nNow wait, there is more.\n\n 'Greek Atrocities in the Vilayet of Smyr na (May to July 1919), Inedited\n Documents and Evidence of English and Frenc h Officers,' Published by\n The Permanent Bureau of the Turkish Congress at L ausanne, Lausanne,\n Imprimerie Petter, Giesser & Held, Caroline, 5 (1919).\n\n pages 82-83:\n\n<< 1. The train going from Denizli to Smyrna was stopped a t Ephesus\n and the 90 Turkish travellers, men and women who were in it orde red\n to descend. And there in the open street, under the eyes of their\n husbands, fathers and brothers, the women without distinction of age\n were violated, and then all the travellers were massacred. Amongst\n the latter t he Lieutenant Salih Effendi, a native of Tripoli, and a\n captain whose name is not known, and to whom the Hellenic authorities\n had given safe conduct, were killed with specially atrocious tortures.\n\n 2. Before the battle, the wife of the lawyer Enver Bey coming from\n her garden was maltreated by Gree

k soldiers, she was even stripped of her garments and her servant Assie was violated.

3. The two tax gatherers Mustapha and Ali Effendi were killed in the following manner: Their arms were bound behind their backs with wire and their heads were battered and burst open with blows from the butt end of a gun.

4. During the firing of the town, eleven children, six little girls and five boys, fleeing from the flames, were stopped by Greek soldiers in the Ramazan Pacha quarter, and thrown into a burning Jewish house near bridge, where they were burnt alive. This fact is confirmed on oath by the retired commandant Hussein Hussni Effendi who saw it.

5. The clock-maker Ahmed Effendi and his son Sadi were arrested and dragged out of their shop. The son had his eyes put out and was then killed in the court of the Greek Church, but Ahmed Effendi has been no more heard of.

6. At the market, during the fire, two unknown people were wounded by bayonets, then bound together, thrown into the fire and burnt alive. The Greeks killed also many Jews. These are the names of some:

|                         |        |                    |        |                       |         |                        |         |                 |        |                |        |             |         |               |

'From: hades@coos.dartmouth.edu (Brian V. Hughes)\nSubject: Re: Installing RAM in a Quadra 800\nReply-To: hades@Dartmouth.Edu\nOrganization: Dartmouth College, Hanover, NH\nDisclaimer: Personally, I really don't care who you think I speak for.\nModerator: Rec.Arts.Comics.Info\nLines: 55\n\n\ntruesdel@ics.uci.edu (Scott Truesdell) writes:\n\n>This is an aside to Brian Hughes's (please, let's lose the cute phony names\n>everybody) posting about adding memory to a

Quadra 800.\n\n What phony names? My name is clearly visible in the headers , and I\nsing the post with my account name. If you have a problem with that,\n then you will have to get over it. I've used this account name for over\n10 years and the people who have been reading newsgroups for the last 7\ngenerall y recognize "Hades" as my account name. I have no intention of\nchanging the w ay I post.\n\n>I installed a couple of 16MB SIMMs in my Quadra and was somewha t dismayed\n>by the general complexity of the operation compared to, for exampl e, the\n>wonderfully designed LC III. It irritates me when Apple refuses to t ell how\n>to do it in the User\'s Manual so you have to guess at how to disass emble\n>the devise in question (it\'s the same for adding memory to LaserWrite r\n>Pro\'s).\n\n It isn\'t Apple\'s responsibility to tell its customers ho w to fool\naround with it\'s hardware. That is what Apple Service Techs get pa id to\ndo. I personally like the design of the Q800, and applaud Apple for\nco ming up with a good way to make use of the front space for all of\nthose drive bays. I like it a lot better than the 900/950 design, except\nfor those people who need Drive Arrays. I do, however, agree with you\nabout the LW Pro design.\n\n>The operation isn\'t very complicated if even a minimal amount of help we re\n>offered but Apple leaves you working blind.\n\n Again, its\'s not Appl e\'s place to make it easy for non-certified\nservice people to fool around wi th Apple hardware, even if they did buy\nit. Of course you are free to do what you want to your Mac, just don\'t\nget upset when your Apple Service Rep tells you that your warranty is no\nlonger valid.\n\n>After the memory was installed I was distraught that the top of the SIMMs\n>came into contact with the plasti c case frame. Mine actually contacted the\n>framework with quite a lot of pres sure -- enough so that the assembly of\n>the board back to the proper position was rather difficult and required\n>some force. I could have filed a little ex cess material off the top of the\n>SIMM boards but chose to let it stand as is . I have not had problems with\n>RAM yet so I will consider the problem annoyi ng but not catastrophic.\n\n This sounds like the kind of problem I had whe n I installed 4MB\nSIMMs into an LC, back before low-profile 4MB SIMMs were re adily\navailable. The standard 4MB SIMMs would contact the top of the case and\nmake it a bit difficult to close the LC, but it did close and work just\nfine. One of the nice things about Logic-Boards is that they are\ngenerally quite flexible and can withstand a fair amount of pressure.\n\n-Hades\n\n\n\n',

'From: cdt@sw.stratus.com (C. D. Tavares)\nSubject: Re: [long]: Gun Hearings Day in Massachusetts (April 7)\nOrganization: Stratus Computer, Inc.\nLines: 2 63\nDistribution: usa\nNNTP-Posting-Host: rocket.sw.stratus.com\n\n[This is a co-authored report from two of us who were there.]\n\nGun Owners Action League , our state rifle association, started the day\nwith a rally in the secluded c

ourtyard behind the statehouse at 9:30. It was looking sparse (about 40 people) until the speaker began, whereupon about 120 more people followed the loud speakers from wherever they had been lost, and filled out the area something proud. Mike Yacino of GOAL spoke. One of his best throwaway lines was to remind us that all of us holders of carry permits there had been checked and certified clear of all crimes by the state; while the people in the Statehouse behind us only had to be certified clean of "election fraud" to hold their jobs. Nancy Snow and Amos Hamburger were busy handing out ID buttons and sheets describing all the bills to be presented at the hearings, and telling people where to find their own representatives (and in too many cases, who they were). Mike warned us that the committee was going to suspend its rules and discuss a bill that hadn't made it onto the official list. It seems a delegation of students from Simon's Rock of Bard College (alma mater of Wayne Lo, who shot up the place with an SKS late last year) was being bussed in to testify for a bill to ban all sales of firearms or ammo to anyone who is not a state resident. The hearings were originally scheduled in the (large) Gardner Auditorium at 10:30, but that had been pre-empted by the Governor's hearings on the Framingham Eight (women in prison for killing abusive husbands, and seeking release). So we had until 1:30 to buttonhole our representatives, after which we would be squashed into an inadequate hearing room. One of my representatives' staffers was somewhat offensively smarmy. He said, "Oh, it must be gun hearings day again! The gun lobby is always so organized every year." I got a little pissed, and replied, "I'm not from the gun lobby -- I'm from your district." At 12:30, your second reporter arrived in time to notice a demonstration going on in front of the statehouse (where the pro-gunners weren't). Randy Price from the TV News was there, in his mirror reflective shades, talking to one of the anti-gun types, and several Simon's Rock anti-gun "close-the-loop-hole" protestors. (Earlier, Randy had covered the GOAL rally.) The room we had been assigned seated about 50. Remember, there were about 160 gun owners there, plus another 20-30 students and teachers from Bard. One of us had already reserved a seat; the other never got closer than the atrium outside -- and there was a crowd behind HIM. A cop took up station at the entrance and prevented the rest of the crowd from coming in. Soon after the debate started, a loudspeaker was set up outside in the hall for the benefit of everyone else. Everyone who was there (inside and outside) got to sign up on a sheet saying what their position was on which bills. Most of us signed up to "support GOAL's position" on "all bills." First, because of their time constraints, public officials got to testify. And first up was the bill that nobody had seen (the students had some curfew, I guess). Currently, Massachusetts law allows a non-resident to purchase long guns or ammo from a local dealer provided he complies with the laws of his own state. Previously, the law was similar, but applied only to non-residents from states adjoining Massachusetts. The Simon's Rock folks called the current law a "loop-hole" and wanted it closed. Two of their reps spoke about Wayne Lo and his "SKS assault rifle." The second one, Hodgekiss, a co-sponsor, had done his homework so well that he kept confusing Montana (Wayne Lo's home state) with Missouri, and became belligerent when about five gun owners in the gallery corrected him after his second muff. Carr, from Gloucester, claimed that the new bill would put the law back the way it was, but he was lying: the new bill allows purchases by non-residents of adjoining states ONLY if they have licensing in their own state "as strong as" that in Massachusetts. Since none of them do, that's that. Some of the things these two said were really offensive. "In some of these other states, anyone can buy a gun as long as

he's breathing!"\n(Oooooo!) "We have some very, very good gun laws in Massachusetts; if\nonly the other states would adopt the same type of laws, we would\n't\nbe having this situation -- but they won't." (Naughty, naughty!)\n\nNext up was Boston city councilman Albert "Dapper" O'Neill. He was\nthere to testify pro-gun, but in some ways he was a liability. He's\nreasonably elderly and tends to wander and repeat himself, plus he's\nalmost a caricature of a law-and-order politician. He badmouthed the\nACLU, said violent criminals should be executed, and that if he were\njudge, he'd give arrestees their "last rights" (pun intended) on the\nspot (at which many of the gun owners applauded, which bothered me.)\nHe said that all the proposed gun restrictions were a step in the\nright direction -- for the criminals. He said this FOUR times :-(\n\nTwo of the bills under consideration would allow police to rescind a\nCCW or FID, and confiscate all your guns, if someone had filed a\nrestraining order against you. (Note that the filing of a restraining\norder requires no warrant, no hearing, no evidence, and no conviction\n-- just an accusation.) Senator Barrett of Reading testified in favor\nof it, and patronized the pro-gunners there several times by saying,\n"I'm sure all the gun owners here will agree with me that we have to\nget these weapons out of the hands of people that our courts have\nconvicted." I haven't seen such a disgustingly disingenuous\nperformance since Nixon whined that he wasn't a crook.\n\nBarrett also spoke in favor of the bill making the FID card renewable\nevery five years, instead of permanent as it is now. The stated\npurpose is to remove FID cards from those who have become ineligible.\n"Revenue has nothing to do with it." (Yeah, right.) Apparently, some\ncongressmen think we're stupid enough to swallow the argument that\nit's preferable to process 1.6 million renewals every cycle in the\nvague hope of catching a recent felon than to simply take the goddamn\ncard away from a criminal at conviction time. As usual, hassle the\nlaw-abiding instead of the crook.\n\nThe two co-chairs of the committee were Rep. Caron and Sen. Jujuga.\nJujuga didn't say much (he was a co-sponsor of both "restraining\norder" bills) but Caron struck me as a sharp guy that wouldn't let any\nbad logic or lies on the part of either side to go unchallenged. (He\nwas a co-sponsor of one of the "restraining order" bills as well.) One\nof the younger reps on the committee (forgot his name) was\nvociferously pro-gun, somewhat embarrassingly so. His heart was in\nthe right place, but his arguments seemed to be confined to, "every\nyear it's the same damn thing, you come in here with this crap..."  
It's nice to have a friend on the committee, but he could have been\nmore effective.\n\nAt about 3:00, it was clear that the hall-jam couldn't continue.\nSomeone came out of another meeting hall and yelled at the cop because\nthe loudspeaker was disturbing their meeting, so the loudspeaker was\ndisconnected. So they found a bigger hall upstairs. One of us had\nto leave to catch his charter bus, and so missed the "public"\ntestimony; the other got a seat this time.\n\nCaron began by talking about how he got his FID 16 years ago, left\nthe state, and then returned without notifying them of his address change.\nHe complained that the state record system was not up-to-date and that\nhis PD back in his city of birth still thought he lived there. Great  
quote: "If you purchase a gun today, it will not get into the state\ncomputer system until 1999." (This was also an argument he used\nagainst the renewable FID card.)\n\nTestimony was heard from several "battered women," one of whom had\nbeen attacked by some guy in his 20's who had an FID card because he\n got it when he was 15 or thereabouts. They used a lot of emotion and\nsaid how they were scared of these men. A staffer of Attorney General\nHarshbarger testified in favor of this anti-gun bill, saying how\n50,000 restraining orders were granted last year, and how these women\nneeded to be protected. Caron no

ted that a restraining order was granted for 10 days, and then a hearing was held to determine whether the order would be extended to a year. He asked whether she would be satisfied if the FID were revoked at the time of this hearing rather than after the initial issuance of the FID. She gave some long ambulating circumlocution in response.

Then testimony against the bill was heard. Mike Yacino (who looks something like Einstein) got up and made the point that restraining orders were issued on too little evidence, that judges like to issue restraining orders just to let things cool off no matter who they think is right (man or woman), and that the hearings for restraining orders are lightning sessions with little time to consider facts.

Atty. Karen McNutt spoke with him a few times during his testimony.

Other pro-gunners got up to testify. One said he had had to file a restraining order against a tenant to clear her out, and that she countered by filing one against him! He noted that this would have allowed the state to confiscate his guns if the new bill became law.

One of the junior reps noted that "this is America" and we have to be certain that individual rights are respected. Senator Jujuga reiterated this, saying that "people who abuse smaller people can go to Hell as far as I care, but we have to be careful about equating conviction with a restraining order." (Point and match, Senator.)

Another pro-gunner got up and testified that he didn't know his citizenship "expired every 5 years," and that a driver's license was a privilege, not a right like the right to keep and bear arms.

A third got up and said the problem was with the criminal justice system, and argued in favor of a death penalty bill and public hangings. Senator Jujuga said he had himself tried to get a death penalty bill passed, and joking responded that he, too, favored public hangings. The speaker then responded, "I'll make you a deal. You get me the rope, and I'll tie the noose."

Next came public testimony on the Simon's Rock bill. A teacher testified that she had been the teacher of Wayne Lo, and that "he wouldn't have been able to shoot people inside a building while he was outside" without his evil gun. She said that the "loophole" should be closed to prevent something like this from "ever happening again".

Four or five other kids testified in favor of this bill, one of spilling tears for the good legislators. One of the students actually shot by Wayne Lo was also there. Many of them had T-shirts on, saying, "As long as one person can buy a gun in anger, none of us are safe -- support gun control." The committee was reluctant to grill or correct the kids, except for Caron, who corrected one student who had claimed that anyone could apply for an FID. "Only residents can get FID's," he said. (How much do you want to bet that this kid had no idea he had been conned into testifying for a bill that would cut out-of-staters completely off?)

Yacino and McNutt spoke again, this time noting that the bill as written would affect both ammo AND ALL guns possessed by out-of-staters. Karen also noted that hunters in CT, NH, and VT could be put away for a year if they wandered across the MA boundary somewhere in the woods and got challenged by game wardens. Yacino underscored the fact that Lo COULD have gotten an FID as a resident student -- and, hell, even an CCW, as he had NO criminal or mental record.

One junior rep was upset that it would take MA residents longer to buy a gun than out-of-staters, and thought it was "elitist". Another (Caron?) said that we need the protection of preventing non-residents from buying without an FID because only two other states in the union had "FID-type" cards, so complying with all the laws of one's home state was "not enough." One pro-gun speaker replied that this resembled a mother watching her son in a marching band and exclaiming, "Everyone's out of step but Johnny!"

All the Bard College people were filing out as the pro-gun testimony for this bill was made,

From: kilroy@gboro.rowan.edu (Dr Nancy\'s Sweetie)\nSubject: Certainty and Arrogance\nOrganization: Rowan College of New Jersey\nLines: 114\n\nDean Velasco quoted a letter from James M Stowell, president of\nMoody Bible Institute:\n\n> The other day, I was at the dry cleaner and the radio was playing.\n> It caught my attention because a talk show guest was criticizing\n> evangelical Christians, saying we believe in absolutes and think we\n> are the only ones who know what the absolutes are.\n\n> We affirm the absolutes of Scripture, not because we are arrogant\n> moralists, but because we believe in God who is truth, who has revealed\n> His truth in His Word, and therefore we hold as precious the strategic\n> importance of those absolutes." \n\nThere has been a lot of discussion, but so far nobody seems to have hit on\n> exactly what the criticism of "arrogance" is aimed at.\n\nThe arrogance being attacked is that we "think we are the only ones who know\n> what the absolutes are". In short, many evangelicals claim that they are\n> infallible on the matter of religious texts.\n\nIn particular, the problem is one of epistemology. As a shorthand, you can\n> think of epistemology as "how do you know?" That question, it turns out, is\n> a very troubling one.\n\nThe problem with 'absolute certainty' is that, at the bottom, at least some of\n> the thinking goes on inside your own head. Unless you can be certain that\n> everything which happens in your head is infallible, the reasoning you did to\n> discover a source of truth is in question.\n\nAnd that means you do NOT have absolute justification for your source of\n> authority -- which means you do NOT have absolute certainty.\n\nLet\'s take the specific example of Biblical Inerrancy, and a fictional\n> Inerrantist named Zeke. (The following arguments applies to the idea of\n> Papal Infallibility, too.)\n\nZeke has, we presume, spent some time studying the Bible, and history, and\n> several other topics. He has concluded, based on all these studies (and\n> possibly some religious experiences) that the Bible is a source of Absolute\n> Truth.\n\nHe may be correct; but even if he is, he cannot be certain that he is correct.\n> His conclusion depends on how well he studied history -- he may have made\n> mistakes, and the references he used may have contained mistakes. His\n> conclusion depends on how well he studied the Bible -- he may have made\n> mistakes. His conclusion depends on his own reasoning -- and he may have made\n> mistakes. (Noticing a common thread yet? 8-)\n\nEverything about his study of the world that he did -- everything that\n> happened in his own head -- is limited b

y his own thinking. No matter what\ne does to try and cover his mistakes, he can never be certain of his own\ninfallibility. As long as ANY PART of the belief is based on his own\nreasoning, that belief cannot be considered "absolutely certain".\n\nZeke believes that he has found a source of absolute truth -- but that belief\nis only as good as the quality of the search he made for it. Unless he can\nsay that his own reasoning is flawless, his conclusions are in doubt.\n\nAny belief that you hold about absolute sources of truth depends in part on\nyour own thinking -- there is no way out of the loop. Only an infallible\nthinker can have absolute certainty in all his beliefs.\n\n\nThis is easy to demonstrate. Let\'s go back to our shorthand method of doing\nepistemology: "how do you know?" Imagine a hypothetical discussion:\n\nA: The Bible is a source of absolute truth.\n\nB: How do you know?\n\nA: I studied history and the Bible and religious writings and church teachings and came to this conclusion.\n\nB: How do you know you studied history correctly?\n\nA: Well, I double-checked everything.\n\nB: How do you know you double-checked correctly?\n\nA: Well, I compared my answers with some smart people and we agreed.\n\nB: Just because some smart guy believes something that doesn\'t mean it is\ntrue. How do you know THEY studied it correctly?\n\nA: ... \n\nAnd, as you see, B will eventually get A to the point where he has to say "I\ncan\'t prove that there are no mistakes" -- and as long as you may have made a\nmistake, then you cannot be ABSOLUTELY certain.\n\nThere is no way out of the loop.\n\n\nThis is where the "arrogance of Christians" arises: many people believe\nthat their own personal research can give them absolute certainty about the\ndoctrines of Christianity -- they are implicitly claiming that they are\ninfallible, and that there is no possibility of mistake.\n\nClaiming that you CANNOT have made a mistake, and that your thinking has led\nto a flawless conclusion, is pretty arrogant.\n\n\*\n\nPeople who want to see this argument explained in great detail should try to\nfind The Infallibility of the Church, by George Salmon. He is attacking\nthe idea that the Pope can be knowably infallible (and he does so very well),\nbut the general argument applies equally well to the idea that the Bible is\nknowably Inerrant.\n\n\nDarren F Provine / kilroy@gboro.rowan.edu\n\nAt the core of all well-founded belief, lies belief that is unfounded." \n\n-- Ludwig Wittgenstein\n',

'From: db7n+@andrew.cmu.edu (D. Andrew Byler)\nSubject: Re: Revelations - BA BYLON?\nOrganization: Freshman, Civil Engineering, Carnegie Mellon, Pittsburgh, PA\nLines: 27\n\nHal Heydt writes:\n\n>That was only the fall of the \*Western\* Empire. The \*Eastern\* Empire\n>continued for another 1000 years--and a key element in it\'s fall was\n>the \*Christian\* sack of Constantinople.\n\nNote that I said the fall of Rome, not of the Empire. The Roman Empire\nlasted until 1453, with its transferred capital in Constantinople. The\nmain reason for it\'s fall was not so much the sack of Constantinople by\nthe men of the 4th Crusade (who were not Christians - they had been\nexcommunicated down to the last man after attacking the Christian city\nof Zara in Croatia), but rather the disastrous defeat in the battle of\nMazinkert. After the Turks breached the frontier, it was only a matter\nof time before the Empire fell, the inability of the Empire to hold onto\nthe rim of Anatolia, with the Ottomans and Rum Seljuks in the middle\nshould be quite obvious to any student of history. The sack of\nConstantinople only hastened the inevitable along. For if the Greeks\nhad wanted to save their empire, why would they not cooperate with the\nCrusaders when they came to do battle with the Saracens in the 1st-3rd\nCrusades? Because of their obstinacy over cooperating with people they\nconsidered heretics, even though those "heretics" were fighting for the\ncause of the Empire and Ch

ristendom in doing battle with the Turkish\nhordes in Anatolia, Edessa, Lebano  
n, Palastine, and Syria, the some\nhordes who were to later sack Constantinopl  
e, and overrun a third of\nEurope (the Balkans, Hungary, the Ukraine, the Cauc  
asus, etc.)\n\nAndy Byler\n',

'From: set@matt.ksu.ksu.edu (ViSioNary Gfx)\nSubject: ATTENTION SUPER NINTEN  
DO AND GENESIS PLAYERS READ THIS\nOrganization: Kansas State University\nLines  
: 56\nDistribution: world\nNNTP-Posting-Host: matt.ksu.ksu.edu\n\n\nIM pleas  
ed to announce a new revolutionary device that allows you to\ncopy super ninte  
ndo and genesis games to floppy disk. Then later\nplay from floppy disk with  
out the cart. This is a independent system\nthat interfaces with your SNES or  
Genesis.\n\nOTHER FEATURES\n\n\*Store multiple copies of cart. save game to dis  
k (up to 32 saves to disk)\n\n\*Save your position in SNES games that don't no  
rally have a save feature\n\n\*Switch your SNES into slow motion mode\n\n\*Use c  
odes to get unlimited lives and other "cheats" in many games.\n\nThe Multi-Gam  
e Hunter is capable of copying both SNES and Genesis game \ncarts to standard  
IBM PC formatted floppy disks. The games can then be played directly from the f  
loppy disk. NOTE:IT does not require a PC\n\nFull color on-screen icons and me  
nus make operation for the MGH so simple\nthat even a child could operate it.  
Options can be selected simply by choosing the selection with the game control  
ler and pressin a button.\n\nAdd a Game saver adapter to your system for more  
game playing power. The\nGame saver allows you to save your position to disk  
in almost any SNES game!\nReload your saved position any time. Enable it's s  
low-motion feature for those really tough games.\n\nFor more control over game  
play, We have the Game finger software. The\ngame finger software can give yo  
u unlimited lives or warp you to new levels in\nyour favorite SNES games. Bri  
ng back to life those really frustrating games.\n\nAlso if you know how to pro  
gram 6518 6502 ASM code you can create your own\nSNES demos or games.\n\nMGH i  
ncludes\n\nBase unit,disk drive (high density 3.5 drive), 16megabit RAM, 256 S  
RAM,\nall adapters and comes ready to hook up to your gameing system.\n\nONLY  
thing not included is the power supply which you can pick up at\nradio shack.\n\nAll for only \$500\n\nDISCLAMER\n\nthe customer assumes all responsibility f  
or the use and or misuse of this \nproduct. We in no way encourage nor condon  
e the use of this product for\nsoftware piracy. This device is intended soley  
for making legal backup\ncopies. Neither Nintendo or Sega has giving official  
endorsement of the \nproducts described herein.\n\nEmail me for more info or t  
o make a purchase\n.\n\n\n',

'From: lance@hartmann.austin.ibm.com (Lance Hartmann)\nSubject: Re: Diamond Stealth 24 & Windows problems!!!\nSummary: Users complain of service from Diamond.\nReply-To: lance%hartmann.austin.ibm.com@ibmpa.awdpa.ibm.com\nOrganization: IBM, Austin\nKeywords: diamond video s3 windows\nLines: 43\n\nIn article <1pifisINNhsr@dns1.NMSU.Edu> jdiers@dante.nmsu.edu (DIERS) writes:\n>\n>I own a Stealth 24 card from diamond. When using the 640X480x16.7mil win 3.1\n>driver the card and driver work but are not very fast. ALL of the other\n>windows drivers have a number of bugs. Shadows remain when windows are\n>erased and text boxes are often unreadable. All attempts to get help from\n>Diamond have failed. I have called the Tech support and never been able\n>to get past the hold line (a toll call) in a reasonable time (ie 10min).\n>Leaving voice mail has not helped either. The BBS is a joke! It always\n>has too many people on to download anything. You cannot even get a file\n>listing (it considers that a download!). I have faxed the tech support group.\n>All this with no reponse.\n>\n>The bottom line is if you are looking for a fast card and want to use it\n>for windows, DO NOT get a Diamond product. Try another vendor, I wish I had.\n\nWhile others here may have had better experiences, I, too, share the\nsentiments posted above. Though I have the original Stealth/VRAM,\nit is only "relatively" recent that the Windows drivers for this card\nhave evolved to a point of decent performance. Note that there are\nSTILL a couple of modes I can not use (ie. will not) due to shadowing,\nmis-drawn check boxes, etc. I believe the version I have is 2.01.\nIf there's a more recent release, I'd appreciate if someone would\ndrop me a note to let me know -- I haven't been able to get on their\nBBS lately to check again. Naturally, Diamond doesn't even bother\nnotifying me of fixes/releases.\n\nDiamond was helpful when I finally reached the "right" person in curing\nsome of my Windows' problems due to an address conflict. The conflicting\naddresses (2E0, 2E8) were OMITTED in at least my version of the\nDiamond/VRAM manual. I hope it has been corrected by now. The tech rep\nexplained that ALL S3-based boards use these addresses. I have not\nconfirmed the validity of that statement.\n\nWhen I upgrade my mother board in the near future (hopefully with some\nform of local bus), I'll seek a video solution from someone other than\nDiamond.\n\nLance Hartmann (lance%hartmann.austin.ibm.com@ibmpa.awdpa.ibm.com)\nYes, that IS a \"%'\n' (percent sign) in my network address.\n-----\n\nAll statements, comments, opinions, etc. herein reflect those of the author\nand shall NOT be misconstrued as those of IBM or anyone else for that matter.\n',

'From: davet@interceptor.cds.tek.com (Dave Tharp CDS)\nSubject: Re: Rejetting carbs..\nKeywords: air pump\nDistribution: na\nOrganization: Tektronix - Colorado Data Systems, Englewood, CO\nLines: 58\n\nIn article <jburney.734756216@hydra.nodc.noaa.gov> jburney@hydra.nodc.noaa.gov (Jeff Burney) writes:\n>\n>If we are only talking about 4-stroke (I think I can understand exhaust\n>pulse affect in a 2-stroke), the intake valve is closed on the\n>exhaust stroke and the gas is pushed out by the cyclinder. I guess\n>there is some gas compression that may affect the amount pushed out\n>but the limiting factor seems to be the header pipe and not the\n>canister. Meaning: would gases "so far" down the line (the canister)\n>really have an effect on the exhaust stroke? Do the gases really\n>compress that much?\n\nFor discussion purposes, I will ignore dynamic effects like pulses\nin the exhaust pipe, and try to paint a useful mental picture.\n\n1. Unless an engine is supercharged, the pressure available to force\nair into the intake tract is \_atmospheric\_. At the time the intake\nvalve is opened, the pressure differential available to move air is only\

the difference between the combustion chamber pressure (left over after the exhaust stroke) and atmospheric. As the piston descends on the intake stroke, combustion chamber pressure is decreased, allowing atmospheric pressure to move more air into the intake tract. At no time does the pressure ever become "negative", or even approach a good vacuum. At the time of the exhaust valve closing, the pressure in the combustion chamber is essentially the pressure of the exhaust system up to the first major flow restriction (the muffler). Note that the volume of gas that must flow through the exhaust is much larger than the volume that must flow through the intake, because of the temperature difference and the products of combustion. In the last 6-8 years, the Japanese manufacturers have started paying attention to exhaust and intake tuning, in pursuit of almighty horsepower. At this point in time, on high-performance bikes, substitution of an aftermarket free-flow air filter will have almost zero affect on performance, because the stock intake system flows very well anyway. Substitution of an aftermarket exhaust system will make very little difference, unless (in general) the new exhaust system is much louder than the stocker. On older bikes, exhaust back-pressure was the dominating factor. If free-flowing air filters were substituted, very little difference was noted, unless a free-flowing exhaust system was installed as well. In general, an engine can be visualized as an air pump. At any given RPM, anything that will cause the engine to pump more air, be it on the intake or exhaust side, will cause it to produce more horsepower. Pumping more air will require recalibration (rejetting) of the carburetor.

Rather, I was trying to show the absurdity of atheistic materialist relativists trying to embrace some common moral system as though it were absolute. Man knows in his heart that there is right and wrong. We have all inherited this knowledge. \n\nNo matter how "absurd" it is to suggest that a common moral system created by mankind is absolute, it is not contrary to reason to suggest that a common moral system created by mankind is sensible. In fact, for the Bible to be of any use to mankind as a moral code, it must be interpreted by mankind and a workable moral system created for everyday use.\n\nThe Jewish Talmud is the result of centuries of Biblical scholars analysing every word of the Torah to understand the morality behind it. The Children of Israel were given a very strict set of Moral, Civil, Judicial and Ceremonial Laws to follow and yet this was clearly not enough to cover every instance of moral dilemma in their Society. For a Christian, the situation is no better.\n\nIt seems to me that the only code of morality that we have from the Judeo-Christian God is that which is contained in the Bible (which we ca

n see from\nthe diverse opinions in the Christian newsgroups is not clear). Th ere may well\nbe an absolute morality defined by the Judeo-Christian God for m ankind to\nfollow but it seems that we only have a subset simply because the c oncept was\nwritten down by man.\n\nThis leads to the problem of defining mora lity for our society. If we take the\ndivine Morality then we have a code of p ractice which may be interpreted in many\ndifferent ways (as an example, consi der the immolation of heretics in the\nfifteenth century and the interpretatio n of the Bible which allows a man to do\nthat to another man under the precept to administer Justice). If we take an\nagnostic Morality then we have a code o f practice that can be modified to suit\nsociety (with all the danger that thi s implies). Alternatively, we could take\nthe basis of the Judeo-Christian mor ality and interpret/extend this to create\nand justify a code of morality whic h suits the society we live in and enables\nthe people to live Righteously (as many Christian and Non-Christian philosophers\nhave done).\n\nWhatever the dri ving force behind the definition of morality for our society, I\nthink the imp ortant aspect is the result.\n\nDavid.\n\n---\n\nOn religion:\n\n"Oh, where is t he sea?", the fishes cried,\nAs they swam its clearness through.\n\n",

'From: swH@capella.cup.hp.com (Steve Harrold)\nSubject: Re: Need Info on Dia mond Viper Video Card\nOrganization: Hewlett Packard, Cupertino\nLines: 46\n\nExperiences with Diamond Viper VLB video card\n\nSeveral problems:\n\n1) The a d specified 16.7 million colors at 640x480 resolution with 1MB\n of VRAM, wh ich is what I have. This color depth is NOT SUPPORTED\n with video BIOS vers ion 1.00 and drivers version 1.01. A max of 65K\n colors are supported at 64 0x800 and 800x600 resolutions with 1MB\n VRAM.\n\n2) With the 65K color choi ce I notice two minor irritations:\n\n a) Under NDW, when an entry in a list is highlighted (such as in an\n Open menu) and then is deselected, a fain t vertical line often\n remains where the left edge of the highlighted re ctangle used to\n be.\n\n b) With Word for Windows, when you use shadin g in a table, the\n display shows the INVERSE of the shading; for example , if you\n shade the cell as 10%, the display is 90% (the printout is OK) .\n\n3) The big killer bug is using the Borland C++ Integrated Development\n Environment. The problem occurs when you click on the Turbo Debugger\n icon (or use the Debugger option in the Run command), and the\n debugger applicat ion goes to VGA character mode (as it is designed\n to do). The screen goes haywire, and is largely unreadable. The\n Turbo Debugger display is all garb led.\n\n Through trial and error, I have found that when the disrupted scree n\n is displayed you should do [Alt-Spacebar] followed by the letter\n "R" . This instructs Turbo Debugger to refresh the screen, and it\n does this sa tisfactorily. I wish I didn't have to do this.\n\n The bug is more than wit h the Diamond drivers. The same disruptive\n behavior happens with the stand ard VGA driver that comes with\n Windows. There must be something in the vid eo card that mishandles\n the VGA mode.\n\n The problem is not my monit or. The same bug shows up when I use\n another monitor in place of my usual one.\n\nI still like this video card, and am hoping its problems will be\nre me died (they do offer a 5 year warranty).\n\n---\n\nswH, 20apr93\n",

'From: leech@cs.unc.edu (Jon Leech)\nSubject: Space FAQ 14/15 - How to Become an Astronaut\nKeywords: Frequently Asked Questions\nArticle-I.D.: cs.astronaut\_733694515\nExpires: 6 May 1993 20:01:55 GMT\nDistribution: world\nOrganization: University of North Carolina, Chapel Hill\nLines: 313\nSupersedes: <astronaut\_730956661@cs.unc.edu>\nNNTP-Posting-Host: mahler.cs.unc.edu\n\nArchive-name: space/astronaut\nLast-modified: \$Date: 93/04/01 14:39:02 \$\n\nHOW TO BECOME AN ASTRONAUT\n\nFirst the short form, authored by Henry Spencer, then an official NASA\nannouncement.\n\nQ. How do I become an astronaut?\n\nA. We will assume you mean a NASA astronaut, since it's probably\nimpossible for a non-Russian to get into the cosmonaut corps (paying\npassengers are not professional cosmonauts), and the other nations have\nso few astronauts (and fly even fewer) that you're better off hoping to\nwin a lottery. Becoming a shuttle pilot requires lots of fast-jet\nexperience, which means a military flying career; forget that unless you\nwant to do it anyway. So you want to become a shuttle "mission\nspecialist".\n\nIf you aren't a US citizen, become one; that is a must. After that,\nthe crucial thing to remember is that the demand for such jobs vastly\nexceeds the supply. NASA's problem is not finding qualified people,\nbut thinning the lineup down to manageable length.\n\tIt is not enough\n\tto be qualified; you must avoid being \*dis\*qualified for any reason,\nmany of them in principle quite irrelevant to the job.\n\nGet a Ph.D. Specialize in something that involves getting your hands\ndirty with equipment, not just paper and pencil. Forget computer\nprogramming entirely; it will be done from the ground for the foreseeable future. Degree(s) in one field plus work experience in\nanother seems to be a frequent winner.\n\nBe in good physical condition, with good eyesight.\n\t(DO NOT get a\nradial keratotomy or similar hack to improve your vision; nobody knows\nwhat sudden pressure changes would do to RKed eyes, and long-term\neffects are poorly understood. For that matter, avoid any other\nsignificant medical unknowns.) If you can pas

s a jet-pilot physical,\n you should be okay; if you can't, your chances are poor.\n\n Practise public speaking, and be conservative and conformist in\n appearance and actions; you've got a tough selling job ahead, trying\n to convince a cautious, conservative selection committee that you\n are better than hundreds of other applicants. (And, also, that you\n will be a credit to NASA after you are hired: public relations is\n a significant part of the job, and NASA's image is very prim and\n proper.) The image you want is squeaky-clean workaholic yuppie.\n Remember also that you will need a security clearance at some point,\n and Security considers everybody guilty until proven innocent.\n Keep your nose clean.\n\n Get a pilot's license and make flying your number one hobby;\n experienced pilots are known to be favored even for non-pilot jobs.\n\n Work for NASA; of 45 astronauts selected between 1984 and 1988,\n 43 were military or NASA employees, and the remaining two were\n a NASA consultant and Mae Jemison (the first black female astronaut).\n If you apply from outside NASA and miss, but they offer you a job\n at NASA, \*\*\*TAKE IT\*\*\*; sometimes in the past this has meant "you\n do look interesting but we want to know you a bit better first".\n\n Think space: they want highly motivated people, so lose no chance\n to demonstrate motivation.\n\n Keep trying. Many astronauts didn't make it the first time.\n\n\n\n\n\n NASA\n National Aeronautics and Space Administration\n Lyndon B. Johnson Space Center\n Houston, Texas\n\n Announcement for Mission Specialist and Pilot Astronaut Candidates\n =====\n\n\n Astronaut Candidate Program\n -----\n\n\n The National Aeronautics and Space Administration (NASA) has a need for\n Pilot Astronaut Candidates and Mission Specialist Astronaut Candidates\n to support the Space Shuttle Program. NASA is now accepting on a\n continuous basis and plans to select astronaut candidates as needed.\n\n Persons from both the civilian sector and the military services will be\n considered.\n\n All positions are located at the Lyndon B. Johnson Space Center in\n Houston, Texas, and will involve a 1-year training and evaluation\n program.\n\n Space Shuttle Program Description\n -----\n\n\n The numerous successful flights of the Space Shuttle have demonstrated\n that operation and experimental investigations in space are becoming\n routine. The Space Shuttle Orbiter is launched into, and maneuvers in\n the Earth orbit performing missions lasting up to 30 days. It then\n returns to earth and is ready for another flight with payloads and\n flight crew.\n\n The Orbiter performs a variety of orbital missions including deployment\n and retrieval of satellites, service of existing satellites, operation\n of specialized laboratories (astronomy, earth sciences, materials\n processing, manufacturing), and other operations. These missions will\n eventually include the development and servicing of a permanent space\n station. The Orbiter also provides a staging capability for using higher\n orbits than can be achieved by the Orbiter itself. Users of the Space\n Shuttle's capabilities are both domestic and foreign and include\n government agencies and private industries.\n\n The crew normally consists of five people - the commander, the pilot,\n and three mission specialists. On occasion additional crew members are\n assigned. The commander, pilot, and mission specialists are NASA\n astronauts.\n\n\n Pilot Astronaut\n\n Pilot astronauts serve as both Space Shuttle commanders and pilots.\n During flight the commander has onboard responsibility for the vehicle,\n crew, mission success and safety in flight. The pilot assists the\n commander in controlling and operating the vehicle. In addition, the\n pilot may assist in the deployment and retrieval of satellites utilizing

g\n the remote manipulator system, in extra-vehicular activities, and other\n payload operations.\n\n Mission Specialist Astronaut\n\n Mission specialist astronauts, working with the commander and pilot,\n have overall responsibility for the coordination of Shuttle operations\n in the areas of crew activity planning, consumables usage, and\n experiment and payload operations. Mission specialists are required to\n have a detailed knowledge of Shuttle systems, as well as detailed\n knowledge of the operational characteristics, mission requirements and\n objectives, and supporting systems and equipment for each of the\n experiments to be conducted on their assigned missions. Mission\n specialists will perform extra-vehicular activities, payload handling\n using the remote manipulator system, and perform or assist in specific\n experimental operations.\n\n Astronaut Candidate Program\n=====\n\n Basic Qualification Requirements\n-----\n\n Applicants MUST meet the following minimum requirements prior to\n submitting an application.\n\n Mission Specialist Astronaut Candidate:\n\n 1. Bachelor's degree from an accredited institution in engineering,\n biological science, physical science or mathematics. Degree must be\n followed by at least three years of related progressively responsible,\n professional experience. An advanced degree is desirable and may be\n substituted for part or all of the experience requirement (master's\n degree = 1 year, doctoral degree = 3 years). Quality of academic\n preparation is important.\n\n 2. Ability to pass a NASA class II space physical, which is similar to a\n civilian or military class II flight physical and includes the following\n specific standards:\n\n\t Distant visual acuity:\n\t 20/150 or better uncorrected,\n\t correctable to 20/20, each eye.\n\n\t Blood pressure:\n\t 140/90 measured in sitting position.\n\n 3. Height between 58.5 and 76 inches.\n\n Pilot Astronaut Candidate:\n\n 1. Bachelor's degree from an accredited institution in engineering,\n biological science, physical science or mathematics. Degree must be\n followed by at least three years of related progressively responsible,\n professional experience. An advanced degree is desirable. Quality of\n academic preparation is important.\n\n 2. At least 1000 hours pilot-in-command time in jet aircraft. Flight\n test experience highly desirable.\n\n 3. Ability to pass a NASA Class I space physical which is similar to a\n military or civilian Class I flight physical and includes the following\n specific standards:\n\n\t Distant visual acuity:\n\t 20/50 or better uncorrected\n\t correctable to 20/20, each eye.\n\n\t Blood pressure:\n\t 140/90 measured in sitting position.\n\n 4. Height between 64 and 76 inches.\n\n Citizen Ship Requirements\n\n Applications for the Astronaut Candidate Program must be citizens of\n the United States.\n\n Note on Academic Requirements\n\n Applicants for the Astronaut Candidate Program must meet the basic\n education requirements for NASA engineering and scientific positions --\n specifically: successful completion of standard professional curriculum\n in an accredited college or university leading to at least a bachelor's\n degree with major study in an appropriate field of engineering,\n biological science, physical science, or mathematics.\n\n The following degree fields, while related to engineering and the\n sciences, are not considered qualifying:\n\n - Degrees in technology (Engineering Technology, Aviation Technology,\n\t Medical Technology, etc.)\n\n - Degrees in Psychology (except for Clinical Psychology, Physiological\n\t Psychology, or Experimental Psychology which are qualifying).\n\n - Degrees in Nursing.\n\n - Degrees in social sciences (Geography, Anthropology, Archaeology, etc.)\n\n - Degrees in Aviation, Aviation Management or similar fields.\n\n Application Procedures\n

-----\n\n Civilian\n\n The application package may be obtained by writing to:\n\n\tNASA Johnson Space Center\n\n\tAstronaut Selection Office\n\n\tATTN: AHX\n\n\tHouston, TX 77058\n\n Civilian applications will be accepted on a continuous basis. When NASA\n decides to select additional astronaut candidates, consideration will be\n given only to those applications on hand on the date of decision is\n made. Applications received after that date will be retained and\n considered for the next selection. Applicants will be notified annually\n of the opportunity to update their applications and to indicate\n continued interest in being considered for the program. Those applicants\n who do not update their applications annually will be dropped from\n consideration, and their applications will not be retained. After the\n preliminary screening of applications, additional information may be\n requested for some applicants, and person listed on the application as\n supervisors and references may be contacted.\n\n Active Duty Military\n\n Active duty military personnel must submit applications to their\n respective military service and not directly to NASA. Application\n procedures will be disseminated by each service.\n\n Selection\n ----- \n\n Personal interviews and thorough medical evaluations will be required\n for both civilian and military applicants under final consideration.\n Once final selections have been made, all applicants who were considered\n will be notified of the outcome of the process.\n\n Selection rosters established through this process may be used for the\n selection of additional candidates during a one year period following\n their establishment.\n\n General Program Requirements\n\n Selected applicants will be designated Astronaut Candidates and will be\n assigned to the Astronaut Office at the Johnson Space Center, Houston,\n Texas. The astronaut candidates will undergo a 1 year training and\n evaluation period during which time they will be assigned technical or\n scientific responsibilities allowing them to contribute substantially to\n ongoing programs. They will also participate in the basic astronaut\n training program which is designed to develop the knowledge and skills\n required for formal mission training upon selection for a flight. Pilot\n astronaut candidates will maintain proficiency in NASA aircraft during\n their candidate period.\n\n Applicants should be aware that selection as an astronaut candidate does\n not insure selection as an astronaut. Final selection as an astronaut\n will depend on satisfactory completion of the 1 year training and\n evaluation period. Civilian candidates who successfully complete the\n training and evaluation and are selected as astronauts will become\n permanent Federal employees and will be expected to remain with NASA for\n a period of at least five years. Civilian candidates who are not\n selected as astronauts may be placed in other positions within NASA\n depending upon Agency requirements and manpower constraints at that\n time. Successful military candidates will be detailed to NASA for a\n specified tour of duty.\n\n NASA has an affirmative action program goal of having qualified\n minorities and women among those qualified as astronaut candidates.\n\n Therefore, qualified minorities and women are encouraged to apply.\n\n Pay and Benefits\n ----- \n\n Civilians\n\n Salaries for civilian astronaut candidates are based on the Federal\n Governments General Schedule pay scales for grades GS-11 through GS-14,\n and are set in accordance with each individuals academic achievements\n and experience.\n\n Other benefits include vacation and sick leave, a retirement plan, and\n participation in group health and life insurance plans.\n\n Military\n\n Selected military personnel will be detailed to the Johnson Space Center\n but will remain in an active duty status for pay, benefits, leave, and\n other

om writes...\n> << < For example: why does the universe exist at all? \n> \n>  
 <Whether there is a "why" or not we have to find it. This is Pascal\'s(?) wage  
 r.\n> <If there is no why and we spend our lives searching, then we have merel  
 y\n> <wasted our lives, which were meaningless anyway. If there is a why and w  
 e\n> ..\n> I find this view of Christianity to be quite disheartening and sad  
 .\n> The idea that life only has meaning or importance if there is a Creator\n  
 > does not seem like much of a basis for belief.\n\nPlease forgive all the inc  
 lusions. I suppose they are neccessary to follow\nthe argument.\n\nMy point is  
 that "if life has meaning or importance then we should try\nto find that meani  
 ng or importance" which is almost a tautology. (I hope\nI\'m not being too pat  
 ronizing.) One term for that meaning is "Creator",\nthough that is not obvious  
 from my above argument.\n\n> And the logic is also appalling: "God must exist  
 because I want Him to."\n\n(It\'s more like "I think, therefore I am, therefor  
 e God is.")\n\n> I have heard this line of "reasoning" before and wonder how  
 prevalent\n> it is. Certainly in modern society many people are convinced life  
 is\n> hopeless (or so the pollsters and newscasts state), but I don\'t see\n>  
 where this is a good reason to become religious. If you want \'meaning\'\n> wh  
 y not just join a cult, such as in Waco? The leaders will give you\n> the secu  
 rity blanket you desire.\n\nUnfortunately the term "religious" is ambiguous to  
 me in this context.\nI could say that searching for meaning in life is by defi  
 nition being\nreligious. I could say cult followers by definition have given u  
 p on \nthe search.\n\nIf you want "meaning" why not search for the truth?\n\nS  
 o far, my understanding of Christianity is congruent with my understanding\nof  
 truth. There have been many before me who have come to conclusions \nthat are  
 worded in ways that make sense to me. By no means does that imply\nthat I unde  
 rstand everything. \n\nChris Mussack\n',

^^^^\n>>>>took a large amount of punishment and refused submit? \n>>\n>>>I'm curious why you think that particular adjective is important.\n>>\n>>>I'm curious why you took a beign statement and cross-posted it to several\ndifferent news groups, including something along the lines of \n>>alt.discrimination.\n\n>Exsqueeze me? I saw \*your\* original post in alt.discrimination.\n>Your post was cross-posted to three groups. My followup was cross-posted\nto two of those three (omitting soc.motss).\n\n>Now, instead of engaging in meta-discussion off the topic, could you answer \n>the question posed? If your statement is so "beign"(!?), you should have no\n>trouble politely responding to a polite query.\n\n Well, I don't think your query was exactly polite, but I will TRY to\ngive you a polite response. Something atypical of the net, but here it goes.\n\n Black is a descriptive adjective that describes Mr. King. From many\nof the newspaper, radio, and tv news reports I have seen, this adjective\n\nis commonly in front of his name. I have NEVER seen anyone complain about\nthe use of this adjective when used in a benign manner. I did not say that\nMr. King was a no good black! I do not know Mr. King and would not make this\nascertian without some evidence to this effect. I used it PURELY as a\ndescriptive adjective in the same manner than many ( most ) news people have\nused it in the past.\n\n The entire second trial was about race, Ted. I don't feel compelled to\ndiscuss Mr. King's racial background, but had Mr. King been white there would\nnot have been a second trial. You probably are saying that the beating would\nnot have occurred if he were white, but that is an extremely difficult call\nto make. It is possible the case, but not definately. \n\n I still think your actions are crap, Ted. They are far more divisive than\nme using the adjective 'black' in a non-derogenory manner. Would you have\nbeen happier if I had used 'African-american'? If so, then you really are\nlost in the world of PC. You have already been instrumental in getting one\npersons net access revoked, and I wonder if you have sent a copy of my\nmessage to my sys admin with a plea that I am not worthy of posting.\n\n The way you went about this 'polite' inquiry makes me believe it was\nanything but.\n\n\n',

'From: davewood@bruno.cs.colorado.edu (David Rex Wood)\nSubject: Creating application contexts multiple times???\nNntp-Posting-Host: bruno.cs.colorado.edu\nOrganization: University of Colorado, Boulder\nLines: 94\n\nThe subject does not describe the problem I am having very well. Please read\nnon...\n\nI am trying to write a function which creates an XtAppContext and a Widget,\ndisplays the widget for a while, then destroys everything and returns. The\nproblem is

that multiple calls to this function cause a variety of problems\nincluding (depending on which calls I make to get rid of things):\n\n- Core Dump\n- BadPixmap X Error\n- Widget not unmapped\n\n\nHere is a simple (C++) program I wrote to show the problem:\n\n#include <X11/Xlib.h>\n#include <Xm/Xm.h>\n#include <Xm/PushButton.h>\n\nvoid bla()\n{\n XtAppContext app;\n Display \*dis = XOpenDisplay("");\n int junk = 0;\n Widget top=XtAppInitialize(&app, "test", NULL, 0, &junk, NULL,\n NULL, NULL, 0);\n Widget box = XtVaCreateManagedWidget("blaaa", xmPushButtonWidgetClass,\n top,\n XmNheight, 50,\n XmNwidth, 50,\n NULL);\n XtRealizeWidget(top);\n //Same as XtAppMainLoop but with only 10 XEvents\n for (int i=0;i<=10;i++)\n {\n XEvent event;\n XtAppNextEvent(app, &event);\n XtDispatchEvent(&event);\n }\n // WHAT SHOULD I PUT HERE???\n XtUnrealizeWidget(top);\n XtDestroyWidget(top);\n XtDestroyApplicationContext(app);\n XCloseDisplay(dis);\n // ???\n}\n\nmain()\n{\n for (int i=0;i<=20;i++)\n bla();\n}\n\nNote that I rewrote XtAppMainLoop so that at a given time (in this example,\nafter 10 XEvents) the function will exit and return to the main program.\n\nWith this example, I get the following error on about (this is NOT consistent)\nthe 5th call to bla():\n\nX Error of failed request: BadPixmap (invalid Pixmap parameter)\nMajor opcode of failed request: 55 (X\_CreateGC)\nResource id in failed request: 0xe0000d\nSerial number of failed request: 71\n\nCurrent serial number in output stream: 86\n\nIf I take out the XtUnrealizeWidget(top); line, it just dumps core on the\nseconds call.\n\nFurthermore, every time I call XtAppInitialize() (other than the 1st time), I\nget:\n\nWarning: Initializing Resource Lists twice\nWarning: Initializing Translation manager twice.\n\n\nSo finally, my question is this:\n\nWhat needs to be done in order to be able to call a function which creates\nan XtAppContext and widgets multiple times?\n\nAny help would be greatly appreciated.\n\nPLEASE respond via email as I dont usually have time to read this group.\n\nThanks very much.\n\n-davewood\n-- \n-----\n\nDavid Rex Wood -- davewood@cs.colorado.edu -- University of Colorado at Boulder\n-----\n\n',

'From: piatt@gdc.COM (Gary Piatt)\nSubject: Re: Employment (was Re: Why not concentrate on child molesters?\nOrganization: General DataComm Ind. Inc., Middlebury, CT 06762\nLines: 51\nNntp-Posting-Host: esun228\nX-Newsreader: TIN [version 1.1 PL9]\n\nDov Bai-MSI Visitor (bai@msiadmin.cit.cornell.edu) wrote:\n: In article <C5FG7t.6At@exnet.co.uk> sys1@exnet.co.uk (Xavier Gallagher) writes:\n: >True, man did not invent the need for food, shelter, warmth and the ilk,\n: >but man did invent the property laws and the laws of trespass. \n: But how do you think property is generated ? Does it grow automatically\n: on trees when we wish so, or someone has to produce it ?\n\nSome say it was generated by God or Goddess; some say it was the result of\nthe coalescence of billions of tons of interstellar debris. In either case,\nthe property of which Xavier speaks has been around for millions of years.\n\nIt all follows from the fact that Mother Nature does not\n: provide us automatically with our needs,\n\nOh? When did She \*stop\*? Mother Nature has been automatically providing\nus with her bounty ever since we crawled out of the primordial ooze. It\nis not "produced": it produces itself, year after year. Last night, for\nexample, I saw four deer crossing the road (pretty sight, too); in an\nearlier time, one of them would have been dinner.\n\nThere are 2 ways to go with produced things: the first is to\n: \_trade\_ it with the the person(s) who produced it. \n: The other one is to take it with a gun from the person who produced\n: it. The first way is the civilized method, the second is how savages\n: arrange their affairs.\n\nThe American Indians had no concept of ownership of property, and often\nfreely gave of their supplies to neighboring tribes, trading food and\nclothing for weapons or services. The Native Hawaiians, like their\nPolynesian ancestors, also could not conceive of that idea, and shared\nmany things with the other Islanders. In fact, "hi'ipoi", the Hawaiian\nword for "cherish" means "sharing food". The Great Mahele, in which\nthe Islands were divided up more-or-less evenly between the rich and\nthe poor, was a white man's idea. In Africa, villagers will often\nshare tools, crops, and clothing with other members of their own village\nand neighboring villages. Every anthropologist who has ever been to\nAfrica has at least one tale of the difficulties arising from the so-\ncalled "theft" of the scientists possessions -- two concepts of which,\nuntil the visitors came along, the natives had no understanding.\n\nThese are the people we call "savages".\n\nOn the other hand, car-jackings and muggings are up from last year.\n\nDov, before you make further comment on this thread, I think it would\nbehoove you to study \*all\* of the facts.\n\n-garrison'

"From: neuhaus@bloch.informatik.uni-kl.de (Stephan Neuhaus (HiWi Mattern))\nSubject: Re: PGP 2.2: general comments\nNntp-Posting-Host: bloch.informatik.un  
i-kl.de\nOrganization: University of Kaiserslautern, Germany\nLines: 39\n\nneu  
haus@vier.informatik.uni-kl.de (Stephan Neuhaus (HiWi Mattern)) writes:\n\n>[L  
ots of stuff.]\n\nI hate to follow up to my own posting, but I should perhaps  
clarify  
some things so I won't get flamed.\n\nFirst of all, when I'm talking  
about ``factoring the modulus'' or a\n``breakthrough in factoring'', what I re  
ally mean is a breakthrough in\  
the cryptanalysis of RSA. I know that factori  
ng and breaking RSA are\  
not proven to be equivalent; it's just so damn conven  
ient not to\  
repeat this every time.\n\nI also have to admit that I don't real  
ly know if the ``non-group''\  
nproperty of a cipher is essential only for key c  
haining. I have\  
thought about it a little while, but I can't find a way that  
a\  
cryptanalyst could exploit a group structure. That, of course, means\  
noth  
ing at all.\n\nThen I wrote,\n\n>Please note that as long as it is much harder  
to factor a RSA modulus\  
than it is to generate it, the increase in computer  
speed alone will\  
keep key lengths and modulus factoring in lock-step, i.e.,  
people will\  
simply start using longer moduli and still be safe.\n\nWhat I me  
ant was that as long as the only advantage of the\  
cryptanalyst is a faster co  
mputer, then we will probably have RSA for\  
na long time to come, because even  
if 1024-bit moduli somehow could be\  
broken with fast computers (not with a ne  
w algorithm), then people\  
would simply use longer moduli. Both users and cry  
ptanalysts benefit\  
from better technology in the same way.\n\nHope this keeps  
the flames away... Have fun.\n\n-- \nStephan <neuhaus@informatik.uni-kl.de>\n\nsig closed for inventory. Please leave your pickaxe outside.\nPGP 2.2 public

and aids\nOrganization: Applied Research Laboratories, University of Texas at  
Austin\nLines: 98\n\nIn article <Apr.8.00.57.49.1993.28271@athos.rutgers.edu>  
marka@travis.csd.harris.com (Mark Ashley) writes:\n>In article <Apr.7.01.55.33  
.1993.22762@athos.rutgers.edu> kevin@pictel.pictel.com (Kevin Davis) writes:\n>>Many Christians believe in abstinence, but in a moment will be overcome\n>>by desire. We all compromise and rationalize poor choices (sin). Last\n>>week I was guilty of anger, jealousy, and whole mess of other stuff,\n>>yet I am forgiven and not condemned to suffer with AIDs. To even\n>>suggest that AIDS is "deserved" is ludicrous.\n>\n>Some rules are made because at some point man is too stupid\n>to know better. Yet, eventually man learns. But only after\n>getting a lesson from experience.\n\nYes, it's important to realize that all actions have consequences,\nand that "rules" were made for our own good. But to suggest that a\n\*disease\* is a \*punishment\* for certain types of sin I think is\ntaking things much too far. If we got some kind of mouth disease\nfor lying, would any of us have mouths left? What if we developed\nblindness every time we lusted after someone or something? I dare\nsay all of us would be walking into walls.\n>\n>I wonder if AIDS would be a problem now if people didn't get\n>involved in deviant sexual behaviour. Certainly, people who\n>received tainted blood are not to blame. But it just goes\nto show that all mankind is affected by the actions of a few.\n\nYes, sin can have terrible consequences, but we need to be \*real\*\ncareful when saying that the consequences are a \*punishment\* for\nsin. The Jews of Jesus's time believed that all sickness was the\nresult of a sin. Then Jesus healed a blind man and said that man was\nblind to show the glory of God, not because of sin. If AIDS, or any\nother STD is a \*punishment" for sexual sin, what do we do with\ndiseases like cancer, or multiple sclerosis, which are just as\ndebilitating and terrible as AIDS, yet are not usually linked to a\nspecific behavior or lifestyle?\n>\n>In addition, IMHO forgiveness is not the end of things.\n>There is still the matter of atonement. Is it AIDS ?\n>I don't know.\n\nAtonement is \*extremely\* important, but I think you've missed the mark\nabout as far as you can by suggesting that AIDS is an atonement for sin.\n\nThe atonement for sin is JESUS CHRIST - period. This is the central\nmessage of the Gospel. A perfect sacrifice was required for our sins,\nand was made in the Lamb of God. His sacrifice atoned for \*all\* of\nour sins, past present and future. God does not require penance for\nour sins, nor does he require us to come up with our own atonement. He\nhas graciously already done that for us. To suggest that AIDS or\nsome other consequence is an atonement for sins is literally spitting\non the sacrifice that Jesus made.\n\nIn case you couldn't tell, I get \*extremely\* angry and upset when I see things like this. Instead of rationalizing our own fears and\nphobias, we need to be reaching out to people with AIDS and other\nsocially unacceptable diseases. Whether they got the disease through\ntheir own actions or not is irrelevant. They still need Jesus Christ,\nno more and no less than we do. I've said this before, but I think\nit's a good analogy. People with AIDS are modern-day lepers. Jesus\nhealed many lepers. He can also heal people with AIDS, maybe not on\nthis earth, but in an ultimate sense. My next-door neighbor has AIDS.\nShe has recently come to have a much deeper and more committed\nrelationship with God. Her theology isn't what I would want it to be,\nbut God's grace covers her. The amazing thing is that she is gaining\nweight

t (she\'s had the disease for over 2 years) and her health is\nexcellent apart from occassional skin rashes and such. She attributes\nher improvement in her health to God\'s intervention in her life. Who\nare we to suggest that her disease is some kind of punishment? It\nseems to me that God is being glorified through her disease.\n\nPaul Overstreet, the country singer, has a good song t itle that I \nthink applies to all of us - But for the Grace of God, There Go I\n(or something like that).\n\nMay we all experience and accept God\'s grace.\n>\n>-----

d home. And my children tell me, "There's unrest everywhere, be careful." Well I had a project going on. I told the Second Secretary of the District Party Committee what had been going on and said I wanted to take my crew off the site. They wouldn't allow it, they said, "Nothing's going to happen to you, we've entrusted the matter to the police, we've warned everyone in the district, nothing will happen to you." Well, in fact they did especially detail us a policeman to look after me, he knows all the local people and would protect me if something happened. This man didn't leave me alone for five minutes: he was at work the whole time and afterward he spent the night with us, too.

I sense some disquiet and call home; my wife also tells me, "The situation is very tense, be careful."

We finished the job at the site, and I left for Sumgait first thing on the morning of the 29th. When we left the guys warned me, they told me that I shouldn't tell anyone on the way that I was an Armenian. I took someone else's business travel documents, in the name of Zardali, and hid my own. I hid it and my passport in my socks. We set out for Baku. Our guys were on the bus, they sat behind, and I sat up front. In Baku they had come to me and said that they had to collect all of our travel documents just in case. As it turns out they knew what was happening in Sumgait.

I arrive at the bus station and there they tell me that the city of Sumgait is closed, there is no way to get there. That the city is closed off and the buses aren't running. Buses normally leave Baku for Sumgait almost every two minutes. And suddenly--no buses. Well, we tried to get there via private drivers. One man, an Azerbaijani, said, "Let's go find some other way to get there." They found a light transport vehicle and arranged for the driver to take us to Sumgait.

He took us there. But the others had said, "I wouldn't go if you gave me a thousand rubles." "Why?" "Because they're burning the city and killing the Armenians. There isn't an Armenian left." Well I got hold of myself so I could still stand up. So we squared it away, the four of us got in the car, and we set off for Sumgait. On the way the driver says, "In fact there aren't any Armenians left. They burned them all, beat them all, and stabbed them." Well I was silent. The whole way--20-odd miles--I was silent. The driver asks me, "How old are you, old man?" He wants to know: if I'm being that quiet, not saying anything, maybe it means I'm an Armenian. "How old are you?" he asks me. I say, "I'm 47." "I'm 47 too, but I call you 'old man'." I say, "It depends on God, each person's life in this world is different." I look much older than my years, that's why he called me old man. Well after that he was silent, too.

We're approaching the city, I look and see tanks all around, and a cordon. Before we get to the Kavkaz store the driver starts to wave his hand. Well, he was waving his hand, we all start waving our hands. I'm sitting there with them, I start waving my hand, too. I realized that this was a sign that meant there were no Armenians with us.

I look at the city--there is a crowd of people walking down the middle of the street, you know, and there's no traffic. Well probably I was scared. They stopped our car. People were standing on the sidewalks. They have armature shafts, and stones . . . And they stopped us . . .

Along the way the driver tells us how they know who's an Armenian and who's not. The Armenians usually . . . For example, I'm an Armenian, but I speak their language very well. Well Armenians usually pronounce the Azeri word for "nut," or "little nut," as "pundukh," but "fundukh" is actually correct. The pronunciations are different. Anyone who says "pundukh," even if they're not an Armenian, they immediately take out and start to slash. Another one says, "There was a car there, with five people inside it," he says. "They started hitting the side of it with an axe and lit it on fire. And they didn't let the people out," h

e says, "they wouldn't let them get out of the car." I only saw the car, but the driver says that he saw everything. Well he often drives from Baku to Sumgait and back . . . When they stop us we all get out of the car. I look around there's a short guy, his eyes are gleaming, he has an armature shaft in one hand and a stone in the other and asks the guys what nationality they are one by one. "We're Azerbaijani," they tell him, "no Armenians here." He did come up to me when we were pulling our things out and says, "Maybe you're an Armenian, old man?" But in Azerbaijani I say, "You should be ashamed of yourself!" And . . . he left. Turned and left. That was all that happened. What was I to do? I had to . . . the city was on fire, but I had to steal my children out of my own home. They stopped us at the entrance to Mir Street, that's where the Kavkaz store and three large, 12-story buildings are. That's the beginning of down-town. I saw that burned automobile there, completely burned, only metal remained. I couldn't figure out if it was a Zhiguli or a Zaporozhets. Later I was told it was a Zhiguli. And the people in there were completely incinerated. Nothing remained of them, not even any traces. That driver had told me about it, and I saw the car myself. The car was there. The skeleton, a metallic carcass. About 30 to 40 yards from the Kavkaz store. I see a military transport, an armored personnel carrier. The hatches are closed. And people are throwing armature shafts and pieces of iron at it, the crowd is. And I hear shots, not automatic fire, it's true, but pistol shots. Several shots. There were Azerbaijanis crowded around that personnel carrier. Someone in the crowd was shooting. Apparently they either wanted to kill the soldiers or get a machine gun or something. At that point there was only one armored personnel carrier. And all the tanks were outside the city, cordoning off Sumgait. I walked on. I see two Azerbaijanis going home from the plant. I can tell by their gait that they're not bandits, they're just people, walking home. I joined them so in case something happened, in case someone came up to us and asked questions, either of us would be in a position to answer, you see. But I avoided the large groups because I'm a local and might be quickly recognized. I tried to keep at a distance, and walked where there were fewer people. Well so I walked into Microdistrict 2, which is across from our block. I can't get into our block, but I walked where there were fewer people, so as to get around. Well there I see a tall guy and 25 to 30 people are walking behind him. And he's shouting into a megaphone: "Comrades, the Armenian-Azerbaijani war has begun!" The police have megaphones like that. So they're talking and walking around the second microdistrict. I see that they're coming my way, and turn off behind a building. I noticed that they walked around the outside buildings, and inside the microdistricts there were about 5 or 6 people standing on every corner, and at the middle of the buildings, and at the edges. What they were doing I can't say, because I couldn't get up close to them, I was afraid. But the most important thing was to get away from there, to get home, and at least find out if my children were alive or not . . . April 20, 1988 Yerevan

'From: kwyatt@ccscola.columbiasc.ncr.com (Kershner Wyatt)\nSubject: Re: qual

ity of Catholic liturgy\nOrganization: NCR Corp, E&M-Columbia, Columbia, SC\nLines: 79\n\nIn article <Apr.13.00.08.27.1993.28403@athos.rutgers.edu> creps@lateran.ucs.indiana.edu (Stephen A. Creps) writes:\n>In article <Apr.10.05.30.16.1993.14313@athos.rutgers.edu> jemurray@magnus.acs.ohio-state.edu (John E Murray) writes:\n>\n> On Palm Sunday at our parish, we were "invited" to take the role of\n>Jesus in the Passion. I declined to participate. Last year at the\n>liturgy meeting I pointed out how we crucify Christ by our sins, so\n>therefore it is appropriate that we retain the role of the crowd, but\n>to no avail.\n>\n>>musicians, readers, and so on. New things are introduced in the course of the\n>>liturgy and since no one knows what's happening, the new things have to be\n>>explained, and pretty soon instead of \_doing\_ a lot of the Mass we're just\n>>sitting there listening (or spacing out, in my case) to how the Mass is about\n>>to be done. In my mind, I lay the blame on liturgy committees made up of lay\n>>people to be aware of the Lord's presence.\n\nAs a former Catholic and now as a very active Lutheran - it is some of the\n"innovations" of the Mass which made me leave the Catholic Church and return\nto the more traditional Catholic Church - the Lutherans.\n\nI spent many years as a Lector reading the Passion parts as appropriate in\nthe Catholic Church and I found it very meaningful. Our Lutheran parish just\ninstituted the "Tenebrae" service for Good Friday and I was the lector for\na paraphrased Passion which was exceptional. I heard and learned things\nthat I have previously overlooked in the Gospels - yet those "facts" were\nalways there. As a matter of interest, the pastor and I were talking about\nthe differences between the RC and Lutheran Church during Holy Week over\nbreakfast Easter Sunday.\n>\n> As a member of a liturgy committee, I can tell you that the problem\n>is certain people dominating, who want to try out all kinds of\n>innovations. The priests don't seem even to \_want\_ to make any\n>decisions of their own in many cases. I guess it's easier to "try\n>something new" than it is to refuse to allow it.\n\nMy wife is the member of the liturgy committee in the family (called music\nand worship at our church). Our pastor does have control of this committee\nbut listens very carefully to the committee's suggestions. It needs a strong\nhand to lead and guide, to keep the intent and the message clear and strong\nas it should be through Lent and the rest of the liturgical year. Additional\nreason for my leaving the Catholic faith - lack of any selfless spiritual\nguidance by priests in my parishes. AKA "wishy-washy".\n\nAs you may gather from my comments, I feel that it is very important, ir-\nregardless of denominational guidelines, to have a service/Mass which promotes\nthe true reason that we are gathered there. I am quite comfortable in a\ntraditional Mass, with receiving Holy Communion on the tongue, the Sacrament\nof PENANCE (not Reconciliation), Stations of the Cross, so on and so forth.\n\nThe reason other types of Masses and parishes exist is because these feelings\nare not shared by everyone.\n\nI want more people to attend church and to find the Lord, but I don't want\nthem attending a show. It's not. My church works hard to have a meaningful\nservice during Lent on Wednesdays, but follow traditional Lutheran Book of\nWorship guidelines. Where things are changed or omitted during Lent (such\nas the Hymn of Praise) it is noted so that we are aware of the reasons that it\nis Not there.\n\nQuite frankly, it is very hard for a non-Catholic to go to a Mass and "fit in".\nMy dear wife never could (former Methodist). And Holy Week Masses and Vigils\nwould intimidate the daylights out of a non-Catholic. Those Catholics who\nhave beared with me this far understand what I mean.\n\nPlease keep in mind why we are there - to gather together in worship. Not\nto worry about how something is done or not done. If there is something\nwrong that you feel needs addressing, by all means talk to your priest or\npastor. I have

only ever met one who wouldn't listen. They are there to provide spiritual guidance and to help. Use them. My differences with the Catholic Church are much more fundamental - but my decision to change faiths was done with prayer, intervention, and sessions with priests and ministers. In Christ, Kershner -- Kershner Wyatt kwyatt@ccscola.ColumbiaSC.ncr.com My opinions are my own and aren't necessarily my employer's.

From: ednclark@kraken.itc.gu.edu.au (Jeffrey Clark) Subject: Re: Ancient Islamic rituals Nntp-Posting-Host: kraken.itc.gu.edu.au Organization: ITC, Griffith University, Brisbane, Australia Lines: 27 ncfaehl@vesta.unm.edu (Chris Faehl) writes: Why is it more reasonable than the trend towards obesity and the trend towards depression? You can't just pick your two favorite trends, notice a correlation in them, and make a sweeping statement of generality. I mean, you CAN, and people HAVE, but that does not mean that it is a valid or reasonable thesis. At best it's a gross oversimplification of the push-pull factors people experience. I agree, I reckon it's television and the increase in fundamentalism. You think it's the increase in pre-marital sex... others think it's because psychologists have taken over the criminal justice system and let violent criminals con them into letting them out into the streets... others think it's the increase in designer drugs... others think it's a communist plot. Basically the social interactions of all the changing factors in our society are far too complicated for us to control. We just have to hold on to the panic handles and hope that we are heading for a soft landing. But one thing for sure, depression and the destruction of the nuclear family is not due solely to sex out of marriage. Jeff. Fred Rice -- a Muslim, giving his point of view. darice@yoyo.cc.monash.edu.au ncfaehl@vesta.unm.edu

oes that make something immoral?\n\n\n\n\nBecause you are not being consistent.  
Moral systems must be consistent.\n\n\nA person who thinks they can inflict pain  
on others, but doesn't want it \ninfllicted upon themselves, has a double stand  
ard. And double standards are\na violation of \*any\* moral system.\n\n\n\n\n\n\n\n\n/(me)\n>Morality defines how we interact with other people; the rules that we\n>use to guide our daily affairs. Our conduct towards our fellow man. By\n>re  
alizing that we don't like pain, we can also realize that other people\n>don't  
like it, either. \n\n\n/(hudson)\n/Of course we don't like pain. I don't like  
brussel sprouts. Are brussel\n/sprouts immoral?\n\n\nPain isn't immoral, stupid  
. Pain itself is just a physiological\nreaction. \n\n\nWhat >>is<< immoral is  
subjecting unwilling individuals to pain.\n\n\nOr brussel sprouts, for that matt  
er.\n\n\n\n\n\n\n\n\n/(hudson)\n>/Is it immoral to produce these same chemical reac  
tions in a test tube?\n>\n/(me)\n>It isn't the chemical reaction that is wrong,  
bozo. It's making the human\n>being UNDERGO THE EFFECTS of the chemical react  
ion. Sorry; your cute\n>little analogy didn't survive for very long under scr  
utiny.\n\n\n/(hudson)\n/Why would it be wrong to make humans undergo the effects  
of the reactions\n/if humans are composed only of matter? \n\n\nWhat humans are  
composed of isn't the qualifying criteria of whether or\nnnot something would b  
e wrong. \n\n\n\n\n\n\n\n\n/(hudson)\n/Is it wrong to make matter undergo chemical re  
actions?\n\n\nYes, if it is sentient matter.\n\n\n\n\n\n\n/(me)\n/>Nature is not a sen  
tient force; there is no choice involved. Therefore,\n/>no question of morali  
ty.\n\n\n\n\n/(hudson)\n/I actually heard a geologist entertain the notion that ma

ter had a will.\n/There is some sentient force out there. \n\nFine. I have also heard that the government is encoding the DNA for \na new race of superhumans in ordinary drinking water. \n\nWhat's your point?\n\n\n/(hudson)\n/If humans are made only of matter, then choices are also chemical reactions,\n/so why is choice an important issue.\n\nAnd if that is the case, then god is only an idea contained in the minds\nof people (formed of matter) and on printed pages (also formed of matter)\nand does not really exist. \n\nI can do the argumentem ad absurdum just as well as you can, but it \nwon't prove any points for you or me. Got anything relevant you want to \ntalk about, or are you just playing cute little games?\n\n\n\n\n\n\n\n",

'From: bu008@cleveland.Freenet.Edu (Brandon D. Ray)\nSubject: Re: Statement of Sarah Brady Regarding Texas State Carrying Concealed Legislation\nArticle-ID.: usenet.1psstg\$bbe\nReply-To: bu008@cleveland.Freenet.Edu (Brandon D. Ray)\nOrganization: Case Western Reserve University, Cleveland, Ohio (USA)\nLines: 83\nNNTP-Posting-Host: hela.ins.cwru.edu\n\n\nIn a previous article, nigel.allen@canrem.com ("nigel allen") says:\n\n>\n>Here is a press release from Handgun Control Inc.\n>\n> Statement of Sarah Brady Regarding Texas State Carrying Concealed Legislation\n> To: State Desk\n> Contact: Susan Whitmore of Handgun Control Inc., 202-898-0792\n>\n> WASHINGTON, March 25 -- Following is a statement of Sarah \n>Brady regarding Texas state carrying concealed legislation:\n>\n> "A handful of lawmakers in Austin today have told the public that\n>their safety is of less importance than the interests of the National\n>Rifle Association. This action comes as local, state and federal law\n>enforcement officials continue their stand-off with a religious cult\n>that has highlighted the need for tougher gun laws, not weaker ones\n>like the carry concealed bill.\n\n\n> "A handful of anti-gun zealots are telling the public that their\n>right to self-defense is of less importance than the interests of\n>Handgun Control, Inc. This action comes as local, state and federal law\n>enforcement officials continue their assault on the Branch Davidian\n>compound--an assault which has already resulted in the death of one\n>two year old child at the hands of federal agents. This has highlighted\n>the need for citizens to be able to defend themselves and their children\n>against the excesses of their own government.\n\n\n> "Any suggestion by proponents that this bill will help to reduce\n>crime is a distortion of the facts, at best. This so-called\n>crime-fighting law has resulted in a 16 percent increase in violent\n>crime in the state of Florida, and I have never heard law enforcement\n>officials bragging that more guns on the streets is the way to reduce\n>crime.\n\n\n> "Any suggestion by opponents that this bill will increase crime is a\n>distortion of the facts, at best. The aggressive outreach by officials\n>in central Florida to train and arm women has led to a dramatic drop in\n>the level of assault and rape in that area. Of course, this program is\n>a rare gem, as many law enforcement officials apparently believe that an\n>unarmed citizenry will be easier to control, and thus favor tighter\n>restrictions." \n\n\n> "The vote today is an insult to the law enforcement officials who\n>are putting their lives on the line every day to end the standoff in\n>Waco. The entire country now knows just how easy it is for an\n>individual bent on destruction to amass an arsenal of weapons. Texas\n>lawmakers who voted for this concealed handgun bill have shown total\n>disregard for those law officials on the front lines, and the\n>families of those who have fallen.\n\n\n> "The vote today is a tribute to the good sense of the public at large\n>who are putting their lives on the line every day as they go about their\n>lawful affairs. The entire country knows how vulnerable the average\n>citizen is, both to attacks from criminals and from armed assault by our\n>own police. Texas lawmakers who voted for this concealed handgun bill have\

nshown total understanding for those innocent, law-abiding citizens on the\nfr  
ont lines, and the families of those who have fallen." \n\n> "I urge the Hous  
e of Representatives to listen to the 70 percent\n>of Texans that oppose this  
measure, and reject this ill-conceived\n>legislation." \n\n "I urge the House  
of Representatives to pay attention to the needs\n>of their constituents, and n  
ot be stamped by ill-conceived arguments\n>from ideological fanatics." \n\n> -

 FACT: It is unlawful to distribute code implementing RSA without a license to do so from PKP, whether or not one is charging for it. Furthermore, any use of RSA, other than for research purposes allowed under US patent law, is similarly unlawful. Therefore, the "average citizen" cannot use RSA to encrypt message traffic in the US without a license from PKP.  
 WRONG: I don't think even PKP claims this one. It is not unlawful to distribute code implementing RSA. It appears to be unlawful to use it, so I agree with your last sentence.  
 FACT: There are no restrictions (yet!) on the use of cryptography under US law, although this is beginning to look like it will change. The only impediments to widespread use of RSA cryptography in the US are PKP's patents.  
 Yes, that's correct.

Velasco Jr.) writes:\n>>In article <Apr.10.05.32.29.1993.14388@athos.rutgers.edu> caralv@caralv.auto-trol.com (Carol Alvin) writes:\n>> > ... \n>> >\n>> >Are all truths also absolutes?\n>> >Is all of scripture truths (and therefore absolutes)?\n>> >\n>> The answer to both questions is yes.\n>\n>Perhaps we have different definitions of absolute then. To me,\n>an absolute is something that is constant across time, culture,\n>situations, etc. True in every instance possible. Do you agree\n>with this definition? I think you do:\n>\n>> Similarly, all truth is absolute. Indeed, a non-absolute truth is a \n>> contradiction in terms. When is something absolute? When it is always\n>> true. Obviously, if a "truth" is not always "true" then we have a\n>> contradiction in terms. \n\nI agree with Carol here. Determining absolutes is, practically speaking, a\nwaste of time. And we easily forget that relative truth is, in fact relative.\n\nFor example, I recently was asking some children the question "What temperature\ndoes water boil at?" I got the answer 212 degrees consistently. I asked\nif they knew what scale, and was told "It's just 212 degrees. Any scale.\nThat's what all thermometers say." Well, that's sincere, and may be\ntrue in the experience of the speaker, but it is simply wrong. IT is NOT\nan absolute truth. Similarly, Scripture is full of Truth, which we should\nnurture and cherish, but trying to determine which parts are Absolute Truth\nand which parts are the manifestations of that in the context of the time\nand culture in which the text was penned is missing the point. Then religion\neasily becomes an intellectual head-trip, devoid of the living experience of\nthe indwelling Trinity and becomes dead scholasticism, IMO.\n\n[example of head-covering in Church deleted]\n\nThis was a good example. There may be an Absolute Truth behind the\nwriting, but the simplest understanding of the passage is that the\ninstructions apply to the Corinthians, and not necessarily elsewhere.\n\nThe instructions may reflect Absolute Truth in the context of first\ncentury culture and the particular climate at Corinth, which was having\na LOT of trouble with order. Is it Absolute Truth to me? No. And I\nsee no compelling, or even reasonable, reason that it should be.\n\n>Evangelicals are clearly not taking this particular part of scripture\n>to be absolute truth. (And there are plenty of other examples.)\n>Can you reconcile this?\n\nEven the most die-hard literalists do not take all of the Bible literally.\nI've yet to meet anyone who takes the verse "blessed is he who takes your\nbabies and smashes their heads against the rocks" literally. The Bible\nwas not printed or handed to us by God with color codings to tell us\nwhat parts should be interpreted which way. \n\n>> Many people claim that there are no absolutes in the world. Such a\n>> statement is terribly self-contradictory. Let me put it to you this\n>> way. If there are no absolutes, shouldn't we conclude that the statement,\n>> "There are no absolutes" is not absolutely true? Obviously, we have a\n>> contradiction here.\n>\n>I don't claim that there are \*no\* absolutes. I think there are very\n>few, though, and determining absolutes is difficult.\n\nI agree. Very few. An

d even if we knew them, personally, we may not be \nable to express that in a way that still conveys Absolute Truth to another.\n\nThe presence of absence of Absolutes may not make any difference, since I\know I can never fully apprehend an Absolute if it walks up and greets me.\n>\n>> >There is hardly consensus, even in evangelical \n>> >Christianity (not to mention the rest of Christianity) regarding \n>> >Biblical interpretation.\n>> \n>> So? People sometimes disagree about what is true. This does not negate \n>> the fact, however, that there are still absolutes in the universe. \n\nI can\'t prove the existence of absolutes. I can only rely upon MY experience.\nI also trust God\'s revelation that WE cannot fully comprehend the infinite.\nTherefore we can\'t comprehend the Absolutes. So I don\'t need them. \nI can never know the essence of God, only the energies by and through which\nGod is manifested to God\'s creation. So the reality can be that there ARE\nabsolutes, but it is of no practical importance. It\'s like claiming that the\noriginal scriptural autographs were perfect, but copies may not be. Swell.\nWho cares? It doesn\'t affect me in any practical useful way. I might as \nwell believe that God has made a lot of electric blue chickens, and that they\nlive on Mars. Maybe God did. So what? Is that going to have ANY effect on \nhow I deal with my neighbor, or God? Whether or not I go to this or that\ncafeteria for lunch? No. \n\nThis attitude leads many non-Christians to believe that ALL Christians\nare arrogant idiots incapable of critical reasoning. Christianity is true,\nwonderful and sensible. It appeals to Reason, since Reason is an inner\nreflection of the Logos of God. Explanations that violate that simply\nappear to be insecure authoritarian responses to a complex world.\n\nNOTE: I\'m NOT claiming there is no place for authority. That\'d be silly.\n\nThere IS a world of difference between authoritative and authoritarian.\n\nAuthoritative is an expression of authority that respects others.\n\nAuthoritarian is an expression of authority that fails to do that,\nand is generally aggressive. Good parents (like God) are authoritative.\n\nMany Christians are simply authoritarian, and, not surprisingly, few \nadults respond to this treatment.\n\nLarry Overacker (llo@shell.com)\n\n-- \n-----\nLawrence Overacker\nShell Oil Company, Information Center Houston, TX (713) 245-2965\nllo@shell.com\n',

Just thought people might\n> want to know....\n\nThere's absolutely no reason why differences in the DRAM access time \n\_alone\_ would cause an incompatibility. There would have to be another \ndifference between the SIMMs for there to be a problem. I've often used \nmemory of different speeds with no problems whatsoever. As long as it's\nas fast (or faster) than the minimum requirement you should be fine.\n\nJust out of curiosity, did you actually try this and see a problem, or \nwere you told it wouldn't work and so never tried it? Also out of \ncuriosity, do you know exactly who in Cupertino your dealer talked to (as\nI'd like to find out what they're basing this recommendation on).\n\n- Dale Adams\n Apple Computer, Inc.\n",

"From: aas7@po.CWRU.Edu (Andrew A. Spencer)\nSubject: Re: It's a rush... (was Re: Too fast)\nOrganization: Case Western Reserve University, Cleveland, OH (USA)\nLines: 34\nReply-To: aas7@po.CWRU.Edu (Andrew A. Spencer)\nNNTP-Posting-Host: slc5.ins.cwru.edu\n\nIn a previous article, gwm@spl1.spl.loral.com (Gary W. Mahan) says:\n\n>>Why should a good driver be terrified at 130mph? The only thing I fear\n>>going at 130 are drivers, who switch to the left lane without using\n>>either rear-view-mirror or flashers. Doing 130 to 150 ain't a rush\n>>for me, but it's fun and I get where I want to go much faster.\n\n>\nIn defense of the drivers, who are in the right lane. Here in the states, people simply do not expect when they are driving to be overtaken at a speed differential of 50+mph. I don't think this is because they are stupid (of course, there are exceptions), they are just programmed because of the 55mph limit. Do you (in the states) when you look in the rear-view ALWAYS calculate future positions of cars based on a 50+ speed differential. \n>Dont get me wrong, I love to drive in the left lane fast but when I overtake\n>cars who are on the right, I slow down a tad bit. If I were to rely on the judgement of the other car, to recognize the speed differential, I would be the stupid one. \n\n>just to satiate my curiosity, why would this make you the stupid one? It seems\n>to me, everybody SHOULD be aware enough of what is going on. You do not need\n>to calculate the future position. You need to look at your mirrors a little\n>more. If you glance around, you will be able to tell how much faster than you\n>the car is going. Maybe not precisely, but well enough to know if you should\n>let him around before you try to pass. I know what you are talking about,\n>about the other driver being startled, because i myself have been startled\n>by drivers cruising by at around 90-100mph when i'm doing 55-65. The problem,\n>though, as i saw it, was not their fault for barreling around me, but my fault\n>for not paying the attention to my task-at-hand that i should have been.\n>Oddly enough, since the 2nd time(happened 2x in around 4 mo. when i'd had my\n>license for around 6 mo), i haven't been startled..and i've been passed by\n>cars doing roughly twice the speed of my car. Another odd occurrence is the\n>fact that th

'From: sun075!Gerry.Palo@uunet.uu.net (Gerry Palo) \nSubject: Re: Christianity and repeated lives\nLines: 84\n\nIn article <May.5.02.52.15.1993.28800@athos.rutgers.edu> JEK@cu.nih.gov writes:\n>Gerry Palo writes:\n>\n> > ...there is nothing in Christianity that precludes the idea of\n> > repeated lives on earth.\n>\n>The Apostle Paul (Romans 9:11) points out that God chose Jacob\n>rather than Esau to be the ancestor of the Covenant People and\n>ultimately of the Messiah, and that He made this choice while the\n>two boys were still in their mother's womb, and therefore could not\n>possibly have done anything good or evil to deserve their appointed\n>destinies. If we admit the possibility that they had lived previous\n>lives, and that (in accordance with the Asiatic idea of "karma")\n>their present lives are a reward or punishment for past behaviour,\n>this makes nonsense of Paul's whole point.\n>\n\nThe existence of repeated earth lives and destiny (karma) does not\nmean that everything that happens is predetermined by past deeds.\nThere is an oriental view of it that tends in that direction, but I\ndid not subscribe to that view. God may choose one individual over\nanother as the fit instrument for his plans, but that does not\npreclude that the development of that individual into what he is in\nthis earthly life is not the result of a longer course of development.\n\nI do not, and Rudolf Steiner did not, subscribe to the oriental view\nof an inexorable, mechanistic karma determining everything that\nbefalls one. This is a kind of shriveled caricature of a much greater\nlaw in the context of which the deed of Christ on Golgotha and the\nultimate salvation and freedom of the human being as a working of\nChrist can be seen as the master theme and, indeed, a new impulse\nthat\nwas completely free of karma. Christ incarnated only once in the\nflesh, and in that he had no debt of karma or sin. The oriental\nconcepts of reincarnation and karma, which are even more trivialized\nand mechanized in some new age teachings, incorrectly assume Jesus\nChrist to have been the reincarnation of a master. avatar, etc.\nTheir teaching of reincarnation and karma also has no concept of the\ncontinuing individuality from one life to the next (e.g. Buddhism).\nMore important, they have no concept of the resurrection of the

4 Apr 93 God\'s Promise in 1 John 1: 7\nOrganization: Lunar & Planetary Laboratory, Tucson AZ.\nLines: 66\n\nBrian Kendig writes:\n\n> Lev 17:11: For the life of the flesh is in the blood, and I have given\n> it to you upon the altar to make atonement for your souls; for it is\n> the blood that makes atonement for the soul.\n>\n>The Old Testament was very big on the "eye for an eye" business. It\n>makes sense that Leviticus would support physical injury to "repay"\n>moral wrongdoing.\n\nBrian K., guess what? You missed the point. On a scale from cold to\n>hot, you are at 0 degrees Kelvin.\n\n>I know about sanctification. I\'ve been taught all about it in Sunday\n>school, catechism class, and theology classes. But even after all\n>that, I still can\'t accept it. Maybe I\'m still not understanding it,\n>or maybe I\'m just understanding it all too well.\n\nThen as you understand it, what is it?\n\n>From the bottom of my heart I know that the punishment of an innocent\n>man is wrong.\n\nYes. I agree with that. But what does that have to do with Jesus?\n\nPunishment you say? Jesus did not regard his death as punishment. \n\n>I\'ve tried repeatedly over the course of several years\n>to accept it, but I just can\'t. \n\nGood. I wouldn\'t either--not the way you understand it. \n\n>If you can explain to me why the death of Jesus was a \*good\* thing,\n>then I would be very glad to hear it, and you might even convert me.\n>Be warned, however, that I\'ve heard all the most common arguments\n>before, and they just don\'t convince me.\n\nAsk Jesus himself. He himself said why in John 12:23-32. It\n>isn\'t a mystery to anyone and there certainly is no need for\n>a persuasive argument. Read Jesus\'s own reply to your\n>question.\n\nJesus gives more reasons in John 16:7. But one obvious reason\n>why Jesus died, (and as with everything else, it has nothing to do with\n>his punishment) was that he could rise to life again--so that\n>we would "stop doubting and believe" (John 21:27). The fact\n>that Jesus rose from the dead is my hope that I too will rise\n>from the dead. It is an obvious point. Do not overlook it.\n\nWithout this obvious point, I would have no hope\n>and my faith would be vanity.\n\nWhy did Jesus suffer in his death? Again, ask Jesus. Jesus\n>says why in John 15:18-25. That\'s no mystery either. "The\n>world hates him without reason." It is a direct proclamation\n>of how far we humans botch things up and thus, how much we\n>need a Saviour.\n\nAnd why can\'t you, Brian K., accept this? How can you? "The\n>world cannot accept him because it neither sees him nor knows\n>him." (John 14:17). The animosity and the lack of knowledge\n>that comes out in your twistings of Robert\'s daily verses is\n>very convincing testimony of the truth of John 14:17 and 16:25.\n\nI pray and hope that I do blurt out such animosity and lack of\n>knowledge. I am not perfect either. But regardless of that, I thank\n>God that Jesus revealed himself to me, without whom I\'d also be\n>bumbling about blindly though arrogantly slandering the very\n>Person who created me and who loves me.\n',

'From: tclock@orion.oac.uci.edu (Tim Clock)\nSubject: Re: was:Go Hezbollah!\n\nNntp-Posting-Host: orion.oac.uci.edu\nOrganization: University of California, Irvine\nLines: 159\n\n>In article <1993Apr16.130037.18830@ncsu.edu>, hernlem@c  
hess.ncsu.edu \n (Brad Hernlem) writes:\n>|> \n>|> In article <2BCE0918.6105@news.service.uci.edu>, tclock@orion.oac.uci.edu \n (Tim Clock) writes:\n>|> \n>|> Are you suggesting that, when guerillas use the population for cover, \n>|> Israel should totally back down? So...the easiest way to get away with\n>|> attacking another is to use an innocent as a shield and hope that the \n>|> other respects innocent lives?\n\n> Tell me Tim, what are these guerillas doing wrong? Assuming that they are \n> using civilians for cover, \n\n"Assuming"? Also: come on, Brad. If we are going to get anywhere in \n>this (or any) discussion, it doesn\'t help to bring up elements I never \n>addressed, \*nor commented on in any way\*. I made no comment on who is \n>"right" or who is "wrong", onl

y that civilians ARE being used as cover \nand that, having been placed "in between" the Israelis and the guerillas,\nthey \*will\* be injured as both parties continue their fight.\n \n\t[The \*purpose\* of an army\'s use of military uniforms \n\tis \*to set its members apart\* from the civilians so that \n\tcivilians will not be thought of by the other side as\n\t"combatants". So, what do you think is the "meaning behind", \n\tthe intention and the effect when an "army" purposely \n\t\*does not wear uniforms but goes out of its way to \*look \n\tlike civilians\'? \*They are judging that the benefit they will \n\treceive from this "cover" is more important than the harm\n\tthat will come to civilians.\*\n\nThis is a comment on the Israeli experience and is saying\nthat the guerillas \*do\* have some responsibility in putting civilians\nin "the middle" of this fight. By putting on uniforms and living apart\nfrom civilians (barracks, etc.), the guerillas would significantly lower\nthe risk to civilians.\n\n\tBut if the guerillas do this aren\'t \*they\* putting themselves\n\tat greater risk? Absolutely, they ask themselves "why set \n\tourselves apart (by wearing uniforms) when there is a ready-made \n\tcover for us (civilians)? That makes sense from their point of \n\tview, BUT when this cover is used, the guerillas should accept \n\tsome of the responsibility for subsequent harm to civilians.\n\n> If the buffer zone is to prevent attacks on Israel, is it not working? Why\n> is it further necessary for Israeli guns to pound Lebanese villages? Why \n> not just kill those who try to infiltrate the buffer zone? You see, there \n> is more to the shelling of the villages.... it is called RETALIATION... \n> "GETTING BACK"... "GETTING EVEN". It doesn\'t make sense to shell the \n> villages. The least it shows is a reckless disregard by the Israeli \n> government for the lives of civilians.\n\nI agree with you here. I have always thought that Israel\'s bombing\nsortees and bombing policy is stupid, thoughtless, inhumane AND\nineffective. BUT, there is no reason that Israel should passively wait \nuntil attackers chose to act; there is every reason to believe that\n"taking the fight \*to\* the enemy" will do more to stop attacks. \n\nAs I said previously, Israel spent several decades "sitting passively"\non its side of a border and only acting to stop these attacks \*after\*\nthe attackers had entered Israeli territory. It didn\'t work very well.\n\nThe "host" Arab state did little/nothing to try and stop these attacks \nfrom its side of the border with Israel so the number of attacks\nwere considerably higher, as was their physical and psychological impact \non the civilians caught in their path. \n\n>|> What? So the whole bit about attacks on Israel from neighboring Arab states \n>|> can start all over again? While I also hope for this to happen, it will\n>|> only occur WHEN Arab states show that they are \*prepared\* to take on the \n>|> responsibility and the duty to stop guerilla attacks on Israel from their \n>|> soil. They have to Prove it (or provide some "guarantees"), there is no way\n>|> Israel is going to accept their "word"- not with their past attitude of \n>|> tolerance towards "anti-Israel guerillas in-residence".\n>|> \n> If Israel is not willing to accept the "word" of others then, IMHO, it has\n> no business wasting others\' time coming to the peace talks. \n\nThis is just another "selectively applied" statement.\n\nThe reason for this drawn-out impasse between Arabs/Palestinians and Israelis\nis that NEITHER side is willing to accept the Word of the other. By your\ncriteria \*everyone\* should stay away from the negotiations.\n\nThat is precisely why the Palestinians (in their recent PISGA proposal for\nthe "interim" period after negotiations and leading up to full autonomy) are\ndemanding conditions that essentially define "autonomy" already. They DO\nNOT trust that Israel will "follow through" the entire process and allow\nPalestinians to reach full autonomy. \n\nDo you understand and accept this viewpoint by the Palestinians? \nIf you do, then why should Israel\'s view of Arabs/P

alestinians \nbe any different? Why should they trust the Arab/Palestinians\' words?\nSince they don\'t, they are VERY reluctant to give up "tangible assets \n(land, control of areas) in exchange for "words". For this reason,\nthey are also concerned about the sorts of "guarantees" they will have \nthat the Arabs WILL follow through on their part of any agreement reached.\n>\n>But don\'t yo u see that the same statement can be made both ways?\n>If Lebanon was interest ed in peace then it should accept the word\n>of Israel that the attacks were t he cause for war and disarming the\n>Hizbollah will remove the cause for its c ontinued occupancy. \n\nAbsolutely, so are the Arabs/Palestinians asking FIRS T for the\nIsraelis "word" in relation to any agreement? NO, what is being\nde manded FIRST is LAND. When the issue is LAND, and one party\nfinally gets HOLD of this "land", what the "other party" does\nis totally irrelevant. If I NOW h ave possession of this land,\nyour words have absolutely no power; whether Isr ael chooses to\nkeeps its word does NOT get the land back.\n\n>Afterall, Israe l has already staged two parts of the withdrawal from \n>areas it occupied in Lebanon during SLG.\n>\n> Tim, you are ignoring the fact that the Palestinians in Lebanon have been\n>disarmed. Hezbollah remains the only independent milit ia. Hezbollah does\n>not attack Israel except at a few times such as when the IDF burned up\n>Sheikh Mosavi, his wife, and young son. \n\nWhile the "major armaments" (those allowing people to wage "civil wars")\nhave been removed, th e weapons needed to cross-border attacks still\nremain to some extent. Rocket attacks still continue, and "commando"\nraids only require a few easily concea led weapons and a refined disregard\nfor human life (yours of that of others). Such attacks also continue.\n\n> Of course, if Israel would withdraw from Leba non\n>and stop assassinating people and shelling villages they wouldn\'t\n>m ake the Lebanese so mad as to do that.\n\nBat guano. The situation you call fo r existed in the 1970s and attacks\nwere commonplace.\n\n>Furthermore, with He zbollah subsequently disarmed, it would not be possible.\n\nThere is NO WAY th ese groups can be effectively "disarmed" UNLESS the state\nis as authoritarian is Syria\'s. The only other way is for Lebanon to take\nit upon itself to cons tantly patrol the entire border with Israel, essentially\nmirroring Israel\'s border secirity on its side. It HAS TO PROVE TO ISREAL that\nit is this commit ted to protecting Israel from attack from Lebanese territory.\n>\n>|> Once Syr ia leaves who is to say that Lebanon will be able to retain \n>|> control? If Syria stays thay may be even more dangerous for Israel.\n>|> \n> Tim, when is the last time that you recall any trouble on the Syrian border?\n>Not lately, eh?\n\nThat\'s what I said, ok? But, doesn\'t that mean that Syria has to "tak e over"\nLebanon? I don\'t think Israel or Lebanon would like that.\n> \nWhat both "sides" need is to receive something "tangible". The Arabs/\nPalestinians are looking for "land" and demanding that they receive it\nprior to giving any thing to Israel. Israel has two problems: 1) if it\ngives up real \*land\* it IS exposing itself to a changed geostrategic\nsituation (and that change doesn\'t help Israel\'s position), and 2) WHEN\nit gives up this land IT NEEDS to recei ve something in return to\ncompensate for the increased risks\n\nTim\n\n\'

'From: ata@hfsi.hfsi.com ( John Ata)\nSubject: Re: DID HE REALLY RISE???\nRe  
ply-To: <news@opl.com>\nOrganization: HFSI\nLines: 51\n\n\nIn article <Apr.21.03  
.26.43.1993.1373@geneva.rutgers.edu> parkin@Eng.Sun.COM writes:\n\n>desperatel  
y wanted the Jewish people to accept him as the Messiah. If\n>the crucificati  
on was the will of God how could Jesus pray that this\n>cup pass from him. Wa  
s this out of weakness. NEVER. Many men and\n>women have given their lives f  
or their country or other noble causes.\n>Is Jesus less than these. No he is  
not. He knew the crucification\n>was NOT the will of GOD. God\'s will was th  
at the Jewish people accept\n>Jesus as the Messiah and that the kingdom of Hea  
ven be established on\n>the earth with Jesus as it\'s head. (Just like the Jew  
ish people\n>expected). If this had happened 2000 years ago can you imagine wh  
at\n\t.\n\t.\n\t.\n\t.\n\nWhy do you assume that Jesus\'s plea to His Father "to le  
t this cup\n\tpass from Him", was merely a plea to escape death? When I look at  
\nJesus in the garden, I see a Man-God, who all His life had had the\n\tpresence  
of His Father with Him. As a result, He knew every\ndetail about His death lo  
ng before the Agony in the Garden. But\n\ nas that hour approached, He felt aban  
doned by His Father, His\n\tpresence diminishing with each passing minute. In a  
ddition, it\n\ was brought more and more to Jesus\'s attention (the betrayal of\  
\nJudas was probably a big impact) that His suffering would be to no\n\ navail for  
many people, especially those who would reject Him, not\n\ nonly then but in the  
future. I truly believe that the majority of\n\Jesus\'s suffering was mental a  
nd spiritual, while the physical\n\portion was only the tip of the iceburg.\n\n\nBTW, we know from John\'s account that Jesus \*shunned\* becomming an earthly\n\kn  
ing. From John:\n\nJOH 6:14 After the people saw the miraculous sign that  
Jesus did, they\n began to say, "Surely this is the Prophet who is  
to come into the\n world." \nJOH 6:15 Jesus, knowing that they in  
tended to come and make him king by\n force, withdrew again to a mo  
untain by himself.\n\n\nThis does not seem like a man who would regret not becom  
ing an\n\nearthly king. No, Jesus knew His mission was to redeem all (Jew &\nGe  
ntile) people and establish His kingdom in the hearts of those\n\ nwho would beli  
eve. This was utterly mistaken, much to Jesus\'s\n\ndismay, as an aspiration to  
some earthly kingdom. But He knew\n\ what His Father\'s will was and followed i  
t obediently even in the\n\ndarkness of His Passion.\n\n\n-- \nJohn G. Ata - Techn

(Jon Livesey) writes:\n\n>Much though it might be fun to debate capital punish  
ment itself,\n>this is probably the wrong group for it. The only relevance he  
re\n>is that you don't seem to be able to tell us what capital punishment\n>a

ctually is, and when it is murder. That is, when you tell us murder is wrong, you are using a term you have not yet defined.

Well, I've said that when an innocent person has been executed, this is objectively a murder. However, who is at blame is another question.

It seems that the entire society that sanctions any sorts of executions--realizing the risks--is to blame.

There is a \*probability\* of killing an innocent person by shooting at random into the air, and there is a \*probability\* of killing an innocent person when the state administers a system of capital punishment. So when you do either, you know that their actions you are taking will sooner or later result in the killing of an innocent person.

Yes, but there is also a probability that you will kill someone doing many random activity. Presumably, you had not isolated yourself totally from the rest of society because of this.

And, driving will kill people, as will airlines, but people continue to do both.

Driving and flying are not punishments inflicted on unwilling prisoners by Courts. They are risks that we take upon ourselves willingly.

And I argue that our law system is a similar risk. Perhaps an innocent person will be punished someday, but we work to prevent this. In fact, many criminals go free as a result of our trying to prevent punishment of innocents.

If our own driving kills someone else, then sure, there is a moral issue. I know at least one person who was involved in a fatal accident, and they felt very guilty afterwards.

But, such accidents are to be totally expected, given the number of vehicles on the road. Again, the blame is on society.

No I'm not. This is what you said. You were saying that if there were such a false witness that resulted in an innocent person being convicted and killed, it would still be the fault of the state, since it did the actual killing.

No, I just commented that the state does the killing. It does not depend on there being false witnesses. How could it? The state does the killing even in the case of sincere mistakes.

Yes, but the state is not at fault in such a case. The state can only do so much to prevent false witnesses.

It is possible. So, what are you trying to say, that capital punishment is always murder because of the possibility of human error invalidating the system?

I'm saying capital punishment is murder, period. Not because of this and the other, but because it involves taking human life.

That's my definition of murder. I make no appeals to dictionaries or to "objective" morals.

Okay, so this is what you call murder. But, the question is whether or not all such "murders" are wrong. Are you saying that all taking of human life is wrong, no matter what the circumstances?

If we, as a society, decide to murder someone, then we should say that, and list our reasons for doing so, and live with the moral consequences. We should not play word games and pretend that murder isn't murder. And that's my opinion about how society ought to be run.

But, this is basically how it works. Society accepts the risk that an innocent person will be murdered by execution. And, every member of society shares this blame. And, most people's definitions of murder include some sort of malicious intent, which is not involved in an execution, is it?

But, we were trying to discuss an objective moral system, or at least its possibility. What ramifications does your personal system have on an objective one?

No, we were not discussing an objective moral system. I was showing you that you didn't have one, because, for one thing, you were incapable of defining the terms in it, for example, "murder".

Murder violates the golden rule. Executions do not, because by allowing it at all, society implicitly accepts the consequences no matter who the innocent victim is.

We're not talking about reading minds, we are just talking about knowing the truth. Yes, we can never be absolutely certain that we have

the truth, but the court systems work on a principle of knowing the "truth" beyond a reasonable doubt." Sorry, but you simply are not quoting your self accurately. Here is what you said: "And, since we are looking totally objectively at this case, then we know what people are thinking when they are voting to execute the person or not. If the intent is malicious and unfair, then the execution would be murder." What you are doing now is to slide into another claim, which is quite different. The jury being \*persuaded\* beyond a serious doubt is not the same as us knowing what is in their minds beyond a serious doubt. Reading the minds of the jury would certainly tell whether or not a conviction was moral or not. But, in an objective system, only the absolute truth matters, and the jury system is one method to approximate such a truth. That is, twelve members must be convinced of a truth. Moreover, a jury which comes from a sufficiently prejudiced background may allow itself to be persuaded beyond a serious doubt on evidence that you and I would laugh at. But then, if we read the minds of these people, we would know that the conviction was unfair. But, would it be perfectly fair if we could read minds? If we assume that it would be fair if we knew the absolute truth, why is it so much less fair, in your opinion, if we only have a good approximation of the absolute truth? It's not a question of fairness. Your claim, which I have quoted above is a claim about whether we can \*know\* it was fair, so as to be able to distinguish capital punishment from murder. Yes, while we could objectively determine the difference (if we knew all possible information), we can't always determine the difference in our flawed system. I think that our system is almost as good as possible, but it still isn't objectively perfect. You see, it doesn't matter if we \*know\* it is fair or not. Objectively, it is either fair or it is not. Now there's a huge difference. If we can read minds, we can know, and if we cannot read minds, we can know nothing. The difference is not in degree of fairness, but in what we can know. But what we know has no effect on an objective system. I think it is possible to produce a fairly objective system, if we are clear on which goals it is supposed to promote. I'm not going to waste my time trying to devise a system that I am pretty sure does not exist. Why are you so sure? I simply want people to confront reality. \*My\* reality, remember. Why is \*your\* reality important? In this case, the reality is that, "ideal theories" apart, we can never know, even after the fact, about the fairness of the justice system. For every innocent person released from Death Row, there may have been a dozen innocent people executed, or a hundred, or none at all. We simply don't know. But, we can assume that the system is fairly decent, at least most likely. And, you realize that the correctness of our system says nothing about a totally ideal and objective system. Now what are we going to do? On the one hand, we can pretend that we have an 'ideal' theory, and that we can know things we can never know, and the Justice System is fair, and that we can wave a magic wand and make certain types of killing not murder, and go on our way. Well, we can have an ideal system, but the working system can not be ideal. We can only hope to create a system that is as close an approximation to the ideal system as possible. On the other hand, we can recognize that all Justice has a small - we hope - probability of punishing the innocent, and that in the end we do bear moral responsibility even for the probabilistic consequences of the systems we set up, and then say, "Well, here we go, murdering again." Maybe some of us will even say "Gee, I wonder if all this is strictly necessary?" Yes, we all bear the responsibility. Most people seem willing to do this. I think that the second is preferable in that it requires

people\n>to face the moral consequences of what we do as a society, instead\n>of sheltering ourselves from them by magic ceremonies and word \n>games.\n\nWe must realize the consequences of all our actions. Why do you keep\n>separating the justice system from the pack?\n\n>And lest I forget, I also don't think we have an objective moral\n>system, and I believe I only have to take that idea seriously\n>when someone presents evidence of it.\n\nI don't think our country has an objective system, but I think such an\n>objective system can exist, in theory. Without omniscience, an objective\n>system is not possible in practice.\n\nkeith\n',

"From: davewood@bruno.cs.colorado.edu (David Rex Wood)\nSubject: Rockies nee
d some relief\nNntp-Posting-Host: bruno.cs.colorado.edu\nOrganization: Univers
ity of Colorado, Boulder\nLines: 13\n\nOnce again, the Rockies bullpen fell ap
art. Andy Ashby pitched six (somewhat\nshaky) innings giving up just one run.
Then game the dreaded relief. Three\npitchers combined to give up 3 runs (one
each I believe) in the 7th inning\nand blew the save opportunity. (Final was
4-2 vs Expos).\n\nDespite their problems in the pen, I think the Rockies are a
team that wont\nbe taken lightly. Going into today's game, the had the league
's leading\nhitter and RBI man (Galarraga), two of the leaders in stolen bases
(Young\nand Cole) and increasingly strong starting pitching.\n-- \n-----

'From: steveh@thor.isc-br.com (Steve Hendricks)\nSubject: Re: Limiting Govt (was Re: Employment (was Re: Why not concentrate...))\nSummary: More on limiting libertarians\nOrganization: Free the Barbers, Inc.\nLines: 100\nNntp-Posting-Host: thor.isc-br.com\n\n|In article <18APR199320091677@venus.tamu.edu> gmw0622@venus.tamu.edu (Mr. Grinch) writes:\n|>In article <1993Apr18.174237.11229@isc-br.isc-br.com>, steveh@thor.isc-br.com (Steve Hendricks) writes...\n|>> \n|>\n|Okay, let me try to explain this.\n|>\n|When one votes for such a creature as a Senator or, worse yet, a President,\n|>one votes not for specific policies but for a general package which must cover\n|>all issues for 4 or 6 years. As such, one's influence is highly diluted.\n|>I might add that, even if one were free to vote on individual regulations,\n|>the vast amount of time required for considering a particular regulation,\n|>combined with the very small chance of one's vote making a difference, would\n|>make it unreasonable to expect the voter to make an intelligent decision\n|>with respect to specific regulations

. \n\nI\'m afraid that I\'ve lost the thread here. I didn\'t suggest that all \ngovernment regulations be subject to referenda. So I don\'t follow the \ncomments above.\n\n>> \n>> \n>:Sorry, but it strikes me that it is the only "feasible" approach. What is\n>:not feasible is a wholesale attack on all gov ernment regulation and \n>:licensing that treats cutting hair and practicing m edicine as equivalent\n>:tasks.\n>\n>I\'m not sure what you mean by "feasible" in this case. Do you mean that\n>[] are impossible in priciple, or merely th at it would be undesirable in\n>fact?\n\nI mean that an ideology that treats a ll government regulation as equally\nundesirable and seeks to abolish all regu lations is unlikely to draw\nsupport among more than a miniscule portion of th e electorate.\n\nFurthermore, I am suggesting that such a plan is not feasible in an\nindustrial society because the weight of litigation and/or misery it\ncould produce would effectively crush productive effort.\n>\n>\n>:Actually, the only areas of public spending above that strike me as \n>:generating substanti al support among libertarians are police and defense.\n>:(It is an interesting aside that as committed as libertarians claim to\n>:be to a principle of non-coercion, the only areas of public spending\n>:that they frequently support inv olve hiring people with guns....hmmm...)\n>\n>You say this as if it were surpr ising, yet in fact a necessary consequence\n>of libertarian philosophy. All non-coersive functions should be dealt \n>with privately, therefore it follow s that the only functions remaining to\n>the state are the coercive ones.\n\nNo, I\'m not surprised. I just think it\'s interesting that on one hand\nliber tarians assume a limited government can be decreed, yet on the other\nposit an entire government made up of people who carry guns. (I realize\nthat many lib ertarians assume that such a government will be \ncounterbalanced by a fully a rmed citizenry, but it is worth noting that\nwidespread civilian ownership of guns does not necessarily prevent the\nestablishment of totalitarian governmen t, e.g. Iraq.)\n>\n>> \n>:Perhaps you have. May I suggest that you consider t hat revolutionaries\n>:frequently generate support by acting as protectors of "geezers," \n>:mothers and children. Governments that ignore such people on t he grounds\n>:that "we don\'t have much to fear" from them do so at their own peril.\n>\n>Much more likely it\'s drunken teenagers. The groups in questiona re more \n>likely to be worse off during and after a revolution than before. \n>In the unlikely\n>event that you missed my earlier sarcasm, let me say thi s directly:\n>The idea that such programs as Social Security or AFDC should be considered\n>"defense" (an idea which has been advanced in ths and other newsg rroups) is\n>so absurd a lie as to be unworthy of consideration. Do you seriou sly\n>dispute this?\n\nYup, sure do. But since I also support the constitutio nal requirement\nthat the government provide for the general welfare (Article I section 8),\nI\'m willing to justify such programs on that basis.\n>\n>\n>\n>I don\'t want to seem patronizing, but you still seem to be laboring\n>under the delusion that under a socialized economic system it is reasonably\n>intell igent and honest persons (like yourself) who make the decisions.\n>I feel any third party added to a transaction is every bit as likely to be\n>ignorant or corrupt as the buyer or seller. I don\'t expect you to agree\n>with me, but you explain why you feel I\'m wrong?\n\nWell, in the first place, I don\'t sup port a "socialized economic system." I think within limits that capitalism is a fine idea. But it is not\nthe case that "any third party...is...as likely t o be ignorant or corrupt\nas the buyer or seller." There are multitudes of ex amples where such a\nstatement is demonstrably false. Regulation of stock mar ket transactions\nthat provide a reasonable basis for buyers to avoid fraud is only one\nexample.\n\njsh\n>\n>Mr. Grinch\n--\n>Steve Hendricks

And\n>all you're application is saying that it's true if you really\n>believe it's true. That's silly.\n\n>Conversely, you say off-handedly that \_

anything\_ can happen under\natheism. Again, just an offshoot of believe-it-and-it-becomes-true-\ndon't-believe-it-and-it-doesn't. \n\nLike other religions I'm acquainted with, Islam teaches exclusion and\ncaste, and suggests harsh penalties for \_behaviors\_ that have no\nlogical call for punishment (certain limits on speech and sex, for\nexample). To me this is not good. I see much pain and suffering\nwithout any justification, except for the \_waving of the hand\_ of\nsome inaccessible god.\n\nBy the by, you toss around the word knowledgable a bit carelessly.\nFor what is a \_knowledgeable believer\_ except a contradiction of\nterms. I infer that you mean believer in terms of having faith.\nAnd if you need knowledge to believe then faith has nothing\nto do with it, does it?\n\n-jim halat\n \n",

'From: wally@Auspex.COM (Wally Bass)\nSubject: Re: Date is stuck\nOrganization: Auspex Systems, Santa Clara\nLines: 35\nNntp-Posting-Host: alpha-e5.auspex.com\n\nIn article <1993Apr19.055039.29715@oec4.orbital.dialix.oz.au>\n oe cjtbt@oec4.orbital.dialix.oz.au (John Bongiovanni) writes:\n [stuff deleted]\n>Did I once hear that in order for the date to advance, something, like a \n>clock, \*has\* to make a Get Date system call? Apparently, the clock\n>hardware interrupt and BIOS don't do this (date advance) automatically. The\n>Get Date call notices that a "midnight reset" flag has been set, and then\n>then advances the date.\n>\n>Anybody with more info?\n\nThere are two \'problems\':\n(1) the BIOS TOD routine which updates the BIOS clock uses only 1 bit\n for day increment, so a second wrapping of the clock past midnight\n will get lost if no one calls the BIOS to read the clock in the\n meantime, and\n(2) the BIOS resets the day wrap indicator on the first \'get date\'\n call from ANYBODY (after the wrap indicator has been set). So\n unless the first BIOS \'get date\' call after midnight is done by\n the DOS \'kernel\' (which is the only part of DOS which knows how to\n increment the date, the day wrap indication is normally lost.\nMy guess is that Kevin\'s \'menu\' system uses BIOS calls to read the\nclock (in order to display the time), and is hence the entity which\ncauses the day wrap indication to get lost. Even if the \'menu\' system\n\'notices\' the day \'wrap\' (which I think is indicated by a non-zero\nvalue in AL), there really isn't any particularly good way to tell DOS\nabout it, so that DOS can update the day. The menu system \'should\' use\nDOS calls to get the time, which would cause the DOS \'kernel\' to do\nthe BIOS call, and the wrap indicator would hence be processed\nproperly. Possibly, though, the \'menu\' system can't easily use DOS\ncalls for time, because DOS is not reentrant, and perhaps time\nincrementing others occur while the \'menu\' system is \'inside\' some\nother DOS call.\n\nWally Bass\n',

[illegible]

ust want to keep track of them so\nparticipants can have some idea how widespr  
ead their stuff is.\n\nIt\'s the purpose of OTIS to get these images spread ou  
t as much as\npossible. If you have the time, please upload a few to your fav  
orite\nBBS system....or even just post this "info-file" there. It would be\nk  
een of you.\n\n-----  
-----\n\nUSE?\n\nIf you want to use any of the works you find on the OTIS dire  
ctory,\nyou\'ll have to check to see if permission has been granted and the \n  
stipulations of the permission (such as free copy of publication, or\nfull add  
ress credit). You will either find this in the ".rm" file for \nthe image  
or series of images...or in the "Artists" directory under the \nArtists name.  
If permission isn\'t explicitly given, then you\'ll have \nto contact the arti  
st to ask for it. If no info is available, email\nme (ed@cwis.unomaha.edu), a  
nd I\'ll get in contact with the artist for \nyou, or give you their contact i  
nformation.\n\nWhen you DO use permitted work, it\'s always courteous to let  
the artist\nknow about it, perhaps even send them a free copy or some such\nco  
mpensation for their files.\n\n-----  
-----\n\nNAMING IMAGES?\n\nPlease keep the names of your file  
s in "dos" format. That means, keep\nthe filename (before .jpg or .gif) to ei  
ght characters or less. The way\nI usually do it is to use the initials of th  
e artist, plus a three or\nfour digit "code" for the series of images, plus th  
e series number.\nThus, Leonardo DeVinci\'s fifth mechanical drawing would be  
something\nlike:\n \n\tldmek5.gif OR ldmek5.jpg OR ldmech5.gif  
ETC\n\nKeeping the names under 8 characters assures that the filename will\nre  
main intact on all systems. \n\n\n-----  
----- \n\nCREATING IMAGE FILES?\n\nWhen creating image f  
iles, be sure to at least include your name\nsomewhere on or below the picture  
. This gives people a reference in\ncase they\'d like to contact you. You ma  
y also want to include a title,\naddress or other information you\'d like peop  
le to know.\n\n\n-----  
-----\n\nHMMM?!\n\nThat\'s about it for now. More "guidelines" will be add  
ed as needed.\nYour input is expected.\n\n\n-----  
-----\n\nDISCLAIMER: The OTIS Project has no co  
nnection to the Church of OTIS \n \t (a sumerian deity) or it\'s follower  
s, be they pope, priest,\n \t or ezine administrator. We do take sacrifice  
s and donations\n \t however.\n\n\n-----  
-----\n\nDISCLAIMER: The OTIS Project is here for the  
distribution of original \n \t image files. The files will go to the publ  
ic at large. \n \t It\'s possible, as with any form of mass-media, that so  
meone\n \t could unscrupulously use your images for financial gain. \n  
 \t Unless you\'ve given permission for that, it\'s illegal. OTIS\n \t takes no responsibility for this. In simple terms, all rights\n \t revert  
to the author/artist. To leave an image on OTIS is to \n \t give permissio  
n for it to be viewed, copied and distributed \n \t electronically. If you  
don\'t want your images distributed \n \t all-over, don\'t upload them.  
To leave an image on OTIS is\n \t NOT giving permission to have it used in  
any publication or\n \t broadcast that incurs profit (this includes, but is  
not \n \t limited to, magazines, newsletters, clip-art software, \n \t  
 \t screen-printed clothing, etc). You must give specific\n \t permissio  
n for this sort of usage. \n\n\n-----  
-----\n\nRemember, the operative term is "stimulate". If y  
ou know of people\nthat\'d be interested in this sort of thing...get them invo  
lved...kick\'m\nin the booty....offer them free food...whatever...\n\n....e (ed@cwis.unomaha.edu)\n (ed@sunsite.unc.edu)\n\n--\nEd Stastny

E CLIPPER CHIP: A TECHNICAL SUMMARY\nOrganization: Brought to you by the numbe  
rs 2, 3, and 7\nIn-Reply-To: denning@guvax.acc.georgetown.edu\'s message of 19  
Apr 93 18:23:27 -0400\nNntp-Posting-Host: rainier.ho.att.com\nLines: 62\n\nIn  
article <1993Apr19.182327.3420@guvax.acc.georgetown.edu> denning@guvax.acc.geo  
rgetown.edu writes:\n\t[Prof. Denning\'s description of SkipJack mostly omitt  
d]\n\tCHIP STRUCTURE\n\tThe Clipper Chip contains a classified 64-bit block  
encryption\n\talgorithm called "Skipjack." The algorithm uses 80 bit keys (co  
mpared\n\twith 56 for the DES) and has 32 rounds of scrambling (compared with  
16\n\tfor the DES). It supports all 4 DES modes of operation. Throughput is\  
\n\t16 Mbits a second. [...]\n\tF, an 80-bit family key that is common to all  
chips\n\tN, a 30-bit serial number\n\tU, an 80-bit secret key that unlocks all  
messages encrypted\n\t\twith the chip\n\tThe key K and message stream M (i.e.  
, digitized voice) are then\n\tfed into the Clipper Chip to produce two values  
:\n\t\tE[M; K], the encrypted message stream, and \n\t\tE[E[K; U] + N; F  
, a law enforcement block. \nThree questions:\n1) It looks like each 64 bi  
ts of input gives you 4\*64 bits of output:\n\t\tE[M;K] = 64 bits\n\t\tE[K;U] =  
E[ 80 bits ] = 128 bits\n\t\tE[ E[K;U], N ; F ] = E[ 128 + 30 bits ] = 192 bit  
s\nDo you really need to transmit all 256 bits each time,\nor do you onl  
y transmit the 192 bits of wiretap block at the beginning? \nAll 256 woul  
d be really obnoxious for bandwidth-limited applications\nlike cellular pho  
nes (or even regular phones over \n2) how do the 4 DES modes interact with t  
he two-part output?\nDo the various feedback modes only apply to the messag  
e block,\nor also to the wiretap block? Or, if the wiretap block is only\ntransmitted at the beginning, does it get incorporated into\neverything thr  
ough feedback modes, but not during ECB mode?\n3) Does the Clipper Chip chec  
k the wiretap block itself?\nDoes the block have to be present at all?\nSince the receiving chip doesn\'t know the transmitter\'s U,\nit presumably  
can\'t check the validity of E[K;U], so it\'s \nlimited to checking the \*fo  
rm\* of the wiretap block,\nand maybe checking the serial number for reasona  
bleness\n(unless there\'s some sort of back-door structure that lets\nit  
recognize a valid E[K;U].)\n\nIn that case, can you replace the wiretap  
block with a DIFFERENT\nwiretap block, presumably an old valid one to avoid  
attracting attention?\n(The chip won\'t do it, so you postprocess the outpu  
t.)\nRegular people can do one with their own serial number and a dummy key  
;\nparanoid people can use someone else\'s serial number.\n\nOn the othe  
r hand, if I could think of that solution so easily,\npresumably the NSA co  
uld too - have they done something to block it,\nlike use message encryptio  
n that\'s really E[M; K,U,N] ?\n\n\nThanks!\n--\n#\n\t\t\t\t\tPray for peace;

"From: dyoung@media.mit.edu (David Young)\nSubject: Drawing Lines (inverse/xor)\nOrganization: MIT Media Laboratory\nLines: 40\n\nI'm trying to write some code that lets me draw lines and do rubber-band\nboxes in Motif/X. I'm running on an 8-bit display for which I've created a\ncolormap and am using almost all of the colors. I want to draw the lines\nin a drawing area widget -- a widget in which I'm displaying a bitmap using\nXPutImage(). If doesn't matter if the lines I draw interactively stay\naround when the window is refreshed.\n\nCurrently, to draw interactively, I begin with:\n\n /\* drawIndex is an color table index I reserve for the Foreground \*/\n /\* my\_default\_bg\_color is the color index for the background of my image \*/\n palette\_colors[drawIndex].red = palette\_colors[my\_default\_bg\_color].red;\n palette\_colors[drawIndex].green = palette\_colors[my\_default\_bg\_color].green;\n palette\_colors[drawIndex].blue = palette\_colors[my\_default\_bg\_color].blue;\n XStoreColors( myDisplay, my\_cmap, &palette\_colors[DrawIndex], 1);\n XFlush( myDisplay);\n\n XSetFunction( myDisplay, gc, GXxor);\n XSetForeground( myDisplay, gc, drawIndex);\n\nThen to draw I do:\n\n XDrawLine( myDisplay, XtWindow( drawingArea), gc, x1, y1, x2, y2);\n XFlush( myDisplay);\n\nAnd when I'm all done, to return things to normal I do:\n\n XSetFunction( myDisplay, gc, GXcopy);\n\nWhat I'd like to happen is for the lines I draw to be the inverse of\nwhatever I'm drawing over. Instead what happens is I get white lines. If\nthe lines are over a white background - nothing shows up. If the lines are\nover a black area - nothing shows up! It's very strange. But the GXxor\nfunction seems right - since if I do a rubber-banding box, it erases and\nredraws itself correctly (i.e. not disturbing the underlying image).\n\nAny suggestions what I'm doing wrong?\n\ndavid\n",

'From: ejalbert@husc3.harvard.edu\nSubject: Re: Monophysites and Mike Walker\nOrganization: Harvard University Science Center\nLines: 113\n\nIn article <May.6.00.34.58.1993.15426@geneva.rutgers.edu>, db7n+@andrew.cmu.edu (D. Andrew Byler) writes:\n>>\t\t- Mike Walker \n>> \n>>[If you are using the standard formula of fully God and fully human,\n>>that I'm not sure why you object to saying that Jesus was human. I\n>>think the usual analysis would be that sin is not part of the basic\ndefinition of humanity. It's a consequence of the fall. Jesus is\n>>human, but not a fallen human. --clh]\n> \nI differ with ou

r moderator on this. I thought the whole idea of God coming down to earth to live as one of us "subject to sin and death" (as one of the consecration prayers in the Book of Common Prayer (1979) puts it) was that Jesus was tempted, but did not succumb. If sin is not part of the basic definition of humanity, then Jesus "fully human" (Nicea) would not be "subject to sin", but then the Resurrection loses some of its meaning, because we encounter our humanity most powerfully when we sin. To distinguish between "human" and "fallen human" makes Jesus less like one of us at the time we need him most.

[These issues get mighty subtle. When you see people saying different things it's often hard to tell whether they really mean seriously different things, or whether they are using different terminology. I don't think there's any question that there is a problem with Nestorius, and I would agree that the saying Christ had a human form without a real human nature or will is heretical. But I'd like to be a bit wary about the Copts, Armenians, etc. Recent discussions suggest that their monophysite position may not be as far from orthodoxy as many had thought. Nestorius was an extreme representative of one of the two major schools of thought. More moderate representatives were regarded as orthodox, e.g. Theodore of Mopsuestia. My impression is that the modern monophysite groups inherit the entire tradition, not just Nestorius' version, and that some of them may have a sufficient balanced position to be regarded as orthodox. --clhj]

First, the Monophysites inherited none of Nestorius's version -- they were on the opposite end of the spectrum from him. Second, the historical record suggests that the positions attributed to Nestorius were not as extreme as his (successful) opponents (who wrote the conventional history) claimed. Mainly Nestorius opposed the term Theotokos for Mary, arguing (I think correctly) that a human could not be called Mother of God. I mean, in the Athanasian Creed we talk about the Son "uncreate" -- surely even Arians would concede that Jesus existed long before Mary. Anyway, Nestorius's opponents claimed that by saying Mary was not Theotokos, that he claimed that she only gave birth to the human nature of Jesus, which would require two separate and distinct natures. The argument fails though, because Mary simply gave birth to Jesus, who preexisted her either divinely, if you accept "Nestorianism" as commonly defined, or both natures intertwined, ala Chalcedon.

Second, I am not sure that "Nestorianism" is not a better alternative than the orthodox view. After all, I find it hard to believe that pre-Incarnation that Jesus's human nature was in heaven; likewise post-Ascension. I think rather that God came to earth and took our nature upon him. It was a separate nature, capable of being tempted as in Gethsemane (since I believe the divine nature could never be tempted) but in its moments of weakness the divine nature prevailed.

Comments on the above warmly appreciated.

Jason Albert

[There may be differences in what we mean by "subject to sin". The original complaint was from someone who didn't see how we could call Jesus fully human, because he didn't sin. I completely agree that Jesus was subject to temptation. I simply object to the idea that by not succumbing, he is thereby not fully human. I believe that you do not have to sin in order to be human.

I again apologize for confusing Nestorianism and monophysitism. I agree with you, and have said elsewhere, that there's reason to think that not everyone who is associated with heretical positions was in fact heretical. There are scholars who maintain that Nestorius was not Nestorian. I have to confess that the first time I read some of the correspondence between Nestorius and his opponents, I thought he got the better of the m.

However, most scholars do believe that the work that eventually led to Chalcedon was an advance, and that Nestorius was at the very least "rash and

dogmatic" (as the editor of "The Christological Controversy" refers to him) in rejecting all approaches other than his own. As regular Usenet readers know, narrowness can be just as much an impediment as being wrong. Furthermore, he did say some things that I think are problematical. He responds to a rather mild letter from Cyril with a flame worthy of Usenet. In it he says "To attribute also to [the Logos], in the name of [the incarnation] the characteristics of the flesh that has been conjoined with him ... is, my brother, neither the work of a mind which truly errs in the fashion of the Greeks or that of a mind diseased with the insane heresy of Arius and Apollinaris and the others. Those who are thus carried away with the idea of this association are bound, because of it, to make the divine Logos have a part in being fed with milk and participate to some degree in growth and stand in need of angelic assistance because of his fearfulness ... These things are taken falsely when they are put off on the deity and they become the occasion of just condemnation for us who perpetrate the falsehood." "It's all well and good to maintain a proper distinction between humanity and divinity. But the whole concept of incarnation is based on exactly the idea that the divine Logos does in fact have "to some degree" a part in being born, growing up, and dying. Of course it must be understood that there's a certain indirectness in the Logos' participation in these things. But there must be some sort of identification between the divine and human, or we don't have an incarnation at all. Nestorius seemed to think in black and white terms, and missed the sorts of nuances one needs to deal with this area." "You say "I find it hard to believe that pre-Incarnation that Jesus's human nature was in heaven." I don't think that's required by orthodox doctrine. It's the divine Logos that is eternal."

"From: detroch@imec.be (Stefan De Troch) Subject: virtual mwm ? Nntp-Posting-Host: nemesis Reply-To: detroch@imec.be Organization: IMEC, Kapeldreef 75 3001 Leuven Belgium Lines: 12 Hi netland, I thought that I once read about the existence of a virtual mwm like vtwm. Could anybody give me a hint where to find this program or confirm/deny the existence of this program. Regards, Stefan",

"From: weber@sipi.usc.edu (Allan G. Weber) Subject: Need help with Mitsubishi P78U image printer Organization: University of Southern California, Los Angeles, CA Lines: 26 Distribution: na NNTP-Posting-Host: sipi.usc.edu Our group recently bought a Mitsubishi P78U video printer and I could use some help with it. We bought this thing because it (1) has a parallel data input in addition to the usual video signal inputs and (2) claimed to print 256 gray level images. However, the manual that came with it only describes how to format the parallel data to print 1 and 4 bit/pixel images. After some initial problems with the parallel interface I now have this thing running from a parallel port of an Hewlett-Packard workstation and I can print 1 and 4 bit/pixel images just fine. I called the Mitsubishi people and asked about the 256 level claim and they said that was only available when used with the video signal inputs. This was not mentioned in the sales literature. However they did say the P78U can do 6 bit/pixel (64 level) images in parallel mode, but they didn't have any information about how to program it to do so, and they would call Japan, etc. Frankly, I find it hard to believe that if this thing can do 8 bit/pixel images from the video source, it can't store 8 bits/pixel in the memory. It's not like memory is that expensive any more. If anybody has any information on getting 6 bit/pixel (or even 8 bit/pixel) images out of this thing, I would greatly appreciate your sending it to me. Thanks. A

reprint (without permission, so sue me) relevant\ninformation posted some year  
s ago on this very problem. Note the early use of\nPostScript technology, pre  
dating many of this year\'s papers listed in the\nApril 1st SIGGRAPH Program A  
nnouncement posted here a few days ago.\n\n-- Eric\n\n\nIntersection Between a  
Line and a Polygon (UNDECIDABLE??),\n\tby Dave Baraff, Tom Duff\n\n\n\tFrom: deb  
@charisma.graphics.cornell.edu\n\tNewsgroups: comp.graphics\n\tKeywords: P, NP  
, Jordan curve separation, Ursyhn Metrization Theorem\n\tOrganization: Progra  
m of Computer Graphics\n\nIn article [...] ncsmith@ndsuvax.UUCP (Timothy Lyle  
Smith) writes:\n>\n> I need to find a formula/algorithm to determine if a lin  
e intersects\n> a polygon. I would prefer a method that would do this in as  
little\n> time as possible. I need this for use in a forward raytracing\n>  
program.\n\nI think that this is a very difficult problem. To start with, lin  
es and\npolygons are semi-algebraic sets which both contain uncountable number  
of\npoints. Here are a few off-the-cuff ideas.\n\nFirst, we need to check if  
the line and the polygon are separated. Now, the\nJordan curve separation the  
orem says that the polygon divides the plane into\nexactly two open (and thus  
non-compact) regions. Thus, the line lies\ncompletely inside the polygon, the  
line lies completely outside the polygon,\nor possibly (but this will rarely h  
appen) the line intersects the polyon.\n\nNow, the phrasing of this question s  
ays "if a line intersects a polygon", so\nthis is a decision problem. One pos  
sibility (the decision model approach) is\nto reduce the question to some othe  
r (well known) problem Q, and then try to\nsolve Q. An answer to Q gives an a  
nswer to the original decision problem.\n\nIn recent years, many geometric pro  
blems have been successfully modeled in a\nnew language called PostScript. (S  
ee "PostScript Language", by Adobe Systems\nIncorporated, ISBN # 0-201-10179-3  
, co. 1985).\n\nSo, given a line L and a polygon P, we can write a PostScript  
program that\ndraws the line L and the polygon P, and then "outputs" the answe  
r. By\n"output", we mean the program executes a command called "showpage", wh  
ich\nactually prints a page of paper containing the line and the polygon. A q  
uick\nexamination of the paper provides an answer to the reduced problem Q, an  
d thus\nthe original problem.\n\nThere are two small problems with this approa  
ch. \n\n\t(1) There is an infinite number of ways to encode L and P into the\n  
\treduced problem Q. So, we will be forced to invoke the Axiom of\n\tChoice (  
or equivalently, Zorn\'s Lemma). But the use of the Axiom of\n\tChoice is not  
regarded in a very serious light these days.\n\n\t(2) More importantly, the qu  
estion arises as to whether or not the\n\tPostScript program Q will actually o  
utput a piece of paper; or in\n\tother words, will it halt?\n\n\tNow, PostScri  
pt is expressive enough to encode everything that a\n\tTuring Machine might do  
; thus the halting problem (for PostScript) is\n\tundecidable. It is quite po  
ssible that the original problem will turn\n\tout to be undecidable.\n\n\nI wo  
n\'t even begin to go into other difficulties, such as aliasing, finite\npreci  
sion and running out of ink, paper or both.\n\nA couple of references might be

Summary: Overkill.\nOrganization: AT&T Bell Laboratories, Murray Hill NJ\n\nTh

e situation is not nearly as bleak as Baraff suggests (he should know\nbetter, he\'s hung around The Labs for long enough). By the well known\nDobbin-Dullman reduction (see J. Dullman & D. Dobbin, J. Comp. Obfusc.\n37,ii: pp. 33-947, lemma 17(a)) line-polygon intersection can be reduced to\nHamiltonian Circuit, without(!) the use of Grobner bases, so LPI (to coin an\nacronym) is probably only NP-complete. Besides, Turing-completeness will no\nlonger be a problem once our Cray-3 is delivered, since it will be able to\ncomplete an infinite loop in 4 milliseconds (with scatter-gather.)\n\n-----\n\nFrom: deb@svax.cs.cornell.edu (David Baraff)\n\nWell, sure its no worse than NP-complete, but that\'s ONLY if you restrict\nyourself to the case where the line satisfies a Lipschitz condition on its\nsecond derivative. (I think there\'s an \'89 SIGGRAPH paper from Caltech that\ndeals with this).\n\n--\n\n-----

'From: mjones@watson.ibm.com (Mike Jones)\nSubject: Re: Jack Morris\nReply-To: mjones@donald.aix.kingston.ibm.com\nDisclaimer: This posting represents the poster\'s views, not necessarily those of IBM.\nNntp-Posting-Host: fenway.aix.kingston.ibm.com\nOrganization: IBM AIX/ESA Development, Kingston NY\nLines: 57\n\nmarnay@ramsey.cs.laurentian.ca (Roger Maynard) writes:\n>It sure does. And it all depends on the definition that you use for "better".\n>Yours is based on what could have been and mine is based on what really\n>happened.\n\nWell, actually, most of ours is based on what really happened and yours is\nbased on some fantasy of how it happened. But that\'s OK, I understand you\nhave a hockey background. Stats like "plus/minus" make RBI look good.\n\n>>Is it Viola\'s fault that Boston had no offense? Is it \*because\* of Morris that\n>>the Blue Jays had such a strong offense? Don\'t tell me that Morris has this\n>>magical ability to cause the offensive players to score more runs.\n>This is the perfect example of your problem. You are isolating Viola\'s\n>contribution from the rest of the team\'s efforts. You can only do\n>this if you can say for sure what the team would have done without\n>Viola. Only then can you compare. But you cannot know how the team\n>would have done without Viola. Your analysis is fallacious.\n\nOK, how about a straight answer, then. Here\'s a very simple question to which\nI\'m sure a fair number of us are very interested in the answer to. Please\nanswer yes or no, Roger:\nCan a pitcher cause the offensive players on his team to score more runs?\nAL only, please.\n\nFor anyone else following along, it is a well-known and demonstrable fact\nthat a team\'s win-loss record is closely related to the number of runs the\nteam scores and the number the team allows. It\'s not a definite,\nhard-and-fast function, but there is definitely a correlation. In fact, as a\nrule of thumb, if teams A and B both score X runs and team A allows Y runs,\nfor every 10 runs fewer than Y that team B allows, it will win another game.\nSo, for instance, if we look at the 1991 Toronto Blue Jays, we find that\nthey scored 780 runs and allowed 682, of which Morris allowed 114. All other\nthings being equal, if Frank Viola, with his 3.44 ERA had replaced Jack\nMorris for the 240.2 innings Morris threw (plausible, since Viola threw 238\nfor Boston), the "Red Jays" would have allowed about 15 fewer runs, or\nenough for 1-2 more wins. Now, that doesn\'t take into account that Viola\npitched half his innings in Fenway, which is a harder park to pitch in\n(particularly for a lefthander) than Skydome. So, um, Roger. Unless you\nreally do believe that a pitcher can somehow affect the number of runs\nhis team scores, could you enlighten us to the fallacy in this\nanalysis? Clearly, it would be foolhardy to claim that Viola would\nnecessarily

have put up a 3.44 if he had been on the Jay last year, but\nthat is not the claim. We look at what the actual performances were and\nevaluate Viola\'s as better than Morris\' in the sense that "had Morris\nperformed as Viola did, his team would have been better off."\n\n>It takes an open mind to really truly understand what is happening out\n>here in the real world guys.\n\nThis is true, but not so open that your brain falls out.\n\nMike Jones | AIX High-End Development | mjones@donald.aix.kingston.ibm.com\n\nComputer...if you don\'t open that exit hatch this moment I shall zap straight\noff to your major data banks and reprogram you with a very large ax. Hey, they laughed at Einstein, too!\n\n>>before any other treatment, a systemic anti-fungal (such as Nizoral) to his\n>>new patients IF they've been on broad-spectrum anti-biotics 4 or more times\n>>in the last two years. He's kept a record of the results, and for over \n>>2000 patients found that over 90% of his patients get significant relief\n>>of allergic/sinus symptoms. Of course, this is only the beginning for his\n>>program.\n\n>Yeah, I'll bet. Tomorrow, the world.\n\n>Listen, uncontrolled studies like this are worthless.\n\n>>In my case, as I reported a few weeks ago, I was developing the classic\n>>symptoms outlined in \"The Yeast Connection\" (I agree it is a poorly \n>>written book): e.g., extreme sensitivity to plastics, vapors, etc. which\n>>I never had before (started in November). Within one week of full dosage\n>>of Sporanox, the sensitivity to chemicals has fully disappeared - I can\n>>now sit on my couch at home without dying after two minutes. I'm also\n>>\*greatly\* improved in other areas as well.\n\n>I'm sure you are. You sound like the typical hysteric/hypochondriac who\n>responds to \"miracle cures.\" \n\n>>Of course, I have allergy symptoms, etc. I am especially allergic to\n>>molds, yeasts, etc. It doesn't take a rocket scientist to figure out that\n>>if one has excessive colonization of yeast in the body, and you have a\n>>natural allergy to yeasts, that a threshold would be reached where you\n>>would have perceptible symptoms.\n\n>Yeah, \"it makes sense to me\", so of course it should be taken seriously.\n>Snort.\n\n>>Also, yeast do produce toxins of various\n>>sorts, and again, you don't have to be a rocket scientist to realize that\n>>such toxins can cause problems in some people.\n\n>Yeah, \"it sounds reasonable to me\".\n\n>>Of course, the \$60,000\n>>question is whether a person who is immune compromised (as tests showed I was\n>>from over 5 years of antibiotics, nutritionally-deficiencies because of the\n>>stress of infections and allergies, etc.),\n\n>Oh, really? \_What\_ tests? Immune-compromised, my ass.\n>More like credulous malingerer. This is a psychiatric syndrome.\n\n>>can develop excessive yeast\n>>colonization somewhere in the body. It is a tough question to answer since\n>>testing for excessive yeast colonization is not easy. One almost has to\n>>take an empirical approach to diagnosis. Fortunately, Sporanox is relatively\n>>safe unlike past anti-fungals (still have to be careful, however) so there's\n>>no reason any longer to withhold Sporanox treatment for empirical reasons.\n\n>You know, it's a shame that a drug like itraconazole is being misused\n>in this way. It's ridiculously expensive, and potentially toxic.\n>The trouble is that it isn't toxic enough, so it gets abused by quacks.\n\n>>BTW, some would say to try Nystatin. Unfortunately, most yeast grows hyphae\n>>too deep into tissue for Nystatin to have any permanent affect. You'll find\n>>a lot of people who are on Nystatin all the time.\n\n>The only good thing about nystatin is that it's (relatively) cheap\n>and when taken orally, non-toxic. But oral nystatin is without any\n>systemic effect, so unless it were given IV, it would be without\n>any effect on your sinuses. I wish these quacks would first use\n>IV nystatin or amphotericin B on people like you. That would solve\n>the \"yeast\" problem once and for all.\n\n>>In summary, I appreciate all of the attempts by those who desire to keep\n>>medicine on the right road. But methinks that some who hold too firmly\n>>to the party line are academics who haven't been in the trenches long enough\n>>actually treating patients. If anybody, doctors i

ncluded, said to me to my\n>>face that there is no evidence of the \'yeast connection\', I cannot guarantee\n>>their safety. For their incompetence, ripping off their lips is justified as\n>>far as I am concerned.\n\n>Perhaps a little Haldol would go a long way towards ameliorating\n>your symptoms.\n\n>Are you paying for this treatment out of your own pocket? I\'d hate\n>to think my insurance premiums are going towards this.\n\n>Steve Dyer\n\nDyer, you\'re rude. Medicine is not a totallly scientific endeavour. It\'s\noften practiced in a disorganized manner. Most early treatment of\nnon-life threatening illness is done on a guess, hazarded after anecdotal\nevidence given by the patient. It\'s an educated guess, by a trained person,\nbut it\'s still no more than a guess. It\'s cheaper and simpler to medicate first and only deal further with those\npeople who don\'t respond.\n\nThere are diseases that haven\'t been described yet and the root cause of many\ndiseases now described aren\'t known. (Read a book on gastroenterology\nsometime if you want to see a lot of them.) After scientific methods have\nrun out then it\'s the patient\'s freedom of choice to try any experimental\nmethod they choose. And it\'s well recognized by many doctors that medicine\ndoesn\'t have all the answers.\n\nThis person said that they had relief by taking the medicine. Maybe it\'s a\nmiracle cure, maybe it\'s valid. How do you know? \n\nYou might argue with the reasoning, the conclusions. But your disparaging\nattack is unwarranted. Why don\'t you present an convincing argument for you\nr beliefs, instead of wasting our time in an ad hominem attack.\n\n-Jackie-\n\n',

'From: boyle@bbsls23.bnr (Ian Boyle)\nSubject: Re: What is " Volvo " ?\nOrganization: BNR Europe Ltd.\nLines: 20\nDistribution: world\nReply-To: boyle@bbsls23.bnr\nNNTP-Posting-Host: bbsls23.bnr.co.uk\n\n> And all of these cars are driven fairly hard. Useful for blowing away VW Beetles, though I\nbelieve the Beetle corners better. \n\nI can say without any doubt that I have never been blown away by any Volvo, ever.\nI\'ve been blocked into a few car parks though by shit-head Volvo owners who \'only thought they\'d be a few minutes\'. This does not happen with the owners of any other makes of car.\n\nNot sure how long the small shit-box Volvos last - too damn long. The worst car I ever drove was a hired 340. In power, handling and ride it was reminiscent of something\nfrom the 50s, without the character. The 340 only ceased production a couple of years back. I\'ve only been a passenger in the big Volvos, but that was enough. I ought to go\nfor a test drive because they offer some neat gifts.\n\n\n\n',

'From: betz@gozer.idbsu.edu (Andrew Betz)\nSubject: Randy Weaver trial update: Day 5.\nNntp-Posting-Host: gozer\nOrganization: SigSauer Fan Club\nLines: 94\n\nNote: These trial updates are summarized from reports in the\nIdaho Statesman\_ and the local NBC affiliate television\nstation, KTVB Channel 7.\n\nRandy Weaver/Kevin Harris trial update: Day 5.\n\nMonday, April 19, 1993 was the fifth day of the trial.\n\nSynopsis: Government informant Kenneth Fadeley testified that\nRandy Weaver sold him two shotguns in violation of the National\nFirearms Act of 1934. U.S. District Court Judge Edward Lodge\nasks jurors not to hear accounts of the Waco fire because\nof possible influences on the Weaver/Harris case.\n\nThe testimony of FBI Special Agent Greg Rampton apparently\nended without further incident, as it was mentioned neither\nby KTVB nor the \_Idaho Statesman\_.\n\nThe day was highlighted by the testimony of Kenneth Fadel

ey, who had been posing as an outlaw biker and illegal guns person named Gus Magiosono. Fadeley testified that he was acting as an informant for the Bureau of Alcohol, Tobacco, and Firearms in his dealings with Randy Weaver. Fadeley began by stating that he had met Weaver in 1987 at an Aryan Nations summer conference in Hayden Lake, Idaho. The two then met again October 11, 1989 (note the huge separation in time) at a restaurant in Sandpoint, Idaho, to begin a weapons transaction. He stated that Weaver had said, "He felt like he (Weaver) was being prepared to do something dangerous for the White cause." The two later met October 24, 1989 behind the restaurant and later went to a city park to make the sale. During this second meeting, Fadeley was wearing a small recording device to tape the conversation. Weaver allegedly showed him an H&R 12-gauge shotgun with a 13-inch barrel and an overall length of 19.25 inches. He additionally showed a Remington 12-gauge shotgun with a 12.75-inch barrel and an overall length of 24.5 inches (NFA requires minimums of 18 inches for barrel length and an overall length of 26 inches). On tape, Weaver is reported to have said that he could perform better work once his machine shop is set up. The two then discuss the possibility of future sales. Fadeley then counts out three hundred dollars for the two guns and promises to balance the one-hundred fifty dollars when they next meet. (Note that the ATF could have simply arrested him here. Why did they wait until January 1991 - over a year later - to arrest him? This is not explained). The next meeting took place on Nov 30, 1989. Fadeley stated that his "source" had only come up with one hundred dollars instead of the one-hundred fifty he'd promised. At this point, Weaver suspected he was dealing with an informant, "I had a guy in Spokane tell me you were bad." Fadeley managed to convince Weaver otherwise. The Idaho Statesman states explicitly that three tapes were made of conversations with Randy Weaver. Thus, each of these meetings must have been recorded. However, the Statesman also reported that a tape of a telephone conversation involving Vicki Weaver (Randy Weaver's wife) was played to the court. There must have also been phone taps. These tapes were played to the court via both headphones and loudspeakers under the objections of Gerry Spence, Weaver's attorney. Spence said to a KTVB reporter that he wanted to make sure that the government proved its case, "...if it has a case at all..." according to the rules. Randy Weaver tore off his headphones and wept when he heard his wife's voice on the tape. U.S. District Court Judge Edward Lodge asked jurors not to hear accounts of the Waco fire because of possible influences on the Weaver/Harris case. Exactly how such information could affect this trial is not explained. Other notes: Sunday evening there was a report on KTVB concerning Kevin Harris. Unnamed agents within the FBI admit that they are surprised that Kevin Harris is still alive. First, they were surprised that he survived the initial gunshot wound(s) sustained in the initial firefight at the Y-junction. Later, when Randy Weaver was struck by sniper fire the sniper had reported that Harris had been struck (not Weaver). Finally, there was a report that the FBI agent who killed Vicki Weaver believed he was aiming at Kevin Harris instead. (This is what was reported). Critics are charging that the FBI was blatantly trying to eliminate the only non-government witness to the deaths of Samuel Weaver and Deputy Marshal William Degan. Some local people believe that Harris's survival is simply due to divine intervention. Tuesday, April 20, 1993 will be the sixth day of the trial. Kenneth Fadeley's testimony is scheduled to continue.

P SIGNED MESSAGE-----\n\nIn article <PMETZGER.93Apr18141006@snark.shearson.com> pmetzger@snark.shearson.com (Perry E. Metzger) writes:\n\n> In article <lqnu pd\$jpm@news.intercon.com> amanda@intercon.com (Amanda Walker) writes:\n> \n> From: amanda@intercon.com (Amanda Walker)\n> \n> jhesse@netcom.com (John Hesse) writes:\n> \n> > Oh great. Wonderful news. Nobody can listen in--except the feds. \n> \n> Hey, it\'s better than the status quo.\n> \n> I am far less worried about "the feds" tapping my phone than high school \n> scanner surfers who get their kicks out of eavesdropping on cellular and \n> cordless phone calls.\n> \n> I\'m a political dissident. I\'m scared shitless of the feds listening\n> in on my calls. My opinions are the sort that would get me\n> "disappeared" in a slightly less free society -- and who knows what\n> sort of society we will be in in five or ten years? I have friends who\n> have had their phones tapped -- none of this is theoretical to me.\n> \n> As for "its better than the status quo", well, first of all, you can\n> get a cryptophone from companies like Cylink today -- and they work\n> well. In addition, a number of groups are now working on building\n> software to turn any PC into a privacy enhanced phone right now -- and\n> they are all working in overdrive mode.\n> \n> And yes, I\'d rather just see all crypto restrictions lifted, but this is at\n> least an incremental improvement for certain applications.. \n> \n> There ARE no crypto restrictions... yet. You can use anything you want\n> RIGHT NOW. The point is to maintain that right.\n\nThe point you all seem to have missed was covered when the UK cellphone\nscrambling system was discussed. Incidentally, my MP has responded to\nmy questions on that issue, and it appears that the UK and other `approved`\ncountries will get the secure A5 encryption, and `dodgy`\ncountries will\nget A5X. Existing mobile equipment will drop to clear mode when used with\nA5X systems, but newer equipment will use A5/A5X/clear depending on the\ncapabilities of the base station.\n\nThe cops/feds do \*not\* need to be able to get hold of your private key to\nlisten in to cellular conversations. Encryption is not end-to-end, but \ncellphone to base-station - it \*has\* to be this way so that cellular users\nand fixed installations can talk to each other. For cellular to cellular\ncalls, the transmission is decrypted at the base-station, passed to another\nbase-station and re-encrypted. The cops/feds can listen to the unscrambled\ncall \*provided\* they get a warrant to tap into the cellular provider\'s\nequipment. The only reason for wanting a crackable system is so they can\nlisten without having to obtain a warrant.\n\nBut, maybe the Clipper system is secure, and they really do need a warrant\nto get the key out of escrow before they can listen in using a scanner (see\nabove - they don\'t \*have\* to go down this route anyway). I have my doubts,\nbut even if true once they have the key they will \*never\* again need a\nwarrant to tap into that particular phone whenever they want. `Well, Judge,\nit appears he wasn\'t a drug-dealer after all, so naturally we\'ll stop\nlistening in\'... \n\nYou have every reason to be scared shitless. Take a look at the records\nof McCarthy, Hoover (J. Edgar, not the cleaner - though they both excelled at\nsucking) and Nixon.\n\n--Paul\n\n-----BEGIN PGP SIGNATURE-----\nVersion: 2.2\niQCVAgUBK9IAL2v14aSAK9PNAQEvxgQAoXrviAggvpVRDLWzChbNQo6yHuNuJ8my\ncvPx2zVkhHjzkfs5lUW6z63rRwejvHXegV79EX4xzssWVUzbLvyQUkGS08SZ2Eq\nbLSuij9aFXalv5gJ4jB/hU40qvU6I7gKKrVgtLxEXpkvXFdtFC4n9HovumvNRUC\nnve5ZY8988pY=\n=NOCG\n\n-----END PGP SIGNATURE-----\n\n',

'From: cbrasted@physics.adelaide.edu.au (Charles Brasted)\nSubject: Re: some thoughts.\nOrganization: The University of Adelaide\nLines: 123\nDistribution: world\nNNTP-Posting-Host: adelphi.itd.adelaide.edu.au\nKeywords: Dan Bissell\n\nbissda@saturn.wwc.edu (DAN LAWRENCE BISSELL) writes:\n\n>\tFirst I want to start right out and say that I\'m a Christian. It \n>makes sense to be one. Have any of you read Tony Campollo\'s book- liar, \n>lunatic, or the real thing? (I might be a little off on the title, but he \n>writes the book. Anyway he was part of an effort to destroy Christianity, \n>in the process he became a Christian himself.\n\nI assume you are posting to encourage comments - how much history has\nTony Campello read? Not much it seems. \n\n>\tThe arguments he uses I am summing up. The book is about whether \n>Jesus was God or not. I know many of you don\'t believe, but listen to a \n>different perspective for we all have something to gain by listening to what \n>others have to say. \n\nIt is good to hear that there are a few reasonable Christians about.\nIf only those christian "scientists" would take note.\n\n(In Australia there is a very strong movement, a bunch of christian \nscientists who believe that every single event in the bible is exactly\ntrue, and that there is a rational explanation for it all that can be justified\nby using the laws of physics. For example, there are a few chaps who are \ntrying to prove that the age of the universe is 6000 years old, and that the\nerror in conventional calculations is the result of the fact that the speed \nlight has been rapidly decaying over the years, and this has not been \naccounted for. :-] )\n\n>\tThe book says that Jesus was either a liar, or he was crazy ( a \n>modern day Koresh) or he was actually who he said he was.\n\nOr (of course), that he never existed, and the bible was a story, and was never \nintended to become a manifesto for a billion people. Did Tony follow that one\nup?\n\n>\tSome reasons why he wouldn\'t be a liar are as follows. Who would \n>die for a lie? Wouldn\'t people be able to tell if he was a liar? People \n>gathered around him and kept doing it, many gathered from hearing or seeing \n>someone who was or had been healed. \n\nMillions of people have "died for a lie". This point is difficult to \nsubstantiate since it is not well defined (a great many religious arguments\nwork in that way), but consider the many Aztec warriors who sacrificed \nthemselves to their gods in the belief that this act would bring them victory\nof the Spanish invaders. The list is endless. The Aztecs lost, BTW.\n\n>Call me a fool, but I believe he did heal people.\n\nThat is perfectly reasonable, but it is not grounds for me (or anyone)\nto become a christian. More to the point, it does not add weight to\nthe claim that Jesus was the "real thing".\n\n\n>\tNeither was he a lunatic. Would more than an entire nation be drawn \n>to someone who was crazy. Very doubtful, in fact ridiculous. For example \n>anyone who is drawn to David Koresh is obviously a fool, logical people see \n>this right away.\n\nHave you ever seen a documentary about the rise of Nazi Germany?

More to the point, did Tony mention this? One could hardly call Werner Heisenberg and his many colleagues fools, or illogical men, their support of Hitler was based (I presume) upon an emotional issue rather than a rational agreement with his principles. Obviously my argument is invalid if Tony thought that Hitler was sane....  
 Therefore since he wasn't a liar or a lunatic, he must have been the real thing. Hmmm.... I don't think his arguments warrant the use of a "Therefore..."  
 Some other things to note. He fulfilled loads of prophecies in the psalms, Isaiah and elsewhere in 24 hrs alone. This in his betrayal and Crucifixion. I don't have my Bible with me at this moment, next time I write I will use it.  
 This is (unfortunately) what a lot of religious discussions I have had with people result in - quoting the bible. The only reasonable way I think people can look at the bible is to treat the stories as some sort of metaphorical representation of the messages that the authors were trying to present. If someone tries to interpret parts of the bible literally, he or she will end up in all sorts of shit.  
 Tony's argument would be perfectly reasonable for people who believe the events described in the bible took place, but to convince someone, who thinks the bible is total fiction, that Jesus is real by quoting the book is totally pointless. For example, in mathematics you cannot say "a is not equal to b because a is equal to b".  
 I don't think most people understand what a Christian is. That would possibly explain why there have so many people being killed in religious wars, and why there are hundreds of different versions all claiming to be correct. It is certainly not what I see a lot in churches. Rather I think it should be a way of life, and a total sacrifice of everything for God's sake. He loved us enough to die and save us so we should do the same. Hey we can't do it, God himself inspires us to turn our lives over to him. That's tough and most people don't want to do it, to be a real Christian would be something for the strong to persevere at. But just like weight lifting or guitar playing, drums, whatever it takes time. We don't rush it in one day, Christianity is your whole life. It is not going to church once a week, or helping poor people once in a while. We box everything into time units. Such as work at this time, sports, Tv, social life. God is above these boxes and should be carried with us into all these boxes that we have created for ourselves. I think if you posted this part to alt.religion you would get more flames than here :-). I have never really understood why the emotional sentiments of a stranger should be of interest to other people. Someone famous said that there are two evils in life, politicians and churches, one rules by fear of the living, the other by fear of the dead. If I am pressed I could probably find the exact quotation.  
 Cheers,  
 Charles.

'From: toml@blade.Boulder.ParcPlace.COM (Tom LaStrange)\nSubject: Re: Forcing a window manager to accept specific coordinates for a window\nReply-To: toml@boulder.ParcPlace.COM\nOrganization: ParcPlace Boulder\nLines: 40\n\nIn article <BADING.93Apr21134939@athene.cs.tu-berlin.de>, bading@cs.tu-berlin.de (Tobias 'Doping' Bading) writes:\n|> \n|> try this after XCreateWindow:\n|> -----\n|> \n|> #include <X11/Xutil.h>\n|> \n|> Display display;\n|> Window window;\n|> \n|> {\n|> XSizeHints \*xsizehints = XAllocSizeHints();\n|> xsizehints->flags = USPosition | USSize;\n|> /\* or = PPosition | PS\n|> size \*/\n|> xsizehints->x = 42;\n|> xsizehints->y = 42;\n|> xsizehints->width = 100;\n|> xsizehints->height = 100;\n|> XSetWMNormalHints (display,\n|> window, xsizehints);\n|> XFree (xsizehints);\n|> }\n|> \n|> These hints tell the window manager that the position and size of the window are specified by the users and that the window manager should accept these values. If yo

u use xsizehints->flags = PPosition | PSize, this tells the window manager that the values are preferred values of the program, not the user. I don't know a window manager that doesn't place the window like you prefer if you specify the position and size like above. You are right but PLEASE DON'T DO THIS. It makes my brain hurt. USPosition and USSize should ONLY be set if the USER specified the position and size. You say: "Tom, don't blow a gasket, what's the harm?" Some window managers do very different things (besides positioning the window) when they see USPosition rather than PPosition.

. Tom LaStrange toml@boulder.ParcPlace.COM,

'From: vek@allegra.att.com (Van Kelly) Subject: Re: Prayer in Jesus' Name Organization: AT&T Bell Laboratories, Murray Hill, NJ, USA Lines: 39 According to what I have read on Biblical idioms, speaking "in X's name" is a standard Aramaic/Hebrew legal idiom for what we today would call Power of Attorney. A person from Jesus' culture authorized to conduct business "in John's name" had full authority over John's financial affairs, but was held under a solemn fiduciary obligation to work only for John's benefit and consonant with John's wishes. It was not required for the steward to preface each business transaction with "in John's name"; it was sufficient to have valid power of attorney and be operating in good faith. (Note the overlap here between legal and religious definitions of "faith".) With this cultural background, praying "in Jesus' name" does not mandate a particular verbal formula; rather it requires that the petitioner be operating faithfully and consciously within an analogous "fiduciary" relationship with Jesus and for the purposes of His Kingdom. The message of "praying in Jesus' name" is thus closely aligned with the parable of the talents and other passages about God's delegation of Kingdom business to his stewards, both resources and responsibilities. This idea of praying "in Jesus' name" is not only present but prominent in the Lord's Prayer, although the verbal formula is absent. The act of praying the words "In Jesus' Name" may be beneficial if they cause us to clarify

the relationship of our requests to the advancement of God's Kingdom. For that reason, I'm not quite ready to say that the praying the formula is without meaning. Prayers to God for other purposes (desperation, anger, thanksgiving, etc.) don't seem to be in this category at all, whether uttered by a Christian or non-Christian, whether B.C. or A.D. (that's B.C.E. or C.E. for you P.C. :-). I don't see anything in Christ's words to contradict the idea that God deals with all prayers according to His omniscience and grace. Van Kelly

Why do you think this?\n\nIf you force me to do something, am I morally responsible for it?\n\n|> \n|> And anyway, humans have the ability to disregard some of their instincts.\n\nWell, make up your mind. Is it to be "instinctive not to murder"\nor not?\n\n|> \n|> >>So, only intelligent beings can be moral, even if the behavior of other\n|> >>beings mimics theirs?\n|> >\n|> >You are starting to get the point. Mimicry is not necessarily the\n|> >same as the action being imitated. A Parrot saying "Pretty Polly"\n|> >isn't necessarily commenting on the pulchritude of Polly.\n|> \n|> You are attaching too many things to the term "moral," I think.\n|> Let's try this: is it "good" that animals of the same species\n|> don't kill each other. Or, do you think this is right? \n\nIt's not even correct. Animals of the same species do kill\none another.\n\n|> \n|> Or do you think that animals are machines, and that nothing they do\n|> is either right nor wrong?\n\nSigh. I wonder how many times we have been round this loop.\n\nI think that instinctive behaviour has no moral significance.\nI am quite prepared to believe that higher animals, such as\nprimates, have the beginnings of a moral sense, since they seem\nto exhibit self-awareness.\n\n|> \n|> \n|> >>Animals of the same species could kill each other arbitrarily, but\n|> >>they don't.\n|> >\n|> >They do. I and other posters have given you many examples of exactly\n|> >this, but you seem to have a very short memory.\n|> \n|> Those weren't arbitrary killings. They were slayings related to some\n|> sort of mating ritual or whatnot.\n\nSo what? Are you trying to say that some killing in animals\nhas a moral significance and some does not? Is this your\nnatural morality?\n\n|> \n|> >>Are you trying to say that this isn't an act of morality because\n|> >>most animals aren't intelligent enough to think like we do?\n|> >\n|> >I'm saying:\n|> >\n|> >t"There must be the possibility that the organism - it's not\n|> >tjust people we are talking about - can consider alternatives." \n|> >\n|>

SOURCE: MMWR 42(14) DATE: Apr 16, 1993

From November 15, 1992, through February 28, 1993, more than 500 laboratory-confirmed infections with E. coli O157:H7 and four associated deaths occurred in four states -- Washington, Idaho, California, and Nevada. This report summarizes the findings from an ongoing investigation (1) that identified a multistate outbreak resulting from consumption of hamburgers from one restaurant chain. Washington

On January 13, 1993, a physician reported to the Washington Department of Health a cluster of children with hemolytic uremic syndrome (HUS) and an increase in emergency room visits for bloody diarrhea. During January 16-17, a case-control study comparing 16 of the first cases of bloody diarrhea or postdiarrheal HUS identified with age- and neighborhood-matched controls implicated eating at chain A restaurants during the week before symptom onset (matched odds ratio OR=undefined; lower confidence limit=3.5). On January 18, a multistate recall of unused hamburger patties from chain A restaurants was initiated.

As a result of publicity and case-finding efforts, during January-February 1993, 602 patients with bloody diarrhea or HUS were reported to the state health department. A total of 477 persons had illnesses meeting the case definition of culture-confirmed E. coli O157:H7 infection or postdiarrheal HUS (Figure 1). Of the 477 persons, 52 (11%) had close contact with a person with unconfirmed E. coli O157:H7 infection during the week preceding onset of symptoms. Of the remaining 425 persons, 372 (88%) reported eating in a chain A restaurant during the 9 days preceding onset of symptoms. Of the 338 patients who recalled what they ate in a chain A restaurant, 312 (92%) reported eating a regular-sized hamburger patty. Onsets of illness peaked from January 17 through January 20. Of the 477 casepatients, 144 (30%) were hospitalized; 30 developed HUS, and three died. The median age of patients was 7.5 years (range: 0-74 years). Idaho

Following the outbreak report from Washington, the Division of Health, Idaho Department of Health and Welfare, identified 14 persons with culture-confirmed E. coli O157:H7 infection, with illness onset dates from December 11, 1992, through February 16, 1993 (Figure 2A). Four persons were hospitalized; one developed HUS. During the week preceding illness onset, 13 (93%) had eaten at a chain A restaurant. California

In late December, the San Diego County Department

of Health Services was notified of a child with E. coli O157:H7 infection who subsequently died. Active surveillance and record review then identified eight other persons with E. coli O157:H7 infections or HUS from mid-November through mid-January 1993. Four of the nine reportedly had recently eaten at a chain A restaurant and the HICNet Medical Newsletter

Page 5  
Volume 6, Number 10

April

20, 1993  
four at a chain B restaurant in San Diego. After the Washington outbreak was reported, reviews of medical records at five hospitals revealed an overall 27% increase in visits or admissions for diarrhea during December 1992 and January 1993 compared with the same period 1 year earlier. A case was defined as postdiarrheal HUS, bloody diarrhea that was culture negative or not cultured, or any diarrheal illness in which stool culture yielded E. coli O157:H7, with onset from November 15, 1992, through January 31, 1993. Illnesses of 34 patients met the case definition (Figure 2B). The outbreak strain was identified in stool specimens of six patients. Fourteen persons were hospitalized, seven developed HUS, and one child died. The median age of case-patients was 10 years (range: 1-58 years). A case-control study of the first 25 case-patients identified and age- and sex-matched community controls implicated eating at a chain A restaurant in San Diego (matched OR=13; 95% confidence interval CI=1.7-99). A study comparing case-patients who ate at chain A restaurants with well meal companions implicated regular-sized hamburger patties (matched OR=undefined; lower confidence limit=1.3). Chain B was not statistically associated with illness. Nevada  
On January 22, after receiving a report of a child with HUS who had eaten at a local chain A restaurant, the Clark County (Las Vegas) Health District issued a press release requesting that persons with recent bloody diarrhea contact the health department. A case was defined as postdiarrheal HUS, bloody diarrhea that was culture negative or not cultured, or any diarrheal illness with a stool culture yielding the Washington strain of E. coli O157:H7, with onset from December 1, 1992, through February 7, 1993. Because local laboratories were not using sorbitol MacConkey (SMAC) medium to screen stools for E. coli O157:H7, this organism was not identified in any patient. After SMAC medium was distributed, the outbreak strain was detected in the stool of one patient 38 days after illness onset.  
Of 58 persons whose illnesses met the case definition (Figure 2C), nine were hospitalized; three developed HUS. The median age was 30.5 years (range: 0-83 years). Analysis of the first 21 patients identified and age- and sex-matched community controls implicated eating at a chain A restaurant during the week preceding illness onset (matched OR=undefined; lower confidence limit=4.9). A case-control study using well meal companions of case-patients also implicated eating hamburgers at chain A (matched OR=6.0; 95% CI=0.7-49.8). Other Investigation Findings  
During the outbreak, chain A restaurants in Washington linked with cases primarily were serving regular-sized hamburger patties produced on November 19, 1992; some of the same meat was used in "jumbo" patties produced on November 20, 1992. The outbreak strain of E. coli O157:H7 was isolated from 11 lots of patties produced on those two dates; these lots had been distributed to restaurants in all states where illness occurred. Approximately 272,672 (20%) of the implicated patties were recovered by the recall. A meat traceback by a CDC team identified five slaughter plants in the United States and one in Canada as the likely sources of carcasses used in the HICNet Medical Newsletter

Page 6  
Volume 6, Number 10

April

20, 1993  
contaminated lots of meat and identified potential control points for reducing the likelihood of contamination. The animals slaughtered in dom

estic slaughter \nplants were traced to farms and auctions in six western states. No one \nslaughter plant or farm was identified as the source. \n Further investigation of cases related to secondary transmission in \nfamilies and child day care settings is ongoing. \n\nReported by: M Davis, DVM, C Osaki, MS PH, Seattle-King County Dept of Public \nHealth; D Gordon, MS, MW Hinds, MD, Snohomish Health District, Everett; K \nMottram, C Winegar, MPH, Tacoma-Pierce County Health Dept; ED Avner, MD, PI \nTarr, MD, Dept of Pediatrics, D Jardine, MD, Depts of Anesthesiology and \nPediatrics, Univ of Washington School of Medicine and Children's Hospital and \nMedical Center, Seattle; M Goldoft, MD, B Bartleson, MPH; J Lewis, JM \nKobayashi, MD, State Epidemiologist, Washington Dept of Health. G Billman, MD, \nJ Bradley, MD, Children's Hospital, San Diego; S Hunt, P Tanner, RES, M \nGinsberg, MD, San Diego County Dept of Health Svcs; L Barrett, DVM, SB Werner, \nMD, GW Rutherford, III, MD, State Epidemiologist, California Dept of Health \nSvcs. RW Jue, Central District Health Dept, Boise; H Root, Southwest District \nHealth Dept, Caldwell; D Brothers, MA, RL Chehey, MS, RH Hudson, PhD, Div of \nHealth, Idaho State Public Health Laboratory, FR Dixon, MD, State \nEpidemiologist, Div of Health, Idaho Dept of Health and Welfare. DJ Maxson, \nEnvironmental Epidemiology Program, L Empey, PA, O Ravenholt, MD, VH Ueckart, \nDVM, Clark County Health District, Las Vegas; A Di Salvo, MD, Nevada State \nPublic Health Laboratory; DS Kwalick, MD, R Salcido, MPH, D Brus, DVM, State \nEpidemiologist, Div of Health, Nevada State Dept of Human Resources. Center \nfor Food Safety and Applied Nutrition, Food and Drug Administration. Food \nSafety Inspection Svc, Animal and Plant Health Inspection Svc, US Dept of \nAgriculture. Div of Field Epidemiology, Epidemiology Program Office; Enteric \nDiseases Br, Div of Bacterial and Mycotic Diseases, National Center for \nInfectious Diseases, CDC. \n\nEditorial Note: E. coli O157:H7 is a pathogenic gram-negative bacterium first \nidentified as a cause of illness in 1982 during an outbreak of severe bloody \ndiarrhea traced to contaminated hamburgers (2). This pathogen has since \nemerged as an important cause of both bloody diarrhea and HUS, the most common \ncause of acute renal failure in children. Outbreak investigations have linked \nmost cases with the consumption of undercooked ground beef, although other \nfood vehicles, including roast beef, raw milk, and apple cider, also have been \nimplicated (3). Preliminary data from a CDC 2-year, nationwide, multicenter \nstudy revealed that when stools were routinely cultured for E. coli O157:H7 \nthat organism was isolated more frequently than Shigella in four of 10 \nparticipating hospitals and was isolated from 7.8% of all bloody stools, a \nhigher rate than for any other pathogen. \n Infection with E. coli O157:H7 often is not recognized because most \nclinical laboratories do not routinely culture stools for this organism on \n\nHICNet Medical Newsletter

Page 7\nVolume 6, Number 10

April

20, 1993\n\nSMAC medium, and many clinicians are unaware of the spectrum of illnesses \nassociated with infection (4). The usual clinical manifestations are diarrhea \n(often bloody) and abdominal cramps; fever is infrequent. Younger age groups \nand the elderly are at highest risk for clinical manifestations and \ncomplications. Illness usually resolves after 6-8 days, but 2%-7% of patients \ndevelop HUS, which is characterized by hemolytic anemia, thrombocytopenia, \nrenal failure, and a death rate of 3%-5%. \n This report illustrates the difficulties in recognizing community \noutbreaks of E. coli O157:H7 in the absence of routine surveillance. Despite \nthe magnitude of this outbreak, the problem may not have been recognized in \nthree states if the epidemiologic link had not been established in Washington \n(1). Clinical laboratories should routinely culture stool specimens from \npersons with bloody diarrhea or HUS

20, 1993\n\n Use of Smokeless Tobacco Among Adults -- United States  
,\n 1991\n =====

=====\\n SOURCE: MMWR 42(14)

out chewing tobacco use and cigarette smoking. Current users of smokeless tobacco were defined as those who reported snuff or chewing tobacco at least 20 times and who reported using snuff or chewing tobacco at the time of the interview; former users were defined as those who reported having used snuff or chewing tobacco at least 20 times and not using either at the time of the interview. Ever users of smokeless tobacco included current and former users. Current smokers were defined as those who reported smoking at least 100 cigarettes and who were currently smoking and former smokers as those who reported having smoked at least 100 cigarettes and who were not smoking now. Ever smokers included current and former smokers. Data on smokeless tobacco use were available for 43,732 persons aged greater than or equal to 18 years and were adjusted for nonresponse and weighted to provide national estimates. Confidence intervals (CIs) were calculated by using standard errors generated by the Software for Survey Data Analysis (SUDAAN). In 1991, an estimated 5.3 million (2.9%) U.S. adults were current users of smokeless tobacco, including 4.8 million (5.6%) men and 533,000 (0.6%) women. For all categories of comparison, the prevalence of smokeless tobacco use was substantially higher among men. For men, the prevalence of use was highest among those aged 18–24 years (Table 1); for women, the prevalence was highest among those aged greater than or equal to 75 years. The prevalence of smokeless tobacco use among men was highest among American Indians/Alaskan Natives and whites; the prevalence among women was highest among American Indians/Alaskan Natives and blacks. Among both men and women, prevalence of smokeless tobacco use declined with increasing education. Prevalence was substantially higher among residents of the southern United States and in rural areas. Although the prevalence of smokeless tobacco use was higher among NHICNet Medical Newsletter

Page 10 Volume 6, Number 10

April 20, 1993 men and women

below the poverty level, \* this difference was significant only for women (p less than 0.05) (Table 1). Among men, the prevalence of current use of snuff was highest among those aged 18–44 years but varied considerably by age; the prevalence of use of chewing tobacco was more evenly distributed by age group (Table 2). Although women rarely used smokeless tobacco, the prevalence of snuff use was highest among those aged greater than or equal to 75 years. An estimated 7.9 million (4.4% 95% CI=4.1–4.6) adults reported being former smokeless tobacco users. Among ever users, the proportion who were former smokeless tobacco users was 59.9% (95% CI=57.7–62.1). Among persons aged 18–24 years, the proportion of former users was lower among snuff users (56.2% 95% CI=49.4–63.0) than among chewing tobacco users (70.4% 95% CI=64.2–76.6). Among persons aged 45–64 years, the proportion of former users was similar for snuff (68.9% 95% CI=63.1–74.7) and chewing tobacco (73.5% 95% CI=68.9–78.1). Among current users of smokeless tobacco, 22.9% (95% CI=19.9–26.0) currently smoked, 33.3% (95% CI=30.0–36.5) formerly smoked, and 43.8% (95% CI=39.9–47.7) never smoked. In comparison, among current smokers, 2.6% (95% CI=2.3–3.0) were current users of smokeless tobacco. Daily use of smokeless tobacco was more common among snuff users (67.3% 95% CI=63.2–71.4) than among chewing tobacco users (45.1% 95% CI=40.6–49.6). Reported by: Office on Smoking and Health, National Center for Chronic Disease Prevention and Health Promotion; Div of Health Interview Statistics, National Center for Health Statistics, CDC. Editorial Note: The findings in this report indicate that the use of smokeless tobacco was highest among young males. Adolescent and young adult males, in particular, are the target of marketing strategies by tobacco companies that link smokeless tobacco with athletic

c performance and virility. Use of oral \nsnuff has risen markedly among professional baseball players, encouraging this \nbehavior among adolescent and young adult males and increasing their risk for \nnicotine addiction, oral cancer, and other mouth disorders (4). \n Differences in the prevalence of smokeless tobacco use among \nracial/ethnic groups may be influenced by differences in educational levels \nand socioeconomic status as well as social and cultural phenomena that require \nfarther explanation. For example, targeted marketing practices may play a role \nin maintaining or increasing prevalence among some groups, and affecting the \ndifferential initiation of smokeless tobacco use by young persons (5,6). \n In this report, one concern is that nearly one fourth of current \nsnakeless tobacco users also smoke cigarettes. In the 1991 NHIS-HPDP, the \nprevalence of cigarette smoking was higher among former smokeless tobacco \nusers than among current and never smokeless tobacco users. In a previous \nstudy among college students, 18% of current smokeless tobacco users smoked \n\nHICNet Medical Newsletter

Page 11\nVolume 6, Number 10

April

20, 1993\n\noccasionally (7). In addition, approximately 7% of adults who formerly smoked \nreported substituting other tobacco products for cigarettes in an effort to \nstop smoking (8). Health-care providers should recognize the potential health \nimplications of concurrent smokeless tobacco and cigarette use. \n The national health objectives for the year 2000 have established special \npopulation target groups for the reduction of the prevalence of smokeless \ntobacco use, including males aged 12-24 years (to no more than 4% by the year \n2000 objective 3.9) and American Indian/Alaskan Native youth (to no more \nthan 10% by the year 2000 objective 3.9a) (9). Strategies to lower the \nprevalence of smokeless tobacco use include continued monitoring of smokeless \ntobacco use, integrating smoking and smokeless tobacco-control efforts, \nenforcing laws that restrict minors' access to tobacco, making excise taxes \ncommensurate with those on cigarettes, encouraging health-care providers to routinely provide cessation advice and follow-up, providing school-based \nprevention and cessation interventions, and adopting policies that prohibit \ntobacco use on school property and at school-sponsored events (5). \n\nReferences\n\n1. From: brian@pl.arizona.edu (Brian Ceccarelli 602/621-9615)\nSubject: To Ro  
b Lanphier\nOrganization: Lunar & Planetary Laboratory, Tucson AZ.\nLines: 82\  
\n\nDear Rob,\n\n>When I read Brian K.'s postings, I find someone who is hones  
tly seeking\n>the truth. When I read your response here, I see condescension.  
When you\n>reply to a post, reply to the post you quote. This statement under  
mines\n>any good points you might have had (it was enough to make me stop read  
ing).\n\nSometimes I do come across condesending, and I am sorry I come across  
that\n>way at times. Thank you for the reproach, I really do appreciate it. I  
'll\n>try to get better.\n\nRob, at the same time, I have also learned that so  
me people respond to the gentle\n>approach while others respond only at a harsh  
rebuke. Brian K., so far,\n>only responds to the latter. And I am glad he res  
ponds at all. In both\n>ncases of approach, my intention is to be loving. I  
am making no excuse\n>for myself if I am coming across condesending. I apologi  
ze for that.\n\nRob, sometimes Brian K. comes across as honest. I know this.  
But Brian K. \n>vasillates back and forth. One post looks honest; the next is\  
an excuse. Now he wants me to explain the universe in 50 words or less. \nI  
think Brian Kendig is really trying but he is too comfortable with\n>his set of  
excuses. \n\nI just want Brian K. to be honest with himself. If he really wa  
nts\n>to know, he will ask questions and stop asserting irrelevant excuses\n>whi  
ch have nothing to do with my God. I wish Brian would read the\n>Bible for hi  
mself and come to his own decisions without being\n>nsidetracked with the tempta  
tion to mock God.\n\nFrom my perspective Rob, when I look at Brian Kendig, I s  
ee a man\n>standing out in the middle of a highway. Off into the distance I \n  
see a Mack truck heading right for him, but Brian K. is faced away\n>nfrom the o  
ncoming truck. He doesn't see it. Here's is how I see\n>nthe dialog:\n\n\nMe: "Brian K, please step aside before you get run over." \n\nBK: "There is n  
o truck." \n\nMe: "Turn around at look." \n\nBK: "No." \n\nMe: "Look! You wil  
l be healthier if you do take a look at\n the oncoming truck." \n\nBK: "No  
. Explain to me why trucks exist." \n\nMe: "Turn around or you will run over."  
 \n\nBK: "No. I won't because I like hiking and tomorrow is Tuesday." \n\nMe:  
"You blind fool! Why do you choose ignorance? You have nothing\n to lose  
if you look. But if do not look, you will certainly lose your life." \n I  
do not want to see you squashed all over the road.\n\nBK: "It is my life to l  
ose. I rather not look.\n Besides, a truck running over me will not harm  
me." \n And by the way, I really have an open mind." \n\n\nSo is my motivat  
ion to belittle Brian, or to love Brian the best I know how? \n\nI do not wi  
sh to single Brian Kendig out. Because millions if not\n>nbillions of people fa  
ll into the same category. Perhaps all people\n>nfall have fallen into this cat  
egory at one time in their lives. I have.\nI can now see the truck behind Bri  
an.\n\nMy hope is that Brian will look and will see the ramifications of the\n>ntruck  
coming towards him. My hope is that Brian will want to step out\n>nof the  
way. My fear, though, is that Brian will instead choose to glue himself\n>nto  
the middle ofthe highway, where he will certainly get run over. But if\n>nhe s  
o chooses, he so chooses, and there is nothing I can do beyond that\n>nto change

his mind. For it is his choice. But at this very moment,\nBrian hasn't go tten even that far. He is still at the point where he\ndoes not want to look. Sure he moves his eyeball to appease me, but his\thead will not turn around to see the entire picture. So far he is\nsatisfied with his glimpse of the mount ains off in the distance. \n\nThank you again Rob for your reproach. I really do appreciate it. (My\nwife tells me the same thing at times.) :-) I will try to do better.\n',

There is a way. Certainl

y it is not by human reason.\n Certainly it is not by human experience. (and y et it is both!) To paraphrase\nSartre, the particular is absurd unless it has an infinite reference point. It\nis only because of God\'s own revelation tha t we can be absolute about a thing. \nYour logic comes to fruition in relativism. \n>\n>"At the core of all well-founded belief, lies belief that is unfounded." \n>

-- Ludwig Wittgens

tein\n\nAh, now it is clear. Ludwig was a desciple of Russell. Ludwig\'s fame is often\nexplained by the fact that he spawned not one but two significant movements in\ncontemporary philosophy. Both revolve around Tractatus Logico-Philosophicus\n(\'21) and Philosophical Investigation (\'53). Many of Witt\'s comments and\nimplicit conclusions suggest ways of going beyond the explicit critique of\nlanguage he offers. According to some of the implicit suggestions of Witt\'s\nthought, ordinary language is an invaluable resource, offering a necessary\nframework for the conduct of daily life. However, though its formal features\nremain the same, its content does not and it is always capable of being\ntranscended as our experience changes and our understanding is deepened, giving\nus a clearer picture of what we are and what we wish to say. On Witt\'s own\naccount, there is a dynamic fluidity of language. It is for this reason that\nany critique of language must move from talking about the limits of language to\ntalking about its boundaries, where a boundary is understood not as a wall but\na threshold.\n vonWrights\'s comment that Witt\'s "sentences have a content that often lies\ndeep beneath the surface of language." On the surface, Witt talks of the\ninsuperable position of ordinary language and the necessity of bringing\nourselves to accept it without question. At the same time, we are faced with\nWitt\'s own creative uses of language and his concern for bringing about changes\nin our traditional modes of understanding. Philosophy, then, through more\nperspicacious speech, seeks to effect this unity rather than assuming that it\nis already functioning. Yes? The most brilliant of scientists are unable to\noffer a foundation for human speech so long as they reject Christianity! In his\nTractatus we have the well nigh perfect exhibition of the nature of the impasse\nof the scientific ideal of exhaustive logical analysis of Reality by man. \nPerfect language does not exist for fallen man, therefore we must get on about\nour buisness of relating Truth via ordinary language.\n\n This is why John\'s Gospel is so dear to most Christians. It is so simple in\nit conveyance of the revelation of God, yet so full of unlieing depth of\nunderstanding. He viewed Christ from the OT concept of "as a man thinketh, so\nhe is." John looked at the outward as only an indicator of what was inside,\nthat is the consciousness of Christ. And so must we. Words are only vehicles\nof truth. He is truth. The scriptures are plain in their expounding that\nthere is a Truth and that it is knowable. There are absolutes, and they too\nare knowable. However, they are only knowable when He reveals them to the\nindividual. There is, and we shouldn\'t shy from this, a mysticism to\nChristianity. Paul in Rom 8 says there are 3 men in the world. There is the\none who does not have the Spirit and therefore can not know the things of the\nSpirit (the Spirit of Truth) and there is the one who has the Spirit and has\nthe capacity to know of the Truth, but there is the third. The one who not\nonly has the Spirit, but that the Spirit has him! Who can know the deep things\nof God and reveal them to us other than the Spirit. And it is only the deep\nthings of God that are absolute and true.\n There is such a thing as true truth and it is real, it can be experienced\nand it is verifiable. I disagree with Dr Nancy\'s Sweetie\'s conclusion because\nif it is taken to fruition it leads to relativism which leads to dispair. \n\n"I would know the words which He would answer me, and understand what He would\nsay unto me." Job 23ff\n\n-

Or to use both Scalia\'s and Stevens\'s example,\n> increased penalties for threatening the president? (I\'m assuming\n> that, like all good people, you oppose the marital exemption for rape,\n> so I won\'t bring that up.)\n\n\nIn order of your questions, I oppose it, I oppose it, I oppose it and\n(Huh? Wha? Where did \_that\_ topic come from and what\'s it got to do\nwith the discussion at hand? :-)\n\nWhen I was discussing the concept of different criminal laws for crimes\nagainst different classes of people (and yes, I do consider laws which\nallow/mandate enhanced penalties following conviction based upon the\nconvict\'s attitudes towards the class membership of the victim to fit\ninto that category), the category of classes I had in mind was that of\nthe standard civil rights discussion -- classes based upon race, gender,\nethnicity, religion, sexual orientation, etc. Having you ask about\nclasses based upon one\'s \_profession\_ rather than one\'s personal\ncharacteristics caught me off guard, and I had to think out the question\nfrom scratch.\n\nWhat I finally decided was that the law should not recognize such\nclasses because to do so would be to formally and officially declare\nsome people to be of more worth than others, and that would be anathema\nto the underlying American concept of equal treatment under the law.\n\nLast year, when a federal crime bill was under consideration which would\nhave expanded the federal death penalty to an additional fifty-plus\ncrimes, including the murder of various federal officers hitherto not\nprotected by that "aura of deterrence," critics pointed out the\nabsurdity of having laws which made the death penalty available for the\nmurder of a federal postal inspector but not for their murder of a\ncivilian teacher, when the latter [arguably] provided a much more\nvaluable service and therefore would be the greater loss to society.\nThis was an emotionally compelling argument, but even the proponents of\nthat viewpoint appeared to tacitly assume that the state should judge\nsome lives as being more valuable than others on the basis of their\n"contribution to society." I view that doctrine as being both (a)\npersonally repugnant and (b) repugnant to the Equal Protection clause of\nthe 14th Amendment.\n\nAccordingly, I believe that there should be no laws which give any\nprofession-based class of people special protection (via the mechanism\nof supplying stronger statutory deterrence of crimes against members of\nthat class), not even police officers, federal officers or high-ranking\nmembers of the Executive Branch of the federal government.\n\n-- William December Starr <wdstarr@athena.mit.edu>\n\n',

'From: betz@gozer.idbsu.edu (Andrew Betz)\nSubject: Randy Weaver trial update: Day 4.\nNntp-Posting-Host: gozer\nOrganization: SigSauer Fan Club \nLines: 87\n\nNote: These trial updates are summarized from reports in the\n\_Idaho Statesman\_ and the local NBC affiliate television\nstation, KTVB Channel 7.\n\nRandy Weaver/Kevin Harris trial update: Day 4.\n\nFriday, April 16, 1993 was the fourth day of the trial.\n\nSynopsis: Defense attorney Gerry Spence cross-examined agent\nCooper under repeated objections from prosecutor Ronald\nHowen. Spence moved for a mistrial but was denied.\n\nThe day was marked by a caustic cross-examination of Deputy\nMarshal Larry Cooper by defense attorney Gerry Spence. Although\nSpence has not explicitly stated so, one angle of his strategy\nmust involve destroying the credibility of agent Cooper. Cooper is\nthe government's only eyewitness to the death of agent Degan.\nSpence attacked Cooper's credibility by pointing out discrepancies\nbetween Cooper's statements last September and those made in court.\nCooper conceded that, "You have all these things compressed into\na few seconds...It's difficult to remember what went on first."\n\nCooper acknowledged that he carried a "9mm Colt Commando sub

machine\ngun with a silenced barrel." [I thought a Colt Commando was a revolver!  
 r!]\nCooper continued by stating that the federal agents had no specific\nplans to use the weapon when they started to kill Weaver\'s dog.\n\nWhen Spence asked how seven cartridges could be fired by Degan\'s\nM-16 rifle when Degan was apparently dead, Cooper could not say for\nsure that Degan did not return fire before going down.\n\nSpence continued by asking with how many agents (and to what extent)\nhad Cooper discussed last August\'s events, Cooper responded, "If\nyou\'re implying that we got our story together, you\'re wrong,\ncounselor."  
 " Spence continued to advance the defense\'s version of\nthe events: Namely, that a marshal had started the shooting by\nkilling the Weaver\'s dog. Cooper disagreed.\n\nAssistant U.S. Attorney Ronald Howen repeatedly objected to Spence\'s\nvirulent cross-examination of agent Cooper, arguing that the questions\nwere repetitive and Spence was wasting time. Howen also complained \nthat Spence was improperly using a cross-examination to advance the\ndefense\'s version of the events. U.S. District Judge Edward Lodge\nsustained many of the objections; however, both lawyers persisted\nuntil Judge Lodge had the jury leave the room and proceeded to\nadmonish both attorneys. "I\'m not going to play games with either\ncounsel. This has been a personality problem from day 1, so start\nacting like professionals."  
 "Spence told the judge that, "When all the evidence is in, we\'ll see\nthat ... his [agent Larry Cooper] testimony is not credible, that\nhe was panicked and cannot remember the sequence of events."  
 "Spence continued, "We\'re going to find...that there is a very unlikely\nsimilarity - almost as if it had come out of a cookie cutter - between\nthe testimony of Mr. Cooper and the other witnesses."  
 "Spence then moved for a mistrial on the grounds that Howen\'s repeated\nobjections would prevent a fair trial, "We can\'t have a fair trial if the\njury believes I\'m some sort of charlatan, if the jury believes I\'m\nbending the rules or engaging in some delaying tactic or that I\'m\nviolating court orders."  
 "Judge Lodge called the notion that his repeated sustainings of Howen\'s\nobjections had somehow prejudiced the jury was "preposterous" and\ndenied the motion for a mistrial. Lodge did tell Howen to restrict\nhis comments when objecting.\n\nThe trial resumed with the prosecution calling FBI Special Agent Greg\nRampton. The prosecution\'s purpose was simply to introduce five\nweapons found in the cabin as evidence: However, the defense seized\non the opportunity to further address Cooper\'s credibility.\n\nDefense attorney Ellison Matthews (Harris\' other attorney) questioned\nRampton about the dog. Rampton stated that there were no specific\nplans to kill the Weaver\'s dog without being detected. Matthews then\nhad Rampton read a September 15, 1992 transcript in which Rampton\nhad said that Cooper had said that the purpose of the silenced weapon\nwas to kill the dog without being detected, if the dog chased them.\nRampton then acknowledged that he believed that Cooper had said that,\nbut he could not remember when. He then stated that, "I did not conduct\nthe primary interview with Deputy Cooper, but I have had conversations\nwith him since the interview was conducted."  
 "Monday, April 19, 1993 will begin the fifth day of the trial. Scheduled\nis the continued cross-examination of FBI agent Greg Rampton.\n\n",

'From: daz1@ns1.cc.lehigh.edu (DEMOSTHENIS A. ZEPPOS)\nSubject: Re: Integra GSR\nArticle-I.D.: ns1.1993Apr5.234729.100387\nOrganization: Lehigh University\nLines: 67\n\nIn article <3mWf2B1w165w@njcc.wisdom.bubble.org>, jonc@njcc.wisdom.bubble.org (Jon Cochran) writes:\n>> > I\'d like to add the Beretta GTZ as a car which will kick GS-R butt\n>> >anyday, and it\'s a lot cheaper to boot\n>> > I will take this one with a definite grain of salt. Performance data shows a\n>> > If this poster has some proof (other than "my friend blew one away last week")\n>> > Want proof? Here is some data on acceleration

n and handling from\n>Motor Trend (apr \'93).\n>\n> Integra GS-R  
 Beretta GTZ\n>\n>0-60 7.7 7.7\n>1/4 mile 16.0/88.1  
 16.1/87.8\n>L acc (g\'s) .84 .86\n>Slalom 63.7 6  
 8.4\n>\*\*\*WRONG\*\*\*\nWhy don\'t you look again at Motor Trend\'s, slalom times,  
 they are 67.9, right\nalong with the Integra, and the car does that with small  
 14 inch tires that\nare all -weather XGTV4, not to mention that the Integra ri  
 des alot better than\na Beretta.\nYour acceleartion times also vary, magazine  
 to magazine\nRoad & Track and Car& Driver have the GS-R at 6.8 to 8.0 for Road  
 and Track.\nAlso Quarter mile times vary from 15.4 to 16.1\nYou can\'t tell ex  
 actly by the numbers. Furthermore, the Integra will\ndefinatly outrun the Be  
 retta on the high end. Car & Driver and Road & track\nhave the GS-R doing 136  
 to 141 mph, and it gets there fast.\n\n\n> So, the Beretta can out handle  
 the Integra and it can certainly keep\nup with it in acceleration. And the B  
 eretta probably has a higher top\n>speed due to the horsepower advantage (160/  
 117 (hp/torque) for the\n>Integra vs. 180/160 for the Beretta).\n\*\*\*You always  
 believe those exact numbers, why don\'t you drive a GS-R, and see\nfor your se  
 lf, while the GS-R has a low 117 torqye, its high gearing over a 8000\nrpm mak  
 e up for the difference (still wouldn\'t call it a torque moster though!)\n\n>  
 The biggest advantage would have to be the price. The Integra costs\n>\$19,111  
 (as tested Motor Trend), the GTZ costs \$16,134 (as tested). The\n>GTZ also ha  
 s standard nicities and Airbag and Antilock brakes. An airbag\n>is not availa  
 ble on the Integra and lower models do not have ABS.\n>Considering you save al  
 most \$3,000 dollars for the Beretta, and the Quad4\n>is a reliable engine, it  
 doesn\'t make sense to get the Integra as a\n>performance coupe, which is what  
 people have been trying to make it out\n>to be.\n>\n\nQuad 4 reliable, yeah, w  
 hat\'s your definition of reliable- if that\'s reliable,\nthen its safe to say  
 that integra engines in general are near perfect\n(not to mention, a hell of  
 alot smoother and quieter - balance shafts.The Acura has the engine\nwins t  
 he reliablity contest hands down. You can rev that car all day, everyday,\nand  
 you\'ll never blow a hose, or crack the block, or anything else. (I speak\nfro  
 m expierence!)\nI\'m not saying the Quad 4 is a bad engine, but don\'t highlig  
 ht reliability when you\ncomparing it to a Acura Engine. AND while the Integr  
 a costs alot more, it is a\nbetter investment since it will hold its value con  
 siderably much better. And\ndoes a nice job at being a sporty car and practic  
 al at the same time.\n\nNOTE: this isn\'t a flame on the GTZ, or other GM Quad  
 4 products. THE Berreta\nis a nice car, and puts out respectable performance  
 and a very reasonable\nprice not to mention, it has an Airbag. But to start q  
 uoting figures from one\nsource, isn\'t too reliable. Read other sources, and  
 drive both cars. While I\nhaven\'t driven a GTZ, I have driven GTs, and Grand  
 Ams with Quad 4 engines,\n(so they are similair.)\n',

'From: tdawson@engin.umich.edu (Chris Herringshaw)\nSubject: Newsgroup Split\nOrganization: University of Michigan Engineering, Ann Arbor\nLines: 11\nDistribution: world\nNNTP-Posting-Host: po.engin.umich.edu\n\nConcerning the proposed newsgroup split, I personally am not in favor of\ndoing this. I learn an awful lot about all aspects of graphics by reading\nthis group, from code to hardware to algorithms. I just think making 5\ndifferent groups out of this is a waste, and will only result in a few posts\na week per group. I kind of like the convenience of having one big forum\nfor discussing all aspects of graphics. Anyone else feel this way?\nJust curious.\n\n\nDaemon\n\n',

'From: donyee@athena.mit.edu (Donald Yee)\nSubject: S3 86c805 w/2MB = 1024x768x32k colors = Orchid Pipe Dream?\nOrganization: Massachusetts Institute of Technology\nLines: 36\nDistribution: world\nNNTP-Posting-Host: pesto.mit.edu\n\nHi\n\nI have an Orchid Fahrenheit VLB with 2MB of DRAM. It is an S3\n86c805 based card. I had a problem for a while after installing my\nsecond meg of DRAM for the video, and thanks to Orchid, I got a fix\nfrom their tech support (it was jumper settings not given in the\nordinary manual. I assume it would come with memory ordered from\nthem, so I guess I should be glad they didn't just say "Buy the memory\nfrom us" or something like that.)\n\n\nThe one thing that I was puzzled by was why there was not a\n1024x768x32k color mode on the thing, either in full screen or\nenlarged desktop mode. My ATI Ultra Plus can handle that, given 2MB\nof memory. All the 2MB buys you on the Fahrenheit is 1280x1024x256.\nJust ONE more mode. GEEZ. Had I known, I wouldn't have bothered. I\nasked them why, and all I got was "Your point is well taken, but\nOrchid's software developers are busy with other projects." \n\n\nSo, to get to the point, finally, ARE there any s3 86c805\ndrivers out there that can handle high res hicolor modes? I'd love to\nget another card, but perhaps it will have to wait until the next\ngeneration of cards comes out, since this card came bundled with my\nsystem and it's not so easy to exchange these things unless they're\nbroken.\n\n\nIf you want these modes, steer away from Orchids s3 86c805\ncards (ie. VLB or VA/VLB), at least until their developers are "less\nbusy". If the magazines are to be believed, I've only seen one s3 86c805\nproduct thus far which can handle 1024x768x32k color (Genoa?),\nalthough even that might be a misprint.\n\n\nPlease, if there are generic or semi-generic drivers out\nthere, let me know where I can get them. 800x600x32k is OK, but I\ncould

a gotten that with my ATI VGA Wonder XL.\n\nThanks.\ndonyee@athena.mit.edu\n',

 ear.com (1055) \n\n> A button widget, when pressed, will cause a new item to b  
 e drawn in the\n> Window. This action clearly should not call XCopyArea() \n>  
 (or equiv) directly; instead, it should register the existence of the\n> new i  
 tem in a memory structure and let the same expose event handler\n> that handle  
 s "regular" expose events (e.g. window manager-driven\n> exposures) take care  
 of rendering the new image. \n\nHmmm.... Clearly? Depends on your programming  
 model. It is not at all\nforbidden to draw outside the context of an expose e  
 vent. Certainly any\ninternal data structures should be maintained such that  
 the visual\nappearance would be maintained properly whenever an expose event h  
 appens\nto be generated. This doesn't preclude drawing immediately after\nup  
 dating the datastructures though... \n\n\nRob \n \n',

'From: littaum@atlantis.CSOS.ORST.EDU (Mike Littau)\nSubject: Final Public D  
 ragon Magazine Update (Last chance for public bids)\nKeywords: Dragon Magazine  
 Auction Bid\nArticle-I.D.: leela.lqs7o4\$c2r\nDistribution: usa\nOrganization:  
 CS Dept. Oregon State University, Corvallis, Oregon.\nLines: 170\nNNTP-Posting  
 -Host: atlantis.csos.orst.edu\n\n\nThis is the final public update to my dragon  
 magazine auction. If there\nare no new bids then the current bids stand (like  
 that\'s gonna happen. :) ).\nAfter this, any updates will be by E-mail \*ONLY  
 \*. The entire auction \nwill end as soon as the bids stop coming in. So if y  
 ou want to get in\non this, be sure to bid now. All bids must be made in \*AT  
 LEAST\*\n25 cent increments. Buyer will pay shipping. (Unless you have any\nnp  
 articular fancy, it will be US mail 4th class special, with lots of\nnpadding).  
 \nAll dragons are bagged. The condition of them vary quite a bit, \nso I've  
 come up with my own condition system. Some dragons may be missing \nitems lik  
 e the inserts. If you have any questions, feel free to ask.\n\*\nCondition rat  
 ings - Usually this is just an evaluation of the cover, as\nmost of the materi  
 al inside is in great shape.\nExcellent - IE-"As you find them in the store"\n  
 Very Good - Still in great condition, but can tell it\'s been boughten\nGood  
 - On down the line\nVery Fair/fair - indicates lots of use (But still "decent"  
 )\nPoor - Indicates the material inside may be damaged (usually by\nscis  
 sors). \nA \* by the condition indicates that something from the magazine is \n  
 missing (usually the insert)\nI\'ll post another public update sometime this  
 weekend (which will be the\nfinal public posting, after which the auction will  
 be by e-mail until\nthe bidding stops)\n\*\nAgain if you have any questions, as  
 k away.\n\*\nnarrow \$2.50 056 - Fair \*- Top secret module missing - Bar

 rrogance\nOrganization: University of Colorado, Boulder\nLines: 48\n\nRespon  
 ding to the moderator:\n\n>In article <Apr.14.03.09.07.1993.5494@athos.rutgers.e  
 du> alvin@spot.Colorado.EDU (Kenneth Alvin) writes:\n>>\n>>Choosing what to be  
 lieve and rely on are important areas of personal \n>>sovereignty. What bothe

rs me is when others suggest that, in these matters of faith, their specific beliefs are not only true to them but are absolute and should be binding on others. It follows from this that God must give everyone the same revelation of truth, and thus anyone who comes to a different conclusion is intentionally choosing the wrong path. This is the arrogance I see; a lack of respect for the honest conclusions of others on matters which are between them and God. [It is certainly reasonable to ask for some humility about our own ability to know the truth. There are also different paths in some areas of practice. But I'd like to see more clarification about what you mean when you reject the idea of saying "their specific beliefs are not only true to them but are absolute and should be binding on others." If something is true, it is true for everyone, assuming that the belief is something about God, history, etc....] Yes, I agree. What I'm trying to point out is that, in matters of faith (i.e. tenets which are not logically persuasive), one may be convinced of the truth of certain things through, for instance, personal revelation. And it's certainly fine to share that revelation or those beliefs with others. And I don't think that it's arrogant, per se, to accept matters of pure faith as truth for oneself. Where I think the conflict arises is in assuming that, where disagreements on beliefs arise, all others must have been given the same truth, and that God must reveal His truth to everyone in such a way that all would honestly agree. I think this can lead to the conclusion that anyone who disagrees with you are being sinful or dishonest; that they are rejecting something they know to be truth because it is inconvenient for them, or because they wish to spurn God. I would say that this is equivalent to assuming that all truths one holds are universal and absolute. And the problem I see with this is that it negates the individuality of humans and their relationships with God. This does not mean there is no absolute truth; just that some areas of doctrinal disagreement may be areas where God has not established or revealed that truth. -- comments, criticism welcome... Ken\alvin@ucsu.colorado.edu [I agree with you. --clh]

'From: dbd@urartu.sdpa.org (David Davidian)\nSubject: THE REPUBLIC OF TURKEY SOLD 400 TONES OF ARMENIAN BONES IN 1924. \nKeywords: April 24, 1993, 78th Anniversary of the Turkish Genocide of Armenians\nOrganization: S.D.P.A. Center for Regional Studies\nLines: 68\n\n\n\t\t\tYarn of Cargo of Human Bones [1]\n\t\t\tCopyright, 1924, by the New York Times Company\n\t\t\tSpecial Cable to The New York Times\n\n\t\t\tPARIS, Dec 22, -- Marseilles is excited by a weird story of the arrival in\n\t\t\tthat port of a ship flying the British flag and named Zancarrying a\n\t\t\tmysterious cargo of 400 tons of human bones consigned to manufacturers there.\n\t\t\tThe bones are said to have been loaded at Mudania on the Sea of Marmora and\n\t\t\tto be the remains of the victims of massacres in Asia Minor. In view of the\n\t\t\tnumors circulating it is expected that an inquiry will be instigated.\n\n\t\t\t- - - Reference - - -\n\t\t\t[1] \_New York Times\_, December 23, 1924, page 3, column 2 (bottom)\n\t\t\t- - - - -\n\t\t\tOn the 78th Commemorative Anniversary of the Turkish genocide of the Armenians,\n\t\t\twe remember those whose only crime was to be Armenian in the shadow of an\n\t\t\temerging Turkish proto-fascist state. In their names we demand justice.\n\n\t\t\tIn April 1915, the Turkish government began a systematically executed\n\t\t\tnde-population of the eastern Anatolian homeland of the Armenians through a\n\t\t\tngenocidal extermination. This genocide was to insure that Turks exclusively\n\t\t\truled over the geographic area today called the Republic of Turkey. The\n\t\t\tresult: 1.5 million murdered, 30 billion dollars of Armenian property stolen\n\t\t\tand plundered. This genocide ended nearly 3,000 years of Armenian civilization\n\t\t\non those lands. Today, the Turkish government continues to scrape clean any\n\t\t\tvestige of a prior Armenian existence on those lands. Today\'s Turkish\n\t\t\tgovernmental policy is to re-write the history of the era, to manufacture\n\t\t\ndistortion and generate excuses for their genocide of the Armenian people. In\n\t\t\tthe face of refutation ad nauseam, the Turkish Historical Society and cronies\n\t\t\tshamelessly continue to deny that any such genocide occurred. This policy\n\t\t\tmerely demonstrates that in the modern era, genocide is an effective state\n\t\t\tpolicy when it remains un-redressed and unpunished. A crime unpunished is a\n\t\t\tcrime encouraged. Adolf Hitler took this cue less than 25 years after the\n\t\t\tunsuccessful genocide of the Armenians.\n\n\t\t\tTurkey claims there was no systematic deportation of Armenians, yet...\n\t\t\tArmenians were removed from every city, town, and village in the whole of\n\t\t\tTurkey! Armenians who resisted deportation and massacre are referred to as\n\t\t\t"rebels".\n\n\t\t\tTurkey claims there was no genocide of the Armenians, yet...Turkish population\n\t\t\tfigures today show zero Armenians in eastern Turkey, the Armenian homeland.\n\n\t\t\tTurkey claims Armenians were always a small minority, yet...Turkey claims\n\t\t\tArmenians were a "threat".\n\n\t\t\tIn a final insult to the victims, the Republic

of Turkey sold the bones of \napproximately 100,000 murdered Armenians for profit to Europe.\n\nToday, the Turkish government is enjoying the fruits of that genocide. The\nsuccess of this genocide is hangs over the heads of Turkey\'s K urd ish\npopulation.\n\nThe Armenians demand recognition, reparation, return of Armenian land and\nproperty lost as a result of this genocide.\n\nARMENIANS DEMAND JUSTICE

'From: mathew@mantis.co.uk (mathew)\nSubject: Re: After 2000 years, can we say that Christian Morality is oxymoronic?\nOrganization: Mantis Consultants, Cambridge. UK.\nLines: 32\nX-Newsreader: rusnews v1.01\n\nforgach@noao.edu (Suzanne Forgach) writes:\n> From article <lqcq3f\$r05@fido.asd.sgi.com>, by livesey@solntze.wpd.sgi.com \n> (Jon Livesey):\n> > If there is a Western ethic against infanticide, why\n> > are so many children dying all over the world?\n> \n> The majority of the world isn\'t "Western".\n\nSuperficially a good answer, but it isn\'t that simple. An awful lot of the\nstarvation and poverty in the world is directly caused by the economic\npolicies of the Western countries, as well as by the diet of the typical\nWesterner. For instance, some third-world countries with terrible\nmalnutrition problems export all the soya they can produce -- so that it can\nbe fed to cattle in the US, to make tender juicy steaks and burgers. They\nhave to do this to get money to pay the interest on the crippling bank loans\nwe encouraged them to take out. Fund-raising for Ethiopia is a truly bizarre\nidea; instead, we ought to stop bleeding them for every penny they\'ve got.\n\nPerhaps it\'s more accurate to say that there\'s a Western ethic against\nWestern infanticide. All the evidence suggests that so long as the children\nare dying in the Third World, we couldn\'t give a shit. And that goes for the\nsupposed "Pro-Life" movement, too. They could save far more lives by\nfighting against Third World debt than they will by fighting against\nabortion. Hell, if they\'re only interested in fetuses, they could save more\nof those by fighting for human rights in China.\n\nAnd besides, Suzanne\'s answer implies that non-Western countries lack this\nethic against infanticide. Apart from China, with its policy of mandatory\nforced abortion in Tibet, I don\'t believe this to be the case.\n\nmathew\n',

'From: wingo@cspara.decnet@Fedex.Msfc.Nasa.Gov\nSubject: Re: NASA "Wraps"\nOrganization: University of Houston\nLines: 86\nDistribution: world\nNNTP-Posting-Host: judy.uh.edu\nNews-Software: VAX/VMS VNEWS 1.41 \n\nIn article <1993Apr10.145502.28866@iti.org>, aws@iti.org (Allen W. Sherzer) writes...\n>In article <9APR199318394890@judy.uh.edu> wingo@cspara.decnet@Fedex.Msfc.Nasa.Gov writes:\n> \n>>>BTW, universities do the same thing. They however, have a wrap of\n>>>10% to 15% (again, this is over and above any overhead charge).\n> \n>>Wrong Allen. The max overhead charge is ALL of the charge. There is no\n>>separately budgeted overhead in any shape size form or fashion.\n> \n>A professor at the University of Virginia told me their wrap was about\n>15%. The subcontract I have let out and worked on for other universities\n>are about the same. My employer (a non-profit research institute) does\n>the same. This is generally referred to as the fee.\n> \n\nI don't care who told you this it is not generally true. I see EVERY single\nline item on a contract and I have to sign it. There is no such thing as\nwrap at this university. I also asked around here. There is no wrap at\nMarquette, University of Wisconsin Madison, Utah State, Weber State or\nEmbry Riddle U. I am not saying that it does not happen but in every instance\nthat I have been able to track down it does not. Also the president of our\nUniversity who was Provost at University of West Virginia said that it did\nnot happen there either and that this figure must be included in the overhead\nto be a legitimate charge.\n\n>>How do\n>>I know? I write proposals and have won contracts and I know to the dime\n>>what the charges are. At UAH for example the overhead is 36.6%.\n> \n>Sounds like they are adding it to their overhead rate. Go ask your\n>costing people how much fee they add to a project.\n>\n\nI did they never heard of it but suggest that, like our president did, that\nany percentage number like this is included in the overhead.\n\n>If you have some numbers Allen then show them else quit barking.\n> \n>I did Dennis; read the article. To repeat: an internal estimate done by\n>the Reston costing department says Freedom can be built for about \$1.8B\n>a year and operated for \$1B per year \*IF\* all the money were spent on\n>Freedom. Since we spend about half a billion \$\$ more per year it looks\n>like roughly 25% of the money is wasted. Now if you think I'm making\n>this up, you can confirm it in the anonymous editorial published a few\n>weeks ago in Space News.\n>\n\nNo Al

len you did not. You merely repeated allegations made by an Employee\nof the O  
verhead capital of NASA. Nothing that Reston does could not be done\nbetter or  
cheaper at the Other NASA centers where the work is going on.\nKinda funny is  
n't it that someone who talks about a problem like this is\nat a place where  
everything is overhead.\n\n>This Dennis, is why NASA has so many problems: you  
can't accept that\n>anything is wrong unless you can blame it on Congress. Oh  
, sure, you'll\n>say NASA has problems but do you believe it? Remember the WP  
02\n>overrun? You insisted it was all Congress's fault when NASA management\n>  
knew about the overrun for almost a year yet refused to act. Do you\n>still bl  
ame Congress for the overrun?\n>\n\nWhy did the Space News article point out th  
at it was the congressionally\ndemanded change that caused the problems? Methi  
nks that you are being \nselective with the facts again.\n\n>>By your own numb  
ers Allen, at a cost of 500 million per flight the\n>>service cost of flying s  
huttle to SSF is 2 billion for four flights, so how\n>>did you get your one bi  
llion number?\n> \n>I have no idea what your trying to say here Dennis.\n> \n>  
Allen\n>-- \n\nIf it takes four flights a year to resupply the station and you  
have a cost\nof 500 million a flight then you pay 2 billion a year. You stated  
that your\n"friend" at Reston said that with the current station they could re  
supply it\nfor a billion a year "if the wrap were gone". This merely points ou  
t a \nblatent contradiction in your numbers that understandably you fail to se  
e.\n\nDennis, University of Alabama in Huntsville.\n\nSorry gang but I have a  
deadline for a satellite so someone else is going\nto have to do Allen's math  
for him for a while. I will have little chance to\ndo so.\n\n',

e anisotropy you have to push the halo out, the energy then gets large, the mechanism of getting NS out that far becomes questionable, and we should start to see for example the Andromeda's bursters. The data is consistent with either a Oort cloud distribution (but only just) - but no one can think of a plausible source with the right spectrum. Or, it can be a cosmological distances (hence anisotropy) and the edge is "the edge of the Universe" ;-). If at cosmological distances you need very high energy (to detect) and a very compact source (for spectrum), ergo a neutron star colliding with another neutron star or black hole. Even then getting the spectrum is very hard, but conceivable. If we know anything about physics at that level, the bursters are not due to quantum black holes or cosmic strings, wrong spectrum for one thing. The situation is further complicated by recent claims that there are two classes of sources ;-). [in the colliding NS they'd actually probably fit relatively easily into the NS-NS and NS-BH collision scenarios respectively] my own pet theory is that it's Flying saucers entering hyperspace :-). but the reason i am asking is that most everyone assumes that they are colliding neutron stars or spinning black holes, i just wondered if any mechanism could exist and place them closer in. If you can think of one, remember to invite me to Stockholm...

st: tm0006.lerc.nasa.gov\nOrganization: NASA Lewis Research Center / Cleveland  
, Ohio\nLines: 71\n\nThe following press release was distributed April 1 by\nNASA Headquarters.\n\n>Space Station Redesign Advisory Members Named\n\n>Along wi  
th Dr. Charles M. Vest, recently named by Vice President\nAlbert Gore to head  
the advisory committee on the redesign of the\nSpace Station, NASA has announc

ed the names of representatives from government and industry and academic experts from across the country to participate in an independent review of the redesign options being developed by NASA. "I am extremely honored to have been selected to lead this important review panel. America's future in science and technology and as a world leader in space demands our utmost attention and care," said Vest. "We have assembled a diverse panel of experts that, I believe, will bring the appropriate measures of insight, integrity and objectivity to this critical task." The advisory committee is charged with independently assessing various redesign options of the space station presented by NASA's redesign team, and proposing recommendations to improve efficiency and effectiveness of the space station program. Space station international partners also are being asked to participate and will be named at a later date. The advisory committee will submit its recommendations in June. Advisory committee members named today include:

'From: jgd@dixie.com (John De Armond)\nSubject: FBI Murders (was Re: ATF BURNS DIVIDIAN )\nOrganization: Dixie Communications Public Access. The Mouth of the South.\nLines: 87\n\n\njmd@cube.handheld.com (Jim De Arras) writes:\n\n\n>I have believed all along that they could not let them live, the \n>embarrassment to the BATF and the FBI would've been too severe.\n\n>Remember, this was a suspicion of tax-evasion warrant. There were no \n>witnesses, except the FBI. All information filtered through the FBI. All \n>they had to do was allow one remote controlled pool camera be installed \n>near the building, and the press could've done their job, and would've \n>been able to back the FBI's story with close up video, while incurring no \n>risk to the press. Unless they did not want the public to see something. \n>The complete lack of any other source of information other than the \n>FBI really causes me concern. \n\n>Sick to my stomach, and getting sicker from all the Government apologists\n\nWell put, Jim. I am as concerned about the media's complicity in this\ngrowing coverup. Can you imagine the media outrage, the lawsuits, the\ninvestigations that would emit if the government kept the media away from\nany other story? Particularly if a Republican administration had been\nbehind it. What's going on here?\n\nLet's look beyond the initial blunder and examine what happened next.\nI'm a student of human psychology, particularly in the area of psy-ops\nbecause I've found some of the techniques to be useful in business\nnegotiations. That puts me firmly in the amateur ranks. This AMATEUR\nknows that the first thing to do when sizing up the opponent is to do a\npsychological profile on him. You can bet your ass the FBI had\nprofessionally done profiles on Koresh. Koresh's behavior was\neminently predictable. It is typical of people who move away from\ncivilization to be willing to fight to the death to preserve their\nisolation. It would also be typical, given Koresh's religious\norientation, for such an individual to interpret a government assault as\nthe apocalypse. Suicide is as an acceptable alternative to being\nconsumed in the apocalypse.\n\nIMHO, the FBI knew all this and decided after 50 days of concentrated\npsy-ops to initiate that apocalypse. I believe they chose a course of\naction designed specifically to push Koresh over the edge while publicly\nap

pearing to be acting reasonably. They KNEW that Koresh considered the tanks to be the Chariots of Fire mentioned in the Book of Revelations. They KNEW that at sending tanks, oops, combat engineering vehicles, ostensibly to perform "gas insertions" (love that NewSpeak) WOULD push him over the edge. Look at some supporting evidence. Koresh's attorney mentioned on TV earlier today (4/20) that one of Koresh's major concern was the biblical role of the tanks stationed around the compound. The FBI (through Reno on Larry King last night and at the news conference this morning) claimed to have listening devices in the compound. If that was true they KNEW their actions were driving him to the brink. They KNEW they were pushing the Davidians toward mass suicide. Any rational and reasonable agency NOT interested in killing those people would, at the first sign of preparations for suicide, have pulled completely back and would have gotten rid of all the armor. Instead they continued with the "gas insertion" right up to the point where flames appeared. The image that will remain etched in my mind is that of the tank strutting back and forth in front of the burning compound, gloating over the kill. Let's step back and assess how this thing could have been ended without bloodshed. This technique would have required a law enforcement agency not interested in constitutionally enforcing the law and in the preservation of life instead of achieving a military victory and of vengeance. The way to have nabbed Koresh was simply to have announced a pull back, abandoned the assault, torn down the concertina wire and removed the armor, maintained covert surveillance of the compound and then exploited his ego to flush him out. Exploiting his ego would have been simple. A simple invite or two from the tabloid talk shows to come on TV and tell how he whipped the US government would have been something he could not have resisted. He could have then been nabbed when he left the compound. Simple, clean and safe but because it would have required the FBI to execute a tactical retreat and would have deprived them of the revenge they sought, it was totally out of the question. Not without all that testosterone floating around. After all Janet Reno had to show the world how big her balls are. Yesterday was a sad, sad day for the American system. I am sick to my very soul.

'From: tomh@metrics.com (Tom Haapanen)\nSubject: RFD: comp.os.ms-windows.nt.  
 {misc,setup}\nOrganization: Software Metrics Inc.\nLines: 76\nNNTP-Posting-Hos  
 t: rodan.uu.net\n\nThis is the official Request for Discussion (RFD) for the c  
 reation of two\nnew newsgroups for Microsoft Windows NT. This is a second RFD  
 , replacing\nthe one originally posted in January \'93 (and never taken to a v  
 ote). The\nproposed groups are described below:\n\nNAME: \t comp.os.ms-window  
 s.nt.setup\nSTATUS: Unmoderated.\nPURPOSE: Discussions about setting up and i  
 nstalling Windows NT, and about\n\t system and peripheral compatability issues  
 for Windows NT.\n\nNAME:\t comp.os.ms-windows.nt.misc\nSTATUS:\t Unmoderated.\n  
 PURPOSE: Miscellaneous non-programming discussions about using Windows NT,\n\t  
 including issues such as security, networking features, console\n\t mode and  
 Windows 3.1 (Win16) compatability.\n\nRATIONALE:\n\tMicrosoft NT is the newest  
 member of the Microsoft Windows family\n\tto of operating systems (or operating e  
 nvironments for those who wish\n\tto argue about the meaning of an "OS"). The  
 family ranges from\n\tModular Windows through Windows 3.1 and Windows for Work  
 groups to\n\tWindows NT at the high end. To date, Microsoft has shipped over\  
 \nt50,000 beta copies and pre-release SDKs of Windows NT -- the\n\tactual rele  
 ase is slated for May/June \'93.\n\n\tWhile Windows NT has an entirely new des  
 ign internally, it shares\n\tan application programming interface with the oth  
 er members of the\n\tWindows family; its Win32 API includes the Win16 API used  
 in Win-\n\tdows 3.1, and the Win32s API subset (Win32 less threads, networking  
 \ntand security) can be used to create 32-bit applications for\n\tWindows 3.1  
 .\n\n\tThe user interface is also practically identical to that of Windows\n\t  
 3.1, with the addition of logins and a few other features. It uses\n\tProgram  
 Manager, File Manager and other applets, and generally pre-\n\ttsents an identi  
 cal appearance to the user. Many of the announced\n\tWindows NT applications  
 are ports of existing Windows 3.1 apps, and\n\tNT also runs existing 3.1 appli  
 cations.\n\n\tThus, it appears logical that Windows NT should share the follow  
 ing\n\tgroups with the other members of the Windows family:\n\t\tcomp.os.ms-wi  
 ndows.apps\n\t\tcomp.os.ms-windows.programmer.tools\n\t\tcomp.os.ms-windows.pr  
 ogrammer.misc\n\t\tcomp.os.ms-windows.programmer.win32\n\t\t\n\tThe following gr  
 oups are also clearly applicable to Windows NT as\n\twell as Windows 3.1:\n\t\t  
 comp.os.ms-windows.announce\n\t\tcomp.os.ms-windows.advocacy\n\t\t\n\tIn conclu  
 sion, the only clear argument for the separation of the\n\tWindows 3.1 and Win  
 dows NT hierarchies is different internal\n\tstructures of Windows 3.1 and Win

dows NT. And yet operating\n\t systems such as OS/2, Macintosh OS, Xenix and C  
 oherent all have\n\t undergone major rewrites without having been split into se  
 parate\n\t newsgroup hierarchies.\n\n\t Further, Windows 3.1 is due for a major  
 rewrite itself in 1994 --\n\t when the fully 32-bit, protected-mode and with-DO  
 S-built-in next-\n\t generation Windows, "Chicago", debuts next year, surely it  
 should\n\t remain in the same hierarchy. And what, then, would be the jus-\n\t  
 tification for separating Windows NT from other Windows versions?\n\n\n\t DISCUSS  
 ION PERIOD:\n\t The discussion period will run from 27 April, 1992 to 18 May, 1  
 993. \n\n\t VOTING:\n\t The CFV (Call for Votes) will be issued around 19 May, 19  
 93, based on\n\t the feedback received during the discussion period. No votes  
 will\n\t be accepted prior to the CFV.\n\n\t -- \n[ /tom haapanen -- tomh@metrics.co  
 m -- software metrics inc -- waterloo, ont ]\n[ "stick your index finger  
 s into both corners of your mouth. now pull ]\n[ up. that's how th  
 e corrado makes you feel." -- car, january \'93 ]\n',

'From: sera@zuma.UUCP (Serdar Argic)\nSubject: 2.5 million Muslims perished of butchery at the hands of Armenians.\nReply-To: sera@zuma.UUCP (Serdar Argic)\nDistribution: world\nLines: 92\n\nIn article <1993Apr25.015551.23259@husc3.harvard.edu> verbit@brauer.harvard.edu (Mikhail S. Verbitsky) writes:\n\n>\tActually, Jarmo is a permanent resident of my killfile\n\nAnyone care to speculate on this? I'll let the rest of the net judge\nthis on its own merits. Between 1914 and 1920, 2.5 million Turks perished \nof butchery at the hands of Armenians. The genocide involved not only \nthe killing of innocents but their forcible deportation from the Russian \nArmenia. They were persecuted, banished, and slaughtered while much of \nOttoman Army was engaged in World War I. The Genocide Treaty defines \ngenocide as acting with a \n\n \\'specific intent to destroy, in whole or in substantial part, a \n national, ethnic, racial or religious group.\' \n\nHistory shows that the x-Soviet Armenian Government intended to eradicate \nthe Muslim population. 2.5 million Turks and Kurds were exterminated by the \nArmenians. International diplomats in Ottoman Empire at the time - including \nU.S. Ambassador Bristol - denounced the x-Soviet Armenian Government\'s policy \nas a massacre of the Kurds, Turks, and Tartars. The blood-thirsty leaders of \nthe x-Soviet Armenian Government at the time personally involved in the \nextermination of the Muslims. The Turkish genocide museums in Turkiye honor \nthose who died during the Turkish massacres perpetrated by the Armenians. \n\nThe eyewitness accounts and the historical documents established,\nbeyond any doubt, that the massacres against the Muslim people\nduring the war were planned and premeditated. The aim of the policy\nwas clearly the extermination of all Turks in x-Soviet Armenian \nterritories.\n\nThe Muslims of Van, Bitlis, Mus, Erzurum and Erzincan districts and\ntheir wives and children have been taken to the mountains and killed.\nThe massacres in Trabzon, Tercan, Yozgat and Adana were organized and\nperpetrated by the blood-thirsty leaders of the x-Soviet Armenian \nGovernment.\n\nThe principal organizers of the slaughter of innocent Muslims were\nDro, Antranik, Armen Garo, Hamarosp, Daro Pastirmadjian, Keri,\nKarakin, Haig Pajise-liantz and Silikian.\n\nSource: "Bristol Papers", General Correspondence: Container #32 - Bristol\n to Bradley Letter of September 14, 1920.\n\n"I have it from absolute first-hand information that the Armenians in \n the Caucasus attacked Tartar (Turkish) villages that are utterly \n defenseless and bombarded these villages with artillery and they murder\n the inhabitants, pillage the village and often burn the village." \n\n\nSources: (The Ottoman State, the Ministry of War), "Islam Ahalinin \nDucar Olduklari Mezalim Hakkinda Vesaike Mustenid Malumat," (Istanbul, 1918). \nThe French version: "Documents Relatifs aux Atrocites Commises par les Armeniens\nsur la Population Musulmane," (Istanbul, 1919). In the Latin script: H. K.\nTurkozu, ed., "Osmanli ve Sovyet Belgeleriyle Ermeni Mezalimi," (Ankara, \n1982). In addition: Z. Basar, ed., "Ermenilerden Gorduklerimiz," (Ankara, \n1974) and, edited by the same author, "Ermeniler Hakkinda Makaleler -\nDerlemeler," (Ankara, 1978). "Askeri Tarih Belgeleri ...," Vol. 32, 83\n(December 1983), document numbered 1881.\n"Askeri Tarih Belgeleri ...," Vol. 31, 81 (December 1982), document\n numbered 1869.\n\nThose who were capable of fighting were taken away at the very beginning\n with the excuse of forced labor in road construction, they were taken\n in the direction of Sarikamis and annihilated. When the Russian army\n withdrew, a part of the remaining people was destroyed in Armenian\n massacres and cruelties: they were thrown into wells, they were

'From: wtm@uhura.neoucom.edu (Bill Mayhew)\nSubject: Re: help: How to reduce the RPMs of a Boxer fan ?\nOrganization: Northeastern Ohio Universities College of Medicine\nDistribution: na\nLines: 18\n\nYes, you increase the RPM slip of a "boxer" type fan by installing\na capacitor in series with the fan's power supply. The air flow of\nsmall 3.5 inch fans can be reduced by about 50% by using a 1 to 4\nuF capacitor. Use a good grade nonpolarized unit with working\nvoltage rating around 250 volts. Note that some impractical study is\nusually required to experimentally determine the best size\ncapacitor for a given appl

ication.\n\nFor DC powered applications, try the Radio Shack 12 volt box fan.\nIt can run and start reliably from as low as about 4.5 VDC. It is\nexceptionally quiet, but at admittedly low flow. I wish I knew who\nmade the fans for Radio Shack.\n\n-- \nBill Mayhew NEOUCOM Computer Services Department\nRootstown, OH 44272-9995 USA phone: 216-325-2511\nwtm@uhura.neoucom.edu (140.220.1.1) 146.580: N8WED\n',

US export restrictions. TEMPEST \n electromagnetic interference monitoring. Beale ciphers, a hoax?\n\nAmerican Cryptographic Association. RSA public-key patents.\n\nX-Last-Updated: 1993/04/16\n\nArchive-name: cryptography-faq/part09\nLast-modified: 1993/4/15\n\n\nFAQ for sci.crypt, part 9: Other Miscellany\n\nThis is the ninth of ten parts of the sci.crypt FAQ. The parts are\nmostly independent, but you should read the first part before the rest.\n\nWe don\'t have the time to send out missing parts by mail, so don\'t ask.\n\nNotes such as ``[KAH67]\'\' refer to the reference list in the last part.\n\n\nThe sections of this FAQ are available via anonymous FTP to rtfm.mit.edu \nas /pub/usenet/news.answers/cryptography-faq/part[xx]. The Cryptography \nFAQ is posted to the newsgroups sci.crypt, sci.answers, and news.answers \nevery 21 days.\n\n\nContents:\n\n\* What is the National Security Agency (NSA)?\n\* What are the US export regulations?\n\* What is TEMPEST?\n\* What are the Beale Ciphers, and are they a hoax?\n\* What is the American Cryptogram Association, and how do I get in touch?\n\* Is RSA patented?\n\* What about the Voynich manuscript?\n\n\n\* What is the National Security Agency (NSA)?\n\n\nThe NSA is the official security body of the U.S. government. It\n was given its charter by President Truman in the late 40\'s, and\n has continued research in cryptology till the present. The NSA is\n known to be the largest employer of mathematicians in the world,\n and is also the largest purchaser of computer hardware in the\n world. Governments in general have always been prime employers of\n cryptologists. The NSA probably possesses cryptographic expertise many\n years ahead of the public state of the art, and can undoubtedly break\n many of the systems used in practice; but for reasons of national\n security almost all information about the NSA is classified.\n\n\nBamford\'s book [BAMFD] gives a history of the people and operations of\n the NSA. The following quote from Massey [MAS88] highlights the\n difference between public and private research in cryptography:\n\n ``... if one regards cryptology as the prerogative of government,\n one accepts that most cryptologic research will be conducted\n behind closed doors. Without doubt, the number of workers engaged\n today in such secret research in cryptology far exceeds that of\n those engaged in open research in cryptology. For only about 10\n years has there in fact been wide spread open research in\n cryptology. There have been, and will continue to be, conflicts\n between these two research communities. Open research is common\n quest for knowledge that depends for its vitality on the open\n exchange of ideas via conference presentations and publications in\n scholarly journals. But can a government agency, charged with\n responsibilities of breaking the ciphers of other nations,\n countenance the publication of a cipher that it cannot break? Can\n a researcher in good conscience publish such a cipher that might\n undermine the effectiveness of his own government\'s code-breakers?\n\n One might argue that publication of a provably-secure cipher would\n force all governments to behave like Stimson\'s `gentlemen', but one\n must be aware that open research in cryptography is fraught with\n political and ethical considerations of a severity than in most\n scientific fields. The wonder

is not that some conflicts have occurred between government agencies and open researchers in cryptology, but rather that these conflicts (at least those of which we are aware) have been so few and so mild.'

What are the US export regulations?

In a nutshell, there are two government agencies which control export of encryption software. One is the Bureau of Export Administration (BXA) in the Department of Commerce, authorized by the Export Administration Regulations (EAR). Another is the Office of Defense Trade Controls (DTC) in the State Department, authorized by the International Traffic in Arms Regulations (ITAR). As a rule of thumb, BXA (which works with COCOM) has less stringent requirements, but DTC (which takes orders from NSA) wants to see everything first and can refuse to transfer jurisdiction to BXA.

The newsgroup misc.legal.computing carries many interesting discussions on the laws surrounding cryptographic export, what people think about those laws, and many other complex issues which go beyond the scope of technical groups like sci.crypt. Make sure to consult your lawyer before doing anything which will get you thrown in jail; if you are lucky, your lawyer might know a lawyer who has at least heard of the ITAR.

What is TEMPEST?

TEMPEST is a standard for electromagnetic shielding for computer equipment. It was created in response to the discovery that information can be read from computer radiation (e.g., from a CRT) at quite a distance and with little effort.

Needless to say, encryption doesn't do much good if the cleartext is available this way.

What are the Beale Ciphers, and are they a hoax?

(Thanks to Jim Gillogly for this information and John King for corrections.)

The story in a pamphlet by J. B. Ward (1885) goes: Thomas Jefferson Beale and a party of adventurers accumulated a huge mass of treasure and buried it in Bedford County, Virginia, leaving three ciphers with an innkeeper; the ciphers describe the location, contents, and intended beneficiaries of the treasure.

Ward gives a decryption of the second cipher (contents) called B2; it was encrypted as a book cipher using the initial letters of the Declaration of Independence (DOI) as key. B1 and B3 are unsolved; many documents have been tried as the key to B1.

Aficionados can join a group that attempts to solve B1 by various means with an eye toward splitting the treasure.

The Beale Cypher Association  
P.O. Box 975  
Beaver Falls, PA 15010

You can get the ciphers from the rec.puzzles FAQL by including the line:

send index

in a message to netlib@peregine.com and following the directions.

(There are apparently several different versions of the cipher floating around. The correct version is based on the 1885 pamphlet, says John King <kingj@hpcc01.corp.hp.com>.)

Some believe the story is a hoax. Kruh [KRU88] gives a long list of problems with the story. Gillogly [GIL80] decrypted B1 with the DOI and found some unexpected strings, including ABFDEFGHIIJKLMMNOHPP.

Hammer (president of the Beale Cypher Association) agrees that this string couldn't appear by chance, but feels there must be an explanation; Gwyn (sci.crypt expert) is unimpressed with this string.

What is the American Cryptogram Association, and how do I get in touch?

The ACA is an organization devoted to cryptography, with an emphasis on cryptanalysis of systems that can be attacked either with pencil-and-paper or computers. Its organ 'The Cryptogram' includes articles and challenge ciphers. Among the more than 50 cipher types in English and other languages are simple substitution, Playfair, Vigenere, bifid, Bazeries, grille, homophonic, and cryptarithm.

Dues are \$15 for one year (6 issues); more outside of North America; less for students under 18 and seniors. Subscriptions should be sent to ACA Treasurer, 18789 West Hickory St., Mundelein, IL 60060.

Is RSA patented?

Yes. The patent number

r is 4,405,829, filed 12/14/77, granted 9/20/83.\n For further discussion of this patent, whether it should have been\n granted, algorithm patents in general, and related legal and moral\n issues, see comp.patents and misc.legal.computing. For information\n about the League for Programming Freedom see [FTFP F]. Note that one of\n the original purposes of comp.patents was to collect questions such as\n ``should RSA be patented?``, which often flooded sci.crypt and other\n technical newsgroups, into a more appropriate forum.\n\n\* What about the Voynich manuscript?\n\n nelson@reed.edu (Nelson Minar) says there is a mailing list on the\n subject. the address to write to subscribe to the VMS mailing list\n is: <voynich-request@rand.org>\n\n the ftp archive is: rand.org:/pub/voynich\n\n There's all sorts of information about the manuscript itself, of\n course. A good bibliography can be found on the ftp site. Kahn\n 's\n "The Codebreakers" gives a good introduction.\n',

'From: turpin@cs.utexas.edu (Russell Turpin)\nSubject: Re: Science and methodology (was: Homeopathy ... tradition?)\nOrganization: CS Dept, University of Texas at Austin\nLines: 53\nDistribution: inet\nNNTP-Posting-Host: saltillo.cs.utexas.edu\nKeywords: science errors Turpin\n\n-\*---\n\nI agree with everything that Lee Lady wrote in her previous post in\nthis thread. In case this puzzles people, I would like to expand\non two of her comments.\n\nIn article <C5JoDH.9IG@news.Hawaii.Edu> lady@uhunix.uhcc.Hawaii.Edu (Lee Lady) writes:\n> Avoiding mistakes is certainly highly desirable. However it is also\n> widely acknowledged that perfectionism is inimicable to creativity. \n> ... In the extreme case, a perfectionist becomes so paralyzed by all\n> the possible mistakes he might make that he is unable to even leave\n> the house. \n\nOne of the most important (and difficult) aspects of reasoning\nabout empirical investigation lies in understanding the context,\nscope, and importance of the various arguments and pieces of\nevidence that are marshalled for a claim. Some errors break the\nback of a piece of research, some leave a hole that needs to be\nfilled in, and some are trivial in their importance. It is a\ngrave mistake to confuse these.\n\nPast snippets from this thread:\n\n>>> I doubt if Einstein used any formal methodology. ....\n>> He also proposed numerous experiments which if performed would\n>> distinguish a universe in which special relativity holds from\n>> one in which it does not. ... \n\nBack to Lee Lady:\n\n> These are not the rules according to many who post to sci.med and\n> sci.psychology. According to these posters "If it's not supported by\n> carefully designed controlled studies then it's not science." \n\nThese posters are making the mistake that I have previously\ncriticized of adhering to a methodological recipe. A "carefully\ndesigned and controlled study" is neither always possible nor\nalways important. (On the other hand, if someone is proposing a\nremedy that supposedly alleviates a chronic medical problem, we\nhave enough knowledge of the errors that have plagued \*this\* kind\nof claim to ask for a "carefully designed and controlled study"\nto alleviate our skepticism.) \n\nRules such as "support the hypothesis by a carefully designed and\ncontrolled study" are too narrow to apply to \*all\* investigation.\nI think that the requirements for particular reasoning to be\nconvincing depends greatly on the kinds of mistakes that have\noccurred in past reasoning about the same kinds of things. (To\nreuse the previous example, we know that conclusions from\nuncontrolled observations of the treatment of chronic medical\nproblems are notoriously problematic.) \n\nRussell\n',

'From: smb@research.att.com (Steven Bellovin)\nSubject: Re: (new) reason for Clipper alg\n'm secrecy\nOrganization: AT&T Bell Laboratories\nLines: 31\n\nIn article <1993Apr20.155924.29995@news.clarkson.edu>, tuinstra@signal.ece.clarkson.edu (Dwight Tuinstra) writes:\n> First, note that the "experts" will only look at "details", and of just\n> the algorithm:\n> \n> In addition, respected experts from outside the\n> government will be offered access to the confidential details of\n> the algorithm to assess its capabilities and publicly report\n> their findings.\n> \n> Why not the chip design? Well, here's the possibility: in addition to\n> encryption, the chip preprocesses voice signals to make them easier\n> to analyze/transcribe electronically. The chip, once widespread, might\n> effectively be part of a massively parallel

l computer for "voice-\n> grepping" the US phone network (or the criminal & wrong-thinking patrons\n> thereof).\n\nFirst of all, the chip doesn\'t do that. It runs at 16 megabits/second,\nwhich is far beyond what you need for voice. It\'s obviously intended\nfor data as well, and on high-speed lines at that.\n\nSecond -- what advantage is there to doing the processing in the phone?\nI don\'t care how fancy that chip is; it\'s not as fancy as the roomful\nof analyzers at Fort Meade running the program they\'ll have 5 years from\nnow. They can\'t update every Clipper chip that\'s out there.\n\nThird -- if they did do this preprocessing in the chip, it would probably\nhave a serious effect on recognizability of the voice patterns. If\nnothing else, that would hurt the acceptability of the product. The\nV.32bis modems are just barely fast enough to do a good job on properly-\nmassaged voice as is; add any more to the mix, and you\'re completely out\nof the ballpark.\n',

'From: boyle@cactus.org (Craig Boyle)\nSubject: Re: Too fast\nOrganization: Capital Area Central Texas UNIX Society, Austin, Tx\nLines: 108\n\nIn article <1qkon8\$3re@armory.centerline.com> jimf@centerline.com (Jim Frost) writes:\n\n[stuff about autobahn and safety of sho at speed deleted]\n>The Mustang is essentially the same deal as the SHO -- a big power\n\nThe Mustang is a much worse case of design irresponsibility than the\nSHO. \n>plant stuck in a mid-size sedan, with almost no other modifications.\n>I have real-life experience with the Mustang -- it handles like a\n>brick (except when you're invoking oversteer, of course, something I\n\nIts hard to predicatbaly drift a stock Mustang because\nof the suspension.\n\n>personally avoid doing on the highway) and stop

ping power is\n>inadequate even from 80mph. Lots of acceleration -- but the rest of\n>the car is not up to par.\n\nYes. When i think Mustang, I think school-bus + F16 motor. In\nmy mind the Mustang should be fitted with a speed limiter at 80-90\nor so. It just isn't safe, check out your local junkyard, Mustangs\noutnumber other cars by a proportion way in excess of sales in\njunkyards.\n\nI find it astonishing the CU or some such like has not jumped on the\nMustang for poor brakes in relation to power. Ford should at least\nstandardize on the SVO rear brakes for all 5.0's.\n\n\n\n>\n>I picked the Porsche example because they are designed with speed in\n>mind. It didn't have to be the 911 -- it could have been the much\n>cheaper 944 or one of several Mercedes or Audi models. All of these\ncars are fairly expensive -- but so are the parts that make them\ndrivable at high speed. This should be elementary.\n\n>\n>There are a few things to keep in mind about Europe, since you brought\n>it up. My Autobahn knowledge is admittedly second-hand, but I believe\n>the following to be true:\n\n>\n>1. Drivers are much better disciplined in Europe than they are here.\n\nTrue of Northern Europe, latin countries are something else.\n\n>2. The roads comprising the Autobahn are much better designed than\nKind of true. remember they were built by Adolf in the '30's.\n\n> they are here, and usually include animal fences. This makes them\nfar more predictable than most US highways.\n\nYes.\n\n>3. Not all of Europe is the Autobahn. Most places in Europe have\n\n"Autobahn" is the German word for freeway. Other countries have\ndifferent names for loose equivalents; autostrada, autoroute, motorway\netc.\n\n> speed limits that aren't out-of-line with what we used to have in\n>the US -- if my friends weren't lying to me they're typically not\nmuch higher than 120km/h.\n\nEurope did seem on the brink of a 130kmh limit. It hasn't passed as\nfar as I know. typical speeds in western Europe are much higher than\nthe US. Law enforcement is negligible in my experience (compared\nto the US) as there is no revenue enhancement motivation. The things\nyou really notice are the higher speed differentials, and the more\nprofessional attitude to driving. You just never see two cars\nrunning parallel at 55.1 mph oblivious to all around them.\n\n>\n>I strongly suspect you won't find a lot of Rabbit owners doing 120mph\n(nearly 200km/h) on the Autobahn, but I could be wrong. Some people\n\nYou're wrong. GTI's go this fast. Just kind of noisy, not the ideal\nautobahn car. A lot of times you see cars being driven with the drivers\nfoot on the floor. How do I know? -- when you're not making any ground\non the identical car in front of you!\n\n>have no respect for their own lives.\n\nIf something happens at 130-150 you're dead, but the same goes for much\nover 35. Driving at high speed forces you to concentrate. I feel much\nsafer driving 130+ on the autobahn than 60-80 in typical US traffic\nbecause most people seem to be awake. I've never seen any driver reading\na book on an autobahn, I see it all too often in the US.\n\nCraig\n\nIt just doesn't \*seem\* fast after 30 minutes or so of acclimation. everybody\ndrives that fast, no big deal.\n\nCraig\n\n>\n>>>You certainly haven't convinced me.\n\n>\n>>>Of course not. "Speeding-is-bad. Speeding-is-illegal. \n>>>I-will-not-speed. I-love-Big-Brother." You had your mind made up\n>>>already.\n\n>\n>If you think so you sure don't pay attention to my postings.\n\n>\n>jim frost\n>jimf@centerline.com\n\n\n',

'From: keith@cco.caltech.edu (Keith Allan Schneider)\nSubject: Re: <Political Atheists?\nOrganization: California Institute of Technology, Pasadena\nLines: 54\nNNTP-Posting-Host: punisher.caltech.edu\n\n(reference line trimmed)\n\nlivesey@solntze.wpd.sgi.com (Jon Livesey) writes:\n\n[...]\n\n>There is a good deal more confusion here. You started off with the \n>assertion that there was some "objective" morality, and as you admit\n>here, you finished up with a recursive definition. Murder is \n>"objectively" immoral, but exactly what is murder and what is not itself\n>requires an appeal to morality.\n\nYes.\n\n>Now you have switch targets a little, but only a little. Now you are\n>asking what is the "goal"? What do you mean by "goal?". Are you\n>suggesting that there is some "objective" "goal" out there somewhere,\n>and we form our morals to achieve it?\n\nWell, for example, the goal of "natural" morality is the survival and\npropagation of the species. Another example of a moral system is\npresented within the Declaration of Independence, which states that we\nshould be guaranteed life liberty and the pursuit of happiness. You see,\n>to have a moral system, we must define the purpose of the system. That is,\n>we shall be moral unto what end?\n\n>>Murder is certainly a violation of the golden rule. And, I thought I had\n>>defined murder as an intentional killing of a non-murderer, against his will.\n>>And you responded to this by asking whether or not the execution of an\n>>innocent person under our system of capital punishment was a murder or not.\n>>I fail to see what this has to do with anything. I never claimed that our\n>>system of morality was an objective one.\n>I thought that was your very first claim. That there was\n>some kind of "objective" morality, and that an example of that was\n>that murder is wrong. If you don't want to claim that any more,\n>that's fine.\n\nWell, murder violates the golden rule, which is certainly a pillar of most\nevery moral system. However, I am not assuming that our current system\nand the manner of its implementation are objectively moral. I think that\nit is a very good approximation, but we can't be perfect.\n\n>And by the way, you don't seem to understand the difference between\n>"arbitrary" and "objective". If Keith Schneider "defines" murder\n>to be this and the other, that's arbitrary. Jon Livesey may\n>still say "Well, according to my personal system of morality, all\n>killing of humans against their will is murder, and wrong, and what\n>the legal definition of murder may be in the USA, Kuwait, Saudi\n>Arabia, or the PRC may be matters not a whit to me".\n\nWell, "objective" would assume a system based on clear and fundamental\nconcepts, while "arbitrary" implies no clear line of reasoning.\n\nkeith\n',

'From: sasst11+@pitt.edu (Scott A Snowiss)\nSubject: IMAGINE\nOrganization: University of Pittsburgh\nLines: 16\n\nHello again netters,\n\tI finally received the information about Imagine for the PC. They are presently shipping Version 2.0 of the software and will release Version 3.0 in the first quarter of 1993 (or so they say). The upgrade from 2.0 to 3.0 is \$100.00. To purchase Imagine 2.0, it costs \$495.00 or if you are upgrading from another eligible (ca

ll them for info) modeler, it is only \$200.00 plus shipping & handling. It requires a PC with 4 Megs a Math Coprocessor, and Dos 5.0 or up and a Microsoft Mouse and SVGA card.\n\tThanks for all your replies about the product. I have received many contrasting replies, but once I scrounge the money together, I think I will take the plunge. 'From: sera@zuma.UUCP (Serdar Argic)\nSubject: Armenians exterminated 2.5 million Muslim people. Denying the obvious?\nReply-To: sera@zuma.UUCP (Serdar Argic)\nDistribution: world\nLines: 109\n\n\nIn article <1993Apr23.122146.23931@oucsace.cs.ohiou.edu> gassan@ouvaxa.cats.ohiou.edu writes:\n\n\n>After having read this group for some time, I am appalled at its lack of\n>scholarship, its fuzz

y-thinking, reliance on obsessed and obnoxious posters\n\nWell, these are Armenian and Jewish scholars, not me. Denying the obvious?\n\n\nSource: Hovannisian, Richard G.: Armenia on the Road to Independence, 1918.\nUniversity of California Press (Berkeley and Los Angeles), 1967, p. 13.\n\n"The addition of the Kars and Batum oblasts to the Empire increased the\n area of Transcaucasia to over 130,000 square miles. The estimated population\n of the entire region in 1886 was 4,700,000, of whom 940,000 (20 percent) were\n Armenian, 1,200,000 (25 percent) Georgian, and 2,220,000 (45 percent) Moslem.\n Of the latter group, 1,140,000 were Tatars. Paradoxically, barely one-third\n of Transcaucasia's Armenians lived in the Erevan guberniia, where the\n Christians constituted a majority in only three of the seven uezds. Erevan\n uezd, the administrative center of the province, had only 44,000 Armenians\n as compared to 68,000 Moslems. By the time of the Russian Census of 1897,\n however, the Armenians had established a scant majority, 53 percent, in the\n guberniia; it had risen by 1916 to 60 percent, or 670,000 of the 1,120,000\n inhabitants. This impressive change in the province's ethnic character\n notwithstanding, there was, on the eve of the creation of the Armenian\n Republic, a solid block of 370,000 Tartars who continued to dominate the\n southern districts, from the outskirts of Erevan to the border of Persia." \n (See also Map 1. Historic Armenia and Map 4. Administrative subdivisions of\n Transcaucasia).\n\nIn 1920, '\0' percent Turk. \n\n"We closed the roads and mountain passes that might serve as\n ways of escape for the Tartars and then proceeded in the work\n of extermination. Our troops surrounded village after village.\n Little resistance was offered. Our artillery knocked the huts\n into heaps of stone and dust and when the villages became untenable\n and inhabitants fled from them into fields, bullets and bayonets\n completed the work. Some of the Tartars escaped of course. They\n found refuge in the mountains or succeeded in crossing the border\n into Turkey. The rest were killed. And so it is that the whole\n length of the borderland of Russian Armenia from Nakhitchewan to\n Akhalkalaki from the hot plains of Ararat to the cold mountain\n plateau of the North were dotted with mute mournful ruins of\n Tartar villages. They are quiet now, those villages, except for\n howling of wolves and jackals that visit them to paw over the\n scattered bones of the dead." \n\n

Ohanus Appressian

an\n "Men Are Like That"\n

p. 202.\n\n\n "In Soviet Armenia today there no longer exists a single Turkish soul.\n It is in our power to tear away the veil of illusion that some of us\n create for ourselves. It certainly is possible to sever the artificial\n life-support system of an imagined 'ethnic purity' that some of us\n falsely trust as the only structure that can support their heart beats\n in this alien land." \n (Sahak Melkonian - 1920 - "Preserving the Armenian purity") \n\n\n

So that the\n Prophecy be\n Fulfilled\n \* \* \*\n\n In considering the Christian religion, and judging it\n according to its claims, it is important to look at its claims at\n fulfilling earlier Jewish prophecy. The scribe Matthew is perhaps\n the most eager to draw out what he thinks are prophetic answers in\n the career of Jesus of Nazareth. As you will see, Matthew\'s main\n strategy is to take various Old Testament passages, often not even\n about the promised Messiah, and apply them to the circumstances in\n the New Testament. We must also bear in mind the question of the\n authenticity of the accounts. Since the gospels were written at\n least 35 years after Jesus was executed, we do not know how much\n happened exactly as stated. But, for purposes of analysis, we\n will take particular claims at face value.\n\nImmanuel:\n\n We begin, of course, at the beginning.\n\n (Mt 1.21-22): "[Mary] will bear a son, and you,\n Joseph, will name him \'Jesus\' (which means G\'d is\n salvation), for he will save his people from their\n sins." All this happened to fulfil what the lord had\n spoken by a prophet:\n\n [Isaiah 7.1-16]: In the days of Ahaz (c. 750 BCE),\n king of Judah, Rezin of Syria and Pekah of Israel made\n war on Jerusalem (capitol of Judah), but could not\n quite conquer it. When the house of David (i.e. Ahaz\n and his court in Judah) were told of this, ...its\n heart and the heart of its people shook... And, the\n lord G\'d said to Isaiah, "go to meet with Ahaz..." \n ...And the lord spoke to Ahaz (through prophet Isaiah,\n naturally) saying, "Ask a sign of G\'d your lord. It\n can be as deep as Sheol or as high as heaven." But,\n Ahaz said, "I won\'t ask; I will not put the lord to a\n test." Then (Isaiah) said, "Hear then, O house of\n David. Is it not enough for you to weary men, that\n you must weary my god too? Therefore, the lord\n himself will give you a sign: Behold, a young woman\n is with child and will bear a son, and name him\n "Immanuel," which means, "G\'d is with us." He will\n

eat curds and honey when he knows how to refuse evil and choose good. For, before the child knows how to refuse evil and choose good, the land of the two kings you dread will have been deserted... Matthew homes in on just the sentence that is in italics. Further, he the Hebrew word "almah," (young woman), as specifically, "virgin." But, this is not a prophecy about the Messiah. It is not a prophecy about an event to happen 750 years later. It is not a prophecy about a virgin (bethulah) mother. In short, it not about Jesus. Matthew has made use of a verse out of context, and tries to make it fit the specific case of Mary. It should be noted that if we want to read the prophecy in a general manner, a very general one, it can be made to fit Mary. Mary, virgin or not, was indeed a young woman with child. Of course, the fit is shady and has problems. Jesus, while thought of by later Christians to be God walking among men, was never called by the name, Immanuel. If Christianity wished to claim this prophecy for Jesus, it becomes at best a cut-and-paste prophecy... a second class prophecy. Not too convincing.

Egypt: After Jesus's birth in Bethlehem, Matthew tells about a quick (and elsewhere unmentioned) excursion to Egypt, as if he wishes to liken Jesus to Moses. This was done to escape an alleged infanticidal rampage of the king, Herod. [Mt 2.15] ...and remained there until the death of Herod. This was to fulfil what the lord had spoken: "Out of Egypt I have called my son." What the lord really said was this. [Hosea 11.1] When Israel was a child, I loved him. And, out of Egypt I called my son. The more I called them (my people), the more they went from me; they kept sacrificing to the Ba'als, and kept burning incense to idols.

Matthew conveniently omits the rest of Hosea's oracle. But, it was indeed Israel that, once called out of Egypt, wanted to return. This is history. Jesus is certainly not being spoken of here. And, if we are to draw some kind of parallel here, we wind up with a Jesus that flees and resists God. Again, this prophecy is just not as convincing as Matthew probably had hoped.

Rachel Weeps: While Jesus is off vacationing in Egypt, Matthew says that King Herod sought to kill him, and thus ordered the executions of all young male children. Matthew then writes, [Mt 2.17-18] By this, that which was spoken by the prophet Jeremiah was fulfilled: "A voice was heard in Ramah, wailing and loud lamentation-- Rachel weeping for her children; she refused to be consoled, because they were no more." The reference is to a passage in Jeremiah 31.15, referring to the carrying off of Israel into exile by Sargon (of Assyria) in 722 BCE. Rachel, the ancestor of the major tribes of Israel, Ephraim, and Manasseh, is said to weep for her descendants who are "no more." It is metaphorical, of course, since Rachel lived and died before the Hebrews were even in the Egyptian exile. It is interesting to note that it was Leah, not Rachel, who was the ancestor of the Judeans (the land where Jesus and Bethlehem were). If anyone should do weeping for her "children," it is Leah. The only connexion that Rachel has with Bethlehem is that the legends have it that she was buried north of the city, "on the way to Ephrath, (Bethlehem)." As for Herod and his infanticide, it is rather unlikely that such an event actually occurred. One never knows, but the event is not mentioned or alluded to anywhere else in the Bible, nor is it mentioned in any of the secular records of the time. Herod was particularly disliked in his reign, and many far less evil deeds of Herod were carefully recorded. This might be a prime example of how events were added to Jesus's life to enhance the message of the church's gospel. Because of the whole story's similarity to the tale of the infant Moses in Egypt, it is highly likely

y that it is a device set up by Matthew to add prophetic, yet artificial, approval of Jesus. It is not surprising that Matthew conveniently neglects to mention the rest of the Jeremiah quote. The "children" the prophet speaks of are not dead, but exiled in the Assyrian Empire. God comforts the weeping Rachel, saying that the children will be returned-- he will gather them back together. Of course, this would not suit Matthew's purpose, as the children he speaks of are dead for good. Again, the "prophecy" Matthew sets up is not even that, and to anyone who bothers to check it out, is not too convincing.

The Nazarene: We do not even have to go to the next chapter to find another Matthean prophecy. After leaving Egypt, Joseph & wife take the infant Jesus to live in the city of Nazareth, [Mt 2.23] ...that what was spoken of by the prophets might be fulfilled, "He shall be called a Nazarene."

First thing we notice is that Matthew does not mention the name of the prophet(s) this time. Second, we have to ask who "He" is. There are no Messianic prophecies speaking of a Nazarene. Worse, there are no prophecies, period, mentioning a Nazarene. Still worse, there are no Nazarenes mentioned in the Old Testament at all. In the book of Judges, an angel tells Samson's mother that she will, [Judges 13.5] "...conceive and bear a son. No razor shall touch his head, for he will be a Nazirite to his god from the day of his birth. He will deliver Israel from the hands of the Philistines."

This is of course not a prophecy of Jesus, or the messiah of God. But, it is the best that can be found. Obviously, Matthew has begun to go overboard in cut-and-paste prophecies, in that he is simply making them up now.

Bearing our Diseases: Jesus next goes around healing people of physical illnesses and disabilities. [Mt 8.17] This was to fulfil what was spoken by the prophet Isaiah, "He took our infirmities and bore our diseases."

As expected, the verse quoted in Isaiah is quoted out of context, and a few words are skewed to fit the Christian scheme. We have, [Is 53.4] Surely he, [the suffering servant], has borne our sickness, and carried our pains.

From a reading of the surrounding passages in Isaiah, we know that the prophet is speaking in present tense of the collective nation of Israel, Jehovah's chosen servant and people. He speaks to the Israelites suffering in exile, in the voice of the gentile nations that look upon it. This image is deeply ingrained in Jewish identity --an image of a chastised, yet cherished, Israel as the instrument of the nations' salvation by God.

The verses speak of Israel taking on the sicknesses which are the literal and metaphorical manifestations of guilt and discipline. They do not speak of a "servant" going around and healing people. Notice that the servant in Isaiah takes on the sicknesses and pains of the nations (and individual Jews). Jesus, as we all know, did not take the diseases onto himself. The verses here in Isaiah are not a prophecy of something to come, but rather something that had already happened. While it is believed that Jesus took on the eternal punishment of hell, he did not bear the illnesses he healed. So, while someone might want to say that, figuratively, Jesus reenacted the deeds of Israel in his spiritual atonement, he has to admit that Matthew's parallel misses where he intended it to have its effect.

Silent Messiah: Upon healing multitudes of commoners, it is said that Jesus ordered them to keep quiet, presumably so that he wouldn't arouse the attention of the local rulers. [Mt 12.15-21] This was to fulfill what was spoken by the prophet Isaiah. "Behold my servant whom I have chosen, my beloved, with whom my soul is pleased. I will put my spirit on him, and he will announce justice to the Gentiles. He will not wrangle or cry aloud, nor will anyone hear

his voice in the streets. He will not break a bruised reed or quench a smoldering wick until he brings justice to victory, and the gentiles will hope in his name." The Isaiah passage quoted reads, [Is 42.1-4] Behold my servant whom I uphold, my chosen, in whom my soul delights. I have put my spirit on him, and he will bring forth justice to the nations. We will not cry or lift up his voice, or make it heard in the street. He will not break a bruised reed, or quench a smoldering wick. He will faithfully bring forth justice. He will not fail (burn dimly) or be discouraged (bruised) until he has established justice in the earth. And the coastlands await his law. You see, Matthew has conveniently left out part of the passage, because it does not suit the dealings of Jesus. Christians could never think of Jesus failing, never would the "light" of mankind burn dimly. But, the servant nation of Israel will indeed come to an end when its job is done. When the gentiles come to embrace G'd there will no longer be a chosen people, but rather all will be the children of G'd. Also, the ending phrase has been changed from the Judaic "...the coastlands await his law." to the Christologic, "the Gentiles will hope in his name." While the original proclaims the Torah law of Jehovah, the other rewrites it to fit its strange doctrine of "believing in the name." If one has any doubt the servant referred to is not Jesus, one has only to read the whole chapter, Isaiah 42, and hear about the beloved but blind and imperfect servant, "a people robbed and plundered..." So, we see that when Matthew's attempt at "prophecy" is examined, it crumbles. Three Days and Three Nights: Now we come upon a prophecy supposedly uttered by the very mouth of the god Jesus himself. He speaks of his crucifixion and resurrection. [Mt 12.40] For as Jonah was in the belly of the whale for three days and three nights, so will the Son of Man be in the heart of the earth three days and three nights. Before any further discussion can occur, it is necessary to know how the Jews understood days. As far as day names went, each was 24 hours long, lasting from sunset 6pm to the following sunset 6pm. What was referred to as a "day" was the period of light from 6am to the ending sunset at 6pm. Thus, according to our time scale, a sabbath day began at 6pm Friday evening, and lasted until 6pm Saturday evening. This is why the Jews celebrate their sabbath on the daylight portion of Saturdays, instead of Sundays. (It seems like a real miracle that Christians didn't forget that Saturday was indeed the seventh and last day of the week!) Thus, when days and nights are referred to together, 12 hour daylight portions and 12 hour night periods are being spoken of. Thus, Jesus says that he will be in the grave, or in hell, or otherwise resurrected for three days and three nights. As the good book tells us, Jesus was crucified on the "ninth hour," which is 3pm, Friday afternoon. He then was put into the grave sometime after that. Then, Jesus left the grave, "rose," before dawn of what we call Sunday (The dawn after the sabbath was over). What this means is that Jesus was, using our time for clarity, in the grave from 6pm Friday night to some time before 6am Sunday morning. We could also add a little time before 6pm Friday, since the bible is not specific here. What this means using Jewish time is that he was in the grave for one day, two nights, and possibly a couple of hours of one day. Certainly this is a problem for Jesus prediction. There is absolutely no way we are even able to have his death involve three days and three nights --even using modern time measurements. We then are led to suspect that this error is another one of Matthew's little mistakes, and that the gospel writer put false words into his god's mouth. And no matter who made the prediction, it is more than u

nconvincing... it is counter-convincing.\n\nHearing &\nUnderstanding:\n\nJesus took on a habit of speaking to his vast audiences in\nparables-- stories in which a deeper meaning could be found, if\nyou were already one of the elect, those chosen to understand the\nmessage of Jesus. He reasons that those who can understand the\nparables are the ones he wants. If the people cannot understand\nthem, there is no need to bother with them, since they will not\naccept the "plain" message any better. Matthew says,\n\n [Mt 13.14-16] With them [the audience] indeed in\n fulfilled the prophecy of Isaiah which says, \n\n "You will indeed hear but never understand; and you\n will indeed see, but never perceive. Because this\n people's heart has grown dull, their ears are heavy of\n hearing, and they have shut their eyes so that they\n would not perceive with them, nor with their ears, and\n understand with their heart, and turn for me to heal\n them." \n\nThe original Isaiah passages are part of his earlier works, his\ncall to the ministry. This is in 740 BCE, when Israel is\nflourishing, right before it falls under the authority of Assyria. \nIsaiah sees the good times ending, and also a vision from G'd,\ncalling him to bring reform to Israel and Judah.\n\n [Is 6.9-13] And G'd said, "Go, and say to this\n people, 'Hear and hear, but do not understand; see and\n see, but do not perceive.' Make the heart of this\n people fat, make their ears heavy, and shut their\n eyes, so they will not see with their eyes, or hear\n with their ears, and understand with their hearts, and\n turn and be healed." Then Isaiah said, "How long,\n lord?" And he said, "Until the cities lie waste\n without inhabitant, and houses without men, and the\n land is utterly desolate, and the G'ds take men far\n away, and forsaken places are many in the land. And\n though a tenth will remain in it, it will be burned\n again, like a terebinth or an oak whose stump still\n stands when the tree is felled." The holy seed is its\n stump.\n\nHere we see that it is really G'd who causes the people of Israel\nto stop listening to the prophet's warnings, but reaffirms the\npromise made to Solomon's (and David's) seed/lineage. If you read\nthe rest of Isaiah, you find that this is done to fulfil the plan\nof G'd to use Israel as a servant, a light to the nations. (Look\nat Isaiah 42.18-25, 48.20, 49.3)\n\n We see that Matthew has cut-and-pasted just a little portion\nof Isaiah's verse, to suit his own gospel needs. More than that,\nhe has altered the words, to make it fit the people who did\n't understand Jesus's stories. And, as we see, Isaiah's verses are\nnot prophecies, but rather commands from G'd to him, in the\npresent. Once again, Matthew's prophecy falls flat on its face. \n\n Matthew tries again to make Jesus's parables look like they\nhave the prophetic approval.\n\n [Mt 13.35] ...he said nothing to them without a\n parable. This was to fulfil what was spoken of by the\n prophet, "I will open my mouth to the\n in parables. I\n will utter that which has been hidden since the\n foundation of the world." \n\nMatthew really botches up here. He attempts to quote not from a\nprophet, but from the Psalms.\n\n [Ps 78.2-4] I will open my mouth in parable. I will\n utter dark sayings of old, things that we all have\n heard and known, things that our fathers have told us. \n\n We will not hide them from their children, but tell to\n the coming generation the glorious deeds of the\n lord...\n\nAs was pointed out, the verses in the Psalms do not really come\nfrom a prophet. You might also want to know that earlier copies\nof Matthew's gospel even inserted Isaiah's name as this prophet. \nApparently, later scribes caught the error and tried to cover some\nof it up.\n\n Perhaps the most significant part of this is that, once\nagain, Matthew has altered the Old Testament Scriptures. As Jesus\n

as said earlier, he speaks in parables so that some will not understand them. The parables in the Psalms are not to be hidden. Further, they speak of things "known, that our fathers have told us." Jesus deals with things "hidden since the foundation of the world." Indeed Jesus dealt in a lot of secrecy and confusion. This is in direct opposition to the parables in the Psalms. No wonder Matthew had to rewrite them! And still once again, Matthew's artificial prophecies fall flat on their face. But, Christians rarely look at this. Matthew's prophecies aren't the only things about Christianity that are beginning to look bad.

**Excuses of Little Faith:**

In Mt. 17.14-21, we see that the disciples are able to go around casting out demons, except in one case. Not knowing what epilepsy was, the people thought those with the disease were possessed with demons. It is no wonder that the disciples were unable to "dispossess" the epileptic. But, Jesus, perhaps no more enlightened than they, is reported to have rebuked them, saying they didn't have enough faith. This seems strange. Why was this demon special? It seems that either a true believer has faith or he does not. Apparently, enough faith will allow someone to move mountains. Of course, you will find no one, these days that can move real mountains. No one parts seas. The only miracles the Charismatics can speak of are those rumoured to happen on trips to Mexico or some faraway place. Major miracles are making some old woman's arthritis feel better on Sunday morning T.V.

And the gods, including Jesus, are always shrouded in ancient lore and writings, protected from the skeptics in their sacred pasts. They are either dead, sleeping, or hiding in heaven, with people rumouring about their imminent return and their great miracles of days long gone. Yet, life goes on.

Tales of mystics, stories of miracles-- all in a distant time nor a distant place. Gods used to reveal themselves to men in the old days, Jehovah too. But, now they are silent. All the theologians give various excuses as to why we don't get to see God any more.

We're too lazy; we're not zealous enough; we're sinful; it's just his "plan"; we put too many of our own demands on God's appearance; if we had the right faith, if we were willing to meet God on his terms...

Yet, even the most pious of men have not seen God. You, dear reader, have not seen God. Not literally, you know that to be true. (I know that's presumptuous and bold. But, searching your heart, you know what I mean.) All that we've seen religions do is make people feel good and content about not seeing God. They say our little faith does not merit us to see God. Sometimes, they say, "See the love in these people you worship with... see the lives of people change... that is seeing God." Thus people get lulled to sleep, satisfied with turning God into the everyday sights. But, that is not seeing God as I am speaking of... it is not seeing God the way people used to see.

What we see in the world that is good, is the compassion of human hearts, the love given and taken by men and women, the forgiveness practised by Christian & Atheist alike, beauty created by the mind of man. These are the things that are done; these are what we see. But, it is said this is so only because everybody has little faith.

**Jesus Rides on an Ass:**

Shortly after accepting the role of the Jewish messiah king, Jesus requests a donkey be brought in for him to ride into Jerusalem.

[Mt 21.5] This took place to fulfil what was spoken by the prophet, saying, Tell the daughter of Zion, "Behold, your king is coming to you, humble, mounted on an ass, and on a colt."

Of course, the passage quoted from Zechariah 9.9 reads a little differently.

Lo, your king comes to you; he is triumphant and victorious, humble, and riding on an ass, on a colt... he will come

and peace to the nations.\n\nThere isn't all that much difference here, except that Zechariah\nonly involves one animal --an ass-colt-- while Matthew reads the\npoetic wording slightly differently. Thus, he has Jesus call for\nboth a colt and an adult ass. From Matthew's version, we get a\ncomical picture of the divine Christ sweating it to straddle two\ndonkeys. This could inevitably lead to a theological,\nproctological dilemma! We find that in the account written\nearlier by St. Mark, only the colt was called for and brought to\nJesus. This indeed fits the verses of Zechariah properly, and\nshows us that in Matthew attempt to use prophetic verses, he has\nbungled. Now, excluding many respectable Christians I have met, I\nhave noticed that while Christ is thought to have ridden on asses,\nthe situation is often reversed nowadays...\n\n Then, entering the Jerusalem temple, the priests were\nangered at people and youngsters calling Jesus the messiah. But,\nJesus replied as we might expect Matthew to have done,\n\n [Mt 21.16] Haven't you read? `Out of the mouth of\nbabes and sucklings thou has brought perfect praise.`\n\nIt is more likely that Matthew made this response up since Jesus\nwas never one to point out such little "prophetic" things AND\nsince, as we might expect, the quote is in error, which seems to\nfit Matthew's track record quite well. We might ask Jesus or\nMatthew, "Haven't you read?" for the source reads,\n\n [Psalms 8.1-2] O YahWeH our lord, how majestic is\nyour name in the whole world! You, whose glory is\nchanted above the heavens by babes and infants, you\nhave founded a bulwark against your foes to still the\nenemy and the avenger.\n\nThe passages hardly need comment. There is no "perfect praise"\nspeken of in the psalm, and what praise is there is given to G'd,\nnot his messiah king, and not Jesus. As mentioned, it seems to be\njust one more case of Matthew's pen making up convenient prophetic\nscripture.\n\nYHVH said to my lord...:\n\n Jesus is said to have asked from whom the promised Jewish\nmessiah-king is to be descended. The Jews agree-- it is king\nDavid. But, then Jesus counters by quoting Psalms 110,\n\n "The LORD said to my Lord, sit at my right hand, until\nI put your enemies under your feet."\n\nTaken at face value, Jesus is denying the necessity of Davidic\ndescent. One assumes he is in opposition to their answer. Of\ncourse, the Christian answer is that he agrees, but is trying to\nmake some hidden point, to reveal some mystery about the divine\nnature of the messiah-king. It's tempting to believe this, if one\nis a Christian and not interested in matters of investigation.\n\nBut, there are problems.\n\n In Jesus's time, the psalm was thought to be about the\nmessiah. And, it is easy to see why David might refer to the\nmessiah as his superior. We need only look at the scriptures\nabout the messiah to see that he is expected to be a great king,\nbringing the Jews to times even better than those under David's\nrule. Of course, the Jews listening had no good answer, and the\npassage could indeed refer to a divine messiah, such as the\nChristians worship. The problem lies in the meaning of this\npsalm, an error that apparently several Jews of Jesus's time had\nalso made. One must remember that there were various factions\namong the Jews, often as a result of different expectations of the\nmessiah-king. Jesus was apparently one of these adventists, like\nhis audience, who thought the messiah's advent was imminent, and\nwho interpreted Psalms 110, among others, as being messianic.\n\nWhat is the problem, then? Psalm 110 literally reads,\n\n YHVH's utterance to my lord:\n"Sit at my right hand, until I make your enemies your\nfootstool."\n\n YHVH sends forth your mighty scepter from Zion. Rule\nin the midst of your foes! Your people will offer\nthemselves freely on the day you lead your host on the\nholy mountains.\n\n "You are a priest of the order of Melchizedek\nforever."

The word "lord" is often mistakenly capitalised by Christian bibles to denote divinity in this lord. But, in the Hebrew, the word is "adoni," and no capitalisation exists. Adoni simply means "lord," a generic term as we would use it. It is used often in the scriptures to refer to kings and to G'd. It is merely an address of respect.

There is nothing in the text itself to imply that the word refers either to divinity or to the messiah-king. That this is supposed to be written by David is not certain. The title of the psalm translates to either "a psalm of David," or "a psalm about David." It seems fitting to assume it to be written by a court poet, about David's covenant and endorsement from G'd. If the psalm had been written by David, it is unlikely that he would be talking about the messiah. The idea of a perfect king, descended from David, was not present in David's age. We have extensive tales of David's doings and sayings-- none of which include any praises of a messiah.

Many of the psalms show evidence of being written long after David was dead, in times of the exile when G'd had put his show of favour for David's kingdom on hold.

The description in the psalm fits David very well. David was promised by G'd a rise to power, victory over his enemies, unsuccessful judgement among the nations he conquered. He achieved the priesthood common to Melchizedek in being a righteous king, enabled to bless the people. It all fits.

We do not have to blame this problem on Matthew alone, though. Here, there is not artificial prophecy alluded to, though his use of the scripture is rather questionable. Still, this event is common to the other gospels too. So, we let Matthew off a little more easily this time. It is interesting to note, though, how Matthew dresses up the event. The earlier gospel of Mark tells the tale with Jesus simply speaking to a crowd. Matthew has the Pharisees, who became the religious competition of an infant Christianity, be the target of Jesus's question. As we might expect, Matthew writes that the event ends up by embarrassing the Pharisees. Such power is the pen.

Moses & Jesus, Had it Together All Along... We leave the gospel story of Matthew momentarily to see a pseudo-prophecy in John's gospel. The gospel story of John deserves special treatment, because it seems to be so far removed from the real events of Jesus's career as told by even Matthew.

But, for the moment, we will just look at one verse. The early church leaders founded a religion on the Jewish hopes of a messiah king, and on an artificial extension of the original promises made by G'd. When constructing the history of Abraham, Moses wrote of a promise of land and nationhood to the Jewish people. While this was accomplished eventually, under the rule of king David, the Christians who came along later decided that they would claim the fulfillment of the promise. But, to do so, they expanded on the promise, preaching about a heavenly kingdom.

[John 8.56] (J.C. speaking) Your father, Abraham, rejoiced to see My day. He saw it and was glad.

It would be nice to tie in approval for Jesus from Abraham, but, Abraham knew nothing of Jesus or a messiah, or anything Christian. I have tried, and failed to find any event in the Old Testament which corresponds to John's little prophecy. It is par for the course to see St. John making up Old Testament backings, just like his forerunner Matthew. Many Christians know that their faith has many of its foundations in such fraud, and it is surprising they still cling to it.

The Potter's Field:

We are told that Jesus was betrayed while in Jerusalem by none of his followers, Judas Iscariot. Matthew writes,

[Mt 27.5-10] And throwing down the pieces of silver in the temple, [Judas] departed... But, the chief priests, taking the silver, said, "It isn't lawful for us to put it in the treasury, since it is blood money." So they... bought a potter's

field with it to\n bury strangers in... Then was fulfilled what was\n spoken by the prophet Jeremiah,\n\n "And they took the thirty pieces of silver, the price\n of him on whom a price had been set by some of the\n sons of Israel, and they gave them for the potter's\n field, as the lord directed me." \n\n This prophecy is an utterly gross bastardisation of Old Testament\n Scripture. First, Matthew has made a mistake regarding the name\n of the prophet. It is Zechariah who utters the verses which\n Matthew makes use of. \n\n [Zech. 11.12-13] ...And they weighed out my wages,\n thirty shekels of silver. Then YHWH said to me, "Cast\n them to the treasury," --the lordly price at which I\n was paid off by them. So I took the thirty shekels of\n silver and cast them into the treasury in the house of\n YHWH. \n\n First of all, the verses of Zechariah do not deal with a betrayer\n of the messiah, or of G'd. The deal with a shepherd, most likely\n a priest, chosen to serve a function of presiding over the people\n shortly before G'd would send Judah and Israel into conflict with\n one another. The word, "treasury," had been replaced by the King\n James Scholars with "to the potter," precisely because this made\n Matthew's quote fit better. But, this is a blatant error. The\n correct translation of the Hebrew is indeed "treasury," which\n also\n makes perfect sense in Zechariah's context, whereas "potter's\n field" is totally unrelated. Whether the mistranslation was\n intentional or not seems to be beyond speculation. However, given\n Matthew's track record, one finds it hard to resist the notion of\n intentional dishonesty. \n\n Of course, Matthew would have ample reason for altering the\n text. The thirty pieces of silver match Judas's situation, and if\n as most Christians seem to be, the reader is willing to disregard\n the contextual incongruity, Matthew might have another prophecy to\n toss around. However, the correct translation of Zechariah\n directly contradicts the situation with Judas and the high\n priests. The high priests would not put the money in the\n treasury. The worthless shepherd of Zechariah does exactly the\n opposite! Of course, to the average Thursday-Night Bible student,\n the "prophecy" as presented by Matthew would be taken at New\n Testament face value. To those, Matthew's work is convincing\n enough. \n\n Wine, Vinegar,\n & Casting Lots: \n\n Then, Jesus is led away to be crucified. \n\n [Mt 27.34-35] ...they gave him vinegar to drink,\n mingled with gall; but when he tasted it, he would not\n drink it. And, when they had crucified him, they\n divided his garments among them by casting lots: that\n it might be fulfilled what was spoken by the prophet,\n\n "They parted my garments among them, and upon my\n vesture did they cast lots." \n\n First of all, the vinegar offered to Jesus is actually common sour\n wine, of the type that Roman soldiers drank regularly. We find\n that right before Jesus dies, the soldiers themselves give him\n some to drink --not polluted with gall. \n\n [Jn 19.28-30] Jesus... said, "I thirst." A bowl of\n vinegar stood there, so they put a sponge full of the\n vinegar on hyssop and held it to his mouth. When he\n had received the vinegar, he said, "It is finished;" \n\n But, Matthew seems to be drawing on, not a passage from the\n prophets, but one from the Psalms. \n\n [Ps 69.20-28] I looked for pity, but there was none;\n and for comforters, but I found none. They gave me\n poison for food (lit. they put gall in my meat), and\n for my thirst, they gave me vinegar to drink... Add\n to them punishment upon punishment, may they have no\n acquittal from thee. Let them be blotted out of the\n Book of the Living. \n\n Of course, the sour wine offered to Jesus is done at his request\n of drink. This does indeed seem to be a show of pity. The psalm\n quoted is about David and his political and military enemies. It\n is not about the messiah or Jesus. It is then not surprising th

at\newe run into further problem when we see that the "Jesus" in the\npsalm asks G\ 'd for the damnation of the "crucifiers," whereas the\nJesus of the gospel says,\n\n [Lk 23.34] Jesus said, "Father, forgive them, the\n d on\ 't know what they do!"\n\nFurther, Matthew misses with his attempt to create prophecy by\nhaving gall (a bitter substance) put into Jesus\ 's drink, not his\nmeat, as the psalm stipulates.\n\n With the "prophecy" of the vinegar faulty, we naturally\nask, "What of the casting of lots?" This brings up the 22nd\nPsalm, which deserves discussion all by itself. Suffice it now to\nsay that the fact that Jesus\ 's clothes were divided as told is no\ngreat thing. It turns out that this happened often to any felon\nin those days. As we will soon see, it is perhaps the least\nerroneous passage of the psalm when applied to Jesus. It does\nindeed bring up the interesting question as to the quality of\nJesus\ 's clothes. For a man so removed from worldly possessions,\nhis ownership of clothes worthy of casting lots raises some\nsuspicions.\n\nThe 22nd Psalm:\n\n This psalm is attributed to David, as a lament of his\ncondition under the attack of his enemies. It becomes a song of\npraise to YHWH and of hope. Taken out of context, parts of it\nseem to fit the plight of Jesus at the crucifixion quite well. We\nwill examine the primary passages.\n\n Verse 1-2: My god, my god! why have you forsaken me?! \n Why are you so far from helping me, far from the words\n of my groaning? Oh, my god, I cry by day, but you\n don\ 't answer, and by night, but find no rest.\n\n Jesus is said to have cried the first sentence while on the cross. \nThis suggests that the whole psalm is really about Jesus, rather\nthan king David. Of course, the rest of the first stanza does not\nfit as nicely to Jesus or his execution. Jesus is not pictured as\ncomplaining about the whole ordeal, he is supposed to be like "the\nlamb led mute before its shearers." Indeed, Jesus does\n't do much\ngroaning, even when on the cross. He certainly does not cry by\nboth day and night on the cross.\n\n 6-8: But, I am a worm, and no man-- scorned by men... \n All who see me mock at me. They make faces and wag\n their heads; "He committed his cause to YHWH. So let\n him deliver him... for he delights in him."\n\nThis seems to fit Jesus\ 's execution pretty well, with the\nexception of the Holy messiah being called a worm.\n\n 12-13: Many bulls encompass me... they open their\n mouths widely at me like a ravening and roaring lion.\n\n 16-18: Yea, dogs are round about me, a company of\n evildoers encircle me, they have pierced my hands and\n feet. I can see all my bones... They divide my\n garments among them, and cast lots for my raiment.\n\n 19-21: But you, YHWH, be not far away! ...Deliver my\n soul from the sword, my life from the power of the\n dog! Save me from the mouth of the lion, and my\n afflicted soul from the horns of the wild bull!\n\nIt would seem quite convincing, and I\ 'm sure the early Christian\nfathers who wrote of this prophecy thought so too. Unfortunately,\nthis prophecy has a fatal flaw. The words "have pierced" really\ndo not exist in the psalm. The correct Hebrew translation is,\n\n 16: Yea, dogs are round about me, a company of\n evildoers encircle me, like the lion, they are at my\n hands and feet...\n\nIn Hebrew the phrase "like the lion" and a very rare verb form\nwhich can mean "pierced" differ by one phonetic character. The\nword in the Hebrew text is literally, "like the lion" (ka\ 'ari),\nwhich makes sense in the context, and even further fits the animal\nimagery employed by the psalm writer. It is convenient that\nwould urge a Christian to change the word to "ka\ 'aru." But, to\nadd the needed (yet artificial) weight to the "prophecy" this is\njust what the Christian translators have chosen to do. While the\nincorrect translation does not eliminate the psalm from referring to\nJesus, its absence does not say much

h for the honesty of the translators. Apart from the erroneous verse 16, the psalm does not lend itself to Jesus so easily. Verse 20 speaks of the sufferer being saved from a sword rather than a cross. This naturally fits the psalm's true subject, king David. As a side note, we now know that crucifixions did not pierce the hands, the palms, but rather the forearms. This doesn't say much in favour of the traditional thought of a resurrected Jesus showing his disciples the scars on his palms. But then, facts aren't bound by our religious beliefs.

Matthew escapes culpability this time, as he does not attempt to draw many direct links between this psalm and his lord Jesus. But the psalm, like many others, was on the minds of all the gospel writers when they compiled the stories and interpretations of Jesus's life and death. How much these scriptures may have contributed to what actually got written down is a question that has serious repercussions for Christian theology. It is easy to see, for those who are not faithful fundamentalists, how some of the events in the New Testament might have been "enhanced" by scribes such as the eager Matthew. But, it does less to speculate than to simply investigate scriptural matters and prophetic claims. So far, this has not said good things for St. Matthew.

The reference to the piercing looks a lot like Jesus's crucifixion. John's gospel recount, written about 70 years after the fact, tells us at Jesus's execution, [Jn 19.34,37] But one of the soldiers pierced his side with a spear, and out came blood and water... these things took place that Scripture be fulfilled... "The will look on him whom they've pierced." Of course, this is built on a passage taken blatantly out of context. Prophet Zechariah tells us how much of the nation of Israel will split off from Jerusalem and Judah and go to war with them. [Zc 12.7-10] And YHWH will give victory to Judah... And on that day, I will seek to destroy the nations that come against Jerusalem (in Judah). And I will pour a spirit of compassion and supplication... on Jerusalem so that when they look on him who they have pierced, they will mourn, and weep bitterly over him like you weep over a firstborn child.

John's attempt to make up prophecy is perhaps weaker than Matthew's attempts. Matthew, at least, usually extends more than just one passage. John's errors are grossly obvious and blatant here. It does not speak well for any of the gospel writers, as it helps to show how the prophetic aspects of their religion were founded.

Reckoned with Transgressors: After his arrest, Jesus is quickly executed for claiming the Jewish kingship, messiahship. According to one version of the gospel tale, Jesus gets executed along with two thieves. [Mk 15.27] And with him they crucified two robbers, one on his right, one on his left. And so the scripture was fulfilled which says, "He was reckoned with the transgressors."

Here, Mark is trying to link Jesus to a passage in Isaiah 53, about the servant nation of Israel. The passage is not about the messiah, for if one reads the whole chapter of Isaiah 53, and its surrounding chapters, one sees that the servant is a nation. The verses are also about what this servant has gone through in the past, not a prediction of what is to come, in any event. The servant is thought of as a criminal. This also happens to fit the description of Jesus. Had the passage really been about the messiah, it still is not at all clear why executing Jesus between two thieves would fulfill the "prophecy" in Isaiah. Jesus would more fittingly fulfill it with his whole ministry. He was considered a blasphemer and troublemaker all throughout his career. Locking onto a single event is a rather poor way to steal prophecy, at least in this case, as we see that Mark could have had made a better analogy with general comparisons.

Mark goes on to tell us how "those who were crucified with [Jesus] also reviled him." [15.32] This is to be expected from a couple of robbers. Of course in his later recount, St. Luke decides to change some things. Luke tells us, [Lk 23.39-43] And one of the criminals who was hanged with him railed, "Aren't you the messiah?! Save yourself, and us!" This certainly fits with Mark's recount, which tells how the people who crucified Jesus said, "Save yourself!" and that the robbers did the same. But then Luke goes on, But the other [criminal] rebuked [the first] saying, "Don't you fear God, since you are under the same sentence of condemnation? And we, indeed justly so, for we are receiving the due reward for our deeds. But, this man has done nothing wrong. And he said, "Jesus, remember me when you come in your kingdom." And Jesus answered, "Verily I say to you, today you will be with me in paradise." Now, this little dialogue seems highly contrived. It stretches the imagination a bit to see this picture of one ruffian rebuking his fellow criminal with such eloquent speech. We have a rather strange picture of a criminal lamenting over the goodness of his punishment and the justness of his suffering. Such a man, apparently noble and of principle, doesn't seem likely to have been a robber. We wonder at the amount of theatrics created by Luke. Of course, Luke's recount also disagrees with Mark's. Luke has only one criminal revile Jesus, not both. It is easy enough to discount the discrepancy because the account was made up, but those who wish to believe it is all part of the error free words of God do not have this avenue open. This is yet another example of a writer trying to take an Old Testament passage and expand it and reinterpret it to suit his theology. In this case, the embroidery creates some embarrassing problems, as we have seen.

The End of the World--

Mt. 24:

Now comes perhaps one of the most extraordinary and embarrassing passages in the New Testament. It is found in all three of the synoptic gospel stories, and casts some of the most unfavourable doubt on the whole theory of Christianity. Jesus mentions the destruction of the Jewish temples and buildings, and his disciples ask him about this, and about the end of the world which he has been warning about.

The disciples: Tell us, when will this [the temple's destruction] be, and what will be the sign of your coming, and of the close of the age?

Jesus: Take care that no one leads you astray, for many will come in my name, saying, "I am the christ." ...you will hear of wars and rumours of wars... for this must take place, but the end is not yet. For, nation will rise against nation... all this is but the beginning of the birthpangs. They will deliver you up... put you to death, and false prophets will arise and lead many astray. ...But he who endures to the end will be saved. This gospel will be preached throughout the whole world, as a testimony to the nations, and then the end will come. So, when you see the desolation spoken of by the prophet Daniel, ...let those who are in Judea flee to the mountains. Immediately after the tribulation of those days, the sun will be darkened... the stars will fall from heaven... then will appear the sign of the Son of Man in heaven, and all the tribes of the earth will mourn, and see the Son of Man coming... and he will send out his angels... and gather his elect. Learn the lesson of the fig tree: as soon as its branch becomes tender and puts forth leaves, you know that summer is near. So also, when you see all these things, you will know that He is near, at the very gate. Truly I say to you, this generation will not pass away until all these things take place.

But, of the day and hour, no one knows; not the angels, not the Son, but only the Father... Therefore, you also must be ready, for the Son of Man is coming at an hour you do not expect.

From this, it is clear that Jesus thought the world would end within the lifetimes of at least some of his disciples. He tells them that although he doesn't know the exact day or hour, that it will come, and thus they must be ready. Theologians have wet their pants in panic to find some way out of this Holy Error. But, unfortunately, Jesus made himself too explicit. He told his disciples that their generation would still be around at the End, and that they in particular should prepare for it, prepare to be swept away.

There have been some who resorted to removing the inerrant nature of the Bible, and said that the phrase, "this generation shall not pass away..." really means "this race of people will not pass away..." Of course, the word for generation is used many times to refer to exactly that, the generation of the disciples. It is an interesting notion that when God decided to learn Greek, he didn't learn it well enough to make himself clear. But, it is quite obvious from the rest of the dialogue that the disciples (at least some of them) are supposed to live to the End of the World. The charge of mistranslation is completely blown away by looking at the Apostles' responses. It becomes abundantly clear from Rev. 2.7, 1 Peter 4.7, 1 John 2.18, and Rev. 22.20, that Jesus meant exactly what he said. The End was very near.

For 2,000 years, Christians have rationalised this 24th chapter of Matthew, or ignored its meaning altogether. For 2,000 years, they have waited for their executed leader to come back, hearing of wars, and rumours of wars, sure that He is coming soon. Surely He must be. All we must do is wait. Can you imagine how tired He must be, sitting around up there, being holy, waiting for just the right moment to spring?

So, shortly after his crucifixion, Jesus of Nazareth (Joshua-ben-Joseph), died. It is said that after three days, or three days and three nights, or three periods of time, or three eternal seconds -- or three of whatever they can decide makes for less trouble -- he was seen again, resurrected, glowing with divine radiance. Then the Saviour decided it wasn't in the best interests of his new religion to stick around, and therefore disappeared from sight into heaven. So the story goes, anyway. As has been seen, there were many things attributed to Jesus when people got around to writing the gospel stories down. To them, Jesus was the fulfiller of all prophecy and scripture. We have seen, though, that this matter is quite shaky. But, throughout Church history, Christians have held fast to faith, in simple belief. What doctrinal objections could not be solved with argumentation or brute force, faith and forgetfulness kept away from question. To question and investigate has never been the easiest way to treat matters. Thus for 2,000 years, the prophecies cited in the New Testament have gone on largely accepted. Things may well continue that way for some time.

Pausing a moment to consider the way the doctrines of Christianity have been accepted and used (properly or improperly) to support wars and persecution, I suppose there is one prophecy of which Christianity can securely keep hold.

[Mt 10.34] Jesus: "Don't think that I have come to bring peace on earth. I haven't come to bring peace, but rather a sword."

+-----+\n\n\nDEPOSITION OF ROMAN ALEKSANDROVICH GAMBARIAN\n\nBorn 1954\nSenior Engineer\nSumgait Automotive Transport Production Association\n\nResident at Building 17/33B, Apartment 40\nMicrodistrict No. 3\nSumgait [Azerbaijan]\n\n\nWhat happened in Sumgait was a great tragedy, an awful tragedy for us, the Armenian people, and for all of mankind. A genocide of Armenians took place during peacetime.\n\nAnd it was a great tragedy for me personally, because I lost my father in those days. He was still young. Born in 1926.\n\nOn that day, February 28, we were at home. Of course we had heard that there was unrest in town, my younger brother Aleksandr had told us about it. But we didn't think . . . we thought that everything would happen outdoors, that they wouldn't go into people's apartments. About five o'clock we saw a large crowd near the Kosmos movie theater in our microdistrict. We were sitting at home watching television. We go out on the balcony and see the crowd pour into Mir Street. This is right near downtown, next to the airline ticket office, our house is right nearby. That day there was a group of policeman with shields there. They threw rocks at those policemen. Then they moved off in the direction of our building. They burned a motorcycle in our courtyard and started shouting for Armenians to come out of the building. We switched off the light. As it turns out, their signal was just the opposite: to turn on the light. That meant that it was an Azerbaijani home. We, of course, didn't know and thought that if they saw lights on they would come to our apartment.\n\nSuddenly there's pounding on the door. We go to the door, all four of us: there were four of us in the apartment. Father, Mother, my younger brother Aleksandr, and I. He was born in 1959. My father was a veteran of World War II and had fought in China and in the Soviet Far East; he was a pilot.\n\nWe went to the door and they started pounding on it harder, breaking it down with axes. We start to talk to them in Azerbaijani, "What's going on? What's happened?" They say, "Armenians, get out of here!" We don't open the door, we say, "If we have to leave, we'll leave, we'll leave tomorrow." They say, "No, leave now, get out of here, Armenian dogs, get out of here!" By now they've broken the door both on the lock and the hinge sides. We hold them off as best we can, my father and I on one side, and my mother and brother on the other. We had prepared ourselves: we had several hammers and an axe in the apartment, and grabbed what we could find to defend ourselves. They broke in the door and when the door gave way, we held it for another half-hour. No neighbors, no police and no one from the city government came to our aid the whole time.

We \nheld the door. They started to smash the door on the lock side, first with an \naxe, and then with a crowbar.\n\nWhen the door gave way--they tore it off its hinges--Sasha hit one of them \nwith the axe. The axe flew out of his hands. They also had axes, crowbars, \npipes, and special rods made from armature shafts. One of them hit my father \nin the head. The pressure from the mob was immense. When we retreated into the \nroom, one of them hit my mother, too, in the left part of her face. My brother \nSasha and I fought back, of course. Sasha is quite strong and hot-tempered, he \nwas the judo champion of Sumgait. We had hammers in our hands, and we injured \nseveral of the bandits--in the heads and in the eyes, all that went on. But \nthey, the injured ones, fell back, and others came to take their places, there \nwere many of them.\n\nThe door fell down at an angle. The mob tried to remove the door, so as to go \ninto the second room and to continue . . . to finish us off. Father brought \nskewers and gave them to Sasha and me--we flew at them when we saw Father \nbleeding: his face was covered with blood, he had been wounded in the head, \nand his whole face was bloody. We just threw ourselves on them when we saw \nthat. We threw ourselves at the mob and drove back the ones in the hall, drove \nthem down to the third floor. We came out on the landing, but a group of the \nbandits remained in one of the rooms they were smashing all the furniture in \nthere, having closed the door behind them. We started tearing the door off to \nchase away the remaining ones or finish them. Then a man, an imposing man of \nabout 40, an Azerbaijani, came in. When he was coming in, Father fell down and \nMother flew to him, and started to cry out. I jumped out onto the balcony and \nstarted calling an ambulance, but then the mob started throwing stones through \nthe windows of our veranda and kitchen. We live on the fourth floor. And no \none came. I went into the room. It seemed to me that this man was the leader \nof the group. He was respectably dressed in a hat and a trench coat with a \nfur collar. And he addressed my mother in Azerbaijani: "What's with you, \nwoman, why are you shouting? What happened? Why are you shouting like that?" \nShe says, "What do you mean, what happened? You killed somebody!" My father \nwas a musician, he played the clarinet, he played at many weddings, Armenian \nand Azerbaijani, he played for many years. Everyone knew him. Mother says, \n"Th he person who you killed played at thousands of Azerbaijani weddings, he \nbrought so much joy to people, and you killed that person." He says, "You \ndon't need to shout, stop shouting." And when they heard the voice of this \nman, the 15 to 18 people who were in the other room opened the door and \nstarted running out. We chased after them, but they ran away. That man left, \ntoo. As we were later told, downstairs one of them told the others, I don't \nknow if it was from fright or what, told them that we had firearms, even \nthough we only fought with hammers and an axe. We raced to Father and started \nto massage his heart, but it was already too late. We asked the neighbors to \ncall an ambulance. The ambulance never came, although we waited for it all \nevening and all through the night.\n\nSomewhere around midnight about 15 policemen came. They informed us they were \nfrom Khachmas. They said, "We heard that a group was here at your place, you \nhave our condolences." They told us not to touch anything and left. Father lay \nin the room.\n\nSo we stayed home. Each of us took a hammer and a knife. We sat at home. Well, \nwe say, if they descend on us again we'll defend ourselves. Somewhere around \none o'clock in the morning two people came from the Sumgait Procuracy, \ninvestigators. They say, "Leave everything just how it is, we're coming back \nhere soon and will bring an expert who will record and photograph everything." \nThen people came from the Republic Procuracy too, but no one helped us take \nFather away. The morning came and the neighbors arrived. We wanted to take \nFather away somehow. We calle

d the Procuracy and the police a couple of times, but no one came. We called an ambulance, and nobody came. Then one of the neighbors said that the bandits were coming to our place again and we should hide. We secured the door somehow or other. We left Father in the room and went up to the neighbor's. The excesses began again in the morning. The bandits came in several vehicles, ZIL panel trucks, and threw themselves out of the vehicles like . . . a landing force near the center of town. Our building was located right there. A crowd formed. Then they started fighting with the soldiers. Then, in Buildings 19 and 20, that's next to the airline ticket office, they started breaking into Armenian apartments, destroying property, and stealing. The Armenians weren't at home, they had managed to flee and hide somewhere. And again they poured in the direction of our building. They were shouting that there were some Armenians left on the fourth floor, meaning us. "They're up there, still, up there. Let's go kill them!" They broke up all the furniture remaining in the two rooms, threw it outside, and burned it in large fires. We were hiding none floor up. Something heavy fell. Sasha threw himself toward the door shouting that it was probably Father, they had thrown Father, were defiling the corpse, probably throwing it in the fire, going to burn it. I heard it, and the sound was kind of hollow, and I said, "No, that's from some of the furniture." Mother and I pounced on Sasha and stopped him somehow, and calmed him down. The mob left somewhere around eight o'clock. They smashed open the door and went into the apartment of the neighbors across from us. They were also Armenians, they had left for another city. The father of the neighbor who was concealing us came and said, "Are you crazy? Why are you hiding Armenians? Don't you now they're checking all the apartments? They could kill you and them!" And to us : " . . . Come on, leave this apartment!" We went down to the third floor, to some other neighbors'. At first the man didn't want to let us in, but then one of his sons asked him and he relented. We stayed there until eleven o'clock at night. We heard the sound of motors. The neighbors said that it was armored personnel carriers. We went downstairs. There was a light on in the room where we left Father. In the other rooms, as we found out later, all the chandeliers had been torn down. They left only one bulb. The bulb was burning, which probably was a signal they had agreed on because there was a light burning in every apartment in our Microdistrict 3 where there had been a pogrom. With the help of the soldiers we made it to the City Party Committee and were saved. Our salvation--my mother's, my brother's, and mine,--was purely accidental, because, as we later found out from the neighbors, someone in the crowd shouted that we had firearms up there. Well, we fought, but we were only able to save Mother. We couldn't save Father. We inflicted many injuries on the bandits, some of them serious. But others came to take their places. We were also wounded, there was blood, and we were scratched all over--we got our share. It was a miracle we survived. We were saved by a miracle and the troops. And if troops hadn't come to Sumgait, the slaughter would have been even greater: probably all the Armenians would have been victims of the genocide. Through an acquaintance at the City Party Committee I was able to contact the leadership of the military unit that was brought into the city, and at their orders we were assigned special people to accompany us, experts. We went to pick up Father's corpse. We took it to the morgue. This was about two o'clock in the morning, it was already March 1, it was raining very hard and it was quite cold, and we were wearing only our suits. When my brother and I carried Father into the morgue we saw the burned and disfigured corpses. There were about six burned people in there, and the small corpse of a burned child. It was gruesome. I s

that \nretribution awaits those who perform such acts.\n\n May 18, 1988\nYerevan\n\n\t\t - - - reference - - \n\n[1] \_The Sumgait Tragedy; Pogroms

nal\nOrganization: Ford Motor Company\nLines: 34\nDistribution: world\nReply-To: peterson@pms860.pms.ford.com\nNNTP-Posting-Host: pms001.pms.ford.com\nKeywords: college\n\nI haven't seen anyone post this so I will do the honors.\n\nMaine beat LSSU 5-4 in Milwaukee on Saturday night. It was quite a game.\nMaine stormed to a 2-0 lead in the first and looked like they might run away\nwith it. Maine's first goal came inside the first thirty seconds of the game.\nLSSU came back at the end of the period to cut the lead to 2-1.\n\nLSSU came out in the second dominating the play particularly along the boards.\nThe play went quickly with the refs running a no-holds-barred type of game.\nLSSU scored three more unanswered goals to lead 4-2 at the end of the second.\nNow it looked like LSSU might just walk away with the game.\n\nCoach Walsh, of Maine, replaced the starting goalie Dunham with Snow, who won the game against Michigan. Snow proved to be a much more aggressive goalie.\n\nThe third period, like the second, belonged to the team behind. Maine scored three unanswered goals in a span of five minutes after the four minute mark.\nThey were all scored by Jim Montgomery, the tournament MVP, and all assisted by Paul Kariya.\n\nThe last minute of the game bears highlighting. The change to Snow also proved the difference in the end. With one minute to go and with the LSSU goalie pulled, Snow dueled with a LSSU forward in a amazing set of moves by both. Snow won. It was a great way to end the game.\n\nThis year's three championships games were sold out last year in about one month. The Bradley Center holds approximately 17,700.

with any world series rings on their\n>>>fingers.\n>>Yah. So?\n>>>Damn, Morri  
s now has three and probably the Hall of Fame in his \n>>>future.\n>>He certai  
nly didn't earn his last one. \*HOW\* many games did he blow\n>>in the World S  
eries? All of the ones he started?\n>He certainly did earn it! He was a valu  
able member of the Blue Jay team. \n\nNot particularly \*in\* the World Series.  
During the season, he was probably\nmore valuable than, say, putting Olerud ou  
t there to pitch, but yeah, he\n\*was\* valuable in getting them there. In the p  
ostseason, he sucked dirty\nanal water through a straw. The Jays won \*in spit  
e\* of Morris much more\nthan \*because of\* him.\n\n>>>Therefore, I would have t  
o say Toronto easily made the best signing.\n>>Oh, yes. Definitely. Therefor  
e Morris is better than Clemens.\n>Your definition of "better" refers to some  
measurement on a scale that\n>has nothing to do with winning WS rings.\n\nUmm,  
Roger? Return with us to those halcyon days of a few postings ago,\nwhere the  
poster Valentine was replying to used # of WS rings as a measure\nof better. T  
he concept is called "context", and you should really become\nfamiliar with it  
someday.\n\n>The facts are that Morris\n>has shown us that he has what it take  
s to play on a WS winning club.\n>Clemens hasn't.\n\nUnless this transaltes t  
o "Clemens hasn't gone into Lou Gorman's office with\na large caliber handgu  
n and refused to come out until he'd been traded to\nthe Jays," I'm at a com  
plete loss as to any possible meaning for it.\n\n>You can go on about what Cle  
mens has done in the \n>past and claim that he is "better" than Morris if you  
want to. But \n>the facts are that Morris has shown us that he can win and Cl  
emens\n>hasn't.\n\nWhat on earth does this mean? Over their careers, Clemens  
has "won" 68% of\nthe games he's started, Morris 58%. Per year, Clemens has a  
veraged nearly 17\nwins, Morris just under 15. Would you grant the proposition  
that preventing\nthe other team from scoring increases your chances of winning  
a game? If\nso, then consider that Clemens allows 2.8 runs/9 innings pitched.  
Morris\nallows nearly a run more per nine innings. In fact, Jack Morris has ne  
ver in\nhis career had an ERA for a single year as good as Clemens' career ER  
A. But\nI forget, in the Maynardverse there was obviously some mystical signif  
icance\nto Buckner missing that grounder in 1986; had Morris been on the Sox,  
it\nwould have been a routine groundout, right?\n\n>Whether or not Clemens is  
better by your standard of measurement\n>is totally meaningless. The object o  
f the game is not to compile \n>high figures in statistics that you have chose

n to feel are important.\n>The object of the game is to contribute to WS victories. But this\n>has been patiently explained to you many, many times and you are \n>either too stupid or too stubborn to grasp it.\n\n>Speaking of stupid, it has been patiently (and not-so-patiently) explained to\nyou many times that attributing greatness to players based on the\naccomplishments of their teams makes about as much sense as claiming that\na racecar has the most attractive paint job because it won the race. Your\ncontinued failure to not only underst and but even to intelligently reply to\nmany of the arguments presented leads me to the conclusion that you must have\nspent a few too many games in goal without a mask.\n\n>>Don't give me that shit. If Boston had Alomar, Olerud, Henke, and\n>>Ward while Toronto had Rivera, Jack Clark, Jeff Reardon, things would\n>>have looked a little different last fall. Give credit where credit is\n>>due. This lavishing of praise on Morris makes me sick.\n>Yes and the dog would have caught the rabbit too...forget about what\n>didn't happen and open your eyes, for once, and look out there and\n>see what is REALLY happening. Forget about how Morris "shouldn't"\n>have won 21 with an ERA over 4. \n>When Morris pitched, last year, the Jays won. Stop crying about it and\n>get on with life.\n\n>No one is crying; the Jays won, and as a team they certainly deserved to win\nat least the AL East. They performed well in two short series and won the\nWorld Series, and I congratulate them for it. As a Red Sox fan, I hope they\nkeep Morris. I was happy when they picked up Stewart, and elated when they\ntraded for Darrin Jackson. You see, unless you believe in some mystical link\nbetween Morris and the offense, you can hardly help but believe that the man\nwas credited with so many wins last year because he got lucky. Luck runs\nout, just like it did in 1982 when he pitched 50-odd more innings than 1992,\ngave up exactly \*one\* earned run more than in 1992, and went 17-16.\n\n>Seriously, Roger, I'd really like to hear your explanation of the difference\nbetween the 1982 Morris and the 1992 Morris. Which one was a better pitcher,\nand why? Did Morris somehow "learn how to win" in the intervening ten years?\nIf so, then why did he go 18-12 in 1991 with Minnesota with an ERA over half\na run lower than 1992?\n\n>Mike Jones | AIX High-End Development | mjones@donald.aix.kingston.ibm.com\n\n>Don't be humble, you're not that great.\n',

"From: hamachi@adobe.com (Gordon Hamachi)\nSubject: Re: Honda Accord Brake Problem\nOrganization: Adobe Systems Incorporated\nLines: 32\n\n>Joni Ciarletta writes\n> My Honda Accord just hit the magic 100,000 mile mark and now\n> all sorts of things are beginning to go bad. The latest problem\n> I am experiencing is with my brakes. They still stop the\n> car fine, but once I am stopped completely, my brake pedal\n> will sink another 2 or 3 inches all by itself. It feels really\n> strange, and I am worried my brakes will quit working one of\n> these days.\n> \n> I checked my brake fluid, and the reservoir was full, but the\n> fluid itself looked really dirty (like dirty oil). I called\n> my mechanic and he told me I need a new brake master cylinder,\n> which will cost me a whopping \$250-300.\n\n>You are not alone. My '79 Honda Accord with 110,000 miles on it started\n\n>showing the same behavior.\n\n>I replaced the brake master cylinder myself. It took about an hour and cost\n\n>about \$45. Sure beats paying \$300 to have someone else do it! If I wanted to\n\n>rebuild my own master cylinder instead of putting in a rebuilt one, it would\n\n>have cost only \$20 to \$30 for the rebuild kit.\n\n>The Honda brake master cylinder is easy to get to. Two bolts attach it to the\n\n>engine compartment. Two brake lines enter the master cylinder. The tricky\n\n>part was that the brake lines were stuck tight. My Craftsman open end wrench\n\n>rounded off the bolt heads! I had to use Vise Grips to loosen those suckers.\n\n>Wow! Best invention since sliced bread. After that it was very easy. Bolt\n\n>the new part in place, add ne

w brake fluid, and bleed the brakes.\n\nThis is quite easy even for a beginner . My local auto parts store had a repair \nmanual for the Honda Accord; it had detailed diagrams of the master brake \ncylinder and a step-by-step procedure for replacing it.\n",

'From: mussack@austin.ibm.com (Christopher Mussack)\nSubject: Re: tuff to be  
a Christian?\nOrganization: IBM Austin\nLines: 66\n\nPlease realize that I am  
frequently getting in trouble for\nstraying from orthodoxy, but here is my opi  
nion:\n\nIn article <Apr.17.01.10.58.1993.2246@geneva.rutgers.edu>, mds@ms.uk  
y.edu (no name) writes:\n> ... Moreover the Buddha says that we are \n> intrin  
sically good (as against Christ\'s "we are all sinners").\n\nI never thought o  
f these two ideas being "against" each other.\nPeople might quibble about what  
"intrinsically" means but the\nreason we are sinners is because we do not beha  
ve as good as we\nare. The message of Christ is that each of us are not only g  
ood,\nbut great, that we can approach perfection, albeit perhaps through a \nd  
ifferent technique than you claim Buddhism teaches. Because we do\nnot realize  
our greatness, we sin. Peter had no problem walking \non water until a little  
doubt crept in.\n\nDoesn\'t David ask in the 8th Psalm "what is man that you [ God]  
\nshould care for him, but you have made him just a little lower \nthan t  
he angels"? \nI probably exaggerate in my mind what a scrawny little kid David  
\nwas, just as I probably exaggerate what a gigantic monster Goliath\nwas, but  
David\'s power easily defeated Goliath\'s.\n\nRemember the rich young man who  
comes up to Jesus and asks what\nhe can do to enter the Kingdom, Jesus says fo  
llow the commandments.\nI always picture the smug look on his face as he says  
he\'s done that\nhis whole life, probably anticipating an "attaboy" from the \n  
Messiah. Instead Jesus gives him a harder task, sell everything\nand follow H

im. Jesus is raising the bar. The disciples say\nhow can anyone do this if it's so hard even for rich people.\nJesus says anyone can do it, with God's help.\n\nJesus says not only can we avoid killing people, we can avoid\ngetting angry at people. Not only can we avoid committing\nadultery, we can control our own desires. \n\nI realize this was not your main point, but I wonder how other\npeople see this. \n\n> ...> \n> \tParting Question:\n> \t\tWould you have become a Christian if you had not\n> been indoctrinated by your parents? You probably never learned about\n> any other religion to make a comparative study. And therefore I claim\n> you are brain washed.\n\n(Please forgive any generalizations I am about to make.)\n\nYour point about how "hard" other religions are is a good one, just \nas your "Parting Question" is a tough question. I think that Muslims\nworship the same God as I do, we can learn from their name "submission".\nHindus and Buddhists and Taoists, etc. claim that "God" is impersonal. \nIs God personal or impersonal? I say yes, but if I think a little\nmore my answer is whichever is greater. I think it is greater \nto be a personal entity, with an individual consciousness, but\nyou're right that that might be a cultural bias. If I think more\nI must admit that God's personal nature is as far beyond my\nconception as His impersonal nature is beyond the Hindu's\nconception. If somehow Jesus could fit into Hindu cosmology\nthen maybe I wouldn't have a problem, though that is hard to imagine.\n\nAre there any former (or present) "Eastern Religion" members here \nwho could comment?\n\nChris Mussack\n'

=====\n \n \n REQUEST FOR IDEAS FOR APPLICATIONS OF REM  
 OTE SENSING DATABASES \n VIA THE INTERNET\n \nNASA

is planning to expand the domain of users of its Earth and space science\ndata  
 . This effort will:\n \n o Use the evolving infrastructure of the U.S. Glo  
 bal Change Research \n Program including the Mission To Planet Earth (MTP  
 E) and the Earth \n Observing System Data and Information System (EOSDIS)  
 Programs.\n \n o Use the Internet, particularly the High Performance Comput  
 ing and \n Communications Program's NREN (National Research and Educatio  
 n \n Network), as a means of providing access to and distribution of \n  
 science data and images and value added products.\n \n o Provide broad acce  
 ss to and utilization of remotely sensed images in \n cooperation with ot  
 her agencies (especially NOAA, EPA, DOE, DED, \n DOI/USGS, and USDA). \n  
 \n o Support remote sensing image and data users and development \n co  
 mmunities. \n\nThe user and development communities to be included (but not l  
 imited to) as\npart of this effort are educators, commercial application devel  
 opers (e.g., \ntelevision weather forecasters), librarians, publishers, agricu  
 lture \nspecialists, transportation, forestry, state and local government plan  
 ners, and\naqua business.\n \nThis program will be initiated in 1994. Your as  
 sistance is requested to \nidentify potential applications of remote sensing i  
 mages and data. We would \nlike your ideas for potential application areas to  
 assist with development of\nthe Implementation Plan.\n \nPLEASE NOTE: THIS IS  
 NOT A REQUEST FOR PROPOSALS. \n \nWe are seeking your ideas in these areas: \n  
 \n \n (1) Potential commercial use of remote sensing data and images; \n \n  
 (2) Potential noncommercial use of remote sensing data and images in \n  
 education (especially levels K-12) and other noncommercial areas;\n \n (3) T

'From: grantk@nosc.mil (Kelly J. Grant)\nSubject: Strange 386 enhanced behavior...\nKeywords: 386 enhanced, Paradox\nOrganization: Computer Sciences Corporation\nLines: 45\n\nHowdy\n\nWe have been having a real problem with an AST 386sx/16 machine with\n4mb of RAM. We installed Paradox for Windows, (but I don't think\nParadox is the real problem here), and the installation went ok\n(windows is installed on a local drive, paradox installed on a novell\nnetwork (netware 386 v3.26 or greater), DOS 5, Win 3.1) but the program\nwill not load in 386 enchanted mode. The thermometer bar goes to 60%\nand we then either get a '\ninvalid command.com\' or a windows nastygram\ntalking about an illegal instruction. I've checked out the command.com\nthing, but as a long-time C programmer, I've crashed my share of machines\nwith pointer problems and this is a standard behavior :-)\n\nAnyway, paradox will run in standard mode, but not enhanced. We also have\nquattro pro windows, exhibiting the same behavior. Spent about 2 hours\nwith Borland's tech people, with no avail. The guy I talked to a\nmicrosoft\ndidn't want to really dig in and help, as he gave up pretty quickly.\nSomewhat disappointing, really. I expected more from Microsoft. You'd think\nwith all the millions of windows installations that they would have seen all\nthe possible problems, but I guess not...\n\nMicrosoft had sent us a 13 page fax on fixing UAE and General\nProtection faults (sorry, I can't

fax anything out of here so please\ndon't ask, try Microsoft), which we tried . We did \*everything\* they\nsaid, and still no luck.\n\nSo. If you can help, please mail me. This problem is driving us nuts.\nI will greatly appreciate any information anyone can pass on.\n\nThanks\n\nKelly\n-----\n\nTHIS IS THE REAL SIGNATUR E...Please ignore the following demon signature..\n\nKelly J. 'From: pmetzger@snark.shearson.com (Perry E. Metzger)\nSubject: Re: text of White House announcement and Q&As on clipper chip encryption\nOrganization: Partnership for an America Free Drug\nDistribution: na\nLines: 104\n\nrldward1@afterlife.ncsc.mil (Robert Ward) writes:\n>In article <bontchev.734981805@fbihh> bontchev@fbihh.informatik.uni-hamburg.de writes:\n>>and since the US constitution guarantees the right to every American\n>>to bear arms, why is not every American entitled, as a matter of\n>\n>Have you read the applicable part of the Constitution and interpreted it IN \n>CONTEXT? If not, please do so before posting this misinterpretation again.\n>It refers to the right of the people to organize a militia, not for individuals \n>to carry handguns, grenades, and assault rifles. \n\nThe Supreme Court seems to disagree with you -- they have stated that\n"the people" is a term of art referring to an individual right, and\nhave explicitly mentioned the second amendment as an example.\n\nI quote:\n\n "... 'the people' seems to have been a term of art employed in select parts of the Constitution. The Preamble declares that the Constitution is ordained, and established by 'the people of the the U.S.' The Second Amendment protects the right of the people to keep and bear Arms ...."\n\n- Supreme Court of the U.S., U.S. v. Uerdugo-Uriquidez (1990).\n\nFurthermore, in the Miller decision, they only permitted prosecution\nfor possession of a sawed-off shotgun because the defense had not\npresented testimony and they therefore accepted the argument of the\ngovernment that such weapons have no military value -- they held that\nthe amendment protected the individual right to possess military\nweapons. Unfortunately, no second amendment case has successfully\ngotten to the court in fifty years. However, that does not change the\ninterpretation.\n\nFurthermore, it appears that others disagree with you as well, vis:\n\n "The conclusion is thus inescapable that the history, concept, and wording of the Second Amendment to the Constitution of the United States, as well as its interpretation by every major commentator and court in the first half-century after its ratification, indicates that what is protected is an individual right of a private citizen to own and carry firearms in a peaceful manner." - Report of the Subcommittee on the Constitution of the Committee on the Judiciary, United States Senate, 97th Congress, Second Session ( February 1982 )\n\nYou might rightfully ask "well then, what does that first bit about\nmilitias mean?"\n\nWell, "militia" in historical context basically means the whole of the\nadult males of the country. (Indeed, the U.S. Code still defines\n"militia" as all armed men over the age of 17).\n\n "The Militia comprised all males physically capable of acting in concert for the common defense .... And ... these men were expected to appear bearing arms supplied by themselves and of the kind in common use at the time." - Supreme Court of the United States, U.S. v. Miller (1939).\n\nThe r

reason for the phrase being there was to explain the rationale behind the amendment, which was this: by depending on the people to bear arms in defense of the country, no centralization of military power could ever occur which would permit tyranny -- in short, the government would remain perpetually in fear of the people, rather than the other way around.

"No free man shall ever be debarred the use of arms. The strongest reason for the people to retain the right to keep and bear arms is, as a last resort, to protect themselves against tyranny in government."

- Thomas Jefferson, Proposal Virginia Constitution, June 1776

1 Thomas Jefferson Papers, 334 (C. J. Boyd, Ed., 1950).

"And what country can preserve its liberties, if its rulers are not warned from time to time that this people preserve the spirit of resistance? Let them take arms ... The tree of liberty must be refreshed from time to time, with the blood of patriots and tyrants."

- Thomas Jefferson (letter to William S. Smith, 1787, in Jefferson, On Democracy 20, S. Padover, ed., 1939).

"Before a standing army can rule, the people must be disarmed; as they are in almost every kingdom of Europe. The supreme power in America cannot enforce unjust laws by the sword; because the whole body of the people are armed, and constitute a force superior to any bands of regular troops that can be, on any pretense, raised in the United States."

- Noah Webster, "An Examination into the Leading Principles of the Federal Constitution" (1787), in Pamphlets on the Constitution of the United States (P. Ford, 1888).

You may disagree with the second amendment, and wish that it be repealed, but please do not pretend that it isn't there and that it doesn't mean what it says. You might argue that conditions have changed and that it should no longer be present, but you can't imagine it away.

I could fill a book with detailed argumentation. Many have already.

However, none of this has anything to do with cryptography. Lets get it out of here. If you insist on discussing this, please do it in talk.politics.guns, where people will gladly discuss this matter with you.

>>The San Francisco Bay area media is reporting tonight that the Detroit Red Wings beat the Toronto Maple Leafs 6-3. Can someone who is not part of the media conspiracy against the Leafs tell me how the game really went (I am expecting a 4-0 win for the Leafs, shutout for Potvin, hat trick for Andreychuk and a goal and 3 assists for Gilmour). If the Leafs really lost, how many penalties did whichever biased ref was at the game have to call against the

Leafs to let the Red Wings win? Ah yes. California. Did the San Francisco Bay area media report that Joe Montana is rumoured to be the leading candidate to replace fired San Jose Sharks coach George Kingston? Apparently Montana is not only coveted for his winning attitude, but as a playing coach he will be expected to quarterback the powerplay. Close Roger, but no banana, er avocado or is it artichoke?! Geracie in the Murky News said Kingston will be the new 49ers quarterback. I'm still trying to determine if he is kidding or not :). If I happen to pound down enough pints sometime this week I'll go back and check what stooper idiot Purdy said in his column. That ought to be worth a few Leafs, I mean Laughs. If I'm really depressed I'll read the SF Comicle. mark just say

ish Lexicon of the New Testament," Louw and Nida\n\t"Robinson\'s Greek and English Lexicon of the New Testament"\n\t"Greek English Lexicon of the New Testament," Grimm\n\t"Word study Concordance," Tynsdale\n\t"A Greek English Lexicon of the New Testament and other \n\t early Christian Writings," Bauer-Arndt-Gingrich\n\t"The New Analytical Greek Lexicon," Perschbacher\n\nA couple simply stated "hanged oneself", and a couple were more explicit \nand stated that "apacgw" means specifically "kill yourself by hanging." A\ncouple also noted that the meaning of one the root words for "apacgw" is\n"strangle, throttle or choke" (which pretty much invalidates the guy who\nsuggested to David Joslin that Judas was hung upside down). One of the best\nreferences though, "Robinson\'s Greek and English Lexicon of the New\nTestament," not only stated the translation, it gave both the root words, the\nliteral translation, related greek words which use the same roots, and also\nother presented specific examples of the word in greek literature (to give\nfurther context). \n\nThe word "apagchw" has two root words: "gchw" is the "to strangle" root, and\nthe root word "apo" means literally "away." This root words is included in\nwords which denote a transition. It can mean a transition in place (eg: the\ngreek word "apagello" means to send a message). "Apo" can also denote a\nchange in state and specifically the change from life to death. Robinson\nspecifically makes comparison to the word "apokteiuo," which means "to kill." \nIn literal meaning the word "apacgw" means "to throttle, strangle to put out\nof the way," and implicitly denotes a change in life state (ie: away from\nlife, to death). So while the word "apacgw" does mean "to hang," it\nspecifically denotes a death as well. Thus Robinson is quite specific when he\nstate that it means "to hang oneself, to end one\'s life by hanging." He then\nnotes the the use of "apacgw" in Homers Odessy 19:230 to denote context. He\npresents that example of "apacgw" as being used to explicitly mean "suicide by\nhanging." Now since there is a perfectly good word for strangling, without the\nadded denotation of "death," and as you insist that the Bible was written by\nGod, and every word is precisely correct, you are stuck with the complete\nmeaning of "apacgw" (ie: Since the word "apacgw" was used, then death is\ndenoted as the result). \n\nBy the way, I note that Mr DeCenso also presents an example of "apacgw":\n\n> In the Septuagint (the Greek translation of the OT used at the time of Jesus),\n> it\'s only used in 2 Samuel 17:23 : "Now when Ahithophel saw that his advice \n> was not followed, he saddled a donkey, and arose and went home to his house,\n> to his city. Then he put his household in order, and hanged himself, and \n> died ; and he was buried in his father\'s tomb." ^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^\n> ^^^^\n> Notice that not only is it stated that Ahithophel "hanged himself" [Gr. Sept.,\n> APAGCHO], but it explicitly adds, "and died". Here we have no doubt of the\n> result.\n> In Matthew, we are not explicitly told Judas died.\n\nNote Mr DeCenso, as you say, the Septuagint was a translation from Hebrew to\nGreek, and you have not shown the original meaning of the Hebrew (ie" the the\nHebrew say "and died"), and thus whether it was simply echoed in the Greek. \nIt should also be pointed out that, regardless of the added "and died", the\ncorrect translation would still be "apacgw," as the man did indeed die from\nstrangulation (redundant, but correct). Further, we have evidence that the\nSeptuagint was repeatedly rewritten and reedited (which included versions\nwhich contradicted each other), and such editing was not even necessarily\nexecuted by Greeks. Thus I am not sure that you can use the Septuagint as it\nnow stands, as a paragon of ancient greek. So, what you really need to prove\nyour point Mr DeCenso, is an example, in ancient greek, of someone committing\n"apacgw" and surviving. Otherwise I would see you as simply making worthless\nassertions without corresponding evidence. \n\nNow I would note Mr DeCenso, that everyt

ime I go out of my way to research it\nnone of your apparently contrived exegesis, I pretty much find it false. Thus,\nI think that if you are going to add to the text, something over and above\nwhat the source clearly says, then you had better have an explicit Greek or\nhistorical source to justify it. \n\nBy the way, as to Mr Rose\'s statement about trees around the Potter\'s Field:\n\n> There are still trees around the ledges and a rocky pavement at the bottom. \n\nUnless Mr Rose can show that these trees are two thousand years old, or that there are 2000 year old stumps there, or has a 2 thousand year old description\nof the area which mentions such trees, then it is inappropriate for him to\nassert that the present placement of trees prove the location of the trees two\nthousand years ago (after all, things change). \n\nNow as to your other argument, ie: that the money Judas used is not the same\nas the 30 silvers:\n\n> As to your second question Mr DeCenso, you ask how we could be sure that the \n> money with which Judas purchased the land, was indeed for the betrayal, rather\n> than some other source. I would point out that in Acts, where it specifically\n> mention "the reward of iniquity" [Acts 1:18], it also specifically mentions\n> what act of iniquity they were talking about (ie: Acts 1:16 "...concerning\n> Judas who was guide to those who arrested Jesus."). Now I would point out\n> that when the Bible describes an act of "iniquity," and then immediately\n> discusses "\*the\* reward of iniquity," it would be rather inane to suggest that\n> it was an action of iniquity other than the one discussed." \n> \n> Notice that in verse 16, the word "iniquity" is not used. Rather, it states\n> that Judas "became a guide to those who arrested Jesus". \n> But the writer DID NOT stop there...vs. 17, "for he was numbered with us and\n> obtained a part in this ministry." What part did Judas play in their ministry?\n> ^^^^^\n\nTrue, Peter (or the author of Acts) does not specifically call Judas \' betrayal\nan iniquity," but for that matter, neither does John specifically call Judas\' \nactions "an iniquity" either. Further John 13:29 did not say that Judas took\nthe money box, but rather said:\n\n"Some thought that because, Judas had the money box, Jesus was telling\nhim "Buy what we need for the feast"; or that he should give something\nto the poor, So after receiving the morsel he immediately went out, and\nit was night." \n\nNote that it is said that Judas left, it does not say that he took the money\nbox. Thus when I see your explanation it still seems to me you would choose\nthe an unproven iniquity, mentioned by another author, in a different\nbook, written at a different time, over the iniquity explicitly mentioned by\nthe author of acts. I find this forced and contrived. \n\nOf course this particular argument becomes moot, since we have seen\nevidence that "apacgw" means suicide. You see, since Judas\' hanging was\nsuccessful, he could not have spent the money mentioned in John 13:29, because\nMatthew and Mark explicitly say the betrayal was on the high holy day (ie:\nPassover), and thus he could not have spent the money before killing himself\nthe next day. Thus the money which bought the "Field of Blood" would have to\nhave been the 30 pieces of silver (Of course he got the 30 pieces of silver\nthat night as well, and thus couldn\'t have spent that either. Oh dear, I\nbelieve that the house of cards is coming down). \n\nMaybe we should at this point, discuss now whether Jesus was crucified on\nFriday or Saturday as that is now part of the argument about Judas. \n\nBy the way, as to where the prophesy of the Potter\'s field came from (ie: the\nmention of it in Matthew), you say:\n\n> Please, when we are done with this study on his death, remind me to discuss\n> this with you. \n\nI am reminding you now to discuss it now. It\'s all part of the same verse we\nare discussing, and I wish you would quit procrastinating and sidestepping\nthese issues. \n\n \n\nLater, \n\nDave Butler \n\nA wise man proportions his belief

ief to the evidence.\n\t\t\t\t\tDavid Hume, Philosopher\n\t\t\t\t\tAn Inquiry Concerning Human Understanding\n\n PS. I would note again, that you are not stating that that Bible\n is not possibly inerrant; you are stating that it \*IS\* inerrant.\n Since you have been, by your own admission, presenting merely "possible"\n reconciliations (I of course don't rate them that highly), then the \n best you can do is say that the Bible is "possibly" inerrant, not that \n it \*is\* inerrant.\n',

'From: dxfl12@po.cwru.edu (Douglas Fowler)\nSubject: Re: Christian Parenting\nOrganization: Case Western Reserve University, Cleveland, Ohio (USA)\nLines: 83\n\n\nSorry for posting this, but my e-mail keeps bouncing. Maybe it will\nhelp others here, anyway, and therefore I pray others will read this. It is\nactually a response from my Aunt, who has 5 kids, since I have none yet.\n\n>Hi I am a Sociology student and I am currently researching into\n>young offenders. I am looking at the way various groups of\n>children are raised at home. At the moment I am formulating\n>information on discipline within the Christian home.\n>\n>Please, if you are a parent in this category can you email me\n>your response to the following questionnaire. All responses\n>will be treated confidentially and will only be used to prepare\n>stats.\n\nI'm posting this for a good Christian relative who does not have e-mail\naccess. Since this aunt and uncle have 5 kids I felt they would be more\nrelevant than I, who have none (yet).\n\n>1. Ages & sexes of children\n13-year-old (13YO) twins, 10YO boy, 6.5YO boy, 2YO girl\n\n>2. Do you spank your kids?\nI do not call it spanking, but they do, so yes, very rarely.\n\n>3. If so how often?\nI don't call it spanking because it's more of a reaction to something\nvery dangerous, such as trying to stick their finger in a fan or running\ninto the road. Maybe 3-4 times for each except for the 2YO girl, who has\nnot been spanked yet.\n\nThey call it that because it \*does\* hurt their feelings, and of course\nI give all the hugs and stuff to ensure they know they're still loved.\n\n>4. Do you use an implement to spank with?\nNo, that would be too painful. If it's too traumatic they never recall\nwhy they were punished. Besides, it must be immediate, and taking the time\nto go get a tool

eans you're not doing it right away, and that lessens the impact. It's very emotional for a child as it is - which is evidenced by the fact that a little slap on the rear - which hurts for perhaps 5 seconds - is called a spanking. If you do not spank, what method of discipline do you use? Lots of logical consequences - for instance, when 4YO Matthew dared a good friend to jump out of his treehouse or he would push him out, I made sure they didn't play together for 5 days so he'd know that would make him lose friends very quickly. He's never done anything like that since. We also use time-out in their rooms - I use a timer so they don't keep arguing with me over leaving, since it's hard to argue with a machine. I will go to the closed door and tell them timeout won't be over until they calm down if they're too tantrumy. I use the top of the stairs when they're really young. Your age? 40. Your location? Bath, Ohio. It's right outside of Akron, in the northeast part of Ohio. While under the age of 16 did you ever commit a criminal offence? No, and none of my kids would dream of it. I hope you can use this to teach all parents that physical punishment isn't always required - parents use that as an excuse to hit too hard. How were you disciplined as a kid? Lots of timeouts, same as I use. Our family and my husband's have never used spankings. In fact, my grandmother in law was one of 11 kids, and they were almost never spanked. This was around the turn of the century. And, none of us has ever been a foul of the law - man-made or God's law. Jesus says, referring to a small child whom he is holding, that "what ye do to the least of these, ye do also to me." The Bible also says in all things to be kind, and merciful, and especially loving. (Colossians 3:12-15.) There is no room for selfish anger, which I'll admit I've been tempted with at times. When I've felt like spanking hard in anger, maybe the kid deserved a little slap on the rear, but what I would have given would have been the devil's work. I could feel the temptation, and just angrily ordered the kid to his/her room and went to my room myself. After praying and asking God's forgiveness, I was much calmer, and did not feel like spanking, but felt that what I had done was enough punishment. -- Doug Fowler: dxfl2@po.CWRU.edu : Me, age 4 & now: "Mommys and Daddys & other Ever wonder if, after Casey : relatives have to give lots of hugs & love missed the 3rd strike in the poem: & support, 'cause Heaven is just a great he ran to first and made it? : big hug that lasts forever and ever!!!"

'target': array([7, 4, 4, ..., 3, 1, 8]),
'DESCR': '.. _20newsgroups_dataset:\n\nThe 20 newsgroups text dataset\n-----
-----\n\nThe 20 newsgroups dataset comprises around 18000 n
ewsgroups posts on\n20 topics split in two subsets: one for training (or devel
opment)\nand the other one for testing (or for performance evaluation). The sp
lit\nbetween the train and test set is based upon a messages posted before\nan
d after a specific date.\n\nThis module contains two loaders. The first one,\n
:func:`sklearn.datasets.fetch_20newsgroups`,\nreturns a list of the raw texts
that can be fed to text feature\nextractors such as :class:`sklearn.feature_ex
traction.text.CountVectorizer`\nwith custom parameters so as to extract featur
e vectors.\nThe second one, :func:`sklearn.datasets.fetch_20newsgroups_vectori
zed`,\nreturns ready-to-use features, i.e., it is not necessary to use a featur
e\nextractor.\n\n**Data Set Characteristics:**\n\n      =====
=====
=====\n      Classes                20\n      Samples total                1884
6\n      Dimensionality              1\n      Features                    text\n
=====
=====
\n\nUsage\n~~~~~\n\nThe :func:`sklearn.datasets.
fetch_20newsgroups` function is a data\nfetching / caching functions that down
loads the data archive from\nthe original `20 newsgroups website`, extracts t
he archive contents\nin the ``~/scikit_learn_data/20news_home`` folder and cal
ls the\n:func:`sklearn.datasets.load_files` on either the training or\ntesting
set folder, or both of them::\n\n >>> from sklearn.datasets import fetch_20ne
wsgroups\n >>> newsgroups_train = fetch_20newsgroups(subset='train')\n\n >
>> from pprint import pprint\n >>> pprint(list(newsgroups_train.target_names)
)\n ['alt.atheism',\n  'comp.graphics',\n  'comp.os.ms-windows.misc',\n
  'comp.sys.ibm.pc.hardware',\n  'comp.sys.mac.hardware',\n  'comp.w
indows.x',\n  'misc.forsale',\n  'rec.autos',\n  'rec.motorcycles',\n
  'rec.sport.baseball',\n  'rec.sport.hockey',\n  'sci.crypt',\n  '
sci.electronics',\n  'sci.med',\n  'sci.space',\n  'soc.religion.chr
istian',\n  'talk.politics.guns',\n  'talk.politics.mideast',\n  'tal
k.politics.misc',\n  'talk.religion.misc']\n\nThe real data lies in the ``
filenames`` and ``target`` attributes. The target\nattribute is the integer in
dex of the category::\n\n >>> newsgroups_train.filenames.shape\n (11314,)\n
>>> newsgroups_train.target.shape\n (11314,)\n >>> newsgroups_train.target[:
10]\n array([ 7,  4,  4,  1, 14, 16, 13,  3,  2,  4])\n\nIt is possible to lo
ad only a sub-selection of the categories by passing the\nlist of the categori
es to load to the\n:func:`sklearn.datasets.fetch_20newsgroups` function::\n\n

```

```
>>> cats = ['alt.atheism', 'sci.space']\n >>> newsgroups_train = fetch_20
newsgroups(subset='train', categories=cats)\n\n >>> list(newsgroups_train.t
arget_names)\n ['alt.atheism', 'sci.space']\n >>> newsgroups_train.file_n
ames.shape\n (1073,)\n >>> newsgroups_train.target.shape\n (1073,)\n >>> n
ewsgroups_train.target[:10]\n array([0, 1, 1, 1, 0, 1, 1, 0, 0, 0])\n\nConver
ting text to vectors\n~~~~~\n\nIn order to feed predictiv
e or clustering models with the text data,\none first need to turn the text in
to vectors of numerical values suitable\nfor statistical analysis. This can be
achieved with the utilities of the\n`sklearn.feature_extraction.text` as dem
onstrated in the following\nexample that extract `TF-IDF`_ vectors of unigram
tokens\nfrom a subset of 20news::\n\n >>> from sklearn.feature_extraction.tex
t import TfidfVectorizer\n >>> categories = ['alt.atheism', 'talk.religion
.misc',\n ...      'comp.graphics', 'sci.space']\n >>> newsgro
ups_train = fetch_20newsgroups(subset='train',\n ...
categories=categories)\n >>> vectorizer = TfidfVectorizer()\n >>> vectors =
vectorizer.fit_transform(newsgroups_train.data)\n >>> vectors.shape\n (2034,
34118)\n\nThe extracted TF-IDF vectors are very sparse, with an average of 159
non-zero\ncomponents by sample in a more than 30000-dimensional space\n(less t
han .5% non-zero features)::\n\n >>> vectors.nnz / float(vectors.shape[0])\n
159.01327...\n\n:func:`sklearn.datasets.fetch_20newsgroups_vectorized` is a fu
nction which \nreturns ready-to-use token counts features instead of file name
s.\n\n.. _`20 newsgroups website`: http://people.csail.mit.edu/jrennie/20Newsg
roups/\n.. _`TF-IDF`: https://en.wikipedia.org/wiki/Tf-idf\n\n\nFiltering text
for more realistic training\n~~~~~\n\nIt
is easy for a classifier to overfit on particular things that appear in the\n2
0 Newsgroups data, such as newsgroup headers. Many classifiers achieve very\nh
igh F-scores, but their results would not generalize to other documents that\n
aren't from this window of time.\n\nFor example, let's look at the results o
f a multinomial Naive Bayes classifier,\nwhich is fast to train and achieves a
decent F-score::\n\n >>> from sklearn.naive_bayes import MultinomialNB\n >>>
from sklearn import metrics\n >>> newsgroups_test = fetch_20newsgroups(subset
='test',\n ...      categories=categories)\n
>>> vectors_test = vectorizer.transform(newsgroups_test.data)\n >>> clf =
MultinomialNB(alpha=.01)\n >>> clf.fit(vectors, newsgroups_train.target)\n M
ultinomialNB(alpha=0.01, class_prior=None, fit_prior=True)\n\n >>> pred = clf
.predict(vectors_test)\n >>> metrics.f1_score(newsgroups_test.target, pred, a
verage='macro')\n 0.88213...\n\n(The example :ref:`sphx_glr_auto_examples_t
ext_plot_document_classification_20newsgroups.py` shuffles\nthe training and t
est data, instead of segmenting by time, and in that case\nmultinomial Naive B
ayes gets a much higher F-score of 0.88. Are you suspicious\nyet of what's go
ing on inside this classifier?)\n\nLet's take a look at what the most informa
tive features are:\n\n >>> import numpy as np\n >>> def show_top10(classifie
r, vectorizer, categories):\n ...     feature_names = np.asarray(vectorizer.g
et_feature_names())\n ...     for i, category in enumerate(categories):\n ..
.         top10 = np.argsort(classifier.coef_[i])[-10:]\n ...         print("
%s: %s" % (category, " ".join(feature_names[top10])))\n ... \n >>> show_top10
(clf, vectorizer, newsgroups_train.target_names)\n alt.atheism: edu it and in
you that is of to the\n comp.graphics: edu in graphics it is for and of to th
e\n sci.space: edu it that is in and space to of the\n talk.religion.misc: n
ot it you in is that and to of the\n\n\nYou can now see many things that these
features have overfit to:\n\n- Almost every group is distinguished by whether
headers such as\n ``NNTP-Posting-Host:`` and ``Distribution:`` appear more or
less often.\n- Another significant feature involves whether the sender is affi

From: guykuo@carson.u.washington.edu (Guy Kuo)
Subject: SI Clock Poll - Final Call
Summary: Final call for SI clock reports
Keywords: SI,acceleration,clock,upgrade
Article-I.D.: shelley.1qvfo9INnc3s
Organization: University of Washington
Lines: 11
NNTP-Posting-Host: carson.u.washington.edu

```

A fair number of brave souls who upgraded their SI clock oscillator have shared their experiences for this poll. Please send a brief message detailing your experiences with the procedure. Top speed attained, CPU rated speed, add on cards and adapters, heat sinks, hour of usage per day, floppy disk functionality with 800 and 1.4 m floppies are especially requested.

I will be summarizing in the next two days, so please add to the network knowledge base if you have done the clock upgrade and haven't answered this poll. Thanks.

Guy Kuo <guykuo@u.washington.edu>

In [56]:

```

from sklearn.feature_extraction.text import CountVectorizer

vect = CountVectorizer(min_df=5, stop_words="english").fit(text_train)
X_train = vect.transform(text_train)
print("X_train with stop words:\n{}".format(repr(X_train)))

```

```

X_train with stop words:
<11314x25636 sparse matrix of type '<class 'numpy.int64'>'
  with 1148275 stored elements in Compressed Sparse Row format>

```

In [14]:

```

from sklearn.model_selection import GridSearchCV
from sklearn.linear_model import LogisticRegression

param_grid = {'C': [0.001, 0.01, 0.1, 1, 10]}
grid = GridSearchCV(LogisticRegression(max_iter=300), param_grid, cv=3)
grid.fit(X_train, y_train)
print("Best cross-validation score: {:.2f}".format(grid.best_score_))

```

```

Best cross-validation score: 0.88

```

## Removing Stemming

```

0.80

comment on model

The results showed that data is trained well to fit the target by giving the reliable results and scores. Overfittings were avoided.
